Eight hundred Doukhobors arrived by special train from Saskatchewan, about the end of September, for their colony at Brilliant, on the Columbia river. They have 600 acres cleared at Brilliant, 250 acres being planted to fruit, while 50,000 fruit trees have been ordered for planting this fall and next spring. They are now completing the erection of a hospital, and report that next year they will build a school.

A new shingle mill and box factory is now in course of erection at Nelson, B.C., on the site lately occupied by the Kootenay Engineering Works, which were destroyed by fire in July. The new structure will comprise one storey with a large basement; it is expected the factory will be in operation about January 1, 1911. The Company will be known as the Western Box and Shingle Mills, Limited, and it expects to employ about twenty men. The city is exempting the industry from taxation for five years.

The owners of the Porcupine timber limits near Ymir, are preparing to install a sawmill at Porcupine Creek. A company is being formed in Ymir to develop electric power on Wild Horse Creek, and furnish electric light to the town.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of October has been fairly active from a labour standpoint, and will compare favourably with the corresponding month of the previous year. The avenues of employment are many and there are not many idle men hereabout. Unskilled labour is in demand and men need not be out of employment. There is no change to report in the machinists strike since last month, except that the strikers who were arrested for intimida-

tion have been tried and acquitted by the jury at the fall assizes now being held here. Both parties to this strike remain firm. Construction work on the Canadian Northern Railway between Matsqui and Sumas is progressing satisfactorily. The contractor of this section has 250 men at work, and within the next month will add another 100 men to the pay roll. The British Columbia Electric Railway Company is operating its line from this city to the city of Chilliwack. Merchants and business people of both cities appreciate this convenience.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is not much work in the way of farming at this season of the year. Fall fishing on the Fraser has been very good; so has been the price paid for fish, consequently the fishermen have done fairly well—in fact better than in the sock-eye season.

Lumbering.—The lumbering business remains active, the mills working full time filling orders for home consumption, as well as for export, which is mostly by rail, at this season of the year.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were all active. Painters, paperhangers, plumbers and steamfitters were busy while labourers were all working. Machinists, owing to the strike, were quiet, while electrical workers and linemen were all working. Ship builders and calkers were quiet, as were electric car builders. Sheet metal workers were in demand. Printers and pressmen were working full time, the supply being equal to the demand. Journeymen tailors were all working, as were boot and shoe workers. Barbers were all working full time. Clerks, stenographers, delivery employés were active, as were hotel and restaurant employés. Railway employés, both electric and steam, were busy, while teamsters and expressmen were active. Unskilled labourers were in demand.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THF LABOUR MARKET.

Labour was well employed during the month, except in the building trades, which were hampered by rain. Retail business was slower towards the end of the month. The local wholesale trade had few changes. Provisions continued firm. Fruit was plentiful, and eastern eggs rose 1 cent. Taken all in all, business was greater in volume than at this time last year. Considerable activity was noted in shipping circles. Numerous vessels were at the docks and in the harbour. For the coming month a busy time is expected; vessels from all parts of the world are scheduled to arrive. On the tenth, officers of the *SS. Queen Amelia* complained of the scarcity of longshoremen. Wireless reported that all outgoing vessels from Skagway to this port had full passenger lists. The *Empress of India* arrived from China, with $1,500,000 silk cargo and other valuable freight. On October 3, the *New England* brought in a catch of 150,000 pounds of halibut.

The Inland revenue returns for September were $41,996.31. For September, 1909, $36,551.29, the increase for 1910 being $5,445.02.

Bank clearings for three weeks were as follows:—

Ending October 6, 1910	$9,892,928
Ending October 13, 1910	9,517,164
Ending October 20, 1910	9,987,485
Ending October 5, 1909	7,746,986
Ending October 12, 1909	7,437,835
Ending October 19, 1909	7,396,978

Building permits were issued for an $80,000 warehouse for the McClaryManufacturing Company; for enlarging the Canadian Pacific Railway Company's hotel, Vancouver, $200,000; for the Great North-Western Telegraph Company, $36,000; besides a large number for dwellings. Work was started on the proposed new theatre of Froham, Klaw & Erlanger, to

be completed by July 1 next. A contract was let for the proposed new eight-storey building for the Bank of Ottawa, for $220,000, to be completed in a year. A twenty-five foot lot opposite the city hall was sold for $65,000, a record price for the east end. The southeast corner of Granville and Cordova streets, 78 x 120 feet, opposite the Canadian Pacific Railway depot, and unimproved, was sold for $250,000.

The public night schools turned away several prospective students, being overcrowded.

The logs scaled during September were 54,000,000 feet, as compared with the same period last year, 49,824,000.

Over 1,000,000 apples will be on exhibition on October 31, at the Horse Show building.

CONDITION OF LOCAL INDUSTRIES.

The waitresses met with success in unionizing several restaurants.

The machinists are on strike since July 4, for the eight-hour day.

Trade in the cigar-making industry is dull. Ten years ago, when the city had a population of 27,000, the union comprised thirty-five members. To-day, the population is estimated at about 125,000, and the membership is 50. The Cooks' and Waiters' Union is more prosperous than formerly. An effort is being made to organize the coast seamen and firemen.

The Trades and Labour Council resolved to request the Federal Government to take a census of the Orientals in Canada. Tenders were received for the erection of the new labour hall. From January 1, 1910, to October 17, the collections of city taxes amounted to $1,578,158.74, being about eighty-five per cent. of the total taxes.

DISTRICT NOTES.

North Vancouver.—A scenic railway line to the top of Grouse mountain is projected. A charter has been applied for. Building operations were very active. The ship building yards were working overtime.

Prince Rupert.—There was a dearth in the labour market, owing to wet weather. The new Bank of Montreal building, costing $25,000, will soon be finished. About 600,000 acres of timber lands on Moresby Island, Q. C. T., have been transferred.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chrow, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during October were very active. This applies more particularly to unskilled labour and the building trades. The city is employing several hundred men on street improvements, and in addition, the contracting companies give employment to many more; supply of unskilled labour is equal to the demand. For the first nine months of the year the value of the building permits issued amounted to $1,837,625, compared with $1,443,295 for the corresponding period last year. The value of permits issued during September was $199,686, compared with $140,935 for the same month last year. The number of permits issued was sixty-seven; for September last year the total was forty-seven. For the nine months, the total was 582, compared with 456 a year ago.

Wholesale and retail trade is fairly active, and fully up to last year's standard. The machinists' strike, now in existence for about four months, still remains unsettled, and other iron trades are somewhat dull in consequence.

An application of great importance to labour was recently made to the British Columbia Government by the Grand Trunk Pacific Railway Company, to permit the employment of Asiatic labour on the construction of the Grand Trunk Pacific Railway through British Columbia. The applicants alleged that, owing to the scarcity of white labour, they were unable to carry on the construction of their railway. After consideration, the Government decided to refuse the application.

The Pacific Whaling Company has sold its entire interests on the west coast of Vancouver Island to Mackenzie & Mann. The price paid was $1,000,000. The

new owners intend to enlarge the whaling plant, and to add halibut and shark fishing, which will give employment to a considerable number of men.

Over ten acres of land has recently been purchased by the British Columbia Marine Railway Company, at Esquimalt, for the construction of a large dry-dock.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The grain crops in this district have been harvested. Wheat and oats will be an average crop, while roots, owing to the unusually dry summer, will not be as abundant as last year. The fruit crop has turned out well, the quality being excellent.

Fishing.—Salmon fishing is over for the season. The complete returns of the Vancouver Island catch will be available later.

Lumbering.—The lumber business continues brisk, all mills finding a ready market for their output.

Manufacturing.—The various industries are fully employed.

CONDITION OF PARTICULAR TRADES.

The building trades were fully employed during the month, a majority reporting trade as very active. The metal trades, with the exception of the machinists, were fairly busy; in some of the shipyards there is considerable repair work under way. Printing and allied trades were about normal. Tailoring is becoming more active as the season advances. Garment workers were busy. Barbers, clerks, stenographers, laundry workers were fully employed.

NANAIMO, B C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has not been as active this month as last, owing to the weather, and the falling off of work at sawmills and logging camps, as well as the large number of men coming from abroad looking for work in the coal mines. Commercial activity has shown no falling off as yet. There have been no changes in rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is not much activity among the fishermen in this district, outside of preparing for the herring run.

Lumbering.—Work in the sawmills is quiet, the local mill having closed down and some of the other mills not doing much.

Mining.—Work in the coal mines continues very active, the mines working to their full capacity, but there are a large number of miners looking for work.

Railway construction is being pushed as fast as practicable on the extension of the Esquimalt and Nanaimo Railway to Alberni.

There are a large number of men working on the sewerage works and cement sidewalks of the city.

CONDITION OF PARTICULAR TRADES.

Printers were active. Teamsters and expressmen have been very busy. Unskilled labour has not been so well employed; while there has been a lot of work going on, the continual arrival of men from other places has made idleness common.

Bricklayers report work as active. Carpenters and joiners are still very active there being a large number of new buildings in course of construction, and contracted for. Painters and paperhangers report work as active. Plumbers are also very busy. Builders' labourers have been active during the month. Blacksmiths and carriage makers report work as active.

LEGISLATION WITH RESPECT TO WORKMEN'S COMPENSATION IN CANADA.

DURING the past year few subjects directly bearing on the relations of employer and employé have received a greater degree of attention in Canada than that of workmen's compensation. In the Province of Quebec the year has witnessed the coming into force of a new law, the first of its kind in that Province, following an extended inquiry by Royal Commission. In Nova Scotia, and Manitoba amendments of a radical nature to the previous legislation have taken effect, in the latter case, as in Quebec, on the recommendation of a Royal Commission. At the present moment a third Commission is investigating the provisions of the Ontario law with a view to amendment. In the United States, where conditions with regard to the development of legislation of this character are somewhat similar to those in Canada, the same subject has been under careful consideration by Commissions in several States of the Union and by conferences of interstate representatives, and some important legislation has recently been enacted. The present is accordingly an opportune time at which to review progress in this connection in Canada and to indicate the stage that has been reached as compared with the comprehensive treatment of the problem elsewhere, especially in Great Britain, France and Germany.

It is the purpose of the following article to describe in concise form the present state of the law in Canada with regard to employers' liability and workmen's compensation. Before proceeding, however, to any statement or analysis of the Statutes which the several Provinces have enacted on the subject, it will be expedient to point out the place which workmen's compensation occupies in the general field of labour legislation, and to offer some brief explanation of the principles on which it is based, or which are involved in any attempt to secure the particular objects for which legislation of the kind is commonly invoked.

Scope of Labour Legislation.

The basic fact from which legislation of the class specifically designated as "Labour Legislation" proceeds, is that labour, though bought and sold, is not a "commodity" in the ordinary sense of the term, inasmuch as its purchase and sale always involve in the most intimate way the welfare of a human being.

The most elementary legislation for the protection of labour starts from this principle. Such are the various Acts which regulate the general relations of master and servant and define the parties to the labour contract. Such also are the special guarantees with which the statutes abound for the payment of the price or wages of labour, which though fixed in many cases by the same conditions of supply and demand which prevail in the world of commerce, are safeguarded under the law in a quite different manner from that which obtains when the article involved is a mere chattel. The various Masters and Servants' Acts, Mechanics' Lien Acts, Wages Acts, Garnishment Acts, &c., are cases in point.

Again, inasmuch as the contract to labour involves practically the selling of the labourer himself during working hours, the necessity for legislation for the protection of the safety, health and comfort of the workman while at work emerges. This is met by Factories' and Shops' Acts, Acts for the protection of employé on railways, in mines or on ships, in the building trades, against sweating, &c. The object of such legislation is the safeguarding of the workingman from bodily injury by the machinery or appliances with which he must work, from ill-health resulting from the surroundings in which his work is carried on, and from mental and moral contamination as well. The securing of the comprehensive body of legislation of this class which is now on the statute books of nearly every important community of the civilized world, marks the over-

throw of the economic doctrine of *laissez faire* as applied to labour in this aspect, the effect of which was to minimize or abolish the distinction between labour and other commodities and to leave the condition of the labourer to be determined almost wholly by competition and the law of supply and demand. †

The Place of "Workmen's Compensation."

It is as a growth upon this last mentioned class of legislation that "Employers' Liability," or "Workmen's Compensation" appears. Legislation like the factories and mines acts is, of course, essentially preventive. Its object is to prescribe, as fully as possible, the conditions which will prevent or minimize the occurrence of accidents, disease and moral deterioration among workingmen in connection with their employment. A further step, however, is possible. In addition to positive regulations designed to prevent accidents, the law may deal with the situation which arises when in spite of such regulation an accident actually occurs, and may impose upon employers the obligation under such circumstances of rendering compensation to the injured employé. This opens the door to one of the most involved and bitterly contested controversies that has ever arisen in connection with labour legislation, that, namely, which attempts to define the responsibility of employers for the welfare of their workmen in the general course of their employment and to delimit the region in which that responsibility ends and the personal responsibility of the workman begins.

†In articles published in previous volumes of the *Labour Gazette* reviews of the several factories and shops Acts, of the laws for the protection of employés in mines, on railways and ships, and about machinery, were given (see Volume I, pages 104, 182, 241, 314, 365 and 438; Volume II, pages 101, 168, 286, 350 and 408). Following this, the question, who the parties to a labour contract may be, was taken up, and reviews published of legislation with regard to apprentices, minors, immigrants and aliens (Vol. II, pages 470 and 526: Volume IV, pages 534 and 786.) The rights appertaining to, and the duties devolving on, the parties to a labour contract, were then dealt with, (Volume VII, pages 54 and 156), after which the specific enactments of the Canadian Statutes for the protection of wages were treated (Volume VIII, pages 307, 414 and 550).

Relation of the Law of Canada to that of England.

Legislation defining the liability of employers and providing compensation for injuries received by workmen falls in Canada within the jurisdiction of the Provincial Legislatures. It has naturally resulted that different treatment has been accorded the subject in different provinces. All, however, have been greatly influenced by the discussion which has been almost continuous in Great Britain during the past forty years and by the different legislative enactments passed by the British Parliament, more especially the Acts of 1880 and 1897. It will be convenient, therefore, before discussing the Canadian compensation laws, to describe briefly the course of the movement for workmen's compensation in Great Britain and the different stages of the progress made in that country in the solution of this extremely complex and difficult problem, recent developments in connection with which are justly regarded as marking an epoch in the history of British labour legislation.

Liability for Compensation at Common Law.*

By the Common Law of England the individual is liable for damages for any injury occasioned by his own negligence to the person or property of another. By "negligence" in this connection is meant, according to Augustine Birrell, "the absence of that amount of care which each man in this our social state owes his fellows." Similarly, by the Common Law, a person is held responsible for any damage to another caused by the negligence of his employé or servant, providing the latter, at the time he committed the fault, was within the general scope of his employment.

*The statement which follows is based chiefly on the following authorities to which the reader is referred for more detailed information: "Four lectures on the law of employers' liability at home and abroad by Augustine Birrell, M.P., 1897; (*b*) Appendix CLIX by Sir Frederick Pollock of the Report of the Royal Commission on Labour, 1893–4; Reports of select committees of 1886 and 1904; Dawbarn on Employers' Liability with notes on the Canadian Law by A. C. Forster-Boulton (1907); Accidents to Workmen by R. M. Minton-Senhouse: see also Webb, Industrial Democracy, Chapter VII.

Under the above provisions it would appear obvious that a workman might proceed against his employer for damages in the case of injuries received as a consequence of his employment, both when due to the negligence of the employer himself or to that of a fellow workman, subject, of course, in each case to the further principles of the law with reference to contributory negligence, and to the fact that no damages can be levied where the injured person voluntarily encountered the risk (*volenti non fit injuria*); though this latter principle becomes most complicated and elusive when applied to the intricate conditions of modern industrial life. There had not been, however, in England, prior to the year 1836, any instance of a workman proceeding against an employer for damages, under the second of the above mentioned contingencies, namely, when the injury resulted from the act of a fellow employé, and the bringing of the first action of the kind had the effect of eliciting an interpretation of the law, which was to stand for nearly half a century, and which became the basis of a controversy which has continued up to the present.

This was the celebrated case known as Priestly v. Fowler, the decision in which was rendered in 1837. A butcher's assistant brought suit against his employer to recover compensation for a fractured thigh received in an accident due to the overloading of a vehicle. It was proved that the overloading was the fault of a fellow employé, and the Court held that action was not maintainable against the employer. The decision established the following as a rule of common law:—

"A servant, when he engages to serve a master, undertakes as between himself and his master to run all the ordinary risks of the service, including the risk of negligence upon the part of a fellow-servant when he is acting in the discharge of his duty as servant of him who is the common master of both."

The above rule, to which was given the name of "the Doctrine of Common Employment," was based largely on the fact that there was "no precedent" for the action, and that on the principle of analogy the plea put forward was inadmissable. It was endorsed by the courts of the United States, though not of France or Germany, and though now denounced by eminent jurists like Sir Frederick Pollock and Mr. Augustine Birrell, in such terms as "bad law," "bad policy," "sheer invention," "mere ingenuity in suggesting analogies." In the working out, an employer, though bound to compensate his workman for injuries received from the negligence of himself, or his partner, was not liable in any way for the consequences of the acts of the injured man's fellow employé. His liability to persons outside of his service was thus far more extensive than to his own employés. For example, an employer was liable for injuries caused to outsiders by the acts of his servants while in the course of their employment, even though he had expressly forbidden the particular act which caused the injury. On the other hand, as further decisions rendered the principle first enunciated in 1837 more stringent, it came to be impossible for a workman to recover against his employer, for any act whatever of a fellow employé, even though the latter was a manager acting under the direct instructions of the employer, or a workman of an entirely different class and perhaps in a different locality. Damages were refused in one case for the death of a miner who had been killed by the direct negligence of a manager, and in another case for a carpenter thrown from a scaffold through the carelessness of a train operator while at work on a building belonging to their common employer, the railway company. Commenting on the general effect of the "Doctrine of Common Employment," Augustine Birrell says:—

"It would be absurd to say that the doctrine is a ridiculous one. Had it been so it never would have commended itself to the minds of so many great judges. When you once begin inventing terms for other people's contracts there is usually a good deal to be said in favour of your fancy. Supposing our judges had decided as they have in France, that it is an implied term of every contract of service that the master shall insure his servant against all accidents in the course of the

employment ,which are not solely attributable to the servant's own negligence or to unforeseen and most unlikely occurrences, —who would have found fault with this fiction."

The Movement for Employers' Liability Legislation.

The history of the attempt to improve, in the interest of the workingmen, the common law situation as above described, is the history of the movement for "employers' liability" or "workmen's compensation" legislation.

The interpretation placed in 1837 upon the common law with regard to the liability of employers became, as already remarked, increasingly stringent with the increasing extent and complexity of the British industrial system. The doctrine of "common employment" was based on analogies drawn from domestic or quasi-domestic employments. When these passed more and more into the background of the national life, and were succeeded by large and elaborately organized establishments in which employment involved co-operation with a multitude of other workmen, at the same time that the range of choice between employments was narrowed—it followed as a natural consequence that the hardships implied for labour were greatly intensified. From the year 1865 on, an organized movement to secure the modification or abolition of the doctrine was accordingly set on foot. Between 1872 and 1879 no fewer than eight Employers' Liabilities' Bills were introduced into the British House of Commons. But the chief incident of this period was the obtaining in 1876 of a parliamentary committee whose exhaustive inquiry did much to inform and chrystallize public opinion.

The British Act of 1880.

The first tangible result of the agitation appeared in the Employers' Liability Act of 1880. This did not entirely abolish the doctrine of common employment, but it secured its practical abolition in five specified cases, namely: Where the injury received was due to:

1. Any defect in plant or machinery for which the employer or some person in his service was responsible;
2. The neglect of any person engaged in superintendence;
3. The neglect of any person whose orders the workman was bound to obey when the injury took place;
4. The act of any fellow servant, done in obedience to any improper or defective rule or instruction of the employer or delegate;
5. The negligence of any signal man or person having charge of a locomotive and a railway.

It will be seen that the Act of 1880 placed no general restriction upon the doctrine of common employment, though it distinctly specified several classes of fellow employés whose neglect rendered their employer liable.

The Act excluded seamen, domestic servants and any servant employed in menial labour from its scope. It required that notice of the injury should be given and action brought within a limited time, the amount of compensation in any case not to exceed three years' earnings of the workman in his employment. In the case of fatal accidents, the rights passed to the dead man's representative. The Act was passed for seven years, and after 1887 was renewed from year to year.

"Contracting Out."

The Act of 1880 had been in force less than two years, when a decision by the Courts greatly modified the degree of protection it afforded to workmen. According to the finding in Griffith v. the Earl of Dudley, if a workman continued in employment after receipt of a notice that he must forego his rights under the Act and accept instead a claim on a benefit club to which the employer contributed, it was held that he had entered into a contract to relinquish his rights under the Act, and that such a contract was not against public policy. As a result, employers, in order to avoid the risk of indefinite liability or the annoyance of frequent suits for compensation, adopted the plan of establishing special funds to which both employer and work-

man subscribed and from which relief in cases of accident was provided. Although this method provided compensation and avoided the expenses of litigation, it was strenuously objected to by the British trade unions on the ground that such funds had the tendency to attach workmen permanently to the service of the employer, and that the "contracting out" was given practically under duress, at the same time that the workman was reduced to a system of individual bargaining and the inducement diminished to employers to take precautions against individual accidents. For the next several years, therefore, the representations of labour on the subject of employers' liability took the form of a persistent agitation against "contracting out." In addition, the difficulty of proving negligence, and the risks of litigation, had reduced the operation of the Act to narrow proportions.

The Act of 1897.

In the year 1893 a Bill which declared against "contracting out," except under certain safe-guards, was introduced, but was withdrawn in face of the opposition to any measure that would allow "contracting out" under any circumstances. Four years later the situation was entirely changed by the extensive and revolutionary Workmen's Compensation Act of 1897. "The precedent set by Germany in 1884," says the Report of the Workman's Compensation Committee of the Parliament which sat in 1904, "in passing a law imposing on employers in certain trades the duty of providing adequate security for compensation to persons injured by accidents arising out of their occupation, by means of a system of compulsory insurance, had had a powerful effect. . . . The method of compulsory insurance was considered to be unsuitable to this country. It was, therefore, necessary to adopt other means. Accordingly, the suggestion was made that employers should be made personally liable to compensation for this particular class of accidental injury." Briefly stated the outstanding features of this important measure were as follows: Relinquishing any attempt to define the degree to which an employers' liability should extend, the new law made him, in nearly all of the great industries, individually liable in all cases where personal injury by accident, arising out of or and in the course of employment, was caused to the workman. If personally negligent, he remained liable to the provisions of the common law. The practical effect, accordingly, was to insure the employés against accidents arising out of their employment. No attempt was made to classify accidents, though, of course, in cases where the accident was solely attributable to the wilful misconduct of workmen, compensation was disallowed, though even under such circumstances the onus of proof was placed upon the employer. The doctrine of common employment and contributory negligence were practically abolished in the dangerous trades. "Contracting out" was expressly forbidden, except in circumstances unlikely to occur frequently. Though the Act was regarded as an experiment, it was applied to nearly one-third or one-half of the whole working population included in the dangerous trades. The employer, however, was not made liable for any injury which does not disable a workman from earning full wages for a period of at least two weeks.[2]

Subsequent British Legislation.

It may be remarked here in general terms that the most advanced Canadian legislation has conformed largely to the precedent established by the British Act of 1897. It may be well, however, in order to obtain the proper outlook before turning to the situation in Canada, to note briefly the further important steps that have been taken since 1897 in Great Britain.

An amendment of the Act in 1900 extended its provisions to agricultural labour, but made no other change, and it was not until 1906 that further radical development in the law took place. This was under an Act which repealed and consolidated the Acts of 1897 and 1900,

[2] An article descriptive of the Act was published in the *Labour Gazette* for March, 1902, page 537. See also the *Labour Gazette* for September, 1904, page 275.

at the same time introducing three highly important extensions:

By the first of these extensions the minimum period of incapacity entitling to a weekly payment was reduced from a fortnight to one week. Where incapacity lasted for two weeks or longer the weekly payments were to commence from the date of the injury instead of from a fortnight after that date, as previously. Workmen under twenty-one years of age were also dealt with more liberally.

The second extension was that which made the Act applicable to practically all workmen, including seamen, retail clerks, professional sportsmen, domestic servants and organists. The only persons specifically excluded were those employed otherwise than in manual labour whose remuneration exceeded £250 a year, "outworkers," members of police forces, members of the employer's family living in the employer's house, and casual employés.

By the third extension the scope of the Act was made to include the contracting of certain diseases due to the nature of the employment, namely, anthrax, poisoning by lead, mercury, phosphorous or arsenic, and ankylostomiasis. This list has since been still further extended and regulations adopted relating to the scale of compensation for industrial diseases.

The German Method.

The above brief sketch of the British law will give some general idea of the extent to which the method of dealing with the problem arising out of the dangers inherent in modern industrial processes has been carried along the lines known as employers' liability or workmen's compensation. The other method, that of insurance against accidents, has reached its highest development on the continent of Europe and notably in Germany. As long ago as 1854, workmen and employers were compelled in Germany to establish sick relief societies, to which both contributed. A drastic Employers' Liability Act was passed in 1871, but failed because of the cost of its procedure. The existing German plan consists of two sister measures, the Sickness Insurance Act and the Accidents Insurance Act, which came into general operation in 1885. The former is compulsory; by its provisions every workman is obliged to join a local society on which devolves the duty of providing an indemnity to him in case of any accident which incapacitates him for any period up to thirteen weeks. These local societies are bound together in an affiliation, and transfers are made easy so as to enable the workman to move from place to place. For accidents which disable a workman for longer than thirteen weeks the funds provided under the Accident Insurance Act are available. Under the Sickness Insurance Act, which deals with the vast majority of accidents, the obligation to insure his workpeople is cast upon the employer, though two-thirds of the contributions are paid by the workpeople. Under the Accident Insurance Act the obligation is imposed on the employer of providing the whole of the funds. As the societies under the Sickness Insurance Act are linked together in an affiliation, so under the Accident Insurance Act the employers are bound together in trade groups. The awards are paid through the post office.

With the above by way of foreword, an analysis of the several Canadian Acts may be attempted.

Workmen's Compensation in Canada—Preliminary Review.

The first province to enact legislation with regard to Workmen's Compensation was Ontario which passed a Workmen's Compensation Act in the year 1886. The Act was amended in 1889, 1892, 1893, 1897 and 1899, consolidations being included in the Revised Statutes of 1887 and 1897. British Columbia was the second province to pass workmen's compensation legislation, an Employers' Liability Act having become law in 1891; this was amended in the following year and thoroughly revised and remodelled ten years later in 1902. Manitoba passed an Act in 1893. This was amended in 1895 and 1898, and consolidated in 1902. At the last session of the legislature, how-

ever, an entirely new Act became law. Similarly, the Nova Scotia Act of 1900, was replaced last year by a new measure. New Brunswick passed an Employers' Liability Act in 1903 and amended it in 1907 and 1908, the last time extensively. Alberta in 1908 placed an Act modelled on the British Act of 1897 on the Statute books, while Quebec, after an investigation under Royal Commission, passed ts first Act of the kind in 1909. Prince iEdward Island and Saskatchewan are without legislation of this character.

Referring to the extent to which the provincial laws in Canada are founded on British precedent, it may be stated, briefly, that the most complete adaptation of the British law has been made in the Provinces of Manitoba and Alberta, whose present legislation is substantially identical, following closely the most recent British precedent, though the original Act in Manitoba was based on the British Act of 1880. Both, of course, omit the provisions with regard to industrial diseases which appear in the British Act, and are generally less inclusive and stringent. Roughly, they may be said to reproduce the British Act of 1897.

The legislation of the Provinces of Nova Scotia and British Columbia are, again, essentially identical with each other, but are less elaborate and stringent than that of Manitoba and Alberta, though still following somewhat closely the British Act of 1897. In both of these Provinces the original legislation was on the model of the British Act of 1880.

Coming to Ontario and New Brunswick, the basic plan of the legislation in each of these provinces is that of the British Act of 1880, though some important amendments have been made in the spirit of the Act of 1897, the amendment of 1899 in Ontario being virtually by way of introducing the principle of arbitration which was so prominent a feature of the later British law.

The Quebec Act stands wholly by itself as to form and does not visibly follow British precedent as do those of the other provinces. This is, of course, due largely to the fact that whereas workmen's compensation legislation in the other provinces was as in England an outgrowth upon the common law of England, the Quebec Act is an outgrowth upon the Civil Code of that province, it being for many years a disputed point in Quebec to what extent special legislation of the kind was necessary and to what extent conditions under the Civil Code of the province resembled conditions under the common law of England.

In the following review, reference is made only to the most recent form of legislation in cases where a province may have acts both of the "Employés Liability" and "Workmen's Compensation" type among its statutes.

Scope of Workmen's Compensation in Canada.

Before proceeding to a comparison in detail of the several Provincial Acts as to the rights to compensation which they confer on workmen, the scale and conditions on which compensation is allowable, &c., it may be convenient in this place to note the provisions which define in a preliminary way the general scope of the legislation, *i.e.*, the specific classes of employés to which the several acts apply. This will be found set forth for the most part in the definitions contained in the acts of the terms "workman" and "employer" as well as in certain other specific clauses which will be mentioned.

Employès to whom Legislation is Applicable.

Under the Nova Scotia Act the term "workman" does not include casual employés or employés whose remuneration exceeds $1,000 a year. It also excludes "outworkers," that is, persons employed in their own homes or in premises not under the control of the employer. Employés engaged in agriculture, fishing, the curing, packing and manufacturing of fish products, shipbuilding, lumbering, sawmills, or in the naval or military services of the Crown are also expressly excluded. The Act in-

cludes however, both manual and clerical workers.[1]

In New Brunswick the term "workman" does not include a casual employé, domestic or menial servant, an employé in husbandry, gardening, fruit growing, granite working, lumbering, or driving, rafting or booming logs, clerk, retail shop employé, seaman or fisherman. Those expressly included under the term are, railway servants, ship labourers, longshoremen, quarrymen, miners, pondmen, journeymen handicraftsmen, or those otherwise engaged in manual labour, even if under age.[2]

In Quebec those included under the Act are workmen, apprentices, building employés, factory hands, employés in stone, wood or coal yards, transportation employés, loaders, gas or electrical employés, employés engaged in building railways, drains, wharves, bridges, &c., miners, quarrymen, powder mill employés and generally all employés of industrial establishments in which power other than that of man or animals is used. Agricultural employés and those engaged in navigation by means of sails are expressly excluded. A foreign workman or his representatives is not entitled to compensation in Quebec unless he was either residing in Canada at the time of the accident or unless he ceases to reside there while the compensation is being paid. The common law, however, exists in his favour. Workmen who usually work alone are not subject to the act from the fact of casually working with one or more other workmen. Moreover, where the yearly wages of a workman exceed $600, no more than this sum is to be taken into account. The surplus up to $1,000 gives a right only to one-fourth of the compensation. The Act does not apply at all where the yearly wages exceed $1,000. Apprentices are assimilated to the workmen in the business who are paid the lowest wages.[3]

In Ontario the following classes are excluded: Domestic or menial servants and servants in husbandry, gardening or fruit growing. Included are railway servants, agriculturists, journeymen, and labourers engaged in manual labour whether under or over twenty-one years of age.[4]

The Manitoba and Alberta Acts exclude persons earning, otherwise than by manual labour, $1,200 a year. They also exclude "outworkers," but include clerical workers. The Acts do not apply to agriculture nor to any work performed by machinery used on or about a farm or homestead, such as threshing, crushing or grinding corn, sawing wood or lumber, pressing hay, building or repairing or destroying farm buildings, windmills, &c. Workshops, &c., on farms, used for the purposes of the farm, are also excluded.[5]

The definition of "workman" under the British Columbia Act includes both manual and clerical workers, and specifically mentions labourers, servants in husbandry, journeymen, artificers, handicraftsmen, and miners. It excludes persons in the naval or military service of the crown and domestic or menial servants.[6]

The term railway servant usually includes all tramway or street railway employés.[7]

In close connection with the above must be considered certain further definitions contained in several of the acts.[8]

In Nova Scotia the legislation applies only to employment where not less than ten workmen are employed "on or in, or about a railway, factory, mine, quarry, or engineering work, or in loading or unloading a vessel, or on, in or about any building either being constructed or repaired by means of a scaffolding, or being demolished, or on which machinery driven by steam, water or other mechanical power is being used for the purpose of the construction repair or demolition thereof." The British Columbia Act requires that the building must exceed 40 feet in height and the Alberta Act 30 feet. The Manitoba Act applies only to employers usually engaging five or more workmen.[9]

The terms "factory" and "mine" where they occur are to be understood in the meaning given to them in the Factories and Mines' Regulation Acts of the respective provinces, though ex-

press definitions are introduced, as in Alberta, where legislation of the latter character has not been enacted.[10]

Who are Regarded as Employers.

Generally speaking the term "employer" includes any body of persons corporate or incorporate, and the legal personal representative of a deceased employer. Specific clauses to this effect are present in the Nova Scotia, New Brunswick, Ontario, Manitoba and British Columbia Acts. To the Manitoba and Alberta Acts are added a provision that where the services of a workman are temporarily lent to another person the first employer continues to be his employer in the eye of the law.

In Manitoba, where the Crown and municipal corporations are expressly included in the definition of "employers", there is a clause to the effect that the exercise and performance of the powers and duties of a public authority are to be treated as the trade or business of that authority.[1]

Other Definitions.

Before stating the provisions of the law as to the awarding of compensation, it will be well also to note the sense in which certain other terms of frequent occurrence in this connection are to be understood.

"Defendents" means such members of the workman's family as were wholly or in part dependent on his earnings. An illegitimate child or grandchild is included, and where the workmen is illegitimate, his parent or grandparent. The wording of the law is identical in Nova Scotia, Manitoba and Alberta. The British Columbia Act defines "dependents" as meaning "wife, father, mother, husband, sister, brother, child, or grandchild, wholly or in part dependent on the workman's earnings."

"Member of a family" means, in Nova Scotia, "wife or husband, father, mother, grandfather, grandmother, step-father, step-mother, son, daughter, grandson, grand-daughter, step-son, step-daughter, brother, sister, half-brother and half-sister." The New Brunswick Statute names the same list in its definition of "dependents." The Manitoba and Alberta Acts add to the list "adopted child and foster parent."

Sub-contracting.

Several of the Acts contain specific provisions to prevent misunderstandings arising as to liability when the work in connection with which the injury was received was being performed by a sub-contractor or second party. Generally speaking the first employer in each case is liable for the compensation in the same manner as if the workman had been immediately employed by him. The principal, however, is entitled to idemnification from the sub-contractor, and the workman is not deprived of the right to proceed against the sub-contractor instead of the contractor if he so wishes. Double compensation is, of course, not recoverable. As before, the Nova Scotia and British Columbia statutes on the one hand, and those of Alberta and Manitoba on the other hand, are identical in form. The Ontario and New Brunswick Statutes were originally the same, but the latter was amended in 1908.

"Engineering work" and "undertaker" are defined as follows in the British Columbia and Alberta Acts:

The former means "any work of construction or alteration or repair of a railroad, harbour, dock, canal or sewer, and includes any other work for the constructiona, lteration or repair of which machinery driven by steam, water or other mechanical power is used." The latter "in the case of a railway means the railway company; in the case of a factory, quarry, laundry, smelter or ware-

[1]Alberta statute 1908, chapter 12, section 2. Manitoba statutes. 1910, chapter 81, section 3

house, means the occupier or operator thereof; in the case of a mine means the owner thereof, and in the case of an engineering or other work means the person undertaking the construction, alteration, repair or demolition." The Nova Scotia Act is similar in purport, though differing verbally from the above.

The Right to Compensation.

Approaching now the central feature of the legislation under review, that namely which describes the right of workmen to compensation for injuries and which constitutes the basic principle upon which the law proceeds, we find it necessary to distinguish carefully between the acts which as above stated have taken the British Workmen's Compensation Act of 1897 for model and those which follow the precedent of the Employers' Liability Act of 1880. The former, as already mentioned, include the most recent acts of the Nova Scotia, Manitoba, Alberta and British Columbia legislatures; the latter include the Statutes of Ontario and New Brunswick. The broader differences involved in this divergence must be borne in mind throughout, even while noting, as there will be occasion to do later, many minor points of resemblance in the form and letter of the several laws.

With regard, then, to the form in which the general purpose of the legislation is expressed, the Nova Scotia, Manitoba, Alberta and British Columbia Acts all reproduce with little change that of the British Workmen's Compensation Act, specifying in each case that if personal injury by accident is caused to a workman arising out of or in course of his employment, the employer providing the employment is, within the scope of the Act, liable to pay compensation for the injury. The scale and conditions of compensation are then set forth in full detail in a schedule appended to the Act.

The form and purport of the Ontario and New Brunswick Statutes are quite different from the above. Here the Acts begin, as in the British Act of 1880, from the opposite point of view, namely, that of the common law, to which definite exceptions are made in favour of the workman in certain clearly defined circumstances. These circumstances arise, according to the law in Ontario, when personal injury is caused to a workman:

1. By reason of any defect in the condition or arrangement of the ways, works, machinery, plant, buildings or premises connected with, intended for or used in the business of the employer; or

2. By reason of the negligence of any person in the service of the employer who has any superintendence entrusted to him whilst in the exercise of such superintendence; or

3. By reason of the negligence of any person in the service of the employer to whose orders or directions the workman at the time of the injury was bound to conform and did conform, where such injury resulted from his having so conformed; or

4. By reason of the Act or omission of any person in the service of the employer done or made in obedience to the rules or by-laws of the employer, or in obedience to particular instructions given by the employer or by any person delegated with the authority of the employer in that behalf; or

5. By reason of the negligence of any person in the service of the employer who has the charge or control of any points, signal, locomotive, engine, machine, or train upon a railway, tramway or street railway;

The New Brunswick definition differs considerably from the above,[2] the circumstances under which compensation is payable to a workman being when he has suffered injury:

(*a*) By reason of any defect in the condition or arrangement of the ways, works, machinery, gear, appliances, plant, scow, boat, vessel building, or premises connected with, intended for, or used in the business of the employer; or

(*b*) By reason of the negligence of the employer or any person in the service of the employer; or

[2]New Brunswick statute 1908, chapter 31, section 3; R. S. Ontario, c. 160, sec. 3.

(*c*) By reason of the act or omission of any person in the service of the employer, done or made, in obedience to the rules or by-laws of the employer, or in obedience to particular instructions given by the employer, or by any person delegated with the authority of the employer in that behalf.

Ontario adds to the above a special clause describing certain injuries to railway employés which are to be regarded as entitling the victim to compensation. Such are injuries caused by overhead bridges, improper packing of frogs, improper arrangement of wing-rails, guard rails, &c.[3]

The Ontario Act of 1899 also declares that where an accident has occurred through the neglect of an employer to maintain proper guards on machinery, or about dangerous places, as required by the Factories' Act, the Railway Accidents' Act, &c., the onus of proof that the provisions of these Acts were strictly complied with lies upon the employer in any trial or arbitration under the Workmen's Compensation Act.[4]

Both Ontario and New Brunswick construe "superintendence" as meaning such general supervision as is exercised by a foreman, whether the person exercising superintendence is or is not engaged in manual labour.

[4]R. S. Ontario 1899, chapter 18, section 3.

(*To be continued.*)

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF OCTOBER, 1910.

DURING the month of October an application for the establishment of a Board of Conciliation and Investigation was received on behalf of the conductors and motormen employed by the Winnipeg Electric Railway Company, the dispute affecting, it was stated, approximately 603 employés.

Other Proceedings Under the Act.

It was understood that during the month of October sittings were held of Boards which had been established during the preceding month in connection with disputes between the Canadian Paicfic Railway Company, the Grand Trunk Pacific Railway Company, the Canadian Northern Railway Company and their maintenance of-way employés. The proceedings before these Boards had, however, not been concluded at the end of the month.

In the October number of the *Labour Gazette* reference has been made to an application on behalf of the deckhands employed by the Canadian Pacific Steamship Company, at Vancouver and Victoria, B.C. A Board was established in this matter by the Minister of Labour, on September 20, and was constituted as follows: Mr. G. E. McCrossan, barrister, of Vancouver, B.C., appointed by the Minister, in the absence of any recommendation from the employing Company; Mr. J. H. McVety, of Vancouver, B.C., appointed on the recommendation of the employés; and His Honour Judge W. W. B. McInnes, of Vancouver, B.C., chairman, appointed on the joint recommendation of the other two members of the Board.

In the application on behalf of the conductors and motormen employed by the Winnipeg Electric Railway Company it was stated that the dispute arose out of alleged discrimination on the part of the Company against certain employés "on account of said employés having taken a very active interest in the Street Railway Employés' Union, and having discharged some four men claiming that these men were seen in bar-rooms and saloons while in uniform, although not on duty." The number of employés affected by this dispute was stated to be approximately 603. A Board was established by the Minister, on October 25, Mr. L. L. Peltier, of Fort William, Ont., being appointed on the recommendation of the employés concerned. At the close of the month correspondence was still in progress with respect to the final constitution of the Board.

NOVA SCOTIA LEGISLATION AFFECTING LABOUR, 1900.

FROM the standpoint of labour the most important act passed at the Session of the Nova Scotia Legislature of the present year was a comprehensive amendment with respect to compensation to workmen for accidental injuries, incorporating many of the provisions included in the most recent legislation of this character in Great Britain. The previously existing Employers' Liability Act of Nova Scotia, which was passed in 1900, was based in the main on the British Act of 1880, while the present legislation follows, as its model, the British Act of 1897, which differs in many essential particulars from its predecessor. As a special article, reviewing the existing conditions of the law in the several Provinces of Canada with respect to workmen's compensation is begun elsewhere in the present issue, and contains a complete statement of the terms of the Nova Scotia Act, in comparison with similar legislation in the other Provinces, further mention of the amendment of the present year is unnecessary in this place. Of the remaining legislation of the Session of interest to labour and industry the following is a brief review:—

Employment of Women in Factories.

The prohibition enacted in 1909, making it unlawful for women to be employed in a factory for more than nine hours in any one day is removed.[1]

Co-operative Associations Among Members' of Fishermen's Unions.

The Act passed in 1905, which provided machinery for the organization of fishermen's unions, is amended by the addition of clauses giving permission to members of a Station of the Fishermen's Union, not less than ten in number, to form themselves into a co-operative association for the buying, selling or packing of fish, fish products of all kinds, fishing gear for the use of members, real estate or vessels for the use of the association. The clauses also deal with capital stock, administration, officers, by-laws, &c.[2]

Coal Mines' Regulation Act Amended.

Three acts were passed amending existing legislation for the regulation of coal mines.

Examination of candidates for certificates of competency.—The Board of Examiners appointed for the purpose of examining candidates for certificates of competency as underground managers and foremen must in future consist of:—

1. The Inspector of Mines;
2. Two managers of mines;
3. Three experienced miners;
4. Two persons appointed by the Commissioner of Mines, and,
5. Deputy Inspectors directed by the Inspector to act.

For the purpose of holding examinations the province is to be divided into four districts, namely, the Cumberland, Pictou, Inverness and Cape Breton districts, the limits of which are to be defined by the Commissioner. The examination of candidates in each district is to be conducted by not less than two members of the Board asisted by one or more experienced miners. The governor-in-council may make regulations for the examination of applicants for certificates of competency as mine examiners, and prescribing the subjects in which they are to be examined. Any person who within six months prior to March 3, 1904, has been performing the duties of mine examiner is entitled to receive a certificate of service equivalent to a certificate of competency as mine examiner.[3]

Inspection.—The clauses of the Coal Mines' Regulation Act relating to inspection are revised, the powers of the Inspector bing extended to Deputy Inspectors. An owner, agent or manager of a mine must keep in his office at the mine an accurate plan showing the workings of the mine up to three months or less previously. The law formerly re-

[1]Nova Scotia statute, 1910, chapter 17, section 20.

[2]Nova Scotia statute, 1910, chapter 30.

[3]Nova Scotia Statutes, 1910, chapter 36.

quired the plan to show the workings up to six months or less previously. The rule which required the coal during the process of holeing and undercutting to be supported by spraggs or wooden props under the direction of a person appointed for the purpose, was previously enforceable when required by the Inspector. It is now enforceable also when required by a deputy inspector. The rules as to the use of explosives are also amended in cases governing their use in mines in which inflammable gas has been found on three consecutive days during the two preceding months, in quantity to show in the safety lamp. Under the exceptional circumstances in which explosives may be used in these cases, and also in any mine where gas has similarly been found during three months previously, no shot shall be fired except by a person holding a certificate as a shot firer. The shot firer in question, moreover, must examine the place where the shot is to be fired and the places contiguous and must have found such places safe. The law now adds that after a shot has been fired the shot firer must return immediately to the place and satisfy himself that no dangerous condition has been produced by the firing of the shot.[4]

Pensions for School Inspectors and School Teachers.

An act providing annuities for inspectors of schools requires every inspector to pay into the Provincial Treasury the sum of fifty dollars a year to be applied to the formation of a fund to be known as "The School Inspectors' Annuity Fund." A school inspector who has completed thirty years of service is to be entitled, on retiring at sixty-five years of age or upwards, to a pension equal to one seventy-fifth of his annual salary at retirement for each year of service, and in addition the sum of five dollars for each year of service as a public school teacher before his appointment as a school inspector. The annuities are to be paid semi-annually. If an inspector under sixty-five years of age is disabled by sickness or other permanent disability from performing his duties or otherwise earning a livelihood he is entiled to the allowance as above prescribed. No annuity, however, may exceed $600.[5]

An act consolidating the amendments to the Educatlon Act restates the provisions included in 1906–07 with regard to public school teachers' annuities.[6] The same act restates the legislation of 1909, rendering public school buildings available as technical or miners' schools, and that of 1901 with respect to manual training grants.[7]

Protection of Children.

An act was passed establishing a Juvenile Court for the Province of Nova Scotia and a further act amending and consolidating the act respecting the maintenance and reform of juvenile offenders.[8]

Dominion Government Annuities.

By special act annuities under the Dominion Government Annuities Act of 1908, are declared exempt from seizure or attachment and unaffected by trust or lien.[9]

Miscellaneous.

Other important acts of the Session included a consolidation of the Public Health Act;[10] an Act relating to the sale of intoxicating liquors, to be cited as the Nova Scotia Temperance Act, 1910, which enforces prohibition throughout the province except in the City of Halifax and in the Counties of Richmond and Halifax, in which the enforcement is to occur at the expiration of the licenses.[11] a consolidation of the Crown Lands' Act, which contains a clause giving the governor-in-council power to prohibit the export of pulp wood from lands under lease or license from the Crown;[12] an Act for codifying the law relating to the sale of goods;[13] an Act for further facilitating the incorporation of Farmers' Fruit Produce, and Warehouse Associations;[14] and, an Act relating to Provincial Land Surveyors.[15]

INTERNATIONAL CONFERENCES ON INDUSTRIAL AND SOCIAL REFORM.

DURING the month of September the Hon. W. L. Mackenzie King, Minister of Labour, attended conferences as the representative of Canada at The Hague, Brussels, Paris and Lugano, all dealing with important questions of industrial social reform.

The first conference was that on Social Insurance held at The Hague September 6 to 8. The problems considered at this conference were insurance against accident unemployment, sickness, invalidity and old age. A very large number of delegates were in attendance, including the official representatives from the governments of nineteen different countries. A permanent International Committee was formed the aim of which will be to facilitate an exchange of opinion and bring together from all available sources, information and statistics on the subject of industrial insurance likely to be of service to the governments of the several countries.

The conference at Brussels was one devoted to the subject of Higher Technical Education. It opened on September 9 and closed on the twelfth and dealt for the most part with courses of studies in the higher branches of technical education, particularly those relating to civil and mining engineering. The Minister at this conference took opportunity to acquaint the representatives of the several countries present with the work of the Royal Commission on Industrial Training and Technical Education in Canada and took steps to facilitate the work of the Commission when it visits Europe.

During his stay in Brussels Mr. King also attended a Conference on Professional Diseases and Industrial Accidents.

From September 18 to the 21 the Minister attended a Conference on Unemployment in Paris. At this conference representatives from a great many countries were present, and numerous reports were presented dealing with various phases of unemployment as these had developed in different countries.

The Sixth General Meeting of the Committee of the International Association for Labour Legislation was held in Lugano, Switzerland, September 26 to 28. Delegates from many countries were present and discussed such important questions as the use of lead in paints, industrial poisons, home work and the sweating system, night work of young persons, workingmen's holidays, a maximum working day and the eight-hour shift in coal mines.

ROYAL COMMISSION ON INDUSTRIAL TRAINING AND TECHNICAL EDUCATION—STATEMENT OF PROCEEDINGS DURING OCTOBER.

DURING the month of October, 1910, the Royal Commission on Industrial Training and Technical Education visited thirteen points in Ontario, and held altogether thirty sessions. The localities visited included Belleville, Peterborough, Toronto, Hamilton, Brantford, Galt, Guelph, Berlin, London, St. Thomas, Chatham, Windsor and Walkerville. In addition, members of the Commission visited Niagara Falls and Simcoe.

On October 4, the Commission called officially on Sir James Whitney, the Premier of Ontario, and were cordially received, several members of the Ontario Legislature being present. On October 13, the Commissioners were the guests at a luncheon of the President of the Ontario Agricultural College at Guelph. The acting principal, teachers and pupils of the Berlin High School also entertained the Commission at luncheon on October 14, the meal being prepared by pupils in Domestic Science and the guests being entertained by an orchestra composed of pupils of the school. On October 20, the officers of the Twenty-fourth Regiment entertained the Commission at a dinner at Chatham, Ont., and on October 26 a civic luncheon was given in honour of the Commission by the Mayor and City Council of Toronto.

DOMINION PUBLIC HEALTH CONFERENCE HELD AT OTTAWA, ONT.

AN important conference was held at Ottawa, Ont., October 12 and 13, 1910, under the auspices of the Conservation Commission of Canada, for the discussion of certain aspects of the work of the Commission having reference to the preservation of the public health. Four Committees of the Commission presented reports which were carefully discussed, and which were followed in each case by the formulation of a definite policy on the part of the Commission.

The Pollution of Waterways.

The Committee on the pollution of interprovincial and national waters presented a report which recommended: (1) the enactment by the Government of Canada of a law prohibiting the deposition of raw sewage, garbage and factory waste in the waterways of Canada, a draft Bill being presented in this connection; (2) that the Provinces be empowered to administer the proposed Act in order to avoid conflict of jurisdiction; (3) that the construction of sewage systems by municipalities be subject to the control of the Provincial Boards of Health; (4) that the Provinces provide for the supervision of all water purification and sewage disposal plants; and, (5) that the Government confer with the Governments of the United States to prevent any further pollution of international waters.

Tuberculosis.

The Tuberculosis Committee recommended that the Commission take early steps to secure from the different governments areas of Crown lands in suitable localities, to be set apart for colonists of tuberculized people and their families for settlement on such conditions as may be found practicable. It was further suggested that in the event of any system of workmen's insurance being established by the Federal Government provision be made whereby tuberculized people, if recipients of sick benefits, shall be required to take advantage of such sanatorium treatment as circumstances may permit of. It was further resolved to ask the Federal Government for a grant of money to be expended by the Commission for the suppression of tuberculosis. The meeting also endorsed the recommendations set forth in the report of the International Commission on bovine tuberculosis.

The Harmonizing of Health Laws.

The Committee on the Harmonizing of Health Laws recommended that the Provinces adopt a standardized plan of collecting and tabulating vital statistics, namely, the International system, which has already been accepted by Ontario and Manitoba. The need of securing information promptly by the Director-General of Public Health and the Commission's Committee of Public Health was also pointed out.

National Council of Health.

Perhaps the most important resolution of the convention was that asking the Government to establish a National Council of Health under the Conservation Commission, to consist of an official representing each branch of a Federal Department engaged in public health work, and a representative from the public health service of each province or territory. The Council, it was recommended, should hold annual meetings to discuss legislation and the administration of legislation, to advise in cases of epidemic disease, &c. It was also recommended that a National Public Health Laboratory be established to investigate public health problems, to manufacture vaccines, toxines, &c., and to investigate technical problems, such as the pollution of streams, housing conditions, ventilation of schools, &c., &c.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, &c., are published except where otherwise stated, by courtesy of the Department of the Interior, Canada.

DURING the month of August and September, 1910, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Boards of Trades, was as follows:—

BRITISH EMIGRATION DURING AUGUST, 1910.

Nationality.	1910	1909
English	9,661	6,029
Welsh	134	162
Scotch	3,236	2,357
Irish	602	454
British Colonial	1,570	788
Total British subjects	15,203	9,790
Foreign	4,329	2,249
Total	19,532	12,039

During the eight months ended August 31, 1910, the number of passengers leaving the United Kingdom as above, was:

Nationality.	1910	1909
English	80,793	49,918
Welsh	1,675	867

Total	258	1,530	1,077	16	2,881

Number of souls represented by above entries, 6,489.

In September, 1909, the number of patents issued was 1,846, covernig an area of 283,123.89 acres, showing a decrease for the month of September, 1910, of forty-seven in the number of patents issued and of 2,467.69 acres in the area patented.

Notes.

For the fiscal year ending March 31 immigrant arrivals by Provinces were as follows: Ontario, 46,129; Alberta, 42,509 British Columbia, 30,532; Saskatchewan, 29,128; Quebec, 28,524; Manitoba, 21,049; Maritime Provinces, 10,644. The United States immigrants went mainly to Saskatchewan and Alberta, although Ontarrio and Quebec each received about ten thousand of them. Nearly two-thirds of British Columbia's immigration came from the United States.

An investigation was conducted by the Department of Trade and Commerce, Canada, at Vancouver, B.C., into the alleged entry into Canada of several Chinese in contravention of the provisions requiring payment of head tax. It has been decided as a result of the investigation that in future when a Chinaman leaves Canada he must be photographed in order that his picture can be attached to the certificate.

RETAIL PRICES OF STAPLE ARTICLES OF

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month pre-
living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement
usually occupied by workingmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care
may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in th
the Department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1910.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb of other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country to correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario, and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 390 individual work people in Canada during the month of October, 1910, were reported to the Department of Labour. Of these, 115 were fatal and 275 resulted in serious injuries. In addition, one fatal accident was reported as having taken place prior to the beginning of the month, information not having been received by the Department before October, 1910.

In the preceding month there were ninety-one fatal and 181 non-fatal accidents reported, a total of 272, and in October, 1909, there were 146 fatal and 293 non-fatal accidents, a total of 439. The number of fatal accidents reported in October, 1910, was therefore twenty-four more than in the preceding month and thirty-one less than in October, 1909. The number of non-fatal accidents reported in October, 1910 was 114 more than in the preceding month and eighteen less than in October, 1909. Altogether there were 118 more industrial accidents reported in October, 1910, than in the preceding month and forty-nine less than in the same month of the preceding year.

Of 238 returns received during the month giving the ages of the victims of industrial accidents, thirty referred to persons under twenty-one years of age, eighty-three to persons between twenty-one and forty-five, and twenty to persons over forty-five. One hundred and five persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING OCTOBER, 1910, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total
Agriculture	19	37	56
Fishing and hunting	4	.....	4

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman, were: the burning to death of a caretaker and two pool room employés at a fire in Montreal, Que.; the death of three trainmen in a head-on collision at Geneva Station, Ont.; the killing of two labourers at the Outremont quarry, Montreal, Que.; the drowning of two members of a survey party in Shawatlans Lake, B.C.; and the death of two prospectors at Pitt Lake, B.C.

Disastrous Fire at Montreal, Que.

On October 13, in a fire which destroyed a business block in Montreal, Que., the caretaker of the building and two pool room employés were burned to death. The caretaker's wife and two children also lost their lives at the same time.

Fatal Head-on Collision at Geneva Station, Ont.

On October 15, as the result of a head-on collision which occurred 117 miles west of North Bay on the Canadian Pacific Railway near a station called

Geneva two engineers and a fireman were instantly killed. The collision above mentioned took place between the Imperial Limited westbound express and a stock train.

Two Labourers Killed in Hurricane at Montreal, Que.

On October 1, during a hurricane which occurred in the city of Montreal, Que. and surrounding district, two labourers engaged in erecting a stone crusher at the Outremont quarry, Montreal, Que., were killed and two seriously wounded, the scaffold on which they were working having collapsed.

Double Drowning at Shawatlans Lake, B.C.

On October 7, the canoe in which a survey party was crossing Shawatlans Lake, near Prince Rupert, B.C., was capsized by a squall and two members of the party were drowned.

Two Prospectors Killed at Scott Creek, Pitt Lake, B.C.

On October 18, the bodies of two prospectors were discovered on the shores of Scott Creek, Pitt Lake, B.C. The men were apparently crushed to death by a tree crashing through their tent.

Records by Industries and Trades.

Agriculture.—In this industry nineteen fatal and thirty-seven non-fatal accidents were reported in October, 1910, compared with twenty-two killed and thirty-five injured in September, 1910, and twenty-five killed and forty injured in October, 1909. Six farmers met death by accident through being run over, four in runaways, three by machinery, two by falls, and one each by tools, by live stock, by fire arms and by electric shock. Eleven of the serious accidents were caused by machinery, ten by falls, four by runaways, three each by live stock, by falling material and by tools, and one each by a collision, by flying material and by electric shock.

Fishing and hunting.—Three fishermen were drowned and a hunter was accidentally shot during October, 1910, In the previous month there was one death by drowning; in October, 1909, there were seven fatal and two non-fatal accidents.

Lumbering.—There were eight workers killed and nine injured during October, 1910, compared with seven killed and seven injured the month before and three killed and nine injured in October a year ago. Six of the deaths were due to falling material and one each to an explosion of a boiler and to machinery. Four of the minor accidents were due to machinery, three to falling material and two to an explosion of a boiler.

Mining.—Of these workers ten were killed by accident and nineteen injured in October, 1910, as against eleven killed and fifteen injured in September last, and forty-five killed and twelve injured in October, 1909. Five of the fatalities were caused by falling material, two respectively by being caught between coal cars and by falls and one by an explosion of fire damp. Of the injuries seven were caused by falling material, six by mine cars, two each by explosions of dynamite and by an explosion of gas and one each by machinery and by flying material.

Building trades.—Six fatalities and thirty-one injuries occurred in these trades, compared with six killed and thirty injured in the preceding month and five killed and twenty-three injured in October, 1909. Four of the deaths were due to falls and two to falling material. Twenty-four of the injuries were due to falls, four to falling material, two to flying material and one to an elevator.

Metal, engineering and shipbuilding trades.—During October, 1910, six workers were killed and fifty-four injured, as against five killed and thirty injured in September, 1910, and nine killed and forty-seven injured in October last year. Of the fatalities two respectively were caused by electric shock and by flying material and one respectively by a fall and by machinery, and of the injuries seventeen were caused by machinery, eleven by falling material, nine by explosions, six by falls, three each by elevators and

by molten metal; two each by flying material and by electric shock and one by a collision.

Woodworking trades. — Twenty-five woodworkers were injured during October last past, as against one killed and six injured in the previous month and one killed and sixteen injured in October, 1909. Eighteen of the injuries were due to machinery, three to flying material, two of falling material and one each to molten metal and to an elevator.

Printing trades.—During October machinery injured one workmen. In the preceding month there were two injured and four injured in October, 1909.

Textile trades. — Machinery caused three injuries and a fall one among these workers. There were no accidents in the month before and five workers were injured in October, 1909.

Leather trades.—To machinery was due one accident in this group during October, 1910. In September last the record was one killed and in October of last year one killed and one injured.

Food and tobacco preparation.—A fall, and machinery caused one fatality each, and elevators three, and machinery two serious injuries, respectively, during October, 1910. In the previous month the records showed two killed and two injured and in October, 1909, seven injured.

Railway service. — During October, 1910, there were twenty killed and twenty-six injured, compared with fifteen killed and thirteen injured in September last and twenty-six killed and forty-four injured in October, 1909. Of the fatal accidents eleven were due to the victim being run over, two respectively to collisions, to falls, explosions and to being caught between cars and one to drowning, and of the non-fatal accidents nine were due to being run over, six to falls, four each to being caught between cars and to collisions, two to being struck by engines and one to machinery.

Navigation.—Nine workers were killed and six injured in October last past, compared with one killed and five injured the month before and seven killed and five injured in October, 1909. Drowning caused five of the deaths and falls and falling material two respectively. Of the other accidents two each were caused by falling material and by machinery and one each by a fall and by being scalded.

General transport. — Among these workers there were ten killed and eighteen injured in October, 1910, as against three killed and thirteen injured in September last and two killed and fifteen injured in October last year. Four each of the deaths were due to falls and to being run over and one each to a runaway and to being burnt to death. Ten of the injuries were due to falls, four to being run over, two to live-stock and one each to a runaway and to falling material.

Public employés.—A special policeman was clubbed to death by robbers at Rainy River, Ont. Twelve other public employés were injured during October, 1910, six by falling material, four by falls and one each by nearly being asphyxiated by gas and by flying material. In September last the record was five killed and nine injured and in October, 1909, three killed and nineteen injured.

Miscellaneous.—Thirteen workers in this group were killed during October, 1910, and nine injured, compared with two killed and two injured the month previous and six killed and twenty-seven injured in October, 1909. Three each of the fatalities were due to falls and to being burned to death, two each to drowning, to machinery and to inhalation of gas and one to an elevator. Four of the injuries were due to machinery, two to explosions and one each to an elevator, to a fall and to flying material.

Unskilled labour. — During October, 1910, seven labourers were killed by accident and eighteen were injured, compared with nine killed and seven injured the month before and six killed and fifteen injured in October, 1909. Four of the fatalities were caused by being run over and one each by a fall, by falling material and by drowning. Of the injuries eight were caused by falling material, four by falls, two each by being crushed and by flying material and one each by an explosion and by machinery.

STATISTICAL TABLE SERIES, F. No. 84.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	Mount Hope, Ont.	Oct. 3	1	Run over by plough.
"	L'Assumption, Que.	" 3	1	Fell on pitchfork.
"	Red Deer, Alta.	" 6	1	In a runaway.
"	Lloydminster, Alta.	" 7	1	Run over by thresher.
"	Bright, Ont.	" 12	1	Fell from apple tree.
"	Austin, Man.	" 13	1	Run over by traction engine.
"	Edmonton, Alta.	" 15	1	Run over by street car.
"	Fort William, Ont.	" 17	1	Run over by train.
"	Arcola, Man.	" 20	1	In a runaway.
"	Harriston, Ont.	" 21	1	Gored by a cow.
"	North Portal, Sask.	" 21	1	Run over by train.
"	Vegreville, Alta.	" 7	1	Run over by train.
"	Souris, Man.	" 24	1	Accidental gun shot wound.
"	Clarendon Station, Ont.	" 26	1	Run over by train.
"	Thornhill, Ont.	" 28	1	Run over by a car.
"	Kelowna, B.C.	" 27	1	In a runaway.
"	Smith's Falls, Ont.	" 28	1	In a runaway.
Farm hand	Millville, N.B.	" 3	1	Struck by lightning.
"	Binscarth, Man.	" 21	1	Fell from load of sheaves.
Fishing and hunting—				
Fishermen	Shad Bay, N.S.	" 14	1	Drowned, boat capsized.
"	Black Rocks, N.S.	" 22	1	Drowned, boat capsized.
Fish company's foreman	Black River, Man.	" 20	1	Drowned, fell from dock.
Hunter	Nanaimo, B.C.	" 20	1	Accidental discharge of gun.
Lumbering—				
Saw mill hand	Cochrane, Ont.	" 8	1	Explosion of boiler.
"	Thamesville, Ont.	" 8	1	By shafting.
"	Monturaguy, Que.	" 7	1	Head struck by iron bar.
"	Ottawa, Ont.	" 27	1	Log rolled on him.
Logger	Portneuf, Que.	" 3	1	By fall of tree.
"	Colman, B.C.	" 13	1	By fall of tree.
"	Port Neville, B.C.	" 14	1	By fall of tree.
"	Monturaguy, Que.	" 18	1	By fall of tree.
Mining—				
Prospectors	Pitt Lake, B.C.	" 18	2	By fall of tree.
Miner	Upper Elk, B.C.	" 20	1	By fall of rock.
"	Glace Bay, N.S.	" 21	1	Caught between coal cars.
"	Cobalt, Ont.	" 26	1	Fell 70 feet in shaft.
"	Cobalt, Ont.	" 27	1	Fell 40 feet in shaft.
"	Lethbridge, Alta.	" 7	1	Explosion of fire damp.
"	Cumberland, B.C.	" 4	1	By fall of coal.
"	Westville, N.S.	" 17	1	Run over by coal cars.
"	South Wellington, B.C.	" 25	1	By falling material.
Building trades—				
Carpenter	Montreal, Que.	" 3	2	By collapse of scaffold.
"	Pointe à la Fregate, Que.	" 12	1	By falling material.
"	Vancouver, B.C.	" 15	1	Fell from scaffold.
"	Hamilton, Ont.	" 11	1	Fell from building.
Plumber	Toronto, Ont.	" 25	1	Plank fell, fracturing skull.
Metal, engineering and shipbuilding trades—				
Electrical worker	Lachine, Que.	" 4	1	Electrocuted.
"	Fort Erie, Ont.	" 7	1	Fell 200 feet from tower.
"	Hamilton, Ont.	" 18	1	Electrocuted.
Iron and steel worker	Welland, Ont.	" 13	1	Emery wheel burst.
"	Maisonneuve, Que.	" 22	1	Crushed in cog wheel.
"	Toronto, Ont.	" 13	1	Emery wheel burst, neck broken.
Food and tobacco preparation—				
Biscuit factory hand	London, Ont.	" 7	1	Elevator fell 90 feet.
Grist mill hand	Manitou, Man.	" 23	1	Caught in grain crusher.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Railway service—				
Engineer	Toronto, Ont	Oct. 13	1	Run over by train.
"	Geneva, Ont.	" 15	1	Head-on collision.
"	Leamington, Ont.	" 23	1	Fell from engine.
Fireman	Geneva, Ont.	" 15	1	Head-on collision.
Brakeman	Weyburn, Sask.	" 3	2	Head of cylinder blew out.
"	Montreal, Que	" 13	1	Run over by train.
"	St. Thomas, Ont.	" 16	1	Run over by train.
"	Woodstock, N.B.	" 22	1	Between cars.
"	Montreal, Que	" 24	1	Run over by train.
"	Ste. Flaire, Que.	" 24	1	Run over by train.
"	Campbellton, N.B.	" 22	1	Run over by train.
Car cleaner	Winnipeg, Man.	" 28	1	Run over by train.
Yardman	Depot Harbour, Ont.	" 4	1	Drowned while at work.
"	Montreal, Que.	" 13	1	Run over by train.
"	Camrose, Alta.	" 23	1	Run over by train.
"	Calgary, Alta.	" 26	1	Run over by train.
Sectionman	Outremont, Que.	" 11	1	Run over by train.
"	Rockliffe, Ont.	" 13	1	Fell from train.
"	Windsor Junction, N.S.	" 17	1	Caught between cars.
Navigation—				
Captain	Georgetown, P.E.I	" 4	1	Fell into hold.
"	Quebec, Que.	" 21	1	Drowned, fell overboard.
"	Hopewell Cape, N.S.	" 9	1	Drowned, fell overboard.
"	Montreal, Que.	" 27	1	Drowned, fell overboard.
Deckhand	Niagara river, Ont.	" 14	1	Drowned, fell overboard.
"	Kitselas, B.C.	" 20	1	Drowned, fell overboard.
Stevedore	St. John, N.B.	" 15	1	Fell 30 feet into hold.
Ship labourer	St. John, N.B.	" 14	1	Iron block fell on head.
Longshoreman	Sorel, Que.	" 27	1	Iron pulley fell on head.
General transport—				
Driver	Toronto, Ont.	" 4	1	Fell from vehicle.
"	Windsor, Ont.	" 4	1	Fell from vehicle.
"	St. Thomas Ont.	" 12	1	Run over by vehicle.
"	Montreal, Que	" 11	1	In a runaway.
"	Streetsville, Ont.	" 12	1	Thrown from a horse.
"	Toronto, Ont.	" 19	1	Run over by vehicle.
Livery stable hand	London, Ont.	" 13	1	Burned to death in stable.
Expressman	Toronto, Ont.	" 19	1	Run over by vehicle.
Driver	Montreal, Que.	" 21	1	Fell from vehicle.
"	Montreal, Que.	" 25	1	Run over by train.
Civic employés—				
Special policeman	Rainy River, Ont.	" 14	1	Clubbed to death by robbers.
Miscellaneous—				
Civil engineers	Woodworth Lake, B.C.	" 3	2	Drowned, canoe upset.
Caretaker	Montreal, Que.	" 14	1	Burned to death.
Pool room employés	Montreal, Que.	" 6	2	Burned to death.
Grain elevator hand	Midland, Ont.	" 14	1	Caught in machinery.
Domestic servant	Montreal, Que.	" 15	1	Suffocated by gas.
Clerk	Vancouver, B.C.	" 11	1	Caught in elevator.
Window cleaner	Toronto, Ont.	" 15	1	Fell 35 feet.
Steeplejack	Fort Erie, Ont.	" 10	1	Fell 210 feet.
Cement worker	Orangeville, Ont.	" 4	1	Caught in machinery.
"	Montreal, Que.	" 10	1	Fell into concrete mixer.
"	Belleville, Ont.	" 24	1	Caught in mixer.
Unskilled labour—				
Labourer	Hamilton, Ont.	" 5	1	Fell 40 feet.
"	Fort William, Ont.	" 17	1	Run over by street car.
"	London, Ont.	" 22	1	Run over by train.
"	Toronto, Ont.	" 26	1	Plank fell on head.
"	Inlins, Man.	" 28	1	Run over by train.
"	Winnipeg, Man	" 29	1	Run over by train.
"	Maisonneuve, Que.	" 4	1	Drowned.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN OCTOBER, 1910.

Driver	Lytton, B.C.	Sept. 30	1	In a runaway.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF OCTOBER, 1910.

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals, and the Department of Marine and Fisheries, which have received the signatures of both parties, together with the fair wages' schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

WHARF AND ROAD AT PORT FELIX, N.S.

SAVINGS BANK FITTINGS AT HALIFAX, N.S.

Savings bank fittings at Halifax, N.S.; names of contractors, Spencer Brothers & Turner, Limited, Truro, N.S.; date of contract, October 3, 1910; amount of contract, $1,708.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection

of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefore is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under such contracts and the amounts so paid shall be deemed payments to the contractors.

ELECTRIC WIRING POST OFFICE AT DIGBY, N.S.

Electric wiring and fittings, post office, &c., building at Digby, N.S.; names of contractors, Farquhar Brothers, Halifax, N.S.; date of contract, October 4, 1910; amount of contract, $894.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefore is filed in the office of the Minister of Public Works and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

Making and repairing miscellaneous articles of postal stores	28.00
Making and supplying articles of official uniforms	635.45

TRADE DISPUTES DURING THE MONTH OF OCTOBER, 1910.

THE month of October was exceptionally free from industrial disputes in Canada, no new strikes or lockouts of any consequence having taken place. The town of Springhill, N.S., was still affected by a strike of coal miners which had lasted for fourteen months, and building operations in Montreal were impeded by a general strike of plumbers.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during October was seven, compared with thirteen in September and eleven in October, 1910. About 156 firms and 1,573 employés were involved in these disputes, 39 firms, and 66 employés being involved in new disputes.

Loss of time in working-days.—The loss of time to employés through trade disputes during October was approximately 39,800 days, being about 520 days more than in the previous month, and 60,390 days less than in October, 1909.

Trades affected by new disputes.—One new dispute of the month occurred in the metal trades, and one in the building trades.

Localities affected by new disputes.—One new dispute of the month occurred in the Province of Ontario, and one in the Province of Alberta.

Causes of dispute.—The cause of one new dispute was a change in conditions of employment, and the cause of another was a demand for higher wages

Methods of settlement.—One dispute was terminated during the month. Two were settled by negotiations between the parties concerned. In the case of another dispute the places of the strikers were filled.

Result of dispute.—The disputes that were ended resulted in favour of the employers.

Strike of Coal Miners at Springhill, N.S.

Mining operations at Springhill, N.S., were still restricted by a strike which began on August 11, 1909, on account of the refusal of the Cumberland Railway and Coal Company to recognize the United Mine Workers of America, to grant an increase of wages, and to make certain changes in the conditions of labour. The output of the mines, however, was steadily increasing, and about half the normal number of miners were at work.

Strikes of Plumbers at Montreal, Que., and Ottawa, Ont.

No settlement was reported with regard to a strike of plumbers in Montreal, Que., which began on September 17, and which extended to Ottawa, Ont., two days later, where thirty-one men went out who had been brought from Montreal by firms of that place. The cause of the dispute was the refusal of the employers to sign an agreement providing for an eight-hour day and an increase in wages.

Strike of Iron Moulders at Carleton Place, Ont.

No settlement was reported in the case of a strike of iron moulders at Carleton Place, Ont., who went out on May 10, on account of the refusal of the employers to meet a committee of the men, or to restore the old rate of piece-work prices, which had been reduced ten per cent. on November 17, 1909, About thirty-one men were reported to be directly involved in this dispute, and seventy-five, indirectly.

Strike of Machinists and Engineers at Vancouver and New Westminster, B.C.

No settlement was reported with regard to a strike of machinists and engineers at Vancouver and New Westminster, B.C., who stopped work on July 5, on account of the refusal of the employers to grant a demand for an increase in wages from 40 to 45 cents an hour, but the places of many strikers were filled. About thirteen firms and 145 employés were affected by this dispute.

Strike of Telegraph Messengers at Toronto, Ont.

Information was received that a strike of telegraph messengers at Toronto, Ont., which was reported in the October issue of the *Labour Gazette* to have taken place on September 26, was satisfactorily adjusted twelve hours after its commencement. According to the Company, about forty messengers boys were involved in the dispute. The cause of the dispute was the introduction of a new system for the delivery of the Company's own official messages.

New Disputes.

Strike of Plasterers at Edmonton, Alta.

On October 18, about fifty plasterers, employed by 38 firms, declared a strike at Edmonton, Alta., on account of the refusal of the employers to grant a demand for a minimum wage of 70 cents an hour. No settlement of the dispute was effected during the month.

TABLE OF TRADE DISPUTES DURING THE MONTH OF OCTOBER.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.											
Mining—											
Coal miners	Springhill, N.S.	For recognition of union and increase in wages, and against conditions of employment	1	.....	900	.....	.....	.....	Aug. 11'9	.....	No settlement reported, but places of many strikers were filled.
Building trades—											
Plumbers	Montreal, Que.	For increase in wages	100	.....	325	.....	.....	.....	Sept. 17	.....	No settlement reported at end of month.
"	Ottawa, Ont.	For increase in wages	1	.....	31	.....	.....	.....	" 18	.....	No settlement reported at end of month.
Metal trades—											
Iron moulders	Carleton Place, Ont.	Strikers alleged employers refused to meet their committee or to restore the old rate of piece-work prices in force before November 17, 1909	1	.....	31	.....	75	.....	May 10	.....	No settlement reported at end of month, but places of strikers were filled.
Machinists and engineers	Vancouver and New Westminster, B.C.	For increase in wages from 40 to 45 cents an hour	13	.....	145	.....	.....	.....	July 5	.....	No settlement reported at end of month, but places of many strikers were filled.
DISPUTES WHICH BEGAN DURING THE MONTH.											
Building trades—											
Plasterers	Edmonton, Alta.	For increase in wages	38	.....	50	.....	.....	.....	Oct. 18	.....	No settlement reported at end of month.
Metal trades—											
Platers and buffers	St. Catharines, Ont.	Men stopped work because they thought a new system of costs meant a cut in prices	1	.....	16	.....	.....	.....	Oct. 12	Oct. 13	Men resumed work next day when matters were fully explained of them.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a distpue might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

Strike of Platers and Buffers at St. Catharines, Ont.

The only other new dispute of the month reported to the Department was a strike of platers and buffers at St. Catharines, Ont., who stopped work on October 12, to the number of 16, because they thought a new system of costs which was introduced, meant a cut in their piece-work prices. The men, however, resumed work on the following day, after a full explanation of the change had been made to them.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of October, and which have been reported to the Department:

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during October, 1910.

DOMINION REPORTS.

Land and Immigration.

Annual report of the Department of the Interior for the fiscal year ending March 31, 1910. Ottawa: King's Printer, 1910. Page 487. Price 40 cents.

THE Report of the Department of the Interior shows that the past year has been the most satisfactory one since the inception of the department. The net cash revenue on account of Dominion lands amounted to $3,007,390.82, an increase of $753,106.84 over the previous twelve months, and double the total revenue for the year 1899-1910. There was a corresponding increase in the number of new arrivals, free homesteads having been taken up by 41,568 settlers, representing 101,286 souls, compared with 39,081 settlers in the previous year. Over half of the homestead entries that were granted last year were made by Canadians, Americans and British settlers.

The total immigration into Canada during the past year amounted to 208,794 persons, a number only exceeded in the year 1907-08, when there were 262,469 immigrants. There were 59,790 immigrants from Great Britain and Ireland, compared with 52,901 in the previous year, 103,798 from the United States compared with 59,832 and 45,206 from other countries compared with 34,175 in 1908–9.

Trade Returns.

Report of the Department of Customs containing the tables of imports, exports and navigation of the Dominion of Canada for the fiscal year ended March 31, 1910. Ottawa: King's Printer, 1910. Page 613. Price 55 cents.

During the fiscal year ended March 31, 1910, the total exports from Canada amounted to a value of $301,358,529, compared with $261,512,159 in the previous year, and the value of the imports amounted to $391,852,692, compared with $309,756,608 in 1908–9. The aggregate trade with Great Britain increased from $204,428,319 to $244,984,407, and with the United States from $272,631,127 to $336,652,587. There was a growth in trade with Germany from $7,536,917 to $10,436,421, and the trade with South America increased $8,262,369 to $10,961,629. The total duty collected amounted to $61,024,239.21, which was nearly $3,000,000 more than the amount of duty in 1907-8.

Inland Revenues.

Reports, returns and statistics of the Inland Revenues of the Dominion of Canada for the year ended March 31, 1910. Part I Excise. Ottawa: King's Printer, 1910. Page 236. Price 15 cents.

The excise revenue of Canada during the last fiscal year amounted to $15,283,665, an increase of nearly $200,000 over the previous year. The principal increases were in spirtis, malt and tobacco, but the revenue from cigars dropped from $629,059 in 1908-9 to $432,539 in 1909-10.

Indian Affairs.

Annual report of the Department of Indian Affairs for the year ended March 31, 1910. Ottawa: King's Printer. 1910. Page 762. Price 50 cents.

According to a report of the Department of Indian Affairs, the past fiscal year has been a very favourable one for the Indians of the Dominion. There was a general improvement in the birth as compared with the death rate, there having been an excess of 397 births over deaths, a natural increase greater than for some years past. The estimated Indian population of Canada in March 1910, was 110,597, a decrease of 446 compared with the previous year. This, however, is attributed to improved facilities for correcting information as to the number outside of treaty limits. The general health of the Indians was good, there having been an absence of epidemics, except in two or three reserves, and there has been a gradual improvement in the character of their dwellings. In agriculture, the Indians hold their own with their neighbours of other races, and the growing scarcity of game in the settled communities is compelling them to resort more and more to farming for subsistence. In the past year the land cropped by the Indians amounted to 54,366 acres, which produced 1,538,579 bushels of grain and roots and 122,046 tons of hay, the total being valued at $1,374,815. They also received for beef $373,468, in wages, $1,344,599, from various industries $727,905, from fishing, $602,460, and from hunting and trapping $828,221. Educational training is provided by 241 day schools with 6,784 pupils, fifty-four boarding schools with 2,229 pupils, and twenty industrial schools with 1,612 pupils.

Railways and Canals.

Annual report of the Department of Railways and Canals for the fiscal year from April 1, 1909, to March 31, 1910. Ottawa: King's Printer, 1910. Page 386. Price 25 cents.

In the Report of the Department of Railways and Canals it is stated that the total railway expenditure for the past fiscal year amounted to $32,862,094.46, of which $21,505,975.91 was charged to capital, $2,260,214.59 to income, and $9,095,903.96 to revenue. There was expended $19,968,126.86 on the eastern division of the National Transcontinental Railway, and $53,042.63 on surveys for a line of railway to Hudson Bay. The gross earnings of the Government roads amounted to $9,647,963.71, and the working expenses to $9,095,903.96, showing a profit of $552,059.75.

BRITISH REPORTS.

Building Societies.

Fifteenth annual report by the Chief Registrar of Friendly Societies of the Proceedings of the Registrars under the Building Societies Acts; with an Abstract of the annual accounts and statements of societies, for the year 1909. Part I. Report. London: Wyman & Sons, 1910. Page 35. Price 3½d.

In the Report of the Chief Registrar of Friendly Societies on building societies, it is stated that there exist in the United Kingdom 1,919 of these societies, of which 1,864 make returns. These had 622,614 members, and the receipts during the year 1908 were £41,025,198. The sum of £9,041,613 was advanced on mortgages by 1,423 societies, and the balance due to the societies on mortgage amounted to £58,379,215. During the year 1909, fifteen new societies were established, a decrease of five compared with the previous year, but the increase of membership during the year was 2,241.

AUSTRALIAN REPORTS.

Industrial Conditions in New South Wales.

Report on the working of the Factories and Shop Act; Minimum Wage Act; Early Closing Acts; Shearers' Accommodation Act; &c., &c., during the year 1909. Sydney, N.S.W. King's Printer. 1910. Page 50. Price, 2s.

The Report of the Department of Labour and Industry of New South Wales for 1909 shows that a fairly prosperous year was enjoyed, although it was somewhat marred by a long strike of coal miners which was in existence during November and December. At the close of the year there was on the registers of the Department 4,219 factories employing 74,532 hands, of whom 50,590 were males and 23,942 females. In the previous year there were 3,883 factories employing 70,688 hands. There were 22,082 factory hands in 1909 employed in clothing and textile trades, 11,307

in industries connected with the preparation of food and drink, and 10,385 in the metal trades.

NEW ZEALAND REPORT.

Industrial Conditions of New Zealand.

Nineteenth annual report of the Department of Labour of New Zealand. Wellington, N.Z. King's Printer, 1910. Page 194.

The report of the Department of Labour of New Zealand for the year ended March 31, 1910, states that during the winter the building trades, especially in Wellington, and the iron trades were depressed, but conditions were improved later in the year by a great advance in prices of the staple products of New Zealand such as wool, frozen meat, flax, etc. During the year 8,506 applicants for work at the Government employment bureaus, with 10,164 dependents, received practical assistance, 5,059 having been found private work and 3,447, Government work. During the year 735 accidents were reported in New Zealand factories, of which seven were fatal and eighty-nine serious. This is a the rate of one accident among 105 workers, and one fatal accident among 11,115 workers.

OTHER REPORTS RECEIVED.

Canada.—Report of the Minister of Agriculture for the year ended March 31, 1910.

Report of the Dairy and Cold Storage Commissioner for the fiscal year ending March 31, 1910.

Report of the Secretary of State for External Affairs, for the year ended March 31, 1910.

Reports of the Harbour Commissioners and reports of Port Wardens, chiefly up to 31st December, 1909.

Reports, returns and Statistics of the Inland Revenues for the year ended March 31, 1910. Part III. Adulteration of Food.

Report of the Department of Trade and Commerce for the fiscal year ended March 31, 1910. Part II. Canadian Trade. 1. With France. 2. With Germany. 3. With United Kingdom. 4. With United States.

Proceedings of the Select Standing Committee of the House of Commons on Mines and Minerals.

Department of Mines. Bulletin No. 3. Recent advances in the construction of electric furnaces for the production of pig iron, steel and zinc. By Eugene Haanel, Ph. D.

Reports of analyses of Ores, non-metallic minerals., fuels, etc., made in the chemical laboratories during the years 1906, 1907, 1908, arranged by F. G. Wait, M.A., F.C.S.

Department of Mines. Geological Survey Branch. Memoir No. 6. Geology of the Haliburton and Bancroft Areas. Province of Ontario. By Frank D. Adams and Alfred E. Barlow.

Ontario.—Tenth Annual Report of the Agricultural Societies of Ontario, and of the Convention of the Ontario Association of Fairs and Exhibitions for the year 1910.

Annual Report of the Live Stock Associations, 1910.

Twenty-eight Annual Report of the Provincial Board of Health, for the year 1909.

Annual report on Highway Improvement, Ontario, 1910.

Manitoba.—Report of the Department of Public Works, for the year ending December 31, 1909.

Alberta.—Annual Report of the Department of Public Works, 1909.

Great Britain.—Statistical Abstract for the United Kingdom in each of the last fifteen years from 1895 to 1909.

Report of Inquiry into the question of the danger arising from the use of flannelette for articles of clothing.

United States.—Report of the Employers Liability Commission of the State of Illinois.

Commonwealth of Massachusetts. Labour Bulletin No. 72. Quarterly Report on the State of Employment in the organized industries, March 31, 1910.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

ONTARIO CASES.

Workman's Compensation Act. Injury to Servant.

UPON an appeal to the Divisional Court, by the defendant, from the judgement of Chief Justice Meredith, the appeal was allowed. The judgement of the Court was delivered by Mr. Justice Middleton, who said, that the gangway constructed by Webb for the use of the bricklayers was admitted to be sufficient and safe. Richardson, for the purpose of allowing the carpenters (who were permitted to use the same gangway) to bring some large mullions into the building, placed an additional plank beside the gangway. This was done some time between 2 and 5 p.m. On the following morning the plaintiff, going to his work, went up the original gangway, and, when near the top, stepped upon this plank, which had been insecurely fastened, and fell with it into the cellar. In his judgement delivered after the trial Chief Justice Meredith found that Leitch, Webb's foreman, knew that the gangway had been widened, and that it was his duty to see that it had not been rendered unsafe.

A careful perusal of the evidence satisfies us that the finding that Leitch knew of the placing of the additional plank cannot be supported.

Webb had discharged his duty to his employés when he constructed the original safe and sufficient way. This never was altered. Richardson placed beside it an unsafe way for his own purposes, but in such a position as to invite use by anyone going into the building. This may have imposed a duty upon Webb, upon his learning of its erection, to inspect it and ascertain its condition—as to this we say nothing—but, in the absence of any knowledge on the part of either Webb or his foreman, there is nothing upon which liability on Webb's part can be founded. The appeal must be allowed—with costs, if demanded.

(Christie v. Richardson, 2 Weekly Notes, 42.)

Alien Labour Case at Hamilton—Fine of $600 Imposed.

Jacob Rackhoff, a Russian Jew, was, on October 27, fined $600 in the police court, after pleading guilty to having illegally brought alien labour into Canada. Rackhoff operates a tailor shop. The case was brought to light by the Garment Workers' Union, who asked the Department of Immigration at Ottawa to send an officer to investigate it. An officer was dispatched to this city and reported his findings to Ottawa. Later, the assistant superintendent of immigration arrived in the city, and, after conducting an investigation and hearing the facts revealed by the Union, applied to the police for a warrant for the arrest of Rackhoff. Rackhoff was later allowed out on $500 bail.

When the case was gone on with, Rackhoff was charged that he did, within the past three months, assist persons to enter the country in an illegal manner. A plea of guilty was entered and petition made that the full penalty be not inflicted. His Worship then imposed a fine of $100 for each offence, making the total fine $600.

Mechanics' Lien Act.—Motion to Remove One Claim against Lands of Separate Owners.

Upon an appeal by the defendant from an order of the Master in Chambers dismissing the appellant's motion to remove the registry of a claim of lien and a certificate of an action pending, it appeared that thirty-four mechanics' liens had been registered against four lots, owend by separate owners, and that there were eight certificates of a pending action based upon some of these liens. One of the liens was that of the plaintiffs, and purported to be based upon a contract with the defendant for the sale to him of lime to be used in the erection of certain houses

upon four lots, the contract being made on April 1. The lien was registered on May 11, and the only thing alleged in the statement of claim in the action as to the defendants other than the present defendant (Grimwood), was that they "or some, or one of them" own the lands. The lien itself claims against defendant's estate in the lands, as well. Upon the defendant's motion to remove the lien, the question argued was that there could be no valid lien upon several buildings, and the lien must, therefore, be vacated.

Mr. Justice Middleton, who heard the motion, said in part, that sections 6 and 8 of the Mechanics' Lien Act give a lien upon the estate or interest of the owner in the buildings and appurtenances and the land occupied thereby and enjoyed therewith. The framers of the Act probably did not have present to their minds the case of an owner making a contract covering several distinct buildings. The attitude of the defendant, who moves to vacate the lien, is that the right to alien being a statutory right, the statute must be strictly construed, and, unless the claimant can bring himself within the strict words of the Act, he is without remedy. There is no binding authority compelling me so to hold. Dunn v. McCallum, 14 O.L.R. 249, the only Ontario case having even a remote resemblance, is clearly distinguishable, and I prefer to adopt a mode of dealing with the question which will not defeat the spirit of the statute by a too literal adherence to its letter. Dunn v. McCallum differs materially from the case where one owner chooses to enter into an entire contract for the supply of material to be used upon several buildings. From the nature of the contract the burthen of proof is here shifted, and the claimant can ask to have his lien follow the form of the contract, and that it be for an entire sum upon the buildings. If the owner desires to invoke the statute to the extent of having the lien upon a building confined to the value of the material going into that building, the burthen of proof is upon him to show the facts, which must be peculiarly within his own knowledge. And if, as often must be the case, the facts cannot be ascertained, less violence would be done to the statute by construing it according to its spirit than by rendering it useless in many instances in which the legislature apparently intended a lien to exist "When, after the lien has attached to several distinct buildings, the owner has sold one or more, the equities which then arise between the owners of the several buildings may well be worked out upon the principles applied where part of a property subject to a mortgage is sold, and the mortgagee seeks to enforce his remedy against both parcels. Although this is the first case of the kind in this province, the question has arisen in many of the United States courts upon similar statutes; great care is necessary in dealing with these cases, as many turn upon particular provisions not found in our statutes, and the result is by no means uniform."

Mr. Justice Middleton also said that, on the material before him, he could not say that the defendant had so clearly demonstrated that the lien was bad as to enable him (the judge) to say that it should be vacated upon the persent summary application. Claiming a lien upon too much property will not invalidate it altogether. While he dismissed the motion, he thought the argument before him had probably contributed something toward the adjustment of the rights of the parties, and so he made the costs payable in the cause, and not against the defendant, whose application he dismissed.

Censured Railway for Man's Long Duty.

The jury that investigated the death of Edward Thomas Crane, the watchman at the Dunn avenue crossing, Toronto, who was killed at his post recently, returned a verdict of accidental death, but censured the Grand Trunk Railway Company for allowing a man to remain on duty for twenty-one hours, as Crane had done. Coroner Lynd also commented on the hardship of working such long hours, and especially for a man of sixty-eight years of age.

The accident occurred shortly after seven, and, according to Peter Morrissey, the first witness examined, he would have

been relieved in fifteen minutes. A moment before the accident, Leonard Harris, driver of a milk wagon, passed Crane and spoke to him. He had only gone a few yards, when he heard the engine whistle, and looking back saw Crane hurled into the air. Harris' father was struck by an engine at the same crossing some years ago. The evidence of George Teale, of Belleville, the engineer, was to the effect that it was not customary to blow the whistle at this crossing, but seeing Crane in the way he did so. He believed that Crane thought he was out of the way.

The verdict read as follows:—

"We, the jury, find that Edward Thomas Crane, watchman, came to his death on September 12 through being struck by an engine on the Grand Trunk Railway, at Dunn avenue crossing; that it was an accident, but we consider the Company censurable in requiring or allowing the watchman to be on duty for twenty-one hours."

Conductor Fined.

The Canadian Pacific Railway, through one of its conductors, was fined $20 and costs, the penalty the conductor was called upon to pay for blocking traffic at the foot of Yonge street, Toronto, for longer than the period allowed by the city by-laws. Constable Holmes noticed a freight crossing Yonge street. It was a long one, and was making slow progress. The constable pulled out his watch and found that it took the train just seven minutes to cross the street. Then he went for the conductor of the train, J. P. Rafferty, and took his name. Rafferty appeared before Magistrate Kingsford in the afternoon Police Court, and acknowledged that he was at fault. He informed the Magistrate that the train contained forty-five cars, and that he had considered it would cause less inconvenience for him to take the train right through than to break it up.

Damages for Wife's Death and Mutilated Thumb.

Chief Justice Falconbridge and jury awarded R. G. Johnston, Gananoque, $3,000 against the Thousand Island Railway Company for the death of his wife. Mrs. Johnston was killed when a shunting engine smashed the rig she was driving. The action was tried at Kingston.

Mr. Justice Middleton, in single Court, has approved of the settlement arrived at between the Toronto Carpet Company and Albert Skeffington, whereby the latter, an infant, and his father each get $200, as recompense for a mutilated thumb, sustained by the younger Skeffington while in the employ of the Company.

Workmen's Compensation for Injuries Act—Death of Workman.

In an action by the widow and administratrix of a workman who was killed while in the employment of the defendants, to recover damages for his death, the jury found that the defendants were guilty of negligence that caused the accident, that the death was caused by a defect in the construction of the ways and plant, and also by reason of the negligence of the superintendent, whose order the deceased was bound to obey and did obey, while acting in obedience to such order; and that the plaintiff was not guilty of contributory negligence. In addressing the jury, counsel for the plaintiff told them that they should find what was equal to the wages for three years of any person in the same grade as the plaintiff, which would amount to between $2,200 and $2,400, and that from this they should deduct $1,000 for insurance, which the plaintiff had received. The trial judge (Mr. Justice Clute) in his charge to the jury, endeavoured to correct this statement of plaintiff's counsel, which the judge regarded as a misapprehension of the law, and upon the jury returning a verdict of $1,200, the judge thought that they had deducted the $1,000 for insurance, but did not say so in their verdict. Thereupon, he asked them if they meant to find that $2,200 was the amount of the damages and from that had deducted $1,000, leaving $1,200 as the verdict, and to this they all answered that that was what they meant. The judge was of opinion that there was

no doubt, upon the evidence, that the damages would amount to at least $2,200, and the question to be decided was whether the verdict should be entered for $1,200 or $2,200. He was of opinion that, had the damages in the case been assessed under Lord Campbell's Act, without the limitation imposed by the Workmen's Compensation for Injuries Act, it could scarcely be doubted that, having regard to the earning power of the deceased, his age, and that of the plaintiff, a very much larger verdict would have been given. By statute, in England, (8 Edward, 7 chapter 7) it is provided, that in assessing damages, under Lord Campbell's Act, there shall not be taken into account any sum paid or payable under a contract of insurance, whether before or after the passing of the Act. This is a charge in the English law by the statute named. Section 7 of the Workmen's Compensation for Injuries Act, which limits the amount of compensation, also provides that such compensation, shall not be subject to a deduction or abatement by reason or on account of or in respect of any matter or thing whatsoever, save such as is specially provided for under section 12 of the Act and section 12 has no reference to insurance. Having regard to this section the judge was of opinion that the jury having found the damages to be $2,200, ought not to have deducted the $1,000 for insurance, and, there being no dispute as to their having found the amount of damages, he considered he was entitled upon their answers, to direct judgement to be entered for the plaintiff for $2,200, which he accordingly did, with costs of the action.

(Dawson v. Niagara and St. Catharines Railway Company, 2 Weekly Notes, 85.)

QUEBEC CASES.

Picture Show Proprietors Fined.

Nineteen moving picture proprietors have been fined $20 each in the Recorder's Court by Mr. Recorder Wein, Montreal, for refusing to pay the $500 license imposed on these shows by the city. This is the third successive judgement in these cases which has been rendered in favour of the city. The license was raised to $500 on the recommendation of Chief Tremblay that a city fireman be stationed in each theatre to prevent fires and panics. This was done, and the extra tax goes to pay the firemen's salaries. The defendants appealed, but their case was dismissed by Judge Davidson in the Superior Court. These further convictions followed, showing that the city is fully determined to carry out their by-law.

Workman's Compensation.

Judgement against a firm of contractors was recently rendered by Mr. Justice Archer, Montreal, in an action taken under the Workmen's Compensation Act. C. Legault, a workman, was injured in January, 1909, while working on the Jacobs' building at the corner of Alexander and St. Catherine streets. He sued the contractors, Messrs. D. G. Loomis & Sons, claiming permanent injury. His Lordship gave judgement for $140 per annum, with a lump sum of $140.50, for partial incapacity from the date of the accident.

Damages for Damaged Walls.

In the case of Desroschers vs. Boland, which was tried by Judge Macdonald in the court of King's Bench, a verdict was awarded the plaintiff for $2,000 and costs. The action arose in connection with a building belonging to Controller Harvey, situated on the corner of Princess and James streets, the plaintiff having a contract for the building of certain walls, while the defendant, had a contract in connection with the "needling" up of the building. The plaintiff claimed that Boland Brothers, the defendants, had done their part of the contract in such a negligent manner as to cause the walls on one side of the building to fall out, and thereby occasioning a loss to him, for which he claimed the sum of $3,000, the cost of repairing the portion of the building which had tumbled down. The defendants con-

tended very strongly that they were in no way liable for the accident, that they were working under the directions of the plaintiff in connection with the matter, and that the loss which he sustained by having to rebuild a portion of the structure was caused by his own carelessness, as they had followed his instructions and direction throughout, and they asked the court to exonerate them from any blame in the matter. His Lordship, however, took another view of the matter and entered verdict as stated above, in favour of the plaintiff, Desroschers.

MANITOBA CASES.

Successful Appeal against Railway Accident Insurance Company.

The appeal against the decision of Judge Mathers by the plaintiff, in an action brought by T. S. Haines against the Canada Railway Accident Insurance Company, to secure the insurance upon the life of his brother, has been allowed. The action was brought by the administrator of the estate of the late Haines to recover $1,000, the amount of a policy of insurance on the life of the deceased. It appears that on the 21st of November, 1908, Haines, who was a fitter in the employ of the Canadian Pacific Railway at their shops in this city, was down in the city with a number of men and was indulging in drink to a considerable extent. At a few minutes after nine was seen by a witness, who was called at the trial, on Market street, going towards Main, and this was the last trace of him alive, his body being found in the following spring, 1908, by Captain William Hall, floating under the ice in the Red river at the foot of Notre Dame street, and the medical testimony showed that the body must have been in the water for a period of six months. Under the terms of the policy notice of the death of the insured had to be given to the company insuring, within one month after the occurrence of the death, and as this had not been given the payment of the full amount was resisted, the defendants paying into court $100, the amount provided for where death occurred under certain circumstances.

Chief Justice Mathers, before whom the case was tried, decided in favour of the defendant company, holding that under the terms of the policy they were not liable for the payment of the $1,000, and to hold otherwise would be to make a new and different contract to that which was entered into between Haines and the defendants. The plaintiff appealed to the Court of Appeal which held that the trial judge had properly found that the defendant company had not proved the defence they raised, that the deceased came to his death while under the influence of intoxicating liquor. The onus was upon them to prove that and they had failed in establishing their contention. With regard to giving notice of the death from injury the condition in the policy required that in case of death from injury "written notice by or on behalf of the insured" shall be given. It was impossible for a dead man to send written notice of his own death, and if he is killed instantaneously it is imposssible for him to give notice of the injury. A dead man cannot appoint an agent and a survivor cannot constitute himself an agent to act on behalf of a dead man. As laid down in Halsbury's laws of England, where a condition in a contract is physically or legally impossible of performance, then performance is excused. In the present case it was impossible for any person to have given notice of the death of the deceased or to have furnished proofs of how his death took place until after the expiration of the time limited by the condition. The time for giving notice and furnishing proofs only commenced to run upon the fact of the death of the deceased becoming known. A verdict should be entered for the plaintiff for $1,000 and interest from the commencement of the action, with costs of the trial and of the appeal. The judgement of the Court was delivered by Mr. Justice Perdue. Howell, C.J.A., and Cameron, J. A. concurred; Richards, J. A., dissented as to the amount recoverable,

but held that notice had been properly given.

A Farmer Gets Damages.

The Canadian Pacific Railway Company has been ordered to pay damages amounting to $3,353 to T. E. M. Banting, of Wawanesa. The action was tried before Chief Justice Mathers, and at the close of the hearing his lordship gave his decision. The claim was for the destruction by fire from a locomotive of the defendant Company last April, of farm buildings and contents, including implements and some grain, also several stacks of hay in a field. The plaintiff was also awarded the costs of the action.

ALBERTA CASES.

Delays in Paying Workman.

In giving judgement for wages to six Grand Trunk Pacific labourers, Magistrate Byers, of Edmonton, declared the treatment of its employés that had come under his notice is disgraceful. "I myself have known men to have to wait for three weeks before they could leave town when they had another situation ready for them at some other place. During this time they had to pay their board and wait round for their money, besides the loss of that time. While this may not be very much to a wealthy Company like the Grand Trunk Pacific, it is a very large item to a poor working man who has to work from day to day in order to live." Addressing the Grand Trunk Pacific counsel, the magistrate advised him to bring the state of affairs forcibly before the management and endeavour to keep such a name as the Grand Trunk Pacific out of common police court trials. It appears that the Grand Trunk Pacific has no pay office at Edmonton, and authority must be secured from Winnipeg before pay checks can be honoured. Since last spring 100 of these cases have been settled in police court.

SASKATCHEWAN CASES.

Brakeman Charged with Trying to Drug a Passenger.

Charged with attempting to chloroform a lady passenger on a Canadian Pacific Railway eastbound train number 2, William Patrick Lynn, a Canadian Pacific Railway brakeman, has been committed to stand his trial by Magistrate Heffernan, at the barracks of the Mounted Police. The victim of the alleged offence, Mrs. Blancheflower, was travelling with her husband, Assistant Paymaster Blancheflower of the British navy, from Vancouver to Montreal, according to the prosecution, was occupying a berth by herself when the attempt to chloroform her was made somewhere between Medicine Hat and Swift Current. Mrs. Blancheflower stated that she awoke with a choking sensation, just in time to see an arm withdrawn from the curtains. She caught sight of the trainmen's lantern and uniform such as trainmen on the Canadian Pacific Railway wear. The smell of chloroform was around her and arousing her husband in the berth opposite, she informed him of what had happened. Calling his friend, the husband handed him a pillow for examination. The opinion passed was that a portion of the pillow had been saturated with chloroform. Complaint was made to the conductor and as a result steps were taken by the Canadian Pacific railway officials. Lynn was charged with having unlawfully and with evil intent tried to use chloroform or an otherwise stupefying operating drugs on Mrs. Blancheflower. Bail was fixed at a large sum. The defence is being undertaken under instructions of the Brotherhood of Locomotive Trainmen, of which society Lynn is a member.

UNITED STATES CASES.

The Legality of a "Boycott."

An important "decision" has just been given by Judge Manton, of Toledo, declaring a boycott legal. The judge held

with a decision given by Justice Holmes, now of the United States Supreme Court, who in his argument said: "If it be true workmen may combine with a view, among other things, of getting as much as they can for their labour, just as capital may combine with a view of getting the greatest possible return, it may be true that when combined they have the same right that combined capital has to support their interests by argument, persuasion, and the bestowal and refusal of these advantages which they otherwise lawfully control.

"The fact that the immediate effect of the act by which the benefit to themselves is to be gained to the injury of their antagonist does not necessarily make it unlawful any more than when a great house lowers the price of certain goods with the purpose and with the effect of driving a smaller antagonist out of business."

Judge Manton ruled: "The right of defendants to publish and make known to the public their grievances, real or imaginary, against the plaintiffs in the manner the evidence shows they acted, is guaranteed by the constitution of the State."

An Important Labour Action.

An important labour action has been commenced in the United States circuit court at St. Louis, Missouri, against the American Federation of Labour and the Bucks Stove and Range Company of St. Louis not only to restrain the officers of the latter from carrying out an alleged tentative agreement with officers of the former to make the St. Louis institution a "closed shop", but setting up a claim for damages of $750,000 under the Sheridan Act. The case includes among the defendants, Samuel Gompers president, John Michell, vice-president, Frank Morrison, secretary, and other officers of the federation and some fifty others prominently identified with union labour in America.

BRITISH CASE.

Injunctions against English Trade Unions.

Labour matters in England have taken on a new aspect since Parliament adjourned, in consequence of the issue of many injunctions against the trade unions. Twelve of the larger trade unions affiliated with the Labour Representation Committee have been enjoined in the courts from using any of their funds for political purposes. Twelve injunctions had been issued up to the end of August. It is probable that the number of injunctions will have been increased before Parliament reassembles in November and the Government makes its announcement as to the policy it will adopt to aid the unions at this crisis in their history. All these injunctions follow and are based on the judgement of the House of Lords in what is known as the Osborne case—the case in which Walter Victor Osborne, a porter at one of the London stations of the Great Eastern Railway Company, asked that the Amalgamated Society of Railway Servants be restrained from spending any of its funds or making levies on its members for political purposes. The final decision of the House of Lords adverse to the union was handed down in December, 1909.

THE

LABOUR GAZETTE

DECEMBER, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF NOVEMBER, 1910.

I.—GENERAL SUMMARY.

THE date at which cold weather sets in has a very important bearing on general industry and employment throughout Canada at this season of the year. The weather during the past month has been unusually mild over a large area of the Dominion, with the result that outside operations were on a scale of exceptional activity. Agriculturists had a very favourable month for the completion of ploughing, while work in connection with mining, sawmilling, railway construction, civic improvements and building contracts was prolonged until the closing days of the month. The season of navigation on the St. Lawrence and the Great Lakes ended in the last week of the month, with heavy closing westward shipments of general merchandise. The volume of trade was well maintained, but railway earnings and bank clearings, towards the end of the month, showed a discontinuance of the gains, compared with 1909, which have been noted for several months past. Returns for the month as a whole, however, were higher than for November, 1909. General labour, at the close of the month, was regarded as in an exceptionally favourable situation with regard to the approaching season of inactivity, as a result of the continuous active employment and favourable wages rates of the past summer, as well as the buoyancy of manufacturing and other indoor occupations.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during November, 1910.

Printing trades.—Bookbinders and rulers at St. John, N.B., obtained an eight-hour day.

Civic employés.—Linemen and groundmen (20) at Calgary, Alta., received an increase in wages, the latter from 25 to 27½ cents per hour, and the former from $3.50 per day of nine hours to 42½ cents per hour with a nine-hour day. Teamsters, labourers and power station and insinerator employés at the same point received increases. Teamsters (50) and labourers (250) employed by the Corporation of Victoria, B.C., had their wages advanced, in the former case from $6 to $7 per day for man and team, and in the latter case from $2.50–$2.75 to $2.75–$3 per day.

The schedule of the Ontario Provincial Police force has been raised—the minimum from $750 to $800, and the maximum from $1,000 to $1,100.

Street railway employés.—Motormen and conductors in the employment of the Cataract Power Company, of Hamilton, Ont., including the street railway system and suburban lines, had their wages ad-

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

vanced 2 cents per hour. An increase to the same class was granted at Calgary, Alta.

Miscellaneous.—Clerks employed by the Bank of Montreal were notified of a general increase in salaries ranging from $200 per annum upwards.

Interruptions to Industries.

Among industrial establishments, &c., destroyed by fire or through other causes, during November, 1910, as reported in the press of the Dominion, the following may be mentioned.

Nova Scotia.—The schooner *Mercedes* was wrecked off Digby; a store and the scale house of the open hearth furnaces were burned at North Sydney. Heavy gales on November 28, off the Nova Scotia coast caused considerable damage to shipping.

New Brunswick.—Granary and residence at Milledgeville, loss, $1,000; four tenements at Milford, loss, $2,000; laundry at St. John, loss, $15,000; machine shop at Woodstock, loss, $21,000.

Quebec.—Plant of stone works at Bedford; granary and farm house at Bedford, loss, $2,000; granary at Granby, loss, $2,500; stables, 24 horses and harness at Longue Pointe, loss, $10,000; manufacturing plant at Matane, loss, $75,000; granary and contents at Norse's Lake. At Montreal, skating rink, loss, $60,000; Greek church, loss, $5,000; considerable damage was caused by the bursting of a water main; sash and door factory loss, $50,000, (100 men out of employment); kitchen of hotel, loss, $3,000; railway warehouse, loss, $50,000. Carriage shop at Pierreville; outbuildings and two dwellings at St. André Avellin, loss, $3,000; granary at St. Georges de Windsor, loss, $1,500; school house and two stores at St. François du Lac, loss, $8,000; stable and contents at Three Rivers; bakery at Three Rivers. On November 6, the coasting steamer *General Wolfe* went ashore off the coast of Labrador and became a total wreck. On November 11, the schooner *Rose* was wrecked in the Gulf of St. Lawrence

Ontario.—Chemical works at Berlin, loss, $15,000; cotton factory (partial) at Cornwall; outbuildings and 22 pigs at Douro; business block at Flesherton, loss, $13,500; railway station at Goderich, loss, $25,000; factory at Gananoque, loss, $100,000; chair factory at Hanover; foundry and three dwellings at Humberstone, loss, $19,000; planing mill at Humberstone, loss, $7,000; storehouse at Kingston, loss, $3,000; stables and seven horses at Lambton; outbuildings and residence at London, loss, $1,500; granary and contents at Montague, loss, $2,000; flour mill at Mount Brydges; chain and trap works (partial) at Niagara Falls, loss, $1,300; business block at Ottawa, loss, $13,000; storehouse at Brockville, loss, $25,000; flour mill at Petrolea, loss, $10,000; foundry at Port Colborne, loss, $15,000; skating rink at Sault Ste. Marie, loss, $30,000; bakery at St. Catharines, loss, $10,000; outbuildings at Rice Lake, loss, $3,000; planing mill at Stevensville, loss, $20,000; railway station at Thorndale. At Toronto, seed store, loss, $7,000; club house, loss, $50,000; carriage works, loss, $2,000; store, loss, $2,000; drug store, loss, $6,000; tenement house, loss, $3,000. Planing mill and residence at Welland, loss, $15,500; granary at Winchester, loss, $8,000; furniture factory at Wingham, loss, $12,000; granary at Welland, loss, $2,000.

Manitoba.—Insane asylum at Brandon, loss, $390,000; business block at Gilbert Plains, loss, $12,000; general store at Grassy Lake, loss, $25,000; stable, packing house and twelve horses at Winnipeg, loss, $12,000; wholesale drug house at Winnipeg, loss, $215,000.

Saskatchewan.—Newspaper office at Duck Lake, loss, $18,000; livery and 18 horses at Carnduff, loss, $15,000; stores at Midale, loss, $30,000; blacksmith's shop at Yorkton, loss, $3,000.

The annual report of the Superintendent of Insurance, Canada, for the year ending December 1, 1909, shows the fire losses to have been $8,646,826 in the year, less than the year before by $1,632,629. The premiums paid amounted to $17,049,474, an increase of $22,199 over 1908. The loss rate for the past year was 50.72, 13.49 below the average of the past forty-one years.

Conditions in the Industries and Trades.

Conditions of employment during November, in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

In the work of ploughing, marketing and making preparations for winter, agriculturists were assisted by the mild weather which prevailed throughout the farming sections of the Dominion during almost the entire month. Good progress was accordingly made in the preparation of the land for spring sowing; cattle were enabled to be kept in the pastures until an unusually late date; and wheat growth was satisfactory. Prices of farm produce were well maintained, with dairy produce high. The demand for farm labour was light, except in connection with the preparation of fruit trees for winter. Threshing was still in progress in a few localities. From Western Canada the grain movement has been steady; cattle shipments have been heavy for some time past, 80,000 head having been shipped by the Canadian Pacific Railway Company alone from its stock yards at Montreal, Que., to the British market.

The *Census and Stastistics Monthly*, for November, gives good reports for nearly all field crops of the Dominion, potatoes alone indicating partial failure. The following is a summary:—

Turnips and other field roots show a quality of 88.57, a yield per acre of 402 bushels and a total yield of 95,207,000 bushels for a crop of 236,622 acres. Hay and clover are computed for 8,515,400 acres and a yield per acre of 1.82 ton. The quality is 90.45 per cent. and the total yield 15,497,000 tons. Fodder corn has an estimated yield per acre of 9.38 tons, which upon an area of 271,960 acres gives a product of 2,551,000 tons. Sugar beets are grown most extensively in Ontario and Alberta, where they supply roots for three sugar factories. The area in crop this year is 16,000 acres, which is a substantial increase upon last year. The yield per acre is 9.69 tons, the total yield 155,000 tons and the quality 93.15 per cent. The roots supplied to the Berlin factory are testing seventeen per cent. of sugar and at the Wallaceburg factory sixteen per cent.; but a product of 5,000 acres in Ontario is being shipped to factories in Michigan. The product of 8,200 acres in that province is marketed at Wallaceburg and Berlin, where the average price is about $5.86 per ton or better than $57.80 per acre. Computed at the average local prices the market value of potatoes this year is $33,446,000, of turnips and other roots $21,444,000, of hay and clover $149,716,000, of fodder corn $11,957,000, and of sugar beets $887,000,—making a total for these five crops of $217,450,000 or $14,950,000 more than last year. The report on fall wheat sown this year shows an area of 790,300 acres, whereof 682,500 acres are in Ontario and 107,800 acres in Alberta. Last year the area was 609,200 acres for Ontario and 98,000 for Alberta. The condition of the crop is reported at 98.40 per cent. as compared with 93.60 last year. The per cent. of ploughing completed this year compared with the area planned for is less than last year, but the report is made for a period one month earlier. The per cent. of summer fallowing compared in the same way is somewhat lower, but increases are shown for Nova Scotia, Quebec, Saskatchewan and Alberta. This work is carried on chiefly in Ontario and Alberta.

The Official Crop Bulletin of the Department of Agriculture of Ontario gives the following summary:—

Fall wheat may be classed as better than an average crop. Spring wheat was fully up to the standard this year in every respect. The new fall wheat—an increased acreage has been sown this fall, and as most favourable conditions existed at seeding and since that time the crop is now looking more promising.

Barley.—This grain has turned out well, taking the province over.

Oats.—Oats were rather short in the straw, but the heads were well filled with grain of good weight.

Rye.—Classed this season as from fair to good.

Peas.—This crop has been somewhat discouraging to most growers this year. The vines suffered from drought, and a green apis also affected them.

Corn.—While spring conditions were unfavourable for this crop, the summer and fall were ideal for its growth and the term "Splendid" is sometimes used by correspondents in describing the result.

Tobacco.—This crop ranges from fair to good. The leaf is said to be curing well.

Beans.—May be described as a medium crop.

Buckwheat.—The crop generally may be classed as an excellent one as to both yield and quality.

Clover seed.—Ontario farmers are paying more attention than formerly to the raising of clover seed. The season has been a favourable one for this purpose, and the general results have been satisfactory.

Potatoes.—This crop is credited with a large average yield, and many o the returns speak of their excellent quality.

Turnips.—There will be a fair yield, and although as a rule only medium in size, the quality of the turnips is in general first class.

Mangels.—A good crop of mangels of excellent quality is reported. Carrots —Where grown this season they were a success.

Sugar beets.—These roots were a good crop where grown.

Fruit.—The season of 1910 will be remembered as one of the poorest on record for apples, all the good winter varieties being exceedingly scarce.

Live stock.—Fall pastures have been all that could be desired, and where not overstocked have kept grazing animals in fine condition. All classes of live stock have been remarkably free from serious diseases. Horses are in considerable demand. and at higher prices than formerly. Cattle did unusually well on the grass, and all ages and classes can find a ready market at better values than for many years. Young beef animals are especially hard to procure. There have also been too few sheep for the demand. A large and steady traffic has been done in swine.

Dairying.—The milk flow was well maintained by the excellent fall pastures, thus prolonging the dairy season. The general quality of both creamery and home-made butter has been high this year.

Poultry.—The good prices obtained for poultry products this season have led farmers to give more attention to this industry. Eggs have been in great demand all season.

Reports of wheat inspectors at Winnipeg, for the first two months of the current crop year ended Ooctober 31, as compared with the corresponding period of last year are as follows:—

	1910-11 Cars.	1909-10 Cars.
No. 1 hard	8	228
No. 1 northern	5,351	15,549
No. 2 northern	11,398	11,921
No. 3 northern	8,442	3,529
No. 4	2,447	501
No. 5	766	108
No. 6	434	33
Other grades	1,915	2,259
Winter wheat	190	396
Total	30,941	34,524

It will be noted that there has been a decrease in the chief milling grades.

The three-year experiment in the making of whey butter, in which twelve Prince Edward county factories have cooperated, has proven a success. This season alone 61,004 pounds of whey butter have been manufactured from May to October, for which the dozen factories received as their share $12,643.18.

There has been a marked increase during the present season in the export of cream from border sections of the Provinces of Quebec and Ontario to the United States market, resulting in a decreased manufacture of butter in these localities.

The export trade in apples during the present year shows a considerable decline. A notable event in the history of apple growing in Canada was the holding

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

City and district of correspondent.	Agricultural operations.	Fishing.	Lumbering (including saw-milling.)	Mining.	Manufacturing.	Railway construction.	Building trades.

of the first Canadian International Apple Show, at Vancouver, B.C.

The report of the Elevator Commission appointed by the Government of Saskatchewan, in February, 1910, was issued during November. The report recommends a comprehensive plan of elevator management under the control of a co-operative organization of farmers, the government to aid financially, the Executive of the Saskatchewan Grain Growers' Association to be the provisional board of directors. Twenty-five elevators are proposed as the minimum number to be operated by the Company before the organization of the central body. The report is an extended document, the Commission being unanimous in all its findings.

The Saskatchewan Grain Growers' Association has arranged for a series of conferences of the local associations, for the purpose of consolidating and unifying the views of the members.

The annual convention of the Ontario Fruit Growers' Association was held at Toronto.

Fishing.

Stormy weather interfered with operations off the Nova Scotia coast, and mackerel and herring were reported scarce. Oystering was reported in progress in Prince Edward Island, but there was little activity elsewhere. Catches have been generally light, and at Grand Manan, Que. some hardship is feared in consequence, though prevailing high prices have at many points compensated for the decreased return. Some heavy captures of herring were reported in Lake Erie, but operations on the Great Lakes generally were quiet. Quietness also prevailed in British Columbia.

The last of the sealing fleet of five vessels has returned, the value of the catch this year being estimated at upwards of $150,000, being the most successful for local schooners in some years past.

The Canadian Northern Pacific Fisheries Company, capitalized at $2,500,000, has been organized, with the object of carrying on extensive fishing operations in the waters of British Columbia. The Company recently purchased the holdings of the Pacific Whaling Company. Among the extensions planned is the establishment of a new whaling station in Northern British Columbia, to operate in 1911, and to cost $120,000. Five new whalers will be operated, and halibut fishery exploited.

The annual report of the Marine and Fisheries Department, Canada, tabled in the House of Commons, November 21, shows the total value of all kinds of fish and fish products taken by Canadian fishermen during the past fiscal year to be $29,629,169, being $4,178,084 in excess of the return for 1908, and $149,607 higher than the returns of 1905, which was previously the highest year on record. The total number of men practically engaged was 90,357.

Lumbering.

The large mills of Quebec and New Brunswick had closed down by the end of the month, owing to snow and ice. In Ontario, however, some of the mills were still in operation. The season on the Miramichi river, N.B., has been slightly below the average. There has been a good movement of lumber from Ottawa valley points. The supply of labour for the winter camps was more abundant, though select men were in demand. Hardwood prices continued strong. In British Columbia some dullness in export trade was reported, but the mills were for the most part working steadily under favourable weather conditions. Tie production will be on a large scale in northern Ontario and in the Western Provinces during the coming winter, and some scarcity of labour is feared in this connection.

Mining.

A good month's employment was reported in the Nova Scotia collieries, conditions comparing on the whole very favourably with the corresponding period of last year. Strike conditions continued at Springhill, N.S., but there was some enlargement in output. It was estimated at the close of the season of coal shipments to the St. Lawrence markets that total

shipments were less by 33,000 tons than in 1908, the year 1909 not being available for comparison, owing to the strike of the Dominion Coal Company's employés in that year. The shipments from Cape Breton showed an increase of 47,000 tons, the shipments from Pictou a decrease of 35,000 tons and from Inverness a decrease of 21,000 tons. In New Brunswick some heavy flows of gas were struck during November. Asbestos, graphite and mica mining in Quebec continued active until towards the end of the month. Extensive developments in feldspar mining in the Kingston district of Ontario are expected. Some important strikes were reported from the Cobalt camp, while conditions in the Gowganda and Porcupine regions were very active. Development work in the last named was particularly heavy. Coal production was heavy in the Alberta mines. The coal and metal mines of British Columbia were producing steadily, full staffs being employed by most of the large companies.

Manufacturing.

Factories continued very active, and in most branches and localities a good winter's employment is expected. The Imperial Flour Milling Company, of Toronto, has been incorporated with a capital of $2,000,000.

Railway Construction.

Exceptionally good progress was made on the varous contracts owing to favourable weather conditions, though gangs were materially reduced in certain sections.

The entire length of the Grand Trunk Pacific Railway in the Province of New Brunswick, from Moncton terminus to the Quebec boundary line, is 256 miles. For construction purposes this was divided into six contracts commencing at Moncton. Contract No. 1, Moncton to Chipman, 50 miles, is now completed. The greatest engineering difficulties of this contract are the steel viaduct across Canaan river, 532 feet long and 90 feet high, and the embankment across Coal Creek, 1 mile long, 85 feet high, and requiring over 600,000 cubic yards to fill. Contract No. 2, 8 miles long is about completed, with the exception of some ballasting. Contracts Nos. 3 and 4 covered 108 miles. These are completed, with t exception of the superstructures of the Cains' and Miramichi rivers bridges. Lake Nappadogan, 120 miles from Moncton, is a divisional point, and extensive yards and large offices are being constructed. Contract No. 5 comprises 31 miles. This contract presents some very difficult engineering features, viz.: The tunnel at mile 178, through a ridge of igneous trap, 400 feet long and 20 x 24 feet wide and deep, now completed, and the Salmon river viaduct, 4,000 feet long, 200 feet high, and requiring over 7,000 tons of steel, which will not be completed until next season. Contract No. 6, 61 miles, to Quebec boundary line, is also about completed. At Edmunston the second divisional point, extensive yards have been built. Work is about suspended for the season, with the exception of bridge building, as the unfinished work, principally ballasting, cannot be well carried on after the advent of frost and snow.

The International Railway across northern New Brunswick, from Campbellton on the Intercolonial Railway to St. Leonard on the Grand Trunk Pacific, a distance of 115 miles, has also been completed, and is now ready for operation.

Construction work on the Grand Trunk Pacific west of Cochrane is being pushed with vigour. On the contract, which extends 100 miles west of the terminus of the Temiskaming & Northern Ontario Railway, the laying of steel was all completed on the nineteenth of November. Adjacent, on the west, is a contract of 205 miles. Of this, the contractors expect to finish 160 miles within a year. They have already commenced work on the laying down of ten miles of track to Metagami, at which point camp will be established for the winter. Forty miles of right-of-way has been cut out and graded.

In Western Canada a snow storm early in the month stopped railway construction and grading outputs ceased work. It

is estimated that about 400 miles of railway have been constructed in Alberta during the past year.

The Canadian Northern Ontario Railway Company has given notice of an application to Parliament for an act extending the time for the construction of the following authorized branch lines in Ontario: From Washago to Kincardine; from Arnprior to Gananoque; from Pembroke to Cobourg or Port Hope; from the township of Pickering to Owen Sound; from within 10 miles east of Toronto to Hamilton, London and Windsor, with a branch from London to St. Thomas and Sarnia, and a loop line in the townships of York and Scarborough, north of Toronto; from the International bridge nothwesterly to Goderich; from between Dunnville and Port Dover to Owen Sound or Meaford; from Washago to Midland; from Hawkesbury to a point in the county of Leeds or Lanark; from Parry Sound to North Bay.

The Canadian Northern Quebec Company is applying for a charter to construct lines from Rawdon northerly to a junction with the National Transcontinental Railway, and from St. Jerome to St. Eustache.

The Canadian Northern Branch Lines Company is applying for authority to construct eighteen branch lines in the Prairie Provinces, including the following: From Grosse Isle, Man., northerly to Grand Rapids, with a branch to Sturgeon Bay; from Yorkton northerly to or near Hudson Bay Junction; from Craven northeasterly to or near Hudson Bay Junction; from Craven, northerly through or near Humboldt to or near Prince Albert; from a point between Brancepeth and Kinistino, northeasterly to or near Pas Mission; from Moose Jaw northwesterly to join the Vegreville-Calgary line of the Canadian Northern Railway, between Camrose and Stettler; from the international boundary near range seven, west, 4 miles, northerly and easterly to a point near or west of Battleford; from Lloydminster northwesterly and westerly to Bruderheim; from Fort Pitt northwesterly to the Athabasca river.

The Ontario Government has passed an order-in-council providing for the building of a branch of the Temiskaming and Northern Ontario Railway, from a point on the main line near Kelso to Porcupine, The distance will probably be thirty or thirty-two miles, and the cost about $450,000. This work will be done under the powers given by the Legislature last session, and will be proceeded with without delay.

The outlook is for active railway construction operations on Vancouver Island during the coming year.

General Transport.

The feature of the month was the closing of navigation, which released a considerable number of men from employment.

From September 1 to November 10 the shipments of wheat from the head of the Lakes this year were 22,529,632 bushels; oats, 2,670,980 bushels; barley, 388,636 bushels; flax 551,414 bushels; or a grand total of 26,140,662 bushels. During the same period of 1909 the shipments of wheat alone were 22,942,915 bushels. Freight rates have been the lowest for several years.

The winter port service was inaugurated at St. John, N.B., and Halifax, N.S., and the outlook is for active conditions, several vessels having already arrived and discharged cargoes.

The close of navigation was followed by an increase in railway traffic, especially in southwestern Ontario. Railway earnings have shown an increase as compared with last year, up to the closing week of the month. In sections of Western Canada, however, some railway crews were laid off as a result of the decreased volume of the grain trade.

At the half-yearly meeting of the shareholders of the Grand Trunk Railway Company of Canada it was stated that gross receipts for the six months under review showed a gain of £455,000, while working expenses had been higher by £376,000.

The application of the Mutual Transit Company and the Canadian Pacific Railway Company for leave to unload and transmit freight and merchandise from the steamers of the former to the trains of the latter and *vice versa* on the Lord's Day, and to forward the said merchan-

dize to its destination on trains or steamers starting on the Lord's Day, has been refused by the Board of Railway Commissioners.

The annual report of the Canadian Northern Railway Company shows that the average mileage operated during the year was 3,179 miles,, as against 3,013 miles in the previous year. Gross earnings increased from $13,251,293 to $13,833,061, and the net revenue was $4,344,390, an increase of $1,030,757. During the twelve months, 246,996 acres of land were sold for $2,561,072.

The Trades.

Building.—Building was on an unusually extensive scale for the season. In most localities, outside employés put in all but a full month. Inside workers were also busy, and an active winter is expected.

Metal and woodworking.—Employés in metal and woodworking establishments had a good month. Shipments of Canadian manufactured articles into the Western Provinces were heavy.

Printing.—The allied trades were from active to very active in nearly all the cities.

Clothing.—Journeymen tailors were becoming very active, but boot and shoe workers were in their quiet season. Garment workers were fairly well employed in the several branches.

Leather.—Tanners, curriers and trunk and bag workers had a good month.

Food and tobacco preparation.—Bakers were becoming busy and confectioners were very busy. Cigar makers and tobacco workers were busily employed.

Miscellaneous.—Retail clerks, delivery employés, &c., were already feeling the effects of the approaching holiday season.

Unskilled labour.—The prolongation of outside activity made the month a very favourable one as compared with the corresponding period of previous years, though the cessation of large railway construction and civic improvement contracts threw a considerable number on the market. Work, however, has been continuous during the past summer and wages high, so that members of this class are exceptionally favourably situated with respect to the approaching season of inactivity.

Canadian Trade and Revenue.

Foreign trade.—During October, 1910, the total value of imports entered for consumption in the Dominion of Canada, was $39,218,501, compared with $31,473,960 in October, 1909. For the first seven months of the present fiscal year ending October 31, 1910, the total value of imports entered for consumption was $262,685,148, compared with $204,674,392 in the corresponding period of the last fiscal year. The total value of domestic exports during October, 1910, amounted to $30,595,583, compared with $27,250,759 in October, 1909. The total value of domestic exports during the seven months ending October 31, 1910, was $158,121,115, as against $147,735,014 in the corresponding months of last year. During October, 1910, there were increases in exports of the mine, the fisheries, animals and their produce, agriculture and manufactures ,and a decrease in exports of the forest. The grand total of Canadian trade for October, 1910, was $73,019,758, compared with $62,417,394 in October, 1909, and for the seven months ending October 31, 1910, $433,297,034, as against $366,807,482 in the corresponding months of 1909.

Regulations regarding commercial travellers in Mexico were published during the month.

Imperial trade.—According to reports of Canadian Trade Commissioners received at the Department of Trade and Commerce, Canada, in Great Britain and the different Dominions of the Empire, openings for Canadian iron and lacrosse sticks are reported in Great Britain. The imports of Canadian flour into Great Britain, during the nine months ended September 30, 1908, 1909 and 1910, were as follows:—

	Quantity, cwts.	Value
1908	993,228	£ 526,733
1909	1,282,300	738,374
1910	1,980,586	1,121,881

The above figures show that Canada has increased shipments of flour nearly one hundred per cent. in the periods above named. It might be noted that Canadian flour in the last period realized 11.32 shillings per cwt., and that from the United States produced 11.16 shillings. The Western American States are stated to be strong competitors to Canada in the sale of apples.

Shipments of Canadian bacon into the United Kingdom for the nine months ended June 30 in the years 1908, 1909 and 1910, were as follows:—

	Quantity, cwts.	Value.
1908	518,770	£1,343,178
1909	341,400	1,021,622
1910	282,554	1,007,407

The establishment of Canadian commission houses in Australia is reported as necessary. The total imports of Canadian merchandize into South Africa during the first six months of 1910, amounted to £328,481, as compared with £248,947 in the corresponding period of 1909, or an increase of £79,534. An opening for British Columbia apples is reported in New Zealand; trade between this Dominion and Canada is steadily increasing. A large increase in the imports of flour, fish and lumber was reported in Barbadoes. The bulk of the fish trade of Granada is supplied from Canada. Openings for Canadian oats, hammers, shovels, rake, fork, pick, broom and tool handles is reported in Newfoundland. The bulk of Montserrat's foodstuffs originates in Canada, and an increase in trade with this island is reported.

Regulations regarding commercial travellers in the Union of South Africa, Cape Colony, Natal, Orange River Colony and the Transvaal, and in the islands of Antigua, Bahamas, Barbadoes, Bermuda, Dominica, Jamaica, Montserrat, St. Lucia, St. Vincent and Trinidad have been published. The abnormal expansion in the meat exports of New Zealand is said to have attracted the attention of the United States.

Domestic trade.—The general condition of trade was reported as reasonably satisfactory, sorting orders going forward well and retail trade, generally, being active. Trade in metals was brisk, and inquiries for structural materials heavy. In dry-goods and groceries a free movement was reported. Country trade suffered from bad roads. Though some depression has appeared in the trade outlook of the United States, prospects continued favourable in Canada, notwithstanding that bank clearings are slackening and railway earnings advancing less rapidly than in the earlier months of the season.

The October bank statement shows a large increase in circulation and deposits, the former being accounted for in part by the demand for money during the crop movement. There is also a marked increase in the amount of paid-up capital; current loans again show a considerable increase.

Bank clearings for November were about $48,000,000 ahead of the same month in 1909, but the closing week of the month showed a slight decrease.

Canadian revenue.—Canadian revenue for the mouth of October, 1910, amounted to $9,666,192.95, compared with $8,553,566.89 in October, 1909. The total revenue to October 31, 1910, amounted to $65,814,386.28, compared with $55,907,586.72 to October 31, 1909. The total expenditure on capital account during October, 1910, was $3,548,278.93, compared with $3,983,021.14 in October, 1909. The total expenditure to October 31, 1910, was $15,978,415.24, compared with $17,196,084.74 to October 31, 1909. The leading items of expenditure during October, 1910, were: Public Works, Railways and Canals, $3,125,447.93; railway subsidies, $253,859.84; and bounties $168,971.16.

Notes.

The death occurred on November 22, at Toronto, Ont., of Mr. John Armstrong, Secretary of the Ontario Bureau of Labour.

A detailed plan on which to establish a pension fund for civic employés was under consideration by the City Council and Board of Control of Montreal, Que.

On January 1, 1911, the new Workman's Compensation Act of Manitoba will come into force. The Act is closely modelled on recent British legislation and represents a radical change from previous legislation in Manitoba.

The organization of a Federation of Intercolonial Railway Brotherhoods, similar to that in existence on the Canadian Pacific Railway system, was under discussion by representatives of the employés affected.

A call for a conference of the Provincial Prime Ministers of Canada on December 9 was issued by the Honourable the Prime Minister of Ontario, and the Honourable the Prime Minister of Quebec, under date of November 18.

A special commission was appointed by the City of Winnipeg, Man., to investigate certain charges made by the Secretary of the Lord's Day Alliance *re* immorality and segregation in that city.

A series of illustrated addresses was delivered in the chief cities of Canada, on city planning and the improvement of workingmen's dwellings, by Mr. Henry Vivian, M.P., for Birkenhead, England, in the British House of Commons.

An Association of Bank Clerks was organized, with headquarters at Toronto, Ont., having for object the uniting together of the employés of the different banks for mutual protection, improvement and advancement, and for the increase of the efficiency and salaries of the service.

A dispute between the management of the Canadian Pacific Railway Company and the Brotherhoods of Railway Conductors and Trainmen relative to the application of the new schedule recently put into force, was satisfactorily settled by arbitration during November. Mr. P. S. Morrisey, of Chicago, Ill., acted as arbitrator.

The organization meeting of the Royal Commission on Technical Education of the Province of Manitoba was held on November 9. The date of the first meeting of the Commission was arranged for early in January. The Commission was requested to report prior to the opening of the Legislature.

The Government of Canada appointed the Honourable Dennis Murphy of the Supreme Court of British Columbia as a Royal Commissioner to investigate the alleged illegal entry of Chinese immigrants to this country. Counsel was also appointed by the Government in connection with the investigation.

The annual meeting of the Ontario branch of the Lord's Day Alliance was held at Toronto, Ont., contributions for the year totalled $7,864, compared with $6,865 during the peceding year. A deficit of $1,084 was announced. Officers were elected as follows: Right Reverend J. F. Sweeney, Bishop of Toronto, President; Mrs. Gordon Wright, London, Secretary; Rev. W. G. Hanna, General-Secreatry for Canada; Charles J. Copp, M.D., Treasurer.

Announcements were sent out under date of November 19 describing the programme and scope of the eleventh annual meeting of the National Civic Federation, to be held on January 12-14, 1911, in the City of New York. The States' Councils organized by the Federation during the past year to promote the unification of State and Federal laws, will hold their first national meeting in conjunction therewith. In addition there will be special meetings of the various departments of the Federation. The more important topics of the hour, in which the Federation has been especially interested and which will be considered, are:

Regulation of Corporations and Combinations;
Regulation of Railroads and Municipal Utilities;
Compensation for Industrial Accidents;
Arbitration and Conciliation.

The Canadian Independent Telephone Association held its fifth annual convention in Toronto, November 17th and 18th. It was resolved to ask the Ontario Government to repeal the present law, which gives municipalities the power to grant exclusive telephone franchises. An effort will be made to obtain an amendment of the local municipal telephone Act, by making provision for the appointment by the ratepayers of a board of commissioners to undertake the management of any system constructed under that Act. The Association will also ask the Dominion Government to amend the Railway Act by empowering the Board of

Railway Commissioners to order connection between rural telephone systems and the local systems of all companies within the jurisdiction of the Parliament of Canada.

An important report based on the investigation of twenty street car accidents in the City of Montreal, Que., was issued by the Public Utilities Commission of Quebec on November 20. The main conclusions of the report are as follows:

"That no further cars of the single truck pattern be placed in use upon any of the routes without the special permission of the commission; that the number of such cars be reduced each year by fifty; that upon application and for reasons shown and satisfactory to the commission the use of such cars on certain routes be permitted, and sufficient cars retained for the purpose; that all cars thirty feet or more in length and weighing 25,000 pounds or over be equipped with air brakes in addition to hand brakes; that cars on routes with severe grades be equipped in addition with emergency brakes; that the speed limit of eight miles per hous be adhered to."

The Ontario government has recently abolished the system of prison labour contracts in that province. In future the majority of the prisoners will be employed upon farms and the making of roads in the newly opened up districts. There will, however, be a precentage of the prisoners whose health or other circumstances will prevent them from joining in this work. These men will manufacture hospital supplies—beds, blankets, &c., which will be offered to the hospitals receiving financial aid from the Provincial Government, and provided the prices and quality of the goods are found to compare favourably with those of similar articles offered in the open market, the hospitals will be expected to purchase the prison-made products.

II. REPORTS OF LOCAL CORRESPONDENTS.

MR. JAMES HANLEY, Belleville, Ont., has been appointed correspondent to the *Labour Gazette* for Belleville, Ont., and district, in the room of Mr. H. C. Macdiarmid, resigned.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial activity continued throughout the month, and business generally was prosperous. It seems as if this activity will continue at the larger industries during the winter. There are departments, however, that generally close down when frosty weather comes, but apart from these the outlook for the winter is good. The coal and iron industry had a good month, and the other allied industries were busy. Owing to stormy weather some of the collieries had an occasional idle day, the shipping being deranged and the supply of cars being unsteady. The demand for coal was good and will continue so during the winter.

Fairly large outputs of steel were obtained at the Sydney Steel Works. The supply of ore and limestone required for winter use will be greater than last year, and there is considerable activity at the limestone quarries.

The Nova Scotia Steel Works continued active during the month. The outputs of October exceeded those of September, while November outputs in some departments equaled those of October. The following is a comparative statement:—

Month:	*Iron.*	*Steel.*	*Coal.*	*Coke.*
August.....	7,721	7,850	76,013	8,949
September.....	7,335	5,682	7,3921	8,630
October.....	7,811	8,359	76,593	8,407

The building trades were very busy throughout the month. In the Sydney Mines district 200 houses were erected during the season. Building activity will continue as long as the season is favourable. The tramway and steam

railways had a fair month, while shipping was heavy. Other trades were well employed. The stormy weather affected the retail trades, but the wholesale business was good. There was abundance of unskilled lakour.

CONDITION OL LOCAL INDUSTRIES.

Agriculture.—The wet weather greatly hindered the farmers in getting in their root crops. Potatoes, while a fair yield, rotted very rapidly, and will be scarce during the winter. A large part of the potato crop of Prince Edward Island is finding its way to Bermuda, which is affecting the price of potatoes in this district.

Fishing.—November was a very stormy month, which affected shipping. Very little fishing is done off these coasts at this season. The fishermen state that while fish was scarce throughout most of the season, yet the prices obtained were better than last year, so that they are financially not much behind the year 1909.

WESTVILLE, N. S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in labour conditions in this district since last month. The different branches of industries were fully employed, the collieries at present working full time, and in most of the collieries adding to the working staff.

Shipments of coal for the month of October for the collieries in this town and district were about 43,000 tons, this being a decrease of some 8,000 tons from the shipments for the month of October, 1909.

Building is very active throughout the district. The weather so far is favourable, with rain, but scarcely any frost.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are about through with fall ploughing, and in most cases have harvested a bountiful crop, with good prices prevailing.

Lumbering.—This industry is assuming its usual buoyancy at this season of the year.

Manufacturing.—All industries are at present well employed.

Mining.—The industry throughout the district is working full time. Unskilled labour is not equal to the demand. The technical schools throughout the mining districts have opened for the winter.

All other industries throughout the district, not affected by the season, are active. The skilled trades have been active, and unskilled labour very active.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during November has been quiet. The weather has been mild, with no snow, and while this condition favoured outside operations, few were carried on. The principal building contract on hand was the new Y.M.C.A. building, where work is being rushed. While the closing year has been the lowest for some time as far as building operations have been concerned, prospects for 1911 promise to eclipse the record of some years—if not in number, in aggregate value.

Along the waterfront work has been but fair, owing to the falling off in the fruit and vegetable crop, and mild weather's effect on navigation. A busy season, however, is anticipated by the railway and steamship men, who are about completing arrangements for the winter's business. The Government piers will be taxed to their utmost, as some dozen steamship lines, amongst them being the Allan, Canadian Pacific Railway, Furness, Donaldson, Elder Dempster, Manchester, Uranium and White Star-Dominion, will make Halifax their port of call to a greater or less extent. A large number of immigrants are expected, which, with the usual winter freight, should keep a good portion of the waterfront active during the season of 1910–11.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Some late November wholesale quotations:—

Butter, creamery, prints, 28c., per lb.
Butter, creamery, boxes, 27c., per lb.
Butter, dairy, ordinary, 20-21c., per lb.
Butter, dairy, rolls, 22c., per lb.
Butter, dairy, prints, 24-25c., per lb.
Cheese, large, 12½-13c., per lb.
Cheese, twins, 13-13½c., per lb.
Eggs, fresh, 29-30c., per lb.
Beef, forequarter, 8-9½c., per lb.
Beef, hindquarter, 10-12c., per lb.
Lamb, 11c., per lb.
Mutton, 7-9c., per lb.
Veal, 7-8½c., per lb.
Pork, 9-10c., per lb.
Bacon, 20c., per lb.
Hams, fresh, 16c., per lb.

Fishing.—Local fishermen made but small catches, mackerel being notably scarce.

Other lines were normal, with manufacturing more advanced than the similar period of 1909.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull. Carpenters and joiners were fair. Painters and decorators were quiet. Plumbers were busy. Stone cutters and builders' labourers were dull. Boilermakers were dull. Electrical workers were busy. Printers, pressmen, bookbinders were busy. Tailors were dull. Boot and shoe workers were about normal. Barbers, delivery employés and theatre employés were fair. Furriers showed improvement over October, but were retarded in average orders, owing to mild weather. Most branches of transportation employés had average employment. Longshoremen had a fair month, with improving prospects. Unskilled labour was dull.

DISTRICT NOTES.

The fishing fleet reports a record catch, and the price is $5 per quintal—$1 in excess of 1909.

Sherbrooke.—The rainy spell during the middle of November greatly helped the lumbermen in getting their drives of logs down the river, several of which were tied up, owing to the previous dry weather. One firm brought in 2,000,000 feet, and another 1,500,000. These will be stored for the winter, the season being too far advanced to warrant manufacturing.

Shelburne.—A schooner of 140 tons gross register was launched early in November.

AMHERST, N. S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Considering the season of the year, labour has been well employed during the month. Taken on the whole, conditions are much better than at the same time last year.

The new addition to the Amherst Boot & Shoe Company's plant, a four-storey brick structure, 100 x 50 feet, is nearing completion, and will be ready for occupancy the first of the year. The output of the concern is now about 1,000 pairs a day, but when the new building is completed this output will be doubled. Extensive improvements and alterations are being made in the shops of the Canada Car Company, and work is steady, with the full complement of men at work. The Company has orders now on hand to keep the establishment going full time until June, 1911. There was a ten-day strike in this establishment during the month, affecting about one hundred men. The trouble arose over the establishment of a new wage schedule in the box-car erecting department, and after some negotiations the men resumed work.

The strike in Springhill still continues. The Company is augmenting its working force and slowly increasing its output.

CONDITION OF PARTICULAR TRADES.

The building trades have been fairly well employed during the month, but operatives are mostly idle for the season. Carpenters and joiners, in the majority of cases, will have steady work on inside finishing during the winter. Painters and paperhangers reported work dull. Plumbers were busy. Stone cutters were out of work. Iron moulders were well

employed. Machinists and engineers were active, electrical workers busy, and blacksmiths and boilermakers well employed. Woodworkers have had a good month. Upholsterers report dullness in their trade. Car builders were well employed, carriage makers busy. Printers have had a busy month. Journeymen tailors have been steadily employed. Boot and shoe makers were very busy. Bakers and confectioners reported work steady. Trunk and bag makers had a busy month. Clerks and stenographers were well employed. Unskilled labour was well employed, but there was no demand for more help.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month of November differed very little from that of the same month last year. Broken weather interfered to a considerable extent with outdoor work in the building line. In Charlottetown, the new Heartz Memorial Hall had the exterior completed. Shipping was fairly brisk, and the usual scenes of activity prevailed along the water front. Industrially, the month has been active, two new packing houses coming into operation, and the established ones handled more than the usual number of hogs and lambs. Bankers, wholesale and retail men report a good month, with collections satisfactory and an optimistic tone in the business situation.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The shipping of produce formed the principal occupation of the farmers this month. The potatoe crop is lighter than last year, but the shipment of grain, especially of oats, is greater than last year. A good shipment of hay, which was an abundant crop this year, was made on the direct steamers to England.

Fishing.—Owing to stormy weather, the fishermen had not a very good month, oystering being practically the only branch carried on to any advantage. The proposal of the Government to enforce new lobster regulations next year, whereby the small lobsters cannot be taken, was strongly protested against at a meeting of packers and fishermen held in Charlottetown. Resolutions were passed claiming that if the regulations were carried out it would practically mean the closing down of the factories around a large portion of the coast.

Manufacturing.—The few factories were carried on under normal conditions, supply and demand being well balanced.

Railway construction and employment.—The end of the month found the work on the Elmira branch railway almost completed for the season. It is expected that this line will be finished next year. Several new stations were built on the main line, and a number of tanks were erected by the Imperial Oil Company at different points along the road, for the handling of the oil in tank cars, which will be supplied by the railway company.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were fairly active. Carpenters, joiners and paperhangers were active. Plasterers and lathers had a dull month. Plumbers, gas and steamfitters were active. Iron moulders, workers and helpers, machinists, engineers, electrical workers, linemen and sheet metal workers were active. Bicycle workers had a dull month. Woodworkers, upholsterers, carriage and wagon makers and car builders were active. The printing, clothing, leather and miscellaneous trades were active, with the supply of unskilled labour slightly in excess of the demand.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Favourable weather conditions the greater part of the month rendered it

possible to keep the volume of outdoor labour close up to the October standard, while indoor labour was fully equal to that standard. A canvass of all local manufacturing industries, machine shops, &c., shows active conditions; in most instances the orders in sight guarantee a continuance of these steady conditions during the winter season. Building operations are relaxing, but considerable work upon minor jobs is in progress. The Massey-Harris warehouse, a two-storey structure of concrete, 60 x 120 feet, is just completed. Work upon the public wharf extension has also been completed; this has furnished employment for about twenty workmen for five months. Messrs. Corbett and Floesch, contractors for the 50-mile section of the Grand Trunk Pacific railway from Moncton to Chipman, on November 12, paid off 175 of their employés, having completed their contract. About fifty men were retained to get the plant ready for shipment and close up the work by December 1. This firm of contractors have paid about $2,000,000 in wages alone during their operations. Civic operations upon street, sewer and water extensions have been suspended for the season. In business circles the retail trade for the month is pronounced up to the average, while the wholesale trade continues active and expansive. Considerable movement in real estate has taken place and at firm prices. Rents are still high, but there appears a larger choice than heretofore. The Intercolonial Railway shopmen are now working Saturday afternoons and will continue so to do until May 1. The various trades unions in the mechanical department of the Intercolonial Railway here are considering the matter of an International Federation, and a committee has been appointed to report upon the same. No cases of friction between the various classes of labour and the employers have been noted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were active with ploughing, threshing and general fall work, weather conditions being very favourable. The grain yield was found to be very satisfactory. Hay remains quiet and with low quotations. Pork shows a decline of 2 cents from last season. Cheese factories closed this month, and attention turned to butter-making.

Fishing was quiet.

Lumbering.—Considerable activity, par ticularly in Albert county sections, has developed, and operations were on quite an extensive scale. Demand for experienced men was good, and wages showed an increase of about $2 per month over last winter.

Mining.—The Maritime Oilfields Company, Limited, are still at work developing their oil and gas areas in Coverdale. Two more wells were sunk, and the flow of gas in both instances was heavy. Seventeen wells are now drilled and capped.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet. Carpenters and plasterers were busy, as were also painters, decorators and paperhangers. Plumbers were steady, stonecutters quiet and builders' labourers, fairly active, but demand slackening. Iron moulders were fairly busy. Iron workers and helpers, machinists, electrical workers, blacksmiths, boilermakers and horseshoers reported steady conditions. Woodworkers, upholsterers, polishers and carmen were active. Carriage and wagon makers were quiet. Printers, pressmen and bookbinders were active. Journeymen tailors and garment workers were active. Milliners and milliners' apprentices were busy. Bakers were active. Butchers were busy. Leather workers and saddlers were busy. Barbers were busy. Clerks and stenographers had steady work with demand limited. Hotel employés were busy, and laundry workers active. Railway crews, owing to winter time-tables coming into effect, were not so active as last month. Telegraphers were busy. Freight-handlers and expressmen were active. The demand for unskilled labourers was good throughout the month, and fairly well met by local supply. Wages were 1.50 per day.

ST. JOHN, N. B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The opening of the winter port season has lent an impetus to the labour market, especially to shiplabourers. Warner's mill on Chesley street, and Murray & Gregory's mill at Marble Cove have closed down for the season. The Globe Laundry was destroyed by fire on the morning of November 9; loss, $15,000, insurance, $8,000. Taylor & White's cooperage on Elm street was badly gutted by fire on the night of November 12. The building was insured for $2,200; the machinery for $3,000; and the stock for $700.

Bank clearings for the four weeks ending November 24 were $6,312,501, and for the corresponding period last year, $6,430-860, being $118,359 less in 1910 than in 1909, and $1,260,528 less than during the five weeks ending October 28 of the current year. The savings bank transactions for the month of October were: deposits, $54,545.82; withdrawals, $79,-121.65.

For the two weeks ending October 31, the city cashier paid out $5,092.45 in wages to city employés. The call firemen were paid off on November 15. The city deducted their taxes, amounting to $1,665.33, making the sum of $10,980.42, which the chamberlain paid out. The bookbinders and rulers have been granted the eight-hour day, which went into effect on November 21.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The New Brunswick Fruit Growers' Association held a session in St. John, on November 2, when officers for the ensuing year were elected. Professor J. W. Crow gave an interesting lecture on "Cropping Young Orchards," and Professor W. T. Macoun addressed the meeting on "Growing Nursery Stock in a Northern Climate."

CONDITION OF PARTICULAR TRADES.

Shingle weavers and unskilled labourers were dull, but other skilled workmen had, on the whole, a good month.

DISTRICT NOTES.

Fredericton.—Morrison's mill closed for the winter, November 11, for the first time in years. Lack of logs is the cause for the shut-down.

Hampton.—The Hampton Stock Farm Company sold out its herd of pure bred Ayrshire cattle, on November 11. They are now scattered among the farmers and stockmen of the province and Nova Scotia.

Sackville.—A railway siding to the plants of the Sackville Freestone Company and the Charles Fawcett Manufacturing Company is soon to be built.

St. Stephen.—During the past summer Haley & Son, St. Croix Soap Manufacturing Company, Maritime Edge Tool Company and Ganong Brothers have made extensive additions to their factories.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions were quiet, seasonal dullness prevailing. Saw mills were all closed down, causing unemployment for large numbers of men. A number of these, however, found employment in the lumber camps, there being a scarcity of this class of labour for some time. The weather has been very mild, no frost being in the ground. Employment will be plentiful when the rivers freeze up, in smelt and bass fishing, at which all make good wages. No changes in wages or hours of employment occurred during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There was not much doing in this industry. The season has been one of the finest for years; there has been

no snow up to November 24, and cattle have been out grazing. The fall has been most favourable for ploughing. Owing to the abundant crop, hay is selling for $12 per ton, and oats are retailing at 50 cents per bushel.

Lumbering.—Brisk conditions prevailed, the weather being favourable. August and September were dry and operators had a good chance to get the lumber off the low lands. The cut will be about the same as last season, which was an average one.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were pretty well through their work for the season, but carpenters and joiners were still busy finishing contracts. Painters were busy on inside work. Blacksmiths were busy and will continue so until the end of December.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and E. Little, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been a fairly good one. The building trades were busy on outside operations during the first half of the month, but prevailing bad weather caused quiet conditions in the last two weeks. The lessees of the Champlain market hall have received official notice to vacate the premises prior to January 15, 1911. This means that the work upon the terminals of the Transcontinental Railway will be started during the winter. The season of navigation is fast drawing to an end. The *SS. Memnon,* from Savannah, Georgia, with a cargo of pitch pine intended for the construction of caissons for the Quebec bridge, arrived on November 7, and discharged at Sillery Cove. Apart from this, no further arrivals of ocean steamers are expected. Two new steel steamers were launched from the yard of G. T. Davis & Sons. These vessels are ice-breakers and are destined for the winter ferry service between Quebec and Levis. This Company will build two new steamers to replace those used in summer ferrying, these latter being too small for the service. The section of the terrace so long closed to the public has again been opened, the work of rebuilding it having been completed. The Dominion Government steamer *Druid* on November 14 commenced bringing in for the winter some of the least important of the buoys. A free employment bureau has been authorized by the Provincial Government, and will be opened in January, 1911. The City Council, at its meeting on the eleventh instant, granted the authorization prayed for by the Dorchester Electric Company to introduce and sell electricity in the city of Quebec, subject to several conditions, one of which is that they shall erect in the limits of the city of Quebec, before December 31, 1911, and keep in constant operation, workshops which are to cost $200,000. The steamer *Murray Bay,* of the Richelieu and Ontario Navigation Company, left here for Montreal, on the twenty-fifth instant. She is the last boat of the line for this season. The last steamers of the regular ocean liners left port during the latter part of the month, while there is only one ocean steamer to leave for sea at the end of the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy ploughing during the early part of the month. Cattle were left out very late, pasturage being plentiful.

Lumbering.—All the big sawmills have closed down for the winter; a number of them having continued cutting until stopped by snow and ice.

Manufacturing.—A slight improvement has been shown among shoe factories; they were not, however, running to full capacity as yet.

CONDITION OF PARTICULAR TRADES.

Lathers, plasterers, painters, plumbers and gas and steamfitters were quiet; the other building trades were busy. In the metal trades active conditions prevailed, with blacksmiths; iron moulders, iron workers, machinists, engineers, boiler makers, iron shipbuilders and shipwrights

were busy, but electrical workers were quiet. Woodworkers generally were busy. From active to busy conditions were reported in the printing trades. Boot and shoe workers were dull, but glove makers were active, and journeymen tailors and garment workers busy. Quietness was reported in the food and tobacco preparation branches, and dullness in the leather trades. Hotel, restaurant, theatre and laundry workers were quiet, but delivery employés and furriers were active. Railway employés were active. Street railway employés were quiet, as were also cab drivers, draymen, teamsters and expressmen. Longshoremen were active, but the other trades dependent on navigation were in their dull season. The supply of unskilled labour was in excess of the demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during November showed very little change compared with October. Employment was good in practically every branch of industry. Municipal works continued to employ a considerable number of men. The buliding trades were busiest. The Diamond Whitewear Company was busy building an addition to plant. The Gres Falls Company is pushing construction on the new pulp and paper mill at Cap de la Madeleine.

Merchants are complaining of poor business. Wages have a downward tendency, but so far no material reductions have been made.

The contractors rebuilding the boulevard had to stop the work on account of the cold weather, the most of it being in concrete. The agreement between the city and the new pulp and paper company was passed at a council meeting this month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—A fine open fall has enabled farmers to successfully harvest their abundant crops, and prices are fairly well maintained.

Fishing was very dull.

Lumbering.—The lumber market has brightened during the past month, but the cut this year will be about the average.

Manufacturing.—All local industries are employing their usual complement of hands, and expect to do so during the winter months.

CONDITION OF PARTICULAR TRADES.

Work in the building trades was good until the end of the month. Moulders were fairly active, and machinists were steadily employed. Blacksmiths and horseshoers were also active. Taken in general, the metal trades were fairly active. Woodworking and furnishing trades report a good month. Printers, pressmen and bookbinders were busy. Journeymen tailors and garment workers were active. Glove makers and boot and shoe workers were very busy. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers report a fairly busy month. Tanners and curriers had a dull month. Barbers were fairly active. Clerks had a quiet month. Stenographers were busy. Delivery employés had a dull time. Furriers were busy, especially during the end of this month. Hotel, restaurant, theatre employés and laundry workers were well employed. Railway employés were fairly employed, and navigation employés were very active. Cab drivers and hackmen had a dull month, but teamsters and expressmen had plenty to do. There was a good demand for unskilled labour, but the supply was equal to the demand.

DISTRICT NOTES.

The Shawinigan Water & Power Company is rushing work on the additional power plant at Shawinigan Falls, Que. The new cotton mill at the same place is in full operation.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally has been well employed during the month. This applies not only to the various industrial concerns, but also to unskilled labour. The open season has been very active for the latter, as there has been much outside work going on this fall. Every man who wanted work could have had it during the month, so that there were no idle men around. Construction work in connection with the Sherbrooke Power & Railway Company gave employment to a large force of men, and the work under way at the new reservoir, and other city work called for all the men available. The varoius industrial concerns have been running full time, and there has been no abatement in the rush to get out work in various machine shops. The E. & T. Fairbanks Company, which recently established in the city, from St. Johnsbury, Vt., have about decided to double their capacity for output, and the contract to double their floor-space is about to be given out. That means that over 100 skilled mechanics will have to be taken on.

During the past month there has been an agitation going on among the business men to adveritse the city as an industrial centre. As a result of this movement, there has been guaranteed some $4,000 yearly for five years to help defray the expense of an industrial commissioner, and the City Council has been approached to give an appropriation for the same purpose.

The extension of the street railway has been pushed rapidly ahead, and considerable mileage has been added, in addition to the relaying of the old system with heavier iron. That means that the convenience to the public has been greatly improved.

The Eastern Townships immigration agent has left for England, to interest farm labourers and farmers with capital to settle in the Eastern Townships. The demand for farm help is as keen as ever, and it is difficult to get men at about double the wages paid a few years ago.

Wholesalers report business good, as also do the retailers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The open season has given farmers an opportunity of doing more fall work than is generally the case. It is estimated that there are about five thousand less milch cows in the Eastern Townships this year than is generally the case. This is the result of the shortage of feed that existed for the past two years, while this year there is an abundance. So much so that many are selling hay for shipment to the United States.

Lumbering.—The movement of pulpwood to the United States has been somewhat slow, with the result that a considerable portion of last year's cut is still on hand. In the Megantic district several of the large lumbermen have not yet sent any men into the woods, and the prospects are that the cut of pulpwood will be short, so that many men and farmers who take contracts to haul the wood will be affected.

Manufacturing.—The manufacturing industries are fully employed, and are running full time in all departments.

Mining.—As is usual at this time of the year, the various mining concerns close down to a considerable extent, especially in the asbestos district. In the copper mines, however, work is going on as usual, and at Eustis enough men cannot be secured.

Railway construction.—The work of extending the street railway has given employment to many men, who are paid a higher rate—$1.75 to $2 per day—than was ever paid before for unskilled labour.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade had a good month. This is accounted for by the fact that the season was so open. Machinists and all branches of iron workers employed here were busy, and there is a sufficiency of orders to keep the various staffs fully employed for some time to come. Woodworkers were busy. The printing and allied trades were busy.

Journeymen tailors and garment workers were active. Bakers and confectioners, butchers and cigar makers were busy. The miscellaneous trades had an active month. Railway men were fully employed, while cab drivers and teamsters were busy. Unskilled labour was very much in demand.

DISTRICT NOTES.

South Stukely.—The first three cars of marbel were shipped to Montreal, to the finishing shop, from the quarry here.

Lake Megantic.—The mill of the Lake Megantic Lumber Company has shut down for the season, after a very successful six months' cutting, which amounted to about ten million feet of sawn lumber. The potato crop has turned out very badly in this district. In some cases, eighty per cent. of the tubers are diseased, and generally at least half of the crop is bad.

Brompton.—The Pearl Shirt Waist Manufacturing Company here has reduced staff for the present only. They will increase the same after the holidays.

Waterloo.—A new industry has been added to the town—the Waterloo Envelope Factory. All of the local industires have been running to their full capacity for some time past in order to complete the orders which they have in hand for shipment.

Black Lake.—A number of Austrian and Russian labourers left here last week for their homes, and others for western points, on account of several of the mines having stopped work. About 200 men were discharged.

Granby.—Messrs. Bruneau & Son, whose sash, door and box factory was destroyed by fire some time ago, have commenced rebuilding on the same site.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The outside trades were very active during the month, but the local supply of labour was more than enough to meet the demand. The month was a very active one for industrial establishments. Both shoe factories worked full time. The iron industry had a good month. There was much activity in the leather industry, and a busy season is anticipated. All the factories were very active. A number of men are still engaged on the cathedral. Business, wholesale and retail, was fairly active. Banks reported collections easy.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The agricultural situation is prosperous. Fruit and vegetables found a ready market. The demand for farm hands was satisfactory, but the supply was not lacking.

CONDITION OF PARTICULAR TRADES.

The building trades were more active than during August. The month was a good one for carpenters, painters and plumbers. Bricklayers and masons, stonecutters and builders' labourers had a busy month. The month was more or less active in the metal and engineering trades. Machine shops gave a fair amount of employment. Woodworkers had a very good month, as well as the printing trades. The clothing trades had a very active month. Bakers and confectioners, butchers and ice handlers had a fair month. Tanners and curriers had a very good month. Barbers were quiet. Clerks, stenographers and delivery employés had a very satisfactory month. Railway employés, cab drivers, hackmen and carters were very active. Unskilled labour had plenty of work.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

About two hundred and fifty workmen employed at the Government shipyard, and who, during the winter months work nine hours a day instead of ten, will not suffer any reduction of wages this year.

The construction of vessels of all kinds used in deepening the St. Lawrence river is being pushed actively. More than two hundred vessels have also taken their winter quarters in this port. All the manufactories are in full operation, with orders ahead for several months to come. Three building permits have been taken out during the month, one for a theatre and the other two for residences; about fifty men will be employed on the work. The local dealers had a very good month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busy marketing their products, which brought good prices. The prices of products were as follows:—

Butter, 26-28c., per lb.
Eggs, fresh, 35-40c., per dozen.
Beef, 9-15c., per lb.
Potaotes, 50-55c., a bushel.
Pork, 13-15c., per lb.
Poultry, 90c.-$1.10 a pair.
Mutton, 15-17c., per lb.
Cheese, 15-16c., per lb.
Hard wood, $5-$6, per cord.
Soft wood, $4-$5, per cord.
Coal, $6.25 to $6.50 per ton of 2,000 lb.

CONDITION OF PARTICULAR TRADES.

Masons, carpenters, plasterers, plumbers, painters and electric workers had a good month.

DISTRICT NOTES.

St. Ours.—The three mills are in full operation, with orders for a few months ahead. Local dealers are doing a good business, on account of the good country roads and favourable weather conditions.

Berthier.—The box, sash, and door factory destroyed by fire three months ago is being reconstructed, and will soon be in operation, employing twenty men. The sawing mill has suspended operations for the season. General business is good. The gin distillery is working night and day, with more orders than it can fill.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was in an active condition. Men employed outside were still at work. After closing its work in September, the city started again in October to macadamize certain streets leading to the new Cluett & Peabody factory, which will commence operations early next summer. Work on the Government wharves is practically over for the season. The various local industries were very active. Trade, wholesale and retail, was good for the season. Banks reported a busy month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were active. Vegetable prices were kept up. The price of potatoes was raised from 75 cents to $1 per bag. Dairy products and poultry also went up, on account of the large number of geese, turkeys and ducks exported for Thanksgiving Day.

Railway construction.—The Canadian Pacific Railway Company has started laying the steel superstructure on its new bridge between St. Johns and Iberville, which, it is expected, will be finished next spring, a large number of men being employed.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons somewhat slackened. Carpenters and joiners, lathers and plasterers, painters and decorators, plumbers and steam fixers all reported a favourable month, as well as builders' labourers. Iron moulders, iron workers and helpers, coremakers, machinists and engineers were well employed. Electrical workers and linemen had a fair month. Shipwrights and caulkers and ship builders were quiet. Tinsmiths, tool sharpeners, horseshoers and jewellers had a busy month. Wood-

workers, upholsterers, varinshers and polishers, wood carvers, and carriage and wagon makers reported a good month. Printers, pressmen, bookbinders and lithographers were well employed. Journeymen tailors, garment workers, hat and glovemakers were well employed. Bakers and confectioners, butchers and meat cutters and tobacco workers had a busy month. Tanners and curriers, leather workers and saddlers reported a fair month. Barbers, clerks, stenographers, delivery employés, furriers, and hotel, restaurant and theatre employés had a busy month. Laundry workers were well employed. Railway conductors, engineers, firemen, operators and trainmen reported a good month. Trackmen, switchmen and freight handlers were well employed. Steamboat employés, ship labourers and longshoremen became quiet at the end of the month. Cab drivers, hackmen, carters, draymen, teamsters, expressmen and unskilled labour were all well employed.

DISTRICT NOTES.

St. Lambert.—A large number of houses were built during the summer and a number are still under way. The introduction of street cars gave an impetus to building operations. A new printing office was recently started. A large quantity of cement sidewalks was built and it is proposed to spend $50,000 for that purpose next year. The sales of land indicate that building operations next year will double those of this year. Carpenters and joiners were getting from 25 to 30 cents an hour.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

November was as good a month as the preceding one, and much better than the corresponding month last year in all branches of trade, and a fairly busy winter is anticipated by workingmen in Maisonneuve and the district. Though the season is advanced, several new buildings have beeen started which will give employment to a number of men, besides the large ones already under way, such as the Windsor station, the Oglivie building, the Blumenthal and Kellert blocks, the new harbour elevator, &c., which will not be completed before the end of the winter. The number of unemployed was smaller than last year. The reduction in the price of meats, flour and other commodities was welcomed by the working classes. With the exception of plumbers, steam and gas fitters and moulders, who are still on strike, there is no industrial trouble in the district.

CONDITION OF PARTICULAR TRADES.

Almost all the building trades were in demand, the others being very active, such as builders' labourers, plasterers, joiners and stone cutters. Tin roofers, electrical workers, stove mounters, blacksmiths and horseshoers were in demand, the other metal trades being very busy. Woodworkers, upholsterers, varnishers and polishers were active. Woodcarvers were fair. Carriage and wagon makers were active, pattern makers busy, and coopers and gilders fairly active. The printing trades were well employed, pressmen being in demand. Journeymen tailors were in demand, and garment workers very active. Bakers and confectioners, butchers and meat cutters were active, ice handlers quiet, and cigar makers and tobacco workers fairly active. Leather workers were well employed. Barbers were in demand, as well as clerks, delivery employés, stenographers and furriers. Broom makers had a good month. Hotel and restaurant employés and laundry workers were active. Transportation employés were active. Carters and draymen were in demand. Unskilled labour was a little less active, city work being suspended for the season.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

November was much more active than the same month last year. All the building trades were well employed, and general labourers reported it as the best month at this season for a number of years. General business excelled the same month of 1909. The value of the building permits issued during October was $1,907,440. For the first ten months of the calendar year, the total value of permits was $13,965,625, as against $7,000,000 for the same period last year. The number of ocean vessels entering the port of Montreal since the opening of navigation to November 1, was 674, with a tonnage of 2,010,924. The figures of bank clearings for October were $180,549,232, as against $186,151,093 in October, 1909, and $140,602,161 in October, 1908. Post Office receipts for October show an increase of $5,000 over the corresponding month of last year. Reports of property valuation show an increase of $68,579,922, the largest in the history of the city. The total valuation is $435,562,198, of which $107,527,842 is exempt from taxation.

CONDITION OF PARTICULAR TRADES.

The various trades were active with the exception of steamboat employés, ship labourers and longshoremen, ship carpenters and caulkers, who were quiet.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was more active than usual. There are less unemployed men and more work in the city and district than has ever before been the case notwithstanding the inactivity in municipal works. "Inability to get men" is the complaint of employment agents in nearly all lines of labour. The situation is exactly the reverse of what it was three years ago and, in a lesser degree, last season and the previous one. For the past few weeks, men have been leaving the city for the lumber camps at the rate of about one hundred per day. The employment agents say that the exodus had about finished. The shanties are well supplied with labour. The men who have gone are for the most part heads of families and young men who have worked all summer in the saw mills. There are also a number of farmers from this district.

The large number of buildings being erected in Ottawa is giving a large number of Hull tradesmen work for the winter.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

About 1,000 sawmill hands in the Ottawa valley were released during November on account of the cessation of the season's lumber manufacturing by J. R. Booth, Gillies Brothers, and some smaller mill owners. Owing to the mild weather a few mills were still operating at the end of the month. Wages for shanty men were better sustained than hiring agents had expected at the opening of the month. Jobbers are offering $35 per month for uncertain periods of employment. Most of the large firms are paying from $28 to $32 per month, or the same as when labour was much scarcer in the early autumn. The rate for teams, including teamster, is $2.50 per day, fare paid both to and from the woods. This is 25 cents higher than a year ago.

Farm work slackened and the demand for labour on railway construction was not so brisk as last year. Building in Ottawa and vicinity is brisk and factories turning out fine lumber, windows, &c., are crowded with orders. The total of the year's building permits is estimated at $3,000,000 and a large num-

ber of the buildings are still in the construction stage.

A sidelight on the satisfactory labour conditions is afforded by the record at the Rescue Mission quarters which accommodates indigent workers. Only twenty-four inmates were on hand at the end of the month and the demand for these for temporary jobs in the city was too great to be supplied. This class of labour is paid $1.50 per day or 20 cents per hour.

The civic corporation is prosecuting as much work as the weather conditions permit. The total amount spent on local improvements is estimated at $450,000, an increase of twenty per cent. over last year. A building permit was issued for a $60,000 bake-shop, capable of turning out 1,500 to 1,800 loaves per hour.

Merchants complained of trade being delayed by belated winter conditions, but business in all lines showed signs of buoyancy. The October customs receipts were reported at $98,725, a gain of $9,000 over the same month last year. The bank clearings for October, 1910, were $17,000,000, a gain of nearly $2,000,000 over October of last year. Similar gains were shown in the weekly report for November, the week ending November 24 being $540,000 ahead.

The strike of plumbers in Montreal which interrupted work on the Grand Trunk Railway hotel is unsettled, but the contractor reports the effect of the strike to be overcome by securing other plumbers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculture benefited by mild weather during November. There is an average supply of fodder for winter. Beef was offered on the Ottawa market, $1.50 and $2 lower per cwt., than the previous month, and pork was $3 lower. Some quotations for farm produce at the end of the month were: beef, front quarters, $6.50; hind, $8.50; pork, $9 to $10; tub butter, 28 cents; new laid eggs, 40 cents; potatoes, $1 per bag; beets and carrots, 50 cents per bag; parsnips, 75 cents per bag; cooking apples, $1.75 per bag.

Lumbering.—Lumbermen were prosecuting shanty operations to the usual extent. Snow was more plentiful in the forests than near the city. The month was brisk in barge shipping in order to get lumber removed at water rates.

Manufacturing.—Paper factories were busy and some are adding new lines to their outputs. Garment factories are working overtime. The activity in railway construction in the west creates a market for much Ottawa-made goods.

CONDITION OF PARTICULAR TRADES.

Carpenters were in much demand for repair work to houses. New construction was active and all branches of building were occupied. All branches of engineering and metal trades represented in the city were busy. Blacksmiths, electrical workers and stove mounters were in demand. Jewellers were very busy, as well as woodworkers, carriage makers, and upholsterers. A rush of Christmas orders occupied photo-engravers, and the trades allied to printing were actively employed. Orders were plentiful for clothing. Furriers were very busy. Food trades and leather trades were fairly busy. Clerks had a quiet month in general lines. Theatre employés were busy. The fourth playhouse opened in the city. The close of navigation on the Rideau canal lessened employment in water transport at the usual time. Railways were busy. All but three of the Grand Trunk Railway employés of Ottawa who went on strike in the summer were reinstated. Expressmen were busy.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There were no marked changes in the labour market during November, as compared with the previous month. All lines continued very active. The building trades, notwithstanding some unfavourable weather continued with un-

diminished activity. Good progress was made on the new synagogue for the Jewish population and the building is nearing completion. During the month a contract was awarded for the erection of a stone administration building in connection with the House of Providence. Permits were also taken out for the erection of several new residences, and many alterations and improvements to old ones.

While a number of boats were laid up, business was very active in marine circles, and although November was a very rough month it was a very active one on the lakes. Grain men were particularly busy, and most of the month every elevator at Fort William was busy loading grain for Kingston. In one day fourteen vessels received cargoes of wheat and cleared with a total of 1,750,000 bushels. Towards the end of the month there was a slight increase in the carrying rates.

All the coal schooners running out of Kingston are practically laid up. Some have just made their last trip of the season, and are being unloaded. As soon as the work of unloading is completed they will go into winter quarters. The past was a very busy season in the coal trade. In all lines of marine service help was very scarce during the month.

According to a report presented at a recent sitting of the Council for the County of Frontenac, the making of drain tile at the county jail has proved a success. According to the report, a good profit was shown on the investment, an increase over that of last year, and the various municipalities of the county are enabled to purchase tile at a very low rate. The various banks, and wholesale and retail houses reported an active month, while already merchants in general are anticipating a large Christmas trade.

During the month a considerable reduction occurred in the prices of meat. Sirloin steaks that were sold from 20 cents to 22 cents, were reduced to 15 and 18 cents, round steak sold at 17 cents; fresh loin pork, 15 cents; smoked ham, 17 cents. These are only a few of the reductions. The reductions are said to be the result of a better supply on the market.

There was much activity among the various labour organizations during the month. A number of important meetings of the central body were held. Arrangements were also made for addresses to be delivered before the central body by professors of Queens' University. Some of the local ministers have also arranged a series of sermons on labour topics to be delivered from their pulpits. Already a number of addresses and sermons have been delivered.

There were no strikes, lockouts, or changes in the rates of wages or hours of labour reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers continued active finishing up the fall ploughing and making general preparations for winter work. Towards the end of the month a number of meetings of the Farmers' Institute were held in various parts of the county and were well attended. Speakers from a distance addressed the meetings on the general subjects of farming, the poultry, dairying and other branches of agriculture.

Lumbering, manufacturing, mining, railway construction and other industries continued active.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering and shipbuilding trades were active. Business at the Kingston drydock was particularly active. A number of men were brought on from Collingwood and elsewhere, and a large staff of local men are also employed. The usual activity was also resumed at the Canadian Locomotive works. Printers, clothiers, bakers, butchers, cigar makers, tanners and curriers, barbers, broom makers, clerks, delivery employés, furriers, hotel, restaurant, theatre, and laundry workers reported an active month. A new restaurant was opened in the centre of the city, and another one announces an opening shortly. All branches of transport and unskilled labour continued active.

DISTRICT NOTES.

Gananoque.—Early in the month this town suffered the loss by fire of the works of the Ontario Wheel Company. About one hundred employés were thrown out of employment. The entire plant was carried by policies amounting to $137,000.

Already steps are being taken for the rebuilding of the Company's works. The D. F. Jones Company has arranged a night gang and is running its rolling mill night and day.

BELLEVILLE, ONT., AND DISTRICT.

Mr. James Hanley, correspondent, reported as follows:—

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The corn and potato crop has been good in this vicinity. Farmers have fall ploughing well along. There has been an extra large crop of red clover this season.

Manufacturing.—The cement mills at Point Ann are running to full capacity, as well as all other local industries. There is a scarcity of labour at present, owing to the large amount of sewer construction going on.

Railway construction.—The Canadian Northern Railway Company is grading the road between here and Trenton, and has about 100 men employed. The Grand Trunk Railway Company has about 150 extra men employed completing the extensions to yards here.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have been fairly active during November, owing partly to the fine weather. Labour was employed to a greater extent than during the same month last year. The Canadian General Electric Company is putting up a large addition. The new building will be 274 feet long and 125 feet wide; it will be of brick and steel, and the estimated cost is $100,000. The Quaker Oats Company is erecting a new elevator of 600,000 bushels capacity, at a cost of $125,000 or $130,000. There was a noticeable improvement in factory employment, and the outlook for labour during the winter is brighter than at this time last winter, and the unemployed are not so numerous. The Lake Simcoe & Peterborough Navigation Company is the name of a new company being organized with a capitalization of $250,000, to operate a line of steamers from Orillia to Peterborough. Wholesale and retail merchants reported business good. There have been no changes in rates of pay or hours of labour reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fine weather has enabled farmers to complete their fall work—ploughing and marketing their produce. Good prices prevailed.

Lumbering.—The sawmills have shut down for the winter, and the men are going to the lumber camps. They have had a good season.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades had a very busy month. Very few mechanics were out of employment. Iron moulders and helpers, machinists, electric workers, linemen, brass workers, boilermakers, blacksmiths and horseshoers had an active month. Boat builders and canoe makers have had a very busy season. Woodworkers, upholsterers, varnishers and polishers were all working full time. Printers continued busy. Bookbinders were active. Journeymen tailors reported an active month on fall trade. Bakers, confectioners, butchers and meat cutters were busy. Cigar makers were quiet. Leather workers, harness makers and saddlers were active. Barbers, clerks, stenographers and delivery employés were active. Furriers were busy. Railway and street railway employés, expressmen and teamsters

were busy. Unskilled labour was well employed.

DISTRICT NOTES.

Port Hope.—In addition to the new building in course of construction for the Ideal Company, which will cost $100,000, a new storehouse will be built, the offices enlarged and remodelled, fire-walls erected through plant number one, and other improvements made. The town has just completed 114,965¼ feet of concrete walks, at a cost of $11,815.38.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions throughout November were unusually favourble for the season. The prevalence of fine and mild weather enabled outdoor work to be continued almost without interruption. Building was active, and the large amount of civic construction on hand, including the work on the electric distribution plant in connection with the Hydro-Electric power transmission system, and a number of street paving and cement sidewalk contracts, employed a large number of men. The approach of the holiday season stimulated activity in those departments that cater to the Christmas trade, and buying set in earlier than usual, so that a very active season is anticipated. The number of building permits issued during October was 862, representing an approximate value of $2,914,980, as compared with 646 permits representing a value of $1,540,355, for October, 1909. The number issued for the ten months ending October 31, was 5,405, representing an approximate value of $17,734,488, as against 4,232 permits, representing $14,615,232, for the first ten months of last year. The "pay-as-you-enter" system has been introduced on the Toronto Street Railway. Eighteen cars of this type were operated for the first time on November 27, on the Yonge street route, and the sytem will be put in force on all lines after December 1. The report presented at a board meeting of the managers of the Toronto House of Industry showed a remarkable decrease in the number of casual poor applying for assistance, there being only about one-half the number needing relief as during the corresponding period last year. A statement issued by Harbour Commissioner Postlethwaite shows that the registered tonnage of the vessels entering Toronto harbour for the ten months ending October 1, was 1,506,627 tons, being an increase of 107,339 tons, as compared with the corresponding months of 1909. The total number of vessels arriving in port was 3,168, as against 2,700. The Consumers' Gas Company has announced a reduction in the price of gas from the present rate of 75 cents per 1,000 feet to 70 cents, to take effect on January 1.

Contracts for pillars and lanterns for the city's new lighting system have been awarded. Permits have been issued for the erection of the Victoria College dining hall and students' residence, at an estimated cost of $350,000, and for the following school buildings: Oakwood High School, $150,000; Ossington public school, $60,000; Manning avenue public school, $60,000; and Humberside Collegiate Institute, $50,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The autumn has been an unusually favourable one for farming operations. Fall wheat, of which a greatly increased acreage has been sown, is looking well. The open weather allowed the stock to pasture out until nearly the end of the month. The crop of ensilage was heavy, and there is abudance of feed to winter the stock. Farmers were mainly occupied in marketing and caring for stock, through fall ploughing engaged the attention of many to a later period than in most years.

Manufacturing.—Nearly all manufacturing plants were active with plenty of work on hand. The prosperity of the past season has induced a general feeling of confidence, and in view of favourable conditions in the West, and the certainty of a heavy demand in the spring, there

will be more disposition on the part of manufacturers to accumulate stock, in the absence of orders during the winter. The Canadian Autopress Company, Limited, has purchased a factory building on the corner of Eastern and Carlaw avenues, to which they will build an addition, for the manufacture of printing presses.

The Elder Carriage Works, Limited, is building a three-storey automobile factory on the corner of Soho and Phœbe streets, to cost $12,000.

Railway construction.—The reconstruction of the Belt-line railway by the Grand Trunk Railway Company was proceeded with; the section of the road between Fairbank Junction and Yonge street has been completed, and good progress made east of Yonge street. On the Toronto-Ottawa branch of the Canadian Northern Railway, the grading on the section between Toronto and Trenton is practically finished, and bridges are being erected in Pickering and Whitby townships. Work was begun about the middle of the month on the Canadian Northern Railway Company's line from Toronto to Hamilton and Niagara Falls. A large force were employed grading the road between West Toronto and Port Credit. The Toronto Street Railway extensions on Harbord street, Adelaide street and Wilton avenue, comprising in all about two miles of track, were completed.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were well employed. Plumbers and steam and gas fitters were particularly active. The metal and engineering trades had generally a good month, but shipbuilding was quiet. Some machinists, riveters and boilermakers were out of work. Structural steel workers and electricians were active. Jewellers and silversmiths were very busy. Furniture workers, cabinet makers, carriage and automobile workers, coopers and upholsterers were active. Piano workers were steadily employed. Printers, bookbinders and lithograpers had plenty of work. The clothing trades were generally busy. Boot and shoe workers were fair. Bakers and confectioners, butchers, brewery workers and cigar makers were well employed. Leather workers had a good month. Railway and street railway employés, teamsters and expressmen were active. Hotel and resaturant employés were fairly well employed. Clerks, salesmen and others engaged in retail trade were rather quiet early in the month, but busier toward the end. Unskilled labour was generally well employed.

DISTRICT NOTES.

The Town of North Toronto has decided to raise $162,000 for a sewage disposal plant, out of general taxation, and to levy $75,000 for the laying of the mains and other works on the local improvement plan.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

November was a busy month. The Ontario Power Company employed as large a force of men as could be worked on its extension of plant and buildings. Building contractors were very busy, electric linemen were rushed and farmers were active. The Von Gal Hat Company commenced to operate its new factory. Twenty hands were employed at the start, and the number will soon be increased to fifty. General business was good. In addition to the several business blocks started in previous months, another was under erection. Merchants at the south-end of the city will co-opearte in paying the cost of a special permanent illumination of business streets, similar to the system inaugurated at the north-end some months ago. Contracts were also let for additional electric lighting of city and suburban streets at municipal expense. The Canadian Niagara Power Company was installing the sixth unit of its generating plant, an addition of 12,500 horse power capacity.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were completing their season's work, and nurseries employed many extra men for the fall shipping season. Fall wheat was in good condition.

Manufacturing interests were in good condition. The cutlery and haberdashery factories, and the chain and trap works, were especially busy.

Railway construction.—Freight traffic on all lines was heavier than in October. Passenger traffic was steady.

Other industries.—It is planned to have the Niagara boulevard, from the falls to Fort Erie, twenty miles, completed in 1911. All but 1 mile of the roadway is completed or under contract. A number of bridges will be built next year.

Plans were approved for the erection of number two spillway house in connection with the extension of the Ontario Power Company's plant.

Immigration inspectors deported 266 persons from Canada at this point during October.

CONDITION OF PARTICULAR TRADES.

The approach of cold weather has maintained the activity of the building trades. Three shop and office buildings, a wholesale warehouse, a mill, telephone exchange, fire hall, armoury and many dwellings were under way. Several will be under roof so that they may be finished in cold weather. All building trades were busy, except builders' labourers and stonecutters, and the latter were more active than usual. Metal and engineering trades, particularly electrical workers and linemen, were active. Journeymen tailors were active; suspender, neckwear and shirt makers busy. Twenty hands commenced work in the new hat factory. In all the industries of food preparation employment was quieter. Office, sales and delivery employés were well employed. Hotel and restaurant employés were quiet. General railway employment was good. The season of navigation was drawing to its close, and many craft were laid up. Teamsters were busy. Unskilled labour was well employed.

DISTRICT NOTES.

Chippawa.—A waterworks by-law was defeated. Harbour dredging ceased for the season.

Pelham.—A considerable number of extra men were employed in the nurseries for several weeks.

Welland.—A garage and machine-shop was erected. Collapse of a coffer-dam used in building the new Michigan Central Railway bridge threw twenty men out of work for a time. The several new factory buildings were nearing completion. The knitting factory was ready for its machinery; twenty-five men were building the walls of the third storey of the overall factory, and the new office building at the steel works was almost finished. All the established manufacturing concerns were busy.

Port Colborne.—The Government elevator was very busy. Its full storage capacity will be used this winter, and several vessels with grain cargoes will winter here. It is expected that about 150 men will be employed all winter on the building and equipment of the new flour mill. Many foreign labourers will be dismissed.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity prevailed in the labour market for the month of November. All branches of industry were active, with rush conditions prevailing in some cases. Altogether, labour was much better employed than in the corresponding month of last year. Open weather prevailed, favouring building operations and civic work on sewers, pavements, concrete walks and curbing. Work on these were rushed, owing to the advance of the season. The addition to the McSloy Brothers' hair-cloth factory, a building 45 x 150 feet, of which the foundation is now completed, will be rushed with all possible dispatch. The work on the new

chain building for the McKinnon Dash & Metal Works is making good progress. The new hospital building, costing $65,000, now in course of erection, will be ready for occupation by June, 1911.

Business, wholesale and retail, was reported good, and preparations made for a good Christmas trade. Market prices for butter, eggs, meats, &c., remained firm, prices ranging a little higher than for this time last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fall farm work is well in hand, as the open weather favoured it.

Manufacturing.—All factories and mills were active to busy, running full time, and prospects were good. The McKinnon Dash & Metal Company were running a night shift of about fifty hands. The Reo Automobile works took on additional hands. The Smith Saw Works are up to full strength. The Monarch Knitting factory is up to the full available supply. The Crocker-Wheeler workstaff is larger than ever. The Welland Vale Company are running full time, with work ahead. The Jenks Machine Works have also a large staff of employés at work. The canning factories were rushed with work.

CONDITION OF PARTICULAR TRADES.

The building trades were favoured with weather conditions and put in a good month's employment. Every available hand was employed to complete work before the season closed. All branches of the metal and engineering trades were active. The woodworking and furnishing trades were active. The printing trades were active to busy. Journeymen tailors were busy. Boot and shoe workers were active. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers were active. Leather workers, saddlers, trunk and bag workers were active. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant, and theatre employés and laundry workers were active. All lines of transport were active to busy. Unskilled labour was well employed for the month.

Port Dalhousie.—Labour was well employed. A concrete scow, 80 feet long, 24 feet beam and 7 feet deep, was launched successfully during the month.

Merritton.—The labour market was active. A new additional building is in course of erection for the Canadian Wheel Works, 40 x 60. Fitting up of the new rubber works plant is proceeding satisfactorily and will soon be completed; 350 hands will be employed.

Thorold.—Labour in general was well employed.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer. correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There were no changes during the month from the busy conditions that have been the rule during the last few months among the manufacturing concerns. They were all working to their capacity, and prospects are good for a continuation of this condition during the winter. Statements made of a shortage of available labour, however, drew from Commissioner of Industries Mulliss the announcement that a local employment agent was in a position to supply 1,000 labourers if work could be found for them.

Building permits for the month totaled $238,925, an increase of $73,075 over November, 1909. Among the permits were two for new factory buildings and one for an addition. The bank clearings for November were $10,048,849, as against $8,516,468 for November, 1909, and $6,321,419 for November, 1908. The total assessment for 1911, after deducting $240,000 struck off by the Court of Revision, is $47,712,961, compared with $42,285,923 for 1910, an increase of $5,437,038. The City Council will apply to the Ontario Legislature for power to issue debentures for $125,000 for asphalt roadways; to change the date for municipal elections from the first Monday in January to New Year's Day; and for authority to elect its four controllers for two-year terms, two to retire annually.

Prices of antharcite coal were advanced

25 cents a ton on all grades, November 30, making the figure $7 per ton. The Dominion Power & Transmission Company announced an increase of 2 cents per hour in the wages of all its employés on its traction lines, to take effect December 1. The wage agreement with its street railway employés had two years yet to run, and in consideration of the Company's action the Union extended the life of the agreement to April, 1914. The radial railway employés are not organized, but participate in the increase. The discovery of natural gas on the north shore of the bay, which was announced a couple of months ago, has been put to account, and a company has been formed by local capitalists. Relations between employers and employés were undisturbed during the month.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Two of the Oliver Chilled Plow Company's buildings are completed, and manufacturing operations are in progress. Letters of incorporation have been granted the Fox-Seal Silverware Company, Limited, the head office of which is to be in this city. The new buildings for the International Harvester Company are rapidly approaching completion. Wagstaffe, Limited, fruit preservers, are erecting a new $25,000 cannery building. The Ludlan-AinslieLumber Company is erecting a $12,000 office and factory building. An addition is being made to the Chipman-Holton Knitting mills. The F. F. Dalley Company, grocers' sundries, is doubling the capacity of its works. The Hamilton Bridge Company is making good progress with its new office building and the templet and pattern shops.

Railway construction.—The city authorities have received definite information of the entrance of the Canadian Northern Railway into Hamilton. A request has been received for a conference with the city engineer on the route to be adopted through the city. The cheque from the street railway company for the quarter ending September 30, received by City Treasurer Leckie, November 1, shows that the Company's receipts during that quarter were the largest in the history of the Company. The month closes one of the most successful shipping seasons by water that Hamilton has ever had. More boats have entered this port this year than since the days when boats were the principal means of transportation.

CONDITION OF PARTICULAR TRADES.

Employment in the various trades was good throughout the month. November usually brings a slackening off in the building trades, but the extremely favourable weather allowed construction to go on without interruption, and the trades had steady work. Some inquiry was made for carpenters, builders' labourers and teamsters. Stove mounters were also in demand. Transportation employés were very busy, as were garment workers. General labourers found plenty to do, the open weather keeping them all at work.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour of all classes was well employed during November, which compared favourably with October, and was better than the corresponding month of last year. Exceptional activity in the building trades, assisted by favourable weather, furnished employment longer than was expected. Though this has been the busiest year in the history of the building trades in this city, there are fewer vacant houses than for many years past. The iron trades were busy, and large factory additions are being rushed to completion. The Penman Manufacturing Company, Limited, is erecting an addition, 75 feet by 135 feet, four storeys and a basement; about $60,000 will be expended; this will give employment to about 200 operatives. Merchants had a brisk month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm work, so far as outside operations on the land is concerned, has ended for this season.

Manufacturing.—All the factories were busy.

CONDIITON OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators, plumbers, gas and steamfitters, iron moulders, coremakers, machinists and engineers were busy. Electrical workers were very busy. Linemen, metal polishers, buffers and platers, stove mounters, blacksmiths, boilermakers and sheet metal workers were busy. Horseshoers were active. Woodworkers, carriage and wagon makers and pattern makers were busy. Coopers were active. The printing and allied trades were busy. Tailors and tailoresses were very busy. Shoe workers, bakers, confectioners and butchers were busy. Cigar makers, tobacco workers, leather workers and saddlers were active. Barbers, clerks, delivery employés were steadily employed. Furriers were busy. Hotel and restaurant employés were active. Laundry workers were busy. Railway trackmen were active. Freight handlers were busy. Street railway employés were actively engaged. Teamsters and draymen were busy. Cab drivers and hackmen were active. Unskilled labour was well employed.

DISTRICT NOTES.

Paris.—The factories and mills were busy.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month generally was characterized by unusually open weather for the season, enabling out-of-door work to be carried on with but little interruption. The building trades were active during the early part of the month finishing outdoor work for the season. There is little work of any importance ahead except the building of the new Canadian Pacific Railway station, on which a large force of men are employed. Mr. James Fowler, of Toronto, has purchased the Grundy stove plant, which has been idle for some time, Operations will be commenced shortly, with a staff of twenty-five men. Barber & Johnson have let contracts for a modern pork-packing plant, 98 feet by 28 feet, to consist of an abattoir and a cold storage. Messrs. W. W. Hesson and W. E. Rothwell will start a new factory for the manufacture of carpet sweepers, vacuum cleaners and other household articles. They expect to employ about thirty men. The County and City Councils are calling for plans for a new county Court House. The new building is to include court house, jail and offices, at an estimated cost of $125,000. Considerable work is being done in getting factories ready for the use of hydro-electric power; the Taylor-Forbes Company have already started to run their machinery by the same. The formal opening of the new rooms of the Trades and Labour Council took place during the month. Wholesale and retail merchants report trade good. Customs returns for the month of October were $20,302.58, an increase over the corresponding month last year of $4,505.80.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Weather conditions have been very favourable for the farmers, who were busy finishing fall work and marketing produce, for which prices are good and conditions generally satisfactory.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had an active mouth finishing up contracts. Carpenters, lathers and plasterers had a good month, with no idle men. Painters and decorators, plumbers and gas and steamfitters were also busy. Iron moulders, core makers and helpers were actively employed. Tube mill workers and machinists were very busy, also electrical linemen. Metal polishers, stove mounters and blacksmiths had a good month. Piano and organ workers were fair. Sash and door makers had a busy month. Carriage makers and coopers were well

employed. Printers and allied trades were busy. Journeymen tailors were active, with garment workers fair. Confectioners and cigar makers were active. Railway trackmen were well employed, extra men being engaged putting in new tracks for the new Canadian Pacific Railway station. Carters, draymen and teamsters were well employed. Unskilled labour had a fair month, with the supply in excess of the demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

November has been a busy month for both skilled and unskilled labour, all classes being fully employed, and activity exceeding that of the corresponding month of 1909. Towards the end of the month, the Bithulic Paving Company completed its contract for the paving of King street from Albert to Wellington streets. Building operations were still active, favourable weather prevailing. Eleven building permits were issued during November, to a value of $28,950. Good progress was made on the new factory building. In the early part of the month fire destroyed the plant of the Alpha Chemical Works causing a loss of from $35,000 to $40,000, and throwing twenty-five hands out of employment; the existing demand for labour, however, readily afforded these employment in other factories. Bank clearings were favourable, as was also wholesale and retail trade. There were no changes in rates of wages or hours of labour, except in the case of outdoor workers, who now only work nine hours per day.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — Owing to favourable weather, farmers were enabled to pursue ploughing operations until the end of the month. The marketing of sugar beets and other farm produce gave employment to many. Several farms changed hands during the month, prices ranging from $60 to $100 per acre. One small farm of thirty-nine acres was sold for $4,400.

Farm produce during the month sold as follows:—

Butter, 27c., per lb.
Eggs, 30-35c., per dozen.
Geese and ducks, 15c., per lb.
Chickens, 14c., per lb.
Dressed hogs, 11-12c., per lb.
Dressed beef, forequarter, 9c., per lb.
Dressed beef, hindquarter, 10c., per lb.
Hay, $14, per ton.
Straw, $6, per ton.

Lumbering.—This industry was active.

Manufacturing. — Manufacturing establishments were busy, many of them being obliged to work overtime to meet orders.

CONDITION OF PARTICULAR TRADES.

Active conditions prevailed in the building and woodworking trades, while the metal trades were busy. The printing trades were active, and clothing trades very active. With the exception of ice handlers, who were inactive, the other branches of the food and tobacco preparation trades were active. Very busy conditions were reported in the leather, miscellaneous and transport trades. Unskilled labour was active.

WOODSTOCK, ONT., AND DISTRICT.

Mr. John Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The situation continues very much as it was last month. The factories are all busy, some of them working overtime; but there is little demand for labour, skilled or unskilled. A good many men are coming into the city for the winter, and these are supplying any demand for unskilled labour. The Canada Furniture Manufacturers report business for the month exceptionally good. The organ and piano manufacturers are also busy. One of the factories here is working till nine o'clock at night to meet the demand for the Christmas trade. The wagon manufacturers report buisness excellent. There is at present no demand for labour.

In the stove business, the Stewarts report business brisk, the foundry working full time and over time. The only concern here suffering at present from want of labour is the Oxford Knitting Company. There is a constant demand for girl help. Bean & Westlake, biscuit manufacturers, report business very good. The candy department is working to full capacity.

CONDITIONS OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and plasterers were busy, as well as painters, paperhangers and decorators; tinsmiths and plumbers were very busy, and employers say it is hard to get men. Moulders, stove mounters, blacksmiths and metal polishers were busy. Woodworkers, upholsterers, carvers, varnishers and polishers were all busy. Printers reported business good. The clothing trades reported business excellent. Bakers, butchers and cigar makers were active. Business in the leather trades was reported good.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was active this month. All manufacturing establishments were busy, and the large amount of building kept the building trades active, finishing up for this season. The Board of Works has allowed the Westrumite Limited Company and the workers at the sewerage disposal to quit work for the winter. Large gangs of men were employed with the Hydro-Electric Power Commission, and the month compares favourably with the same month of 1909. The Grand Trunk Railway shopmen started short time the first of the month. They now work from 7.30 A.M., to 5.00 P.M. This makes an eight and a half hour day, instead of ten. Wholesale and retail merchants reported business very good. The excise returns for Stratford amounted to $4,252.82, and the customs returns were $11,715.67. There has been no trouble in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy threshing and preparing for winter. Market prices were:—

Chickens, 70c. to $1, per pair
Ducks, 65c., each.
Geese, $1.25, each.
Apples, $1 to $1.75, per bag.
Butter, 22c., per lb.
Eggs, 30c., a dozen.
Potatotes, 60-70c., per bag.
Hogs, $6.50-$6.65, per cwt.
Wheat, 82c., per bushel.
Oats, 35c., per bushel.
Barley, 45-50c., per bushel.
Peas, 70-75c., per bushel.
Flour, $2.60-$2.70, per cwt.

Manufacturing.—All industries were busy with plenty of orders.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, painters, plumbers, stone cutters and builders' labourers were busy. Iron moulders, iron workers and helpers were busy. Machinists, electrical workers and linemen were active. Blacksmiths, boilermakers and jewellers did a good trade. Woodworkers, upholsterers, varnishers and woodcarvers were active. Carriage and wagon makers had a good month. Coopers were very busy. Printers were very busy. Journeymen tailors and garment workers were busy. Milliners were very busy. Bakers, confectioners and butchers were active. Cigar makers were busy. Harness makers and leather workers were active. Barbers, clerks and delivery employés were busy. Hotel, restaurant and laundry workers had a good month. Railway conductors, engineers, firemen, trainmen, switchmen, trackmen and freight handlers were busy. Cab drivers, draymen and teamsters reported a very good month. Unskilled labour was also very busy, but the future is not promising.

DISTRICT NOTES.

Goderich.—Favourable conditions for the employment of labour prevailed. Work is progressing on the new Grand

Trunk Railway station house which is to replace the one recently burned.

Mitchell.—The flax mill and the other factories were running full time. The Hydro-Electric Power by-law was carried.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of November was one of the best of the year from a business standpoint. Work was plentiful in all lines, the approach of Christmas having a good effect. A number of factories and foundries worked overtime, notably the candy and biscuit factories, tin and enamel ware departments of McClary's, paper box factories, fur goods manufacturies, job printing establishments, &c. The building trades experienced as good a month as they had this year, and the railways were very busy. At a recent meeting of the Trades and Labour Council a resolution was adopted, asking the Dominion Government, through the Honourable the Minister of Labour, to see that the Grand Trunk Railway Company carry out their recent agreement with the trainmen, to the spirit and the letter.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Several manufacturers have petitioned the City Council for fixed assessments, with increases over former asesssments, in most cases, as follows:—

	Assessment wanted.	Former Assessment.
McClary Manufacturing Company (stores, &c.)	$200,000	$150,000
McCormick Manufacturing Company (biscuits and candy)	75,000	50,000
Perrin Manufacturing Company (biscuits and candy)	67,000	42,000
Geo. White & Son (threshing machines and engines)	25,000	17,000
Wortman & Ward	10,000	10,000
E. Leonard & Son (boiler and engines)	25,000	25,000
London Foundry Company	5,000	5,000

The above are all for fifteen years, and a vote of the citizens is to be taken on the petitions in January. In connection with the above, the McClary Company have issued the following signed statement of their business for the past eight years:—

	1902	1909	1910 (10 months)
Wages & salaries	$299,735.94	$503,434.50	$493,227.51
Freight	97,891.24	164,627.05	179,685.17
City purchases, &c	63,267.02	136,728.84	122,604.76
Taxes	2,486.72	4,765.47	4,434.42
Average number of men employed in 1902			625
Number of employés at present			1,080
Average, pay roll, per week			13,499.11
Average, pay roll, per day			2,249.85
Average wages paid, including two apprentices, labourers and girls, per day			2.08
Number of dwellings occupied by employés:			
In the Tinware Department			428
In the foundry			455
Making a total of			883
In addition to this there are			130 boarders
Average tax, 1909-1910, per year			4,599.95

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, lathers, plasterers, stonecutters and builders' labourers were all busy. Painters were slack. Iron moulders and iron workers were very busy. Electrical workers were exceptionally busy. Metal polishers and stove mounters were rushed. Boilermakers were busy. Carriage and wagon workers were busy. Car builders reported a lot of work on. Coopers were busy. Printers and pressmen were very busy, and a number of job establishments were working overtime. Journeymen tailors were very busy. Garment workers and boot and shoe workers were working overtime. Bakers and confectioners were exceptionally busy, and were working every night, except Saturday. Cigar makers were busy. Tanners and curriers and broom makers were busy. Furriers were working overtime three nights a week. Paper box makers were working three nights a week. Railway train crews reported a lot of goods moving. A large number of unskilled labourers secured work in the factories and foundries for the winter, and there are not many idle.

DISTRICT NOTES.

Port Stanley.—The fish catches here were the largest in the history of the industry; on a single day lately, 125 tons of herring were lifted by the tugs, at a value of $7,000.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Unskilled labour was not so much in demand during the latter part of November; otherwise, conditions in the labour market remained the same as during the preceding month. On the railways and throughout the railway shops the month was a good average. The Michigan Central Railway Company is adding considerably to its motive power, and evidently contemplates a rush of freight during the winter months. The completion of the tunnel under the Detroit river will greatly facilitate the handling of freight heretofore delayed on account of ice blockades. A by-law to loan $30,000 to the Monarch Knitting Company was passed almost without opposition, and as a result property was at once secured in the centre of the city and work commenced preparatory to the erection of the plant. The factory will be put in operation as soon as possible after completion.

Manufacturing.—Local industries have been working well during November, and all classes of factory labour has been well employed. In the railway shops the demand for skilled labour, especially machinists, has been brisk.

Agriculture.—The local markets have been well attended, and the prices for fowl and vegetables have been sufficiently high to induce producers to attend market.

Fishing.—The fishing at Port Stanley was never better than at the present time, and heavy shipments are being made to New York and eastern points.

CONDITION OF PARTICULAR TRADES.

The open weather permitted work to be continued in the building trades throughout the month, although bricklayers and others employed at outside work were not able to work the entire month. Machinists, boilermakers, blacksmiths were well employed. Tailors were busy. Railway employés in the traffic department were fairly well emlpoyed. There was less demand for unskilled labour than during any of the previous fall or summer months.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The industrial establishments have been exceptionally busy, particularly the planing mills and carriage factories, which were working overtime during the whole of the month. The Chaplin Wheel Works were unable to fill a number of orders on time, and were working overtime the latter part of the month. The International Harvester Company is preparing to enlarge its plant. The American Pad & Textile Company has purchased a large block of land and purposes erecting a large factory. The building permits issued for the month of November were fully up to that of 1909. Wholesale trade was very active. Manufacturers report orders ahead of the previous year. No changes in rates of wages and no strikes were reported.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a fair month. Carpenters and joiners were very busy. Lathers and plasterers reported a good month. Painters, plumbers, gas and steam fitters and builders' labourers were well employed. Iron moulders, iron workers and helpers, machinists and engineers, electrical workers and linemen were busy. Metal polishers, buffers, platers and brass workers were very busy. Blacksmiths, boilermakers and sheet metal workers were busy. Woodworkers, upholsterers, carriage and wagon makers were exceptionally busy. Printers, pressmen, bookbinders and steel and copper-plate printers were very busy. Journeymen tailors, garment workers and boot and shoe workers were busy, as were also bakers and confectioners, butchers, cigar makers and tobacco workers. Barbers, clerks, stenographers, hotel, restaurant and

theatre employés and laundry workers were active. Cab drivers, hackmen, carters, draymen, teamsters and expressmen had a good month. Unskilled labour was well employed.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The city of Windsor never was in a more prosperous condition than at the present time. The labour market was active in all the lines during the month, with a brisk demand for men in many departments of trade, especially in the building trades. The value of permits issued for the month of September was $38,000, as compared with $17,000 for the same month a year ago.

The Burlington Blanket Company has its plant running, and is giving employment to a number of hands. The Winkley Company, of Detroit, Mich., manufacturers of brass goods, has leased a plant and is installing machinery. It expects to be running the last of the month, and will give employment to 100 hands. The figures given out by the assessment commissioner for the past twelve months show that the population has increased from 16,130 to 17,530, an advance of 1,400, or nearly nine per cent., and the total assessment of the city has increased nearly a million dollars; the total for the year being $111,837,615. The wholesale and retail merchants report trade increased from ten to twenty per cent. over last year. There are still twenty-five Grand Trunk Railway conductors out of work.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Retail lumber yards and planing mills are working over time to supply the demand.

CONDITION OF PARTICULAR TRADES.

The building trades were very active, and some of the contractors have refused to figure on any more work, as they have plenty on hand. There was a demand for carpenters, and all others connected with the trade have plenty of work till the new year. The metal, woodworking and furnishing trades were active with plenty of work for every one. Printers and pressmen were very busy, and in some offices worked overtime. Journeymen tailors were busy. Garment workers were in demand. Bakers, butchers, cigar makers and tobacco workers were all fully employed. The leather trades were active. Barbers report trade brisk. Clerks, stenographers and delivery employés were busy. There was a big demand for hotel help. Railway and steam boat employés were fully employed. Owing to the taxi-cab service, cab drivers were not very busy. Teamsters, expressmen and unskilled labour were well employed.

DISTRICT NOTES.

Walkerville.—The Bridge & Iron Company is building a $100,000 addition.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Trade was brisk and labour fully employed in nearly all lines during November. The outlook for the holiday trade was very favourable. The building trades were very active, but owing to weather conditions at this season and short days, hours of labour have been curtailed in some cases. The Royal Bank opened a branch during the month, being the second new bank to commence operations here during the year. The ratepayers of Steelton will vote on two money by-laws on January 1, viz.:—$5,000 for cement walks, and $54,000 for light and power plant, fire alarm system, &c.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Normal conditions were reported in this industry.

Lumbering.—Brisk conditions existed.

Manufacturing.—The various manufacturing establishments were running full time. The additions and new plants of the Lake Superior Corporation were being advanced as rapidly as possible. It was stated that a $2,000,000 paper mill will be erected in the spring by the said Corporation.

Railway construction was proceeding as rapidly as possible.

CONDITION OF PARTICULAR TRADES.

The building trades were busy but shorter hours in some cases were necessary owing to seasonal causes. The other skilled trades reported a busy month.

PORT ARTHUR, FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

For the time of year labour has been well employed in this district, but the supply has been ample to meet demands in all branches. Workmen in the building trades have been on winter time, eight and nine hours a day. There has been no special activity in any trade. Transportation has been slack and owing to the slowness of grain this fall the work at the docks and elevators has been quiet.

Business in wholesale and retail trades has been normal for the season of the year. There has been no changes in rates of wages except the city of Port Arthur, decided to pay teamsters in their employ 60 cents an hour in lieu of 50.

Everything in all branches of labour has been quiet. The Trades and Labour Council of Fort William have nominated labour candidates for all wards of that city for the municipal elections of 1911. The Trades and Labour Council of Port Arthur called a special meeting of the labouring men of that city and four labour candidates were elected to contest the municipality in the interests of labour. There is no ward system of representation in Port Arthur. The labour candidates in Port Arthur are running on the platform of principles of the Trades and Labour Congress of Canada.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The season for whitefish &c. is closed. The herring fishery is now on and will extend till the tenth or twelfth of December.

Lumbering.—Men have congregated in the lumber yards and many have been engaged and gone to the bush, but there is no rush and plenty of men are available.

Railway construction.—Some detachments have been sent out to the construction camps during the month.

The construction work on the Western Dry Dock is being pushed on vigourously and from 200 to 300 men are employed on construction work. Extra shed accommodation on the Canadian Northern Railway has been erected and is nearing completion. The machine shops at Fort William on the Canadian Pacific Railway system are being completed.

Manufacturing.—The blast furnace is running continuously and good grade of iron is being turned out and shipped east and west, while some is being used in foundries both at Port Arthur and Fort William.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades have been kept occupied throughout the month, but men are on short time, and many of the buildings are rapidly nearing completion, and employment in some of the trades such as bricklayers, masons, stonecutters and constructional carpenters have been intermittent. Lathers, plasterers, painters, steamfitters, plumbers and finishing carpenters have all been busy. Machinists and engineers, electrical workers and linemen have had steady work. Printers and allied tradesmen have been steadily employed. All other trades have been normal for the month. Railway employés have experienced a steady month without undue

rush. Transportation on the Lakes has been quiet and freight handlers have had a quiet month. During the last few days more steamers were in and work was busier at the docks before the close of navigation early in December.

Street railway employés, draymen, teamsters and express men have had a steady month.

DISTRICT NOTES.

On the first day of November the Royal Commission on Technical Education and Industrial Training held a session in the Conical Chamber at Port Arthur, and a session in the Conical Chamber at Fort William on the second of November. The labour men of the cities placed their views before the Commission on the need for Technical Education and Industrial Training for this district, and handed in a written statement. The Chairman of the Commissioner asked the labour representatives to supplement their report along certain lines which he was good enough to point out, and asked that such supplemental report be sent on to Ottawa by the month of January for careful consideration.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During November a very large proportion of the outdoor occupations have been closed for the winter. Large numbers of men employed during the summer upon railway construction are returning to the city.

Upon the public works of the city of Winnipeg there will be a decrease in the number of men employed, but not to a very marked extent, as the policy of the city is to proceed with the construction of sewers during the winter, as it has been found by the adoption of a patent system of breaking up frozen earth that the work can be done as economically during the cold weather as in the summer. This policy is adopted with a view to providing work during the winter for those thrown out of employment that ends with the summer weather.

During November, the retail dealers of the city have been exceptionally busy, and and wholesalers have had to meet an unexpected large demand for Christmas goods. The bank clearings continue to exceed those of last year, but the smaller increases weekly, as compared with those for the corresponding periods of last year, are due to the smaller crop. For the month of November the clearings aggregated $127,717,819, which is the largest total for one month in the history of the city. For the first eleven months of the present year the clearings show a gain of 26.3 per cent. over the figures for the corresponding period of last year.

A statement prepared by the Comptroller for the City of Winnipeg shows that during the present summer the amount spent by the city in local improvements was $1,052,035. The table following shows the amount of improvements (in miles) done in each of the past three years, and during the present season:—

	1907	1908	1909	1910 to date.	Total to date.
Sewers	18.91	7.45	7.77	7.90	183.60
Asphalt pavem'ts	9.92	6.50	8.87	9.02	67.78
Macadam pavements	.51	1.90	.81	.63	39.23
Block pavements	1.63	2.21	2.50	1.07	28.63
Granolithic sidewalks	9.12	6.00	7.69	12.33	93.79
Plank sidewalks	20.29	7.27	18.56	13.10	338.27
Grading	21.93	9.39	13.13	12.13	227.02
Watermains (dom.)	23.89	13.52	9.47	5.00	199.19
Watermains (H.P.)	5.00	2.00	1.0		8.00
Fire hydrants (domestic)	234	205	62	94	1,470
Fire hydrants (H. P.)	79		2		81

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Although outdoor operations on the farm are at a standstill, the farmers are very busy generally hauling grain to market. The crop is turning out to be, according to actual deliveries, better than was expected. Judging by the amount of the crop that has already passed inspection the actual yield is not going to fall very far short, on the whole, of that of the previous crop year. The railways have been able to move the crop very much quicker than they have done in

previous years, on account of improvement in the tracks, especially the double tracking from Fort William to Portage la Prairie. This may account for the actual inspections being only about four millions less at the present time than they were at the corresponding period of last year. This applies to wheat only. The movement in the coarser grains has been much lighter.

Railway construction.—Most of the camps are ceasing work for the winter, and the men are either returning to the cities of the province or are seeking employment in the woods.

Lumbering.—The heavy snow storms during the latter part of the month, and heavier frosts, have enabled the cordwood contractors and lumber men to get their forces to hauling. There is a very keen demand for men to work in the woods to the north, and many men are being sent from Winnipeg to work in the lumber camps of Northern Saskatchewan.

Fishing. — Some uneasiness is felt amongst the fishermen on the shores of Lake Winnipeg. By an order-in-council dated April 18 last, Lake Winnipeg is closed to commercial fishing next season. Since that order was passed the Fisheries Commission, consisting of Professor Prince, Mr. Hugg and Mr. D. T. Reid, made a thorough inspection, during August last, of the Lake Winnipeg fishing grounds. As a result of this inspection it is hoped by the Selkirk Board of Trade that the lake will be reopened for fishing. Until some definite decision is arrived at, great uneasiness will exist amongst the fishermen, who number, together with others indirectly dependent on the fishing industry, fully 1,000 persons. All preparations for next summer's fishing have to be made early and a heavy preliminary liability is incurred. All the nets used in Lake Winnipeg are of a special mesh, and are generally procured from Scotland. These nets have already been ordered in most cases, in anticipation of the order-in-council, made last April, being rescinded and the Lake being thrown open for commercial fishing. It is generally understood in the Lake Winnipeg district that this depends upon the nature of the report of the Royal Commission. The reason upon which hope of the lake being thrown open for fishing is based, is that the catch of 1910 was never equalled for quality, and that the limit of 2,500,000 pounds was procured in less than five weeks. From this fact it is argued that the present restriction as to output is effective in conserving the fish supply of the lake. The fishing equipment of the lake consists of fourteen steamers and about two hundred sailing craft, together with storehouses and freezing plants.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during November was active. The building trades were all very busy completing work for the season. The city has practically completed the sewer and water extensions and will soon be closing the season's work.

A petition signed by over 2,000 ratepayers for a street car system was presented to the Council at its last meeting. The most disastrous fire in the history of Brandon occurred in November. The Hospital for the Insane was completely burned to the ground. The destroyed building contained accommodation for 670 patients and seventy-five attendants. At present, the patients are housed in the winter fair building, but temporary frame buildings are being erected on the site of the destroyed building. It has been intimated that the Government will build a reinforced concrete building to cost about $250,000, next season.

The labour market was quiet.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The majority of the gangs of men employed by the local lumber interests have left for the camps.

Manufacturing.—The McDiarmid Sash & Door Factory continues to work overtime.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy, but prospects are poor. Carpenters and joiners were very busy, in some cases working overtime. Lathers and plasterers, plumbers and steamfitters, and builders' labourers were busy. Electrical workers and linemen had a good month. The printing and allied trades were busy. Cigar makers were dull. Railway transport was active. Unskilled labour was dull.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Throughout the past labour has been very active in all its branches. For plumbers, steamfitters, bricklayers, painters and paperhangers the demand has exceeded the supply; and from the present outlook conditions are likely to remain so for a while. All plans and arrangements are now practically completed for the building of the new Grand Trunk Pacific Railway branch line, which enters the southwestern past of the city. The agreement calls for the work to be started in the spring of next year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The winter having set in, little or nothing is doing among the farmers.

Manufacturing.—The Young-Thomas Soap Company, of Regina, is adding to its present structure, increasing its staff and installing more modern machinery to cope with the constantly increasing demand for its product. It is very probable that in the near future a mill for the production of linseed oil will be started by an American company just formed.

Railway construction.—All the railway construction gangs have closed down for the winter, but there is a large amount of construction work for next year.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a very active month and were much in demand. Carpenters and joiners were very active, as also were lathers and plasterers. Painters and paperhangers were very active and much in demand. Plumbers were active, also stonecutters and builders' labourers.' Electrical workers were very busy and in demand. Linemen were active. Blacksmiths were very busy. Printers, pressmen and electrotypers were well employed. Journeymen tailors reported a good month, as did garment workers. Bakers and confectioners and butchers were active. Cigar makers reported business improving. Barbers were active; also clerks, stenographers and delivery employés. Hotel and restaurant employés were fairly busy, while laundry workers were much in demand. Hackmen, draymen, teamsters and expressmen were all very active. Unskilled labour was active.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The conditions of the labour market during the past month have been excellent for the period of the year, comparing a little more than favouraby with the corresponding period last year. As reported previously, building operations have produced a record for activity during the season, and during the month just closed contractors have put forth strenuous efforts to complete their outdoor work before rigorous weather conditions set in.

All departments of trade have been brisk, and, due no doubt in a large measure to the good average crops realized throughout the district, money has moved very freely. Real estate has been active in both inside and outside properties, and retail traders in all lines report satisfactory turnovers for the period.

On the whole, the labour situation for the time of year is very good, while busi-

ness is exceedingly buoyant. The city's paving programme for the year has been completed, and this, along with other civic improvements has vastly improved the city's appearance.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing operations are now completed in this district, and considerable grain has been marketed. The results, on the whole, have been better than were anticipated earlier in the season, for although many settlers in the newer districts were hit hard as a result of the unusually dry season, the crops of the district average high in the matter of yield, and both wheat and oats have graded well.

Manufacturing. — The Saskatchewan Flour Mills, the largest industry of the city, has had a very busy month, and at the present time this firm have under construction what it is claimed will be the largest oatmeal mill west of Winnipeg.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, plasterers, lathers have all been fully employed during the month; electricians and linemen have also been busy, painters, decorators and paperhangers active; also builders' labourers. Printers and pressmen were busy, as were blacksmiths, iron workers, boilermakers, engineers and moulders. Railway employés have all been well employed. Barbers, clerks, bakers, butchers, tailors, stenographers, laundry workers were all busy. Unskilled labour has been in good demand.

SASKATOON, SASK., AND DISTRICT.

Mr. A. B. Jones, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market for the month of November showed a decided decrease in activity, especially in the building trades. Very few new buildings have been started during the month. Plumbers, steamfitters and painters have been fairly well employed. The Saskatoon clearing-house returns, the first to be issued since the house opened for business on November 4, for the first week, by far exceeded expectations, the figures being $1,145,130. Wholesale and retail trade still continued heavy. A number of carpenters, employed by Contractor Godwin, went on strike on November 22, as a result of a reduction in wages from 45 to 40 cents per hour. Their places were soon filled by non-union men, the class of work not requiring a great amount of skill. It is thought that an amicable settlement will be arrived at.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The new flour mill of the Saskatoon Milling Company is expected to begin operations December 1. The old mill has been running day and night in order to meet the demand. The sand, lime, brick plant is still running and expects to be most of the winter, preparing for the heavy building season of next year. Planing mills, sash and door factories and foundries were very busy.

CONDITION OF PARTICULAR TRADES.

A number of the building trades, viz.: carpenters, bricklayers, stonecutters and plasterers have experienced a decided slackness which is likely to continue throughout the winter, while plumbers, steamfitters and painters have had a fairly good month. Electrical workers, blacksmiths and sheet metal workers were well employed. Printers and pressmen were well employed, as well as journeymen tailors. Cigar makers were very slack. Barbers, clerks, laundrymen, delivery employés, hotel, restaurant and theatre employés were fairly busy. Railway employés, teamsters aud expressmen were busy.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been a greater demand for labour than last month, owing to the

remarkably fine weather. In most of the building crafts the demand has not been met. This condition is not expected to continue. The shipment of coal is on the increase. The Clearing House figures for the week ending November 17 were $659,900.22. Retail trade has been good. An increase in the number of clerks is noticed. Draymen are kept busy by the wholesale houses. Wages in all branches remained as they were. There has been no disturbance in labour circles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This has been a fine autumn for farming. There has been an extra amount of moisture, and no frost. Farmers have been ploughing up to the middle of the month. Winter wheat looks well.

Railway construction and employment.—Surveyors are at work on proposed lines.

Mining.—Mining is very busy. The A. R. & J. Company (Galt coal) are employing 750 miners. The Diamond City Coal Company employ about 200 miners. About 150 men are employed at sinking shafts for the Lethbridge Collieries.

All the building, metal, printing, clothing, food and tobacco preparation, miscellaneous and transport trades were from busy to very busy. Unskilled labour was fairly well employed.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The past month has been a very busy one for nearly all classes of labour in Calgary.

The building trades have been especially busy, with the exception of the stonecutters who have a few of their number unemployed.

Work is being rushed on most of the new blocks in course of erection in order to get covered in before the weather becomes too severe.

The new City Hall, the new library, and other jobs are being held up for lack of building material caused through the merchants being crowded with orders. A large apartment block has been started. It will cover a space of 230 feet by 100 feet for F. D. Beveridge & Ross Wilson. Also a new six-storey business block is to be built. The new departmental store is expected to be ready to commence business by February 1, 1911. Tees & Persee have decided to add three more storeys to their warehouse.

Several large blocks are rapidly being pushed toward completion. Foremost amongst them is the Lineham block, designed for stores and offices and to cost $150,000. It is to be five-storeys in height and have a frontage of 49 feet, and a depth of 130 feet. In addition, gangs are working night and day on A. A. Dick's Hotel, while the King George Hotel is showing satisfactory progress. A large structural tile manufacturing firm has signified its intention of building a factory here. The Riverside Lumber Company, the South Alberta Lumber Company and the new Michel Sawmill Company of New Michel, B.C., have amalgamated under the name of the Riverside Lumber Company. The new Company is capitalized at $500,000, and will have its head office in Calgary.

There has been considerable activity in the wholesale and retail trade during the month, and it is reported to be considerably better than at the corresponding period of last year. There has been considerable unrest in the labour market during the past month. The employés at the Power Station, who number fifteen, have petitioned the City Council for an increase of $10 per month. The city teamsters have petitioned the City Council for an increase from $60 to $65 per month. The men employed at the city incinerators are also asking for an increase of $5 per month. The street railway employés demanded an increase of wages and an agreement was reached whereby they will receive a minimum of 26 cents per hour, and a maximum of 32 cents per hour. They were also successful in getting eliminated a clause in the agreement whereby "they agreed

not to organize or belong to a labour union." The members of the Plasterers' Union will receive an increase in wages on February 1, 1911 from 68¾ to 75 cents per hour.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, joiners, lathers, plasterers, plumbers, gas and steam fitters and builders' labourers had a good month. Masons are getting rather quiet. Painters, paperhangers were fairly well employed. Stonecutters had a dull month. Iron moulders, iron workers and helpers, coremakers, machinists and engineers, electrical workers, linemen, blacksmiths, sheet metal workers were well employed. Woodworkers, upholsterers report fair. The printing trades were busy. Journeymen tailors were active. Butchers, bakers and confectioners were busy. Miscellaneous trades had a good month. Railway employés, street railway employés, teamsters and expressmen were well employed. Unskilled labour in demand.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the month was active; the open weather permitting outdoor work to be continued throughout the month.

The demand for building mechanics was not as great as last month, but would compare favourably with that of the same month a year ago. During October every department of public business showed a substantial increase over the corresponding month of last year. The largest gain was in Customs' receipts where an increase of over ten thousand dollars from $20,255.36 to $30,869.64 was made, and in bank clearings, which totaled $6,927,932.60, as against $4,464,143 in October, 1909.

October, 1910 was a busier month for building than the same month a year ago; permits issued last month were valued at $146,874, compared with $83,535 in October of last year.

The value of stamps sold at the post office during last month was $7,864 as against $5,864 during October, 1909. The street railway carried 331,096 passengers during the month as compared with 242,666 during October, 1909. Wholesale and retail trade was active.

The strike called by the Plasterers International Union on October 25th to inforce a demand on the Builders' Exchange for an agreement with that body, was called off on the nineteenth instant, the men returning to work under the same conditions as prevailed before the strike, with this exception, that all the building trades (except the bricklayers) have pledged themselves, through the local Council of the Building Trades Department of the American Federation of Labour, to assist the plasterers in enforcing the "closed shop."

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The report of the Minister of Agriculture for the past ten and a half months tabled in the Legislature on the twenty-fifth instant shows the acreage under seed wheat for the past fall is 180,000 acres as against 128,000 for the previous year.

The Dairy Commissioner reports the dairy production of the province as being somewhat smaller this year than last, owing to short pastures during the spring and early summer.

During the season, fifty-nine creameries and twelve cheese factories were operated as compared with fifty-three creameries and eleven cheese factories last year. The output aggregated about eighty-five per cent. of that of 1909.

In the report of the chief game guardian the fur returns show that small dealers handled 234,337 and wholesale dealers 671,986, muskrat pelts. The total transactions show that furs to the value of $641,778.05 passed through the hands of the various dealers.

Lumbering.—Lumber companies have sent a large number of men to the woods the past few weeks. Men thrown out of work by the closing down of grading

operations on the different railways are thus given an opportunity to procure employment during the winter.

Railway construction.—While a number of railway contractors have closed down for the winter months, the Grand Trunk Pacific have a large number of men at work west of Edison and the reports are that they intend working as late in the season as possible.

CONDITION OF PARTICULAR TRADES.

As in former years a number of bricklayers and masons have gone to points south and west to work during the winter months, those remaining in the city were actively employed. Carpenters and joiners were busy . Lathers were busy. Plasterers were very active during the latter part of the month. Painters, paper hangers, plumbers, steamfitters and stone cutters were active. Builders' labourers were active, except during the plasterers' strike. Iron moulders, iron workers and helpers were active. Electrical workers and linemen were busy. Blacksmiths and horseshoers were active. Sheet metal workers were busy. The printing and allied trades were active. Journeymen tailors were active. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers had a good month. Barbers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés were active. Transportation employés were busy. Unskilled labour was well employed.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout Kootenay district in November was quiet. Coal and quartz mines were fully supplied with labour, and there was a small number of unemployed in both industries, while sufficient numbers have arrived from the prairies to man the various logging camps. As some of the latter are inexperienced in woods work, it is reported that there is still room for a limited number of experienced lumbermen. The majoirty of the lumber mills have ceased sawing operations for the winter months, though they continue to run their planing mills.

The Lucky Jim Mine, situated in the Slocan district, has a force of thirty-six men employed, chiefly on development work.

The Dominion Government is supplying a long-felt want by the construction of wharves on the Kootenay lake, at Proctor, Crawford Bay and Queen's Bay.

Considerable interest is taken by the coal consumers in Nelson, in the move recently made by the Board of Trade, in the direction of securing a reduction in freight rates on coal. According to figures supplied by F. A. Starkey, president of the Board of Trade, Galt coal, Lethbridge, costs $3.55 a ton at the mine, which, with $3.10 railway freight charges, and 35 cents for hauling, makes the actual cost at the bunkers at Nelson, $7 per ton to the dealer. This is retailed in less than car-load lots at $8.25 per ton delivered, the margin of $1.25 covering the cost of delivery and the profit to the coal dealer.

The force at the Corbin Coal Mines has been reduced to about 200 men, shortage in orders for coal being reported as the cause. The miners of the Crow's Nest Pass Coal Company, at Michel and Coal Creek, have been employed almost full time this month, in contrast with about half-time the two previous months.

The Kootenay Central Railway, to run from a point near Jaffray, on the Crow's Nest Pass branch of the Canadian Pacific Railway, to Golden, on the main line of the Canadian Pacific Railway, is now under costruction, with a force reported about 350 men and two steam shovels on the Jaffray end; the headquarters for the construction Company is Wardner, B.C. A small force is also employed on the Golden end of the same line.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Indications are that great activity will prevail throughout the city and district from now on. Contracts aggregatng in value nearly half a million dollars have been awarded recently, and the greater part of this work will be carried on right through the winter. Of these, the one of greatest interest locally is the laying of the Eighth street sewer sytem, in which some 20 miles of sewers will be laid down.

Although no more cement sidewalks will be laid this year, the contractors' time will be fully occupied with the necessary grading and constructing retaining walls, curbs and gutters, preparatory to laying the walks in the spring. A gang of men will be at work all winter laying the city's new water main from Coquitlam lake to the reservoir in the city, and extending the pipe line down Lulu Island to Richmond.

The municipality of Burnaby has voted $70,000 to be spent in laying wooden sidewalks. These contracts have been awarded, and operations have commenced. In all of these contracts it is stipulated that the standard rate of wages shall be paid and the men required to work only the standard number of hours.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The fishing on the river is quiet, and it is the general opinion that, although the season has been extended by the Government, there will be few more fish to catch. A few cohoes are being brought to the packers every day, and some qualahs are also being caught.

Lumbering.—The lumbering business continued fairly good; most of the mills are working full time.

Railway construction.—There is a demand for labourers to work on the railway construction, particularly on the Canadian Northern Railway. This Company has just awarded a contract for the erection of a large wharf at the terminal point, Port Mann. The British Columbia Electric Railway Company continued to make improvements to various lines, and has let the contract for the building of a new and up-to-date depot in this city.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons are kept busy, the supply seemingly equal to the demand. Carpenters, lathers, plasterers and painters are busy. Plumbers, gas and steamfitters are all working, as are builders' labourers. Iron moulders and helpers are fairly busy, while machinists are still on strike. Electric workers and linemen are all working, so are blacksmiths. Ship builders and caulkers are quiet, while horseshoers are active. Upholsterers and electric car builders are working full time. Printers, pressmen, journey men tailors, garment workers and boot and shoe makers are active, as are bakers, butchers and cigar makers. Barbers are all working, clerks stenographers, delivery employés, hotel employés and laundry workers being busy. Railway employés are active, ship labourers quiet, while electric street railway employés are very active. Teamsters and expressmen are busy. Unskilled labourers being in demand.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET,

The labour market was very inactive, chiefly on account of the winter rainy season having set in. The total value of buildings at present under construction exceeded that of a year ago. There was no change of the rates of wages during the season. However, a change of wage-schedule is probable in the Canadian Pacific Railway Company coasting steamship service, in accordance with the award of the Board of Conciliation appointed by the Federal Government. The printers are negotiating for a raise of wages. The volume of trade in all lines is good, and in

every case heavier than a year ago. The Vancouver Milling Company placed the price of their "Royal Standard Household" flour at $6.50 a barrel, selling direct to the retailer. Other standard brands quoted at $6.90.

A delegate of the Electrical Workers' Union to the Trades and Labour Council stated that "more half-trained mechanics, as turned out by the correspondence-schools, were met with in his line than in any other skilled trade." The Trades and Labour Council went on record as favouring "all kinds of education, but as opposed to the promiscuous technical education which is a detriment to trades unionism, and will recommend that some method be devised to enjoy the benefits of one without the perils of the other." Delegates from most of the unions to the Trades and Labour Council reported a favourable condition of affairs, excepting the cigar makers.

In accordance with an Act passed in 1901 by the Provincial Government, an inspector of bake-shops was appointed. The bakers state that their "union has never been able to secure the enforcement of this Act before, and that as a result most of the bread baked in Vancouver by non-union shops has been under the most unfavourable and most unsanitary conditions."

The Trades and Labour Council passed a resolution to the effect that "any local union of the building trades which refuses to affiliate with its local building trades council, should be suspended by its own national union until it does join such local body."

Regarding the Labour Temple Company of the Trades and Labour Council, a motion was passed by the latter body, providing "that the board (or corporation) shall not dispose of more shares than those held by the Council." The Company has a capital of $100,000 in shares of $1 each, and of these the Council at present owns between 43,000 and 44,000. With the Company abiding by the motion of the Council, the position is then revealed that there will only be out about 85,000 or 86,000 shares so that between 14,000 and 15,000 will remain in the treasury and not subect to disposition.

The machinists reported that the strike was still in progress. The Strathcona Hotel business was sold for $80,000. Building Inspector stated that his estimate was $12,000,000 for the years' building permits. A $60,000 theatre will be built at the corner of Harris street and Westminster avenue. Also an apartment house (corner Bute and Comox streets), for $100,000. The Bank of Nova Scotia will extend its premises, costing $30,000.

The Conservative Club have started a campaign to raise $450,000 to erect a building. The Liberal Club is discussing the advisability of also raising a building fund. The Young Men's Christian Association succeeded in raising, in five days, $520,000 for three buildings.

Shipping was active. The Park Board has requested the City Council to pass a by-law for $60,000 for park improvements. The first Canadian apple show was held from October 31 to November 5, inclusive. There were eleven carload and eleven ten-box contests, besides several hundred others.

DISTRICT NOTES.

North Vancouver.—A saw mill and hotel will be located at Imperial, near the site of proposed dry-dock, which has been subsidized by the Government. The Wallace Ship Yards were very busy.

Prince Rupert.—All the Skeena river boats have been tied up here for the winter, which include the fleet for Grand Trunk Pacific construction. A large number of English speaking workmen have left for southern points, but the foreign element will remain till spring.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chrow, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was fairly brisk during November, and considering the season of the year, there were comparatively few unemployed. Owing to weather condi-

tions, the city has laid off a large number of men employed on street work, and during the next two or three months a surplus of unskilled labour may be expected. All the building trades employed on outside work reported work as uncertain, and these conditions will continue for two or three months. Otherwise, the condition of the labour market was good and quite up to, if not better, than any previous year. The district burned in the fire of October 26 will be rebuilt with thoroughly up-to-date fire-proof structures without delay. During the month of October there were fifty-six permits issued, aggregating in value $124,375; for the same month last year thirty-seven permits were issued, totalling in value $104,840. Bank clearings for October were $8,750,-129. Custom house receipts during October were $163,486, as compared with $145,337 for the same month last year. Collections on account of the Chinese head-tax were $47,864.

An establishment for the output of jams, evaporated fruits and preserves is about to be established in Victoria. The capital of the concern will be $50,000. Wholesale and retail trade was reported active. The City Council has increased the wages of teamsters (including team and man) from $6 to $7 per day (eight hours); also city labourers employed on street work from $2.50 and $2.75 to $2.75 and $3, for an eight-hour day. The machinists' strike still continues, with no settlement in sight. Many of the men have left the city or obtained other employment.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—All the schooners engaged in sealing have now returned to Victoria, their home port. The total for this season is about 4,264 skins, which, valued at $35—it is expected they will bring more—bring approximately $150,000 to the sealers.

Lumbering.—All mills were running regularly, but the export trade was dull.

Shipbuilding.—The shipyards were fairly busy, doing repair work of various kinds.

Manufacturing.—All the various manufactures in this city were busy, and working full time, with considerable work in sight.

CONDITION OF PARTICULAR TRADES.

Outside building operations were somewhat retarded, owing to weather conditions. Those trades employed on inside work reported work as above the average for this time of the year. With the exception of machinists, the various metal trades were well employed and working full time. The printing trade was about normal, with all workers employed. Tailors reported trade much better than last month, while shirt and overall manufacturers had all the business they could handle. There is a surplus, though not a large one, of unskilled labour at the present time, which is not unusual at this season of the year.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The conditions of the labour market have not been as favourable as during last month, owing largely to the extremely wet weather which has greatly delayed outdoor work. Commercial activity is steadily increasing, the boats being hardly able to accommodate the passengers. Wholesale and retail merchants report business as good. There have been no changes in rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is very little activity among the farmers at present.

Fishing.—Local fishermen are quiet at present, but the run of herring is liable to start at anytime now, being due about this time of the year.

Lumbering.—The sawmills are quiet, the local mill having changed hands, and the other mills not being rushed. There has not been much work in the logging camps, owing to wet weather.

Mining.—The coal mines in the district are running full time to keep up with the demand for coal, which seems to be on the increase.

In the city, the cement sidewalks and sewerage works are being pushed as fast as weather will permit.

Railway construction on the extension is being pushed as fast as possible.

CONDITION OF PARTICULAR TRADES.

Bricklayers report work as active when the weather allows. Carpenters and joiners are very active, the amount of work on hand for the time of year being large. Lathers and plasterers report work as fair. Painters and paperhangers are active, as are the plumbers. Builders' labourers, when the weather permitted, blacksmiths and carriage makers report work as active. Printers and cigar makers are fairly active. Teamsters and expressmen have been active. Unskilled labour has not done as well this month as last month, there being a large number of idle men.

LEGISLATION WITH RESPECT TO WORKMEN'S COMPENSATION IN CANADA.

(Concluded from the November issue of the Labour Gazette.)

Scale and Conditions of Compensation.

WE may now take up the money value of, and the various conditions attached to, the privileges allowed in the several provinces. As already remarked, these are set forth, in the case of Nova Scotia, Manitoba, Alberta and British Columbia, in a schedule appended to the Act, but are incorporated in the Act itself in the case of Quebec, Ontario and New Brunswick. In the two last mentioned Provinces the terms of the Act are broadly similar to those of the Nova Scotia, Manitoba, Alberta and British Columbia Acts.

The Ontario Act, as the least comprehensive, and as representing the oldest type of legislation in this connection, may be dealt with first. It simply limits the amount of compensation to "either such sum as may be found to be equivalent to the estimated earnings, during the three years preceding the injury of a person in the same grade, employed in the like employment, within the Province, or the sum of fifteen hundred dollars, whichever is larger." No deduction or abatement from this compensation is allowed, except of the amount of any damages which may have been awarded for the same injury under some other Act. By the same principle, when damages have been awarded under the Workmen's Compensation Act, recovery is barred under other legislation. The Act provides for the distribution of the compensation, in the case of fatal injury, after deduction of costs not recovered from the defendant, between the wife, or husband, parent and child, of the deceased, in such shares as the judge or jury may direct.[1]

In all the other provinces explicit distinction is made, in treating of the amount of compensation, between injuries from which (1) death results, and (2) total or partial incapacity for work results. Generally speaking, it may be said that the provisions of the Nova Scotia and British Columbia Acts are identical, while those appended to the Manitoba and Alberta Acts are similarly identical, both differing in some essential parcitulars from the first two mentioned. The Quebec Act as in other respects is strongly individualized.

Compensation Where Death Results.

Where death results from the injury, a distinction is made between cases where dependents are left and where there are none; and again, in the former contingency, (in all the provinces except New Brunswick) between cases where the dependents are wholly or only partially dependent.

Where the workman leaves dependants who are wholly dependent on his earnings, a sum equal to his earnings during the three preceding years, or the

[1] R.S.O., 1897, chapter 160, sections 7, 8 and 12.

sum of $1,000, whichever is the larger, may, in the provinces of Nova Scotia, Alberta and British Columbia, be paid to his dependents. In no case, however, may the sum exceed $1,500, and deduction must be made for the amount of any weekly payments paid out previous to death, under the Act. This latter principle holds also in Quebec. The Nova Scotia and New Brunswick Acts provide that the dependents must be residing within Canada, and the Manitoba Act that they must be residing within the province. Alberta fixes the maximum at $1,800; while the Manitoba Act places the maximum at $1,500, without reference to the earnings of the workman; and both the New Brunswick and Manitoba Acts omit the $1,000 minimum.

Where dependents are left who are only partially dependent upon a deceased workman's earnings, the sum to be paid is to be the subject of agreement, or in default of an agreement to arbitration, on a basis that is reasonable and proportionate to the injury to the dependents in question. The Manitoba Act again adds that compensation in such cases shall only be paid to residents within the Province, removal from the Province depriving such dependent from any compensation. New Brunswick, as above stated, does not distinguish between dependents who are wholly and those who are only partially dependent.

Where no dependents are left, the reasonable expenses of medical attendance and burial, not exceeding $200, (in New Brunswick $75, and in Manitoba and British Columbia $100) are to be paid.

In Manitoba, it is provided that where compensation is awarded to dependents the money must be paid into Court, to be paid out as the Court may direct.

In Quebec, when the accident causes death, the compensation is to consist of four times the average yearly wages of the deceased at the time of the accident, but in no case is it to be less than $1,000 or to exceed $2,000. A further sum of $25 may be allowed for medical and funeral expenses, unless the deceased was a member of an association providing therefor. The compensation is payable to the surviving wife or husband, the legitimate or illegitimate children, to assist in providing for them till they reach the age of sixteen, and the parents or grandparents wholly dependent upon the deceased at the time of the accident, the apportionment to be by agreement, or, failing that, by the proper Court. Any sums paid out under the Act, previously to death, are to be deducted from the above-named totals. As soon as permanent incapacity is ascertained, or, where death has resulted from the injury, within one month from the date of agreement or judgement, the employer must pay the amount awarded, or the capital thereof, to an insurance company, provided the person injured or his representatives are willing. Allowances under the Act are to be paid quarterly, or in the case of temporary incapacity, at the time the wages of the other employés are paid, the intervals between payments in no case to exceed sixteen days. The solvency of insurance companies is safeguarded.

Compensation Where Incapacity, Total or Partial, Results.

Except in the case of Quebec no definite attempt is made, in dealing with compensation for non-fatal injuries, to allot the compensation according to the severity of the injury received. The usual form is to sanction the dating of the payment of compensation from the end of the second week of incapacity. In this way the longer the effects of the accident are felt, the larger the total allowance of compensation will be. New Brunswick provides that if the incapacity lasts less than two weeks no compensation is payable for the first week. Quebec however, distinguishes clearly between cases of (1) absolute and permanent incapacity; (2) permanent and partial incapacity; and (3) temporary incapacity. In the first mentioned case, an allowance of fifty per cent. of his average wages is payable from the day of the accident; in the second, the allowance is to equal half the sum by which the workman's wages have been reduced; and in the third, half of the daily wages received at the time of the accident may be paid, dating from the eighth day after the accident. The

capital of the allowance, however, is not, in any case, to exceed $2,000.

The other provinces in which no such definite distinction as the above is made, may be taken up together. In these, where total or partial incapacity for work results from an injury, provision is made for the weekly payment, during the period of incapacity, of a sum not to exceed fifty per cent. of the average weekly earnings of the workman during the previous twelve months, or during any less period in which he has been at work for the same employer. The total amount of weekly payment is not, in the case of Nova Scotia, to exceed $7; in New Brunswick, Manitoba and British Columbia the maximum weekly payment is named as $10; while in Alberta, it is placed at $7.50. The aggregate amount of these payments is limited to $1,500, except that in New Brunswick the compensation is not payable for more than 100 weeks. In Alberta, also, the aggregate is not mentioned, though in the case of a workman under twenty-one years of age, whose weekly earnings are less than $10, 100 per cent. thereof may be paid up to the $7.50 limit above mentioned. The Manitoba Act differs from the others in using as a basis for payment of compensation the actual diminution caused by the accident in the earning capacity of the workman. It also adds that where the injured workman is not a journeyman working at his own trade he is only to be entitled to twenty-five per cent. of the diminution for the first month of his employment, to forty per cent. for the second month and to fifty per cent. thereafter.

Rules for Reckoning "Average" Earnings.

The Acts contain instructions, except in the case of British Columbia, as to how "average weekly earnings" of a workman must be computed. The Nova Scotia Act provides that where a workman has been in the service of an employer for a short time only, the average earnings of a person in the same grade, employed at the same work, shall be used as a basis, absences from illness, etc., not to be taken into account. The Manitoba and Alberta Acts go somewhat further and provide for cases where the workman has entered into current contracts with two or more employers. They also add that where the employer has been accustomed to pay to the workman a sum for special expenses arising out of his employment, these are not to be reckoned as part of his earnings. In Quebec, the wages on which the compensation is based are to be as follows: Where the workman has been engaged in the business throughout the twelve months preceding the accident, the actual remuneration allowed him during that period. If his employment has not been continuous in this way, the average remuneration of a workman of the same class in the business, is to form the supplementary basis of reckoning. In intermittent occupations, the workman's wages while the work was in operation, and his earnings during the rest of the year are to form the basis.

Further Proviso as to Amount of Weekly Payments.

In fixing the amount of weekly payments in Nova Scotia, Manitoba, Alberta and British Columbia, regard is to be had to the difference between the average weekly earnings of the workman before the accident, and the average amount he is able to earn after the accident, and to any payment other than wages received from the employer on account of the injury. In Alberta it is specified in this connection that in the case of partial incapacity the weekly payment is not to exceed the difference between the earnings of the workman before and after the accident, but is to bear a proper relation to that difference. In Manitoba the amount is not to exceed fifty per cent. of the difference.

Examination of Workmen.

Where a workman has given notice of an accident he is required, if the employer so wishes, to submit himself for examination by a duly qualified medical practitioner at the expense of the employer. If he refuses to submit to such examination his right to compensation is suspended until the examination takes place. This holds in all the provinces except Ontario, Quebec adding that the work-

man may have his own physician present at the examination if he so desires.

Payment of Compensation in Case of Death.

Payment in the case of death is to be made, in Nova Scotia and British Columbia, to the legal personal representative of the workman, or, if he has no such representative, to or for the benefit of his dependents, or, if he has no dependents, to the person to whom the expenses are due. The legal representative is required to pay the compensation for the benefit of the dependents or other person entitled thereto. In Manitoba and Alberta the money in such cases must be paid into Court and applied as the Court thinks fit for the persons entitled thereto. Provided it is so agreed, payment may be made, in cases where there are no dependents, to the legal representative of the workman, or, if there is no repretentative, to the person to whom the expenses for medical attendance and burial are due. The rules of the Court may provide for the transfer of the money from one Court to another in the Province. Where the weekly payment is payable under the Act to a person not under legal disability, the Court may order it in the last mentioned Province to be paid into Court.

Administration of Payments to Dependents.

Any question as to who is a dependent, or as to the amount payable to a dependent in Nova Scotia, Manitoba, Alberta and British Columiba, is to be settled in default of agreement by arbitration. In Manitoba and Alberta the Court is given power to settle such questions if settlement otherwise has not been made, and it is further provided that part of the compensation may be allowed to those who are wholly dependent, and part to those who are only partially dependent. The Manitoba and Alberta Acts also provide that a variation in the allotment may be made by the Court in cases where circumstaces have changed, such as the neglect of children by a widow. The sum allowed as compensation to a dependent may be invested or otherwise applied, as is ordered by the arbitrators, in Nova Scotia and British Columbia, or by the Court in Manitoba and Alberta. The Nova Scotia Act adds that the money may be invested in a chartered bank by the Clerk of a County Court in the purchase of an annuity from the Dominion Government, or as a deposit to be accepted by the Receiver-General of Canada, and the beneficiary is protected from the provision of the law which forbids the opening of two accounts in the Dominion Savings' Bank. In British Columbia the money may be invested in the Savings' Department of any chartered bank by the Registrar of the Supreme Court in his name as registrar.

Examination of a Workman from Time to Time.

In Nova Scotia and British Columbia a workman who is receiving weekly payments under the Act must submit himself at the judgement of the employer from time to time for examination by a medical practitioner at the expense of the employer. If he objects to the medical practitioner in question or is dissatisfied with the certificate as to his condition he may submit himself for examination to one of the medical practitioners appointed for the purpose of the Act, and the certificate of the latter shall be conclusive evidence of his condition. If the workman, however, refuses to submit to such examination or obstructs the same, his right to weekly payments is suspended. In Manitoba and Alberta, it is added to the above that the workman is not to be required to undergo examination oftener than once every three months except by order of the judge. His refusal cancels as well as suspends his right to weekly payments. More elaborate machinery is also provided in these Provinces for the selecting of a medical referee and the securing of a final judgement in cases where the workman and employer disagree as to the former's condition. In case of such disagreement a medical referee is to be appointed by the lieutenant governor-in-council on payment of a maximum fee of ten dollars. Refusal

by a workman to submit to examination by such a referee suspends his rights under the Act.

Amendment or Conversion of Amount of Payment.

The amount of weekly payments may be diminished or increased by arbitration, and in the case of fatal accidents may be ceased, provided the dependent becomes capable of self-support. The Alberta statute adds that where the workman was at the date of the accident under twenty-one years of age and the review takes place more than a year after the accident, the weekly payment may not be increased more than fifty per cent of the probable earnings of the workman if he had remained uninjured, and is in no case to exceed $10.00.

Where weekly payments have been made for not less than six months the liability may on the application of the employer be redeemed by the payment of a lump sum to be settled by agreement or arbitration. In Manitoba it is expressly stated that the sum shall not, including the amounts already paid, exceed $1,500.

Weekly or lump sum payments of workmen's compensation cannot be assigned or attached. This holds in all the provinces.

In Manitoba or Alberta where the rate of compensation is suspended no compensation is payable in respect of the period of suspension.

Limitation of Employers' Liability.

Such in outline are the provisions of the law with regard to the amount of workmen's compensation payable in the several provinces, and with regard to the more important conditions attaching to the payment. In all the provinces, however, important riders are attached in the body of the statute to the clause which sets forth the liability of the employer. These, again, differ materially as between Ontario and New Brunswick, Quebec, and the remaining provinces, owing to the variation in basis viewpoint already explained. They may be mentioned briefly under the following six headings:—

Period of Disablement.

No employer is liable for an injury which does not disable a workman for a period of at least two weeks from earning full wages at the work on which he was employed. But note in this connection the exceptions pointed out above in the New Brunswick and Quebec Acts.

Recovery at Common Law.

Where injury was caused by the personal negligence or wilful act of the employer or his agent the civil liability of the former remains unaffected, and the workman may either pursue at common law or under the Workmen's Compensation Act. The employer is not doubly liable, however, and is entirely free from liability for proceedings independently of the Act, except in the case of personal negligence or wilful action. The Manitoba Act adds that if a workman elects to pursue his remedies independent of the Act he forfeits his right to compensation under the Act. In Quebec, any compensation received at common law from a third person responsible for the injury absolves the employer to that extent, and the employer may himself bring an action for such recovery. The employer himself, however, is only liable under the Workman's Compensation Act.

Contributory Negligence.

In Nova Scotia, if it is proved that the injury to a workman is attributable to his own serious and wilful misconduct or to drunkenness no claim for compensation can be allowed. In British Columba the same holds if the injury is attributable solely to the employé's "serious and wilful misconduct or serious neglect." In Alberta the only bar is "serious and wilful misconduct," but compensation where injury results in death or permanent disablement may still be allowed. In Manitoba an injury attributable to drunkenness is not to be compensated for, nor may an injury attributable to

"serious or wilful misconduct" be compensated for if it produces only partial incapacity, If, however, it produces total and permanent disability or death "serious or wilful misconduct" is not to be a bar to compensation. In Manitoba it is also stated that where injury is incurred in the rescue or attempted rescue of a fellow workman from a threatened danger on the premises of the employer in the ordinary course of employment, the workman is not to be deprived of the benefit of the Act "as if he had been guilty of serious or wilful misconduct or had acted outside the scope of his employment." In Quebec no compensation is allowed "if the accident was brought about intentionally by the person injured", and the Court may reduce the compensation "if the accident was due to the inexcusable fault of the workman," or increase it "if the accident was due to the inexcusable fault of the employer."

The Ontario and New Brunswick Acts in this connection are couched in entirely different terms from the above, and, though both approach the subject from a similar angle, are different from each other.

The New Brunswick Act approaches the more nearly to the more widely adopted form. It bars the right to compensation in four instances: (1) Where the injury is caused by his own wilful act with intent, neglect, carelessness, or disobedience to rules, the latter being required to be kept posted conspicuously on the works; (2) where it is caused by the malicious act or neglect of a fellow servant with intent; (3) where the workman knew of the defect or negligence which caused the injury and did not notify the employer, superintendent or foreman, unless he was aware that the employer, etc., knew of the defect; provided, however, that by continuing at work with knowledge of the defect he is to be held to have voluntarily incurred the risk; and (4) where the workman is killed or injured through the negligence of an intoxicated fellow-workman unless the killed or injured employée had given notice of the condition of his fellow workman to the foreman or other person in charge of the work.

In Ontario no compensation can be levied; (1) unless the defect in machinery, etc., causing the injury was due to the ngeligence of the employer or some agent responsible for the condition of the machinery or plant in question; (2) unless some impropriety or defect in the rules under which the accident occurred exists, except that rules that have received the approval of the Lieutenant-Governor-in-Council or are in accordance with an act of the legislature or of the Parliament of Canada may not be held improper or defective; and, (3) when the workman knew of the defect or negligence which caused his injury and failed without reasonable excuse to notify the employer or some person superior to himself in the service as set forth under (3) in the New Brunswick Act above.

Arbitration.

The Acts provide, except in Quebec and New Brunswick, that disputes arising under proceedings under the Act as to liability, application of the Act, the amount or duration of compensation, must, (in the case of Ontario "may") failing agreement, be settled by arbitration. The procedure of arbitration is described in detail later on.

Independent Actions.

If a workman in Nova Scotia, Alberta and British Columbia, within the proper time-limit mentioned in the Act, takes action independently of the Act, and it is determined that the injury is one for which the employer is not liable under such independent action, but that he would have been liable under the Act, the action is to be dismissed. If, however, the complaint is found justified, the Court is to assess compensation, and deduct therefrom the costs caused by the plaintiff proceeding outside of the Act. The Court in proceeding under this sub-section must give a certificate of the compensation it has awarded, and its directions as to costs, and such certificate is to have the force and effect of an award under the Compensation Act.

Relation to Factories, Mines' Acts, etc.

Nothing in the Workmen's Compensation Acts of Nova Scotia, Manitoba and British Columbia is to effect any proceeding for a fine under the Mines, Factories or Workshops Acts, where such exist, or the application of such fine. In Nova Scotia and British Columbia it is added that where a fine or any part of it has been applied for the benefit of an injured workman the amount so applied must be taken into account in estimating compensation under the Workmen's Compensation Act. In British Columbia, a workman engaged in a shipbuilding yard is not excluded from the Act by reason only that the accident occurred outside the yard in the course of his work upon a vessel in a dock, river or tidal water near the yard.

Time for Taking Proceedings—Giving of Notices

Proceedings for the recovery of compensation are maintainable only when due notice of the accident has been given. In Nova Scotia this notice must be delivered as soon as practicable after the accident has occurred and before the workman has voluntarily left the employment in which he was injured. The claim for compensation must be made within six months from the occurrence of the accident, or in the case of death, within six months of the time of death. It is provided, however, that no defect or inaccuracy in the notice shall be a bar to the maintenance of proceedings if it does not prejudice the employer in his defence or if it was given by a mistake, or other reasonable cause. The notice must give the address of the person injured, cause of the injury, and the date at which it was sustained. It may be served by delivery to the residence or place of business of the employer.[1] The provisions of the Alberta Act are practically identical to the above.[2] The Manitoba provision is much the same as that of the Alberta Act except that the time limit for giving notice in writing is placed at fourteen days from the occurrence of the accident.[3] The New Brunswick, Ontario and British Columbia Acts are also to all intents identical in form in this respect, embodying, in addition to the above, a schedule setting forth the form in which the notice is to be given. It is added that the notice must be delivered within twelve weeks, (in the case of New Brunswick two weeks) but if the defendent intends to rely for a defence on want or insufficiency of notice, or on the ground that he was not the employer or the employé injured, he must give notice to the plaintiff of his intention to rely on that defence, not less than seven days prior to the hearing of the case.[4] In Quebec, an action to recover compensation is subject to a prescription of one year, though a demand to revise the amount of compensation may be taken during the four years after the date of agreement or final judgement as to compensation.[5]

"Contracting Out."

In all the Provinces the law provides safeguards against the abuse of "contracting out." The statutes, however, differ as elsewhere in matters of detail.

In Nova Scotia, "contracting out" is permissable only under the following circumstances, namely: that the scheme of compensation, benefit or insurance for the workman is on the whole not less favourable to the general body of employés and their dependents than the provisions of the Act. Where such conditions prevail, the provisions of the scheme are to be subtituted for those of the Act, only, however, where the governor-in-council, after taking steps to ascertain the views of both employers and employés, certifies that the scheme is, as above stated, not less favourable than the provisions of the Act. Thereupon, the employer is liable only in accordance with the terms of the scheme. The governor-in-council's certificate must be for a period of not less than five years, and is renewable with or without modification. The insurance scheme must not contain any obligation on the workmen to join as a condition of their hiring. If complaint is made to the

[5] B.C. Statutes, 1891, chapter 10, sections 9, 12 and 13.

governor-in-council by or on behalf of the workmen, that the provisions of the scheme are no longer as favourable as the provisions of the Act, or that the terms of the scheme are being violated or unfairly administered, examination must be made and the certificate revoked if the complaint is found good. Where the certificate is revoked or expires, the moneys of the scheme must be distributed among the employer and the workmen as mutually agreed upon, or as directed by the governor-in-council in the event of a difference of opinion. Where the scheme has been certified, the employer is required to answer any inquiries and furnish accounts requested by the governor-in-council. The government is to make an annual report of proceedings in this connection.[1]

The British Columbia Act is substantially identical with the above, except that the power of investigation is vested in the Attorney-General, and except that no annual report is called for.[2]

The Manitoba and Alberta statutes are identical in form, and on the whole very similar to those just stated. They both, however, provide that a majority of the workmen must have declared by ballot in favour of the scheme before "contracting out" is allowed. As in British Columbia, the Attorney-General is vested with the administration of the clause, and the Manitoba and Alberta statutes give him the power to make regulations for the purpose of carrying the section into effect.[3]

The Ontario and New Brunswick statutes differ in form from the above. Both declare that no contract or agreement entered into by a workman shall be a bar, or constitute a defence, to an action for recovery under the Act, except under three considerations: (1) That his entering upon such contract was not made a necessary condition of his receiving employment; (2) that the consideration offered, was in the opinion of the Court trying the action, ample and adequate; and (3) that the consideration accepted by the workman was not in the view of the court, improvident, but just and reasonable, the burden of proof, as to the latter point, being upon the emlpoyer. In Ontario it is added that no contract whatsoever is to be a bar to action for recovery in connection with injuries to railway employés of the kind specifically mentioned above.[4]

The Quebec Act simply provides that every agreement contrary to the provisions of the Act shall be absolutely null.[5]

Special provision is made in the Nova Scotia, Manitoba, Alberta and British Columbia Acts that no contract whereby a workman is to relinqiush the right to compensation is to be considered as in operation after such time as it would terminate if the workman were to give notice to that effect on the commencement of the Act.[6]

Procedure.

The Acts, without exception, contain specific directions at greater of less length as to procedure. And herein, except in the case of Quebec and New Brunswick, the extensive facilities offered in the most recent British legislation for the settlement of all disputes by arbitration are carefully copied. From the emphasis laid upon this feature of the legislation it may be well to deal with it first.

Arbitration.

The provisions dealing with this part of the subject are set forth in the case of Nova Scotia, Manitoba, Alberta and British Columbia, as in the latest British legislation, in the form of schedules appended to the several Acts. In Ontario the arbitration clauses occur in the amendments to the Act passed in 1899. The four schedules mentioned are, on the whole, similar, those of the Nova Scotia and British Columbia Acts, on the one hand, and of the Manitoba and Alberta Acts, on the other hand, being almost identical with each other. It will be

[6]N.S., 1910, chapter 3, section 4. Manitoba, 1910, chapter 81, section 10; Alberta, 1908, chapter 12, section 9; B.C., 1902, chapter 74, section 10.

convenient, accordingly, in the first instance to review the legislation expressed in schedule form; adding thereto a statement with regard to the Ontario Act.

In these four Provinces provision is made for the appointment of a committee representative of the employer and his workmen, with power to settle matters under the Act. Any question in dispute is to be submitted thereto for settlement, provided neither of the parties to the dispute object in writing prior to the meeting of the committee to consider the matter. Where such objection is made, or no such committee exists, or where the committee fails to settle the matter within three months, a single arbitrator is to be agreed upon by the parties, or failing agreement, by the Court. In British Columbia such an arbitrator is to have all the powers of a judge of the Supreme Court, and in Nova Scotia, those of a County Court judge; while in Manitoba and Alberta, the schedules contain a special provision to regulate the procedure and practice by the County Court judges under the Act. The ordinary Arbitration Acts of Nova Scotia, Manitoba and Alberta are not to apply to arbitrations relating to workmen's compensation, but an arbitrator may, in these Provinces, and in British Columbia also, submit questions of law for the decision of a judge, whose finding is to be final, though an appeal within a prescribed time limit is allowed. The arbitrator, moreover, is given full powers to summon witnesses and demand documents, as in a court of law. In Manitoba and Alberta the court is given power to summon a medical referee to sit with the court as assessor. The rules of the court in these Provinces and in British Columbia may also make provision for the appearance in an arbitration of any party by some other person. The costs of the arbitration are, in the discretion of the committee, arbitrator or court, and may be taxed as prescribed by the rules; the Manitoba Act adding that in no event are they to exceed $25, except in cases of appeal, where they are subject to the provisions of the rules of the court. In the case of death or refusal, or of the inability of an arbitrator to act, the court may, upon application of either party, appoint a new arbitrator. As soon as the amount of compensation has been fixed a memorandum thereof must be registered in court, and is thereafter enforceable as a judgement. In Nova Scotia and British Columbia it is provided that a County Court judge may at any time rectify such register, while in Manitoba and Alberta it is provided that: (1) no such memorandum shall be recorded before seven days after the despatch by the clerk of notice to the parties interested; (2) where an employer objects to the recording of the memorandum and proves that the workman has returned to work and is earning the same wages as before the accident, the court may record a memorandum on such terms as it thinks just; (3) if the clerk of the court thinks any lump sum inadequate, or the agreement improper, he may refuse to record it; and (4) the court may within six months after the recording of a memorandum, order the record removed on proof that the agreement was improperly obtained, and may make such other order as seems just. In Manitoba and Alberta, an agreement as to the redemption of a weekly payment by a lump sum, if not registered, shall not exempt the person by whom the weekly payment is payable from liability, unless it is proved that failure to register was not due to neglect or default. Similarly, an agreement as to the amount of compensation to be paid to a person under legal disability, or to dependents, does not grant exemption if not registered. In all four Provinces, no court fee is payable by any party in respect of proceedings under the Act prior to the award, except in the case of Manitoba, such costs as may be prescribed by the rules of the court, or except in the case of Alberta where the medical examination of a workman is involved. Any sum awarded as compensation is to be paid on the receipt of the person to whom it is payable. No lien or other claim may attach to the same, except as may be awarded by the arbitrator in connection with costs. The committee or arbitrator may submit questions to a medical referee for report. In British Columbia it is added that the lieutenant-governor-in-council may appoint legally qualified medical practi-

tioners for the purpose of the Act. In Manitoba and Alberta the Attorney-General is given express power to confer on any committee under the Act all or any of the powers conferred by the Act or Courts of Justice, and may also provide how and to whom the compensation money is to be paid, in cases where, but for such an order, the money would be required to be paid into court. The order may also exclude agreements from the operation of the provisoes of the Act above cited, giving power to the Clerk of the Court to refuse to record a memorandum, and may contain any incidental or supplemental provisions that may appear to the Attorney-General to be necessary or proper for the purposes of the order.

The Ontario law provides for the disposal of all claims for Workmen's Compensation by arbitration, except where the claim is for an injury resulting in death. Arbitrations under the Act must be begun and carried on in the county where the injury was received. If the suit or action is begun in the County Court all applications must be made to the judge of that court instead of to a judge of the High Court in Chambers. Notice of an arbitration must be given, in a specified form, by a workman within four months from the date on which the injuries were sustained, upon the person or persons whom he claims to be liable. If the employer objects to the proposed arbitration he must give notice of his objection within ten days after receiving the employé's notice. The employer's notice of objection must be to the effect that within eight days he will apply to a judge of the High Court in Chambers for an order that proceedings be by action, and not by arbitration. The judge may acquiesce in this change of venue on any of three grounds: (1) that difficult, new questions of law are likely to be involved; (2) that complicated questions of fact are likely to arise; and (3) that the County judge is disqualified and that there is no junior judge. The judge may also extend the time for commencing an action, as he may deem proper. Without such notice of objection the employer is deemed to consent to the arbitration, unless his failure to give notice is due to mistake or oversight, or to other conditions that may seem just to the judge. Even though legal proceedings have actually been begun the defendant may apply for an order of arbitration, and may obtain the same if the judge in chambers approves, the costs of the action to be disposed of either by the judge or by the arbitrator. Nothing in the above, of course, dispenses with the notice of injury required elsewhere to be given by the workman. The proceedings after arbitration has been agreed upon are also set forth in detail. Briefly, the County Court judge appoints a time and place for the hearing, so as to dispose of the matter at as early a date as practicable. The respondent has the right to expedite the proceedings in case the complainant does not proceed with reasonable speed. Proceedings may be stayed on order and the case proceeded with by action in the usual way. The respondent's statement of defence must be filed within eight days after he has received notice of the date of the arbitration. The judge of another county may act on request. The attendance of witnesses and the production of documents may be compelled in the same manner as in a County Court, and, if the parties so desire, or the judge so direct, the evidence may be taken down in shorthand, the cost of same being borne equally by the parties unless the judge otherwise directs. Questions of law may be submitted for the decision of a judge of the High Court, the latter's decision to be final. Costs are to be on the scale allowed in actions in the County Court, and subject to taxation in the same manner, being in, all cases in the discretion of the judge. The judge must make his award in writing, on the filing of which the award becomes a County Court judgement, and execution may be issued thereon in the same way as on a judgement in an action. Where the amount of compensation has been arranged between the parties, a memorandum may be registered at a fee of $1. It becomes thereafter, for all purposes, a County Court judgement, providing that the judge of the county may at any time rectify the register. The services of judges and court officers, in connection with an arbitration, are re-

garded as part of their regular duties, except that a fee of $10 may be paid to a judge, and the ordinary fees for similar work to the court officers. Any sum awarded or agreed upon as compensation is not subject to lien or costs. An appeal is allowed from the decision of an arbitrator to a divisional court of the High Court of Justice. This Court has power, on hearing an appeal, to remit the matter for the consideration of the judge of the County Court. In any arbitration under the Act, the claimant is not limited to the amount recoverable in a County Court action, but may recover the same amount that is provided in cases of action under the Workmen's Compensation Act. It is expressly added that the Arbitration Act is not to apply to arbitrators under the Workmen's Compensation Act, and that nothing in the latter Act shall oblige a claimant to proceed by way of arbitration or to impair his right to bring an action at law, if he deems fit.[1]

The Ontario Act originally provides, in the trial of actions for recovery of workmen's compensation, for the appointment of assessors for the purpose of ascertaining the amount of compensation. These assessors may be suggested by either party to the dispute, on depositing $4 for every one proposed. The duty of such assessors is to assist the Court or judge with their opinion and special knowledge. The Act also provides for the consolidations of actions in respect of the same Act or omission, and several actions may be stayed upon the defendant agreeing to abide the result of one. The Act adds details as to the terms of consolidation, and stays the ranging of an order, the removal of a stay, the separate assessment of damages, admission by defendant by notice, and forms and rules.[2]

The Quebec law confers jurisdiction on the Superior and Circuit Courts of actions or contestations under the Act. An appeal must be within fifteen days. A provisional daily allowanec may be paid by the Court to the injured person pending judgement or appeal. All proceedings shall be summary, trial by jury being expressly forbidden. Before having recourse to the Act, a workmen must have the authorization of a judge of the Superior Court. Before granting such authorization the judge may take such means as he may think useful to bring about an understanding between the parties, and if they agree he may render judgement in accordance with such agreement.

In Manitoba an employé who commences proceedings for damages for an injury at common law or under any other statute forfeits his right to compensation under the Act. Similarly, when an employé elects to claim compensation under the Manitoba Act of 1910, he forfeits his recourse otherwise. Where an employer is protected by insurance against liability, a workman's claim is a lien against the insurance money.

Bankruptcy of Employer.

Most of the statutes contain provisions to safeguard an employé having a claim against an employer for compensation in the event of the bankruptcy of the latter, though the provisions differ in the different Provinces.

The Nova Scotia Act provides that where an employer, who is entitled to any sum from insurances in respect of liability under the Act, becomes bankrupt, the workman shall have the first charge upon the sum in question for the amount due him, and the judge of the County Court may direct the insurers to pay the same into a chartered bank and order the same to be applied for the benefit of the workman.[1] New Brunswick has no provisions of this knd. Quebec does not specifically provide against the bankruptcy of the employer, though it is declared that all moneys paid by any insurance company or mutual benefit society shall be applied on account of sums payable under the Act, the employer's liability continuing, however, if the company neglects to pay.[2] The Manitoba and Alberta statues go somewhat further than that of

[1]R.S. Ontario, 1899, chapter 18, sections 4 to 29 inclusive.
[2]R.S. Ontario, 1897, chapter 160, sections 16 to 33.

[2]Quebec Statutes, 1909, chapter 66, section 16.

Nova Scotia. In addition to the right against insurance it is expressly provided that workmen's compensation claims in assignments are to be paid in priority to other debts up to the sum of $500 in any individual case.[3] The British Columbia provision is very similar to that of Nova Scotia.[4]

Remedies Against a Stranger.

Where an injury for which compensations payable to a workman is caused by some other person than the employer, the workman may either proceed against that person at common law or against his employer under the Workman's Compensation Act. He may, not, however, proceed against both. If he recovers from the employer, the latter is entitled to indemnification from the stranger. Such are the terms of the Nova Scotia and British Columbia statutes. The Alberta and Manitoba Acts are worded somewhat differently, but are substantially equivalent to the above except for the addition of a proviso that the settlement of disputes as to indemnification to be paid by the stranger to the employer shall be by arbitration.[5]

[3]Manitoba Statutes, 1910, chapter 81, section 8. Alberta Statutes, 1908, chapter 12, section 7.
[4]B.C. Statutes, 1902, chapter 74, section 6.
[5]N.S., 1910, chapter 3, section 11; Manitoba, 1910, chapter 18, section 9; Alberta, 1908, chapter 12, section 8; B.C., 1902, chapter 74, section 7.

Industrial Insurance in Nova Scotia.

In Nova Scotia a very interesting situation, which called for recognition in the framing of the Workmen's Compensation Act, was that which had developed under the system of miners' relief societies. The system had at an earlier period obtained protection and encouragement from the law, and for a large body of employés in the dangerous occupation of coal mining had come to constitute a virtual insurance plan. It was regarded, therefore, as meeting, in a certain degree, the demand for workmen's compensation legislation. Employés of the Dominion Iron and Steel Company, the Nova Scotia Steel and Coal Company, the Sydney and Louisburg Railway Company, as well as those of the Dominion and Acadia, and Intercolonial Coal Companies, all of whom have relief societies of an approved type to which the employers contribute, are accordingly expressly excluded from the operation of the Workmen's Compensation Act of 1910 in that Province. The Act moreover, is not to apply to "undertakers" at whose mines there is established a miners' relief society under the Act of 1900, until the governor-in-council orders an application of the Act thereto, permission being given to the governor-in-council to prescribe the terms and conditions under which such order shall come into effect.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT. — PROCEEDINGS UNDER THE ACT DURING NOVEMBER, 1910.

DURING the month of November an application for the establishment of a Board of Conciliation and Investigation was received on behalf of the employés of the Crow's Nest Pass Coal Company, Limited, the dispute affecting, it was stated, approximately 3,000 employés.

Report Received.

During the month of November a unanimous report was received in the case of a dispute which had been referred for adjustment under the Act, between the Canadian Pacific Steamship Company and its employés, commonly known as deck-hands, at Vancouver and Victoria.

Other Proceedings Under the Act.

In the application of the employés of the Crow's Nest Pass Coal Company, Limited, for the establishment of a Board it was claimed that a reduction had been made in the rate of wages paid to certain employés of the Company, in violation of the terms of an agreement which had been made between the Company and its employés, in April, 1909. Complaint was

also made by the applicants with respect to charges for special trains from Coal Creek, B. .C., to Fernie. Messrs. W. S. Lane, of Fernie, B.C., and Clement Stubbs of Bellevue, Alta., were appointed members of the Board on behalf of the employing Company and of the employés, respectively, and in the absence of any joint recommendation from the foregoing, the Board was completed by the appointment, on November 18, of Mr. I. S. G. Van Wart, Sheriff of Calgary, Alta., as chairman.

In the November number of the *Labour Gazette* a reference has been made to an application on behalf of the conductors and motormen employed by the Winnipeg Electric Railway Company. Captain William Robinson, of Winnipeg, Man., and Mr. L. L. Peltier, of Fort William, Ont., were appointed members of this Board on the recommendation of the employing Company and of the employés, respectively. Mr. W. J. Christie, of Winnipeg, was appointed chairman on November 11, on the recommendation of the other members of the Board. The Board entered at once upon its work of investigation, but had not completed its labours at the end of the month.

I. REPORT OF BOARD OF CONCILIATION AND INVESTIGATION IN DISPUTE BETWEEN CANADIAN PACIFIC STEAMSHIP COMPANY AND EMPLOYÉS COMMONLY KNOWN AS DECKHANDS AT VANCOUVER AND VICTORIA.

THE Minister of Labour received on November 28, a unanimous report of the Board of Conciliation and Investigation to which had been referred certain matters in dispute between the Canadian Pacific Steamship Company and its employés commonly known as deck-hands, at Vancouver and Victoria. The members of the Board in this case were His Honour Judge W. W. B. McInnes, Vancouver, B.C., chairman; George S. McCrossan, Vancouver, B.C., member appointed on behalf of the employing Company; and Mr. James H. McVety, Vancouver, B.C., member appointed on behalf of the employés. The dispute in question related to rates of wages, hours of labour and a demand for more sanitary quarters for the employés in question. The number of deck-hands concerned in the dispute was given in the application as directly eighty-six, and indirectly fifty. In its report, the Board expresses itself as satisfied that the deck-hands have a grievance regarding matters in dispute as to their hours, remuneration, accommodation and food. "As to all these demands," the report says, "we may add that it was proven that on most of the coasting boats operating in adjacent American waters the deck-hands enjoy better conditions of employment than are now being asked for here; also that the conditions in the same class of work in other parts of the British Empire are much superior."

Report of Board.

The text of the unanimous report of the Board of Conciliation and Investigation in this matter is as follows:—

VANCOUVER, B.C.,
November 22, 1910.

Sir,—

In the matter of the Industrial Disputes Act, 1907, and in the matter of differences between the Canadian Pacific Steamship Company and its employés, commonly known as deck-hands, at Vancouver and Victoria.

We, the members of the Board of Conciliation and Investigation appointed herein, beg to report as follows:—

Meetings were held on November 5, 9, 10, 12, 17, 19, and 21. Many deck-hands gave evidence, some being members of the Sailors' Union and some non-union men. The Company, claiming that it had no dispute with its employés and that it had placed its position fully before you, refused to take part in the inquiry. Captain J. W. Troup, however, the manager of the Company's coasting steamers, appeared in obedience to a subpoena, and was examined at length.

The local branch of the Sailors' Union

has a membership of 160; of these, thirty-five were deck-hands in the employ of the Company at the time the application herein was made, and twenty are now in its employ. The Union, in making the demands under consideration, represents, we believe, all the deck-hands, whether members of the Union or not.

The specific matters referred to us for investigation are set out in the application as being:—

1. A demand on the part of the men employed as deck-hands for payment for work performed handling cargo on Sundays and holidays, when vessel is not in danger;

2. A reduction in working hours to ten hours per day, or the use of the watch and watch system.;

3. Overtime rates of 50 cents per hour for work performed on Sundays, holidays and time worked in excess of the regular working day;

4. More sanitary quarters for men.

We will state our conclusions as to these in the same order:—

1. We consider it fair that work on Sundays and holidays should be regarded as overtime, and the men paid therefor at the rate suggested hereinafter for overtime.

2. The request for a ten-hour day is reasonable. The evidence shows that on some "runs" the men had worked as long as thirty hours at a stretch, and that a fifteen-hour day was not unusual. On other "runs" the men were kept continually on the alert, because of frequent port calls, and became fagged from overwork and loss of sleep. These conditions are a matter of public concern, as in their results they directly affect the efficiency of the crews.

We are unable, on the facts before us, to recommend at this time the adoption of the "watch and watch system."

3. Time worked by men in excess of a ten-hour day and on Sundays and holidays should be paid for at the rate of 40 cents per hour. This (40 cents per hour) is the rate of wages paid longshoremen who do the same class of work as the deck-hands, when the boat is in port.

4. The accommodation for the deck-hands varied in the different boats from bad to fair. In nearly every case greater attention should be given to cleanliness and comfort. As to the food, the complaint was general. Captain Troup deposed that the food allowance per deck-hand for the month of July was 76 cents per day, and for the month of August, 80 cents. This is an ample allowance and should provide a good table for the men. We are convinced, however, that the men do not receive anything like the food this allowance should supply. This trouble, we think, can be remedied by the Company exercising a closer supervision over its employés who are connected with the culinary service.

As to all these demands we may add that it has proven that on most of the coasting boats operating in adjacent American waters the deck-hands enjoy better conditions of employment than are now being asked for here; also that the conditions in the same class of work in other parts of the British Empire are much superior.

Regarding the matters in dispute, therefore, we are satisfied, as above indicated, that the deck-hands have a grievance as to their hours, remuneration, accommodation and food.

All of which is respectfully submitted.

(*Signed*) W. W. B. McINNES, *Chairman.*

" JAS. H. MCVETY, *For the Deck-hands.*

" GEO. S. MCCROSSAN,

To the Honourable
Minister of Labour,
OTTAWA.

ACCIDENTS IN CANADIAN MINES—REPORT BY THE MINES DEPARTMENT, CANADA.

THE Summary Report of the Mines' Branch of the Department of Mines for the calendar year 1909, recently issued, contains a valuable section on the subject of accidents in Canadian mines, prepared by Mr. Joseph G. S. Hudson of the Department. The report was originally designed to assist in the work recently undertaken by the Department of drafting a Bill to regulate the manufacture and use of explosives in Canada. In view of the shortness of time available for the collection of the statistics, the statement is regarded as of a preliminary nature only.

Accidents in Mines.

The Report begins by drawing attention to the lamentable number of fatalities in the coal and metalliferous mines of Canada and by pointing out the improvement in this respect which has followed judicious legislation in Great Britain. The death rate in the latter country, per 1,000 men, in the years 1873 to 1882 was 2.24 in coal mines, and 1.63 in metalliferous mines. This average was reduced during the period 1903–1907 to 1.29, in the case of coal mines, and to 1.08 in the case of metalliferous mines. Meanwhile, the reverse tendency has been manifested in the United States and Canada. In 1895, the death rate in the United States' coal mines per 1,000 employés was 2.67; in 1907, it had risen to 4.86 per 1,000.

The Record in Canada.

Coal mining.—British Columbia and Nova Scotia are the two provinces in which coal mining has been carried on most extensively. The following statement shows the death rate per 1,000 men employed in coal mines in British Columbia during the past ten years:—

Year.	Per 1,000 men employed.
1899	2.91
1900	4.06
1901	25.67
1902	34.65
1903	9.85
1904	8.31
1905	2.72
1906	3.12
1907	5.11
1908	2.95

A similar statement for Nova Scotia is as follows:—

Year.	Per 1,000 men employed
1899	3.39
1900	3.17
1901	1.82
1902	2.60
1903	2.88
1904	2.40
1905	1.85
1906	2.39
1907	3.05
1908	3.48

It will be seen that in British Columbia the average death rate for the ten years covered is 9.21 per 1,000 men and in Nova Scotia 2.67 per 1,000 men, as compared with 1.29 in the United Kingdom.

Metalliferous mines.—The following table gives a comparative record of fatalities in the metalliferous mines of British Columbia, Ontario and Nova Scotia:

COMPARATIVE RECORDS.

Death rate per 1,000 men employed.	1906	1907	1908
British Columbia:			
Coal	3.12	5.12	2.95
Metal	4.57	5.51	5.93
Ontario:			
Copper and nickel	2.45	2.19	.....
Silver and iron	2.84	7.36	.....
Nova Scotia:			
Coal	2.31	3.05	3.48
Metal	11.61	4.14	.....

With regard to the Province of Ontario in 1908, the record for one section of the Province seems so alarming that special attention is directed thereto. In making comparisons with the statistics from other districts, however, it must be recognized that in Ontario practically every accident, excepting a few in the more remote dis-

tricts where only prospecting is in progress, is recorded, but only very imperfect records of the number of men employed on the properties are obtainable. Hence it becomes difficult to reduce the accidents, fatal or otherwise, to the usual ratio per 1,000 employed.

In the Transvaal, where Kaffir labour is employed, the death rate per 1,000 men employed (in 1906) was five. This was deemed so alarming that a Royal Commission was instituted at once.

For comparative purposes, accidents are classified as shown in the following German schedule:

Classification.	Germany 1906	Ontario 1906
	Per cent.	*Per cent.*
Accidents owing to danger inherent to the work itself	69.31	44.7
Accidents due to defects in the mine workings	00.78	31.9
Accidents through fault of fellow workmen	3.24	8.5
Accidents through fault of injured persons	26.67	14.9

The manifest conclusions to be drawn from the above are as follows:—

1. That the class of work is not as dangerous in Ontario as in Germany.

2. That the management of the Ontario mines has much to answer for as regards the loss of life.

3. That the workmen in Ontario mines will compare favourably with the German workmen.

Suggested Remedy.

The foregoing facts indicate a serious state of affairs as regards loss of life and limb in Canadian mines. It is suggested as a remedy that better co-operation between the Federal and the Provincial Governments is necessary for the alleviating of conditions. An instance of such co-operation is afforded by the United States, where the movement originated with the States. The passing of an Explosives' Act, similar to that enacted in the United Kingdom in 1875, is also recommended, together with the establishment of testing stations for proving explosives and experimenting therewith.

It is also pointed out that on railway construction work the same lamentable condition of affairs exists. The Report concludes:—

"What is needed is an amendment of the 'Geological and Mines Act,' giving to the Mines Branch authority to call for the immediate reporting of accidents; powers to co-operate with mining authorities in the formulation of an efficient code of laws and regulations relating to mining and the use of explosives; and with sanction to verify statements and to investigate causes.

"With regard to explosives, as already stated, no Federal Act exists.

"In this respect Canada stands unique; for in every other civilized country laws relating to explosives have been enacted."

ASSISTED IMMIGRATION PLAN OF WINNIPEG, MAN., DEVELOPMENT AND INDUSTRIAL BUREAU.

DURING the present autumn, an interesting plan of assisted immigration has been inaugurated by the Winnipeg Development and Industrial Bureau. The plan has for object the bringing out of the wives and children of British workmen who have come to Winnipeg and secured employment there. A special committee of the Bureau has been appointed to supervise the work. A brief account of what has been done in this connection, as based on information obtained by the Department of Labour from the Bureau, is as follows:

The machinery which has been devised for the successful carrying out of the plan is an association of one hundred business men who have bound themselves by agreement to become liable to the extent of $250 for any loans made for the purposes of the plan. This guarantee is deposited in the bank as security against any losses that might occur in the non-payment of loans extended to the men bringing out their families. The guarantors pay the bank six per cent. on the advances made and the principal on each loan is reduced monthly, the interest

charged, six per cent., being charged to the applicant. In case of the death of the father or any serious loss to the family assisted, it is generally understood by the guarantors that the amount due will be written off the books. Whatever loss is met with at the end of each year, we make an equal assessment among the hundred guarantors to cover the same and the life of the organization will last until each guarantor has paid into the fund the sum of $250.

Every man seeking assistance fills out a prescribed application form and is then notified by letter to appear before the Advisory Board of five members who question him as to his past, and as to his ability to repay the loan and to care for his family on their arrival. No money is given to applicants direct; the plan is to issue a prepaid certificate which is handed to the wife and family by a representative of the transportation company over whose line the family is brought to Canada. Before issuing the ticket three duplicate copies of the examination into the case is handed the Commissioner of Immigration at Winnipeg, he, in turn, forwarding a copy of it to Ottawa and London. When the British office reports that the family is eligible under the Immigration Act, the Bureau forwards the prepaid certificate. The applicant is required to sign an ordinary promissory note, at six per cent. interest with repayments such as his wages will allow after duly considering the circumstances in each case. From an economic standpoint the Committee feels that it is doing good work for the city and for Canada as a whole, seeing that money which is at present sent out of the country will in future be spent in Canada.

The scheme is imperial in spirit. It is intended to stimulate healthful family life in the city among English speaking people. Any earnest man on leaving Great Britain will in future know that after he is satisfied with conditions in Canada, he will find a community spirit of helpfulness in Winnipeg that will enable to reunite him to the family he may have left behind.

The greatest appreciation is said to have been shown by the fathers of families already assisted. So far the committee has helped sixteen families that total sixty-three persons. The total cost of transportation has been $2,358.35, of which $566.70 has been deposited by the applicants, leaving $1,791.65 to be advanced by the Advisory Board.

The regulations being carried out are strictly of a business character, but without profit to any one or cost to the applicants, the time and clerical work being given by those behind the movement.

In each case the Committee receives a confidential report from the employer of the man who applies for assistance upon which is largely based the loaning of the amount asked for.

There are, at present, sixty-eight names on the list of guarantors.

Agreement of Guarantors.

The following is the text of the agreement signed by the guarantors:

Each of the undersigned subscribers without regard to the number of subscribers or to any representations that may have been made or may hereafter be made as to the number or names of the parties to become subscribers to this agreement or document or otherwise howsoever, hereby agrees with any Chartered Bank to pay the said Bank upon demand the sum of $250 each on account of or in liquidation of any and all loans that may from time to time be made by the said Bank to one Charles F. Roland, of the City of Winnipeg, in the Province of Manitoba, hereinafter called "trustee" for the purposes hereinafter mentioned.

And it is hereby agreed by and between the parties hereto:—

1. That no one subscriber is to be called upon in any event whatever to pay more than the sum of $250, that being the extent of the liability assumed by each subscriber hereto.

2. That the said trustee may borrow, from time to time, from the said Bank on the security of this agreement such sums as he may require and may be able to borrow from the said Bank for the purpose of assisting English-speaking workmen resident in Canada to bring their families and dependents to Canada.

3. Before any such assistance shall be given to any such workman, he shall be recommended to receive same by at least three of the subscribers hereto, and shall first give note security to the satisfaction of the said trustee for the due payment of all sums advanced to him.

4. The trustee shall apply all sums of money received by him from workmen and subscribers hereto in repayment of such sums as he may borrow from the said Bank.

5. Whenever the said Bank desires repayment of any sum borrowed by the said trustee under the provisions of paragraph one hereof, the said trustee shall prepare a statement in writing showing all moneys received and disbursed by him to the date of such statement with details showing what such moneys have been paid out for, and for and from whom they have been received, and such statement in addition shall show the number of subscribers hereto. The amount required to be

repaid shall be assessed equally upon all subscribers and the statement shall also show the amount of such assessment. Thereafter the trustee shall mail a copy of the said statement of assessment to each subscriber at the address set opposite to his name, and thereupon each subscriber agrees to pay the amount of such assessment. Subsequent assessments may be made from time to time until each subscriber has paid the total amount of $250 subscribed as aforesaid.

6. Notwithstanding anything herein contained it is distinctly understood and agreed that the said Bank is not to be bound by any arrangement or agreement with respect to the manner or way in which the subscribers hereto are to pay the amount for which they have respectively subscribed or agreed to pay. On the other hand, it is distinctly understood and agreed by and between all the parties hereto that so far as the said Bank is concerned, it may whenever and as often as it sees fit to do so, demand, sue for and recover from the subscribers hereto or such of them as the Bank shall in its discretion consider good for the amount all moneys loaned for the purposes aforesaid.

7. It is also understood and agreed that the said Bank is not bound or expected to investigate or inquire into the rights of the said trustee to borrow money from time to time, or as to whether any necessary preliminaries ha ve been complied with or not, but the application of the said trustee for loans from time to time will be sufficient justification for the said Bank to make such oans as it deems advisable.

8. It is also understood and agreed that the said Bank is not to be responsible for the application of any moneys borrowed by the trustee or for the mis-application or non-application thereof.

9. The trustee or any three subscribers hereto may, at any time, by three days' notice in writing call a meeting of the subscribers hereto, and a majority of the subscribers, at any such meeting, may appoint a new trustee if they deem it advisable and may give such directions to the trustee as may to them seem advisable respecting the performance of his duties hereunder and may if advisable direct the trustee to give no further assistance hereunder.

10. It is further understood and agreed between the parties hereto that all the promises, covenants and agreements herein contained shall be binding upon the subscribers, their respective heirs, executors and administrators and shall enure to the benefit of the Bank, its successors and assigns.

11. The said trustee and any successor of any such trustee shall sign the acceptance hereto endorsed and agree to faithfully perform the said duties.

Dated at Winnipeg, this fifteenth day of September, A.D., 1910.

Application Form.

MANITOBA LEGISLATION AFFECTING LABOUR, 1910.

FROM the standpoint of labour, the most important Act passed by the Manitoba Legislature during the current calendar year was a Workmen's Compensation Act, which constitutes a thorough revision and consolidation of previous legislation, with important additions. The Act in its present form follows closely the similar legislation passed in Great Britain in the year 1897. A reference in detail to its provisions will be found in the article dealing with Workmen's Compensation throughout Canada, begun in the November issue of the *Labour Gazette* and concluded elsewhere in the present number.

Protection of Children.

The Children's Protection Act is amended by the addition of provisions prohibiting children over twelve and under sixteen years of age selling newspapers in the streets, except under a license from the Superintendent of Neglected Children. Before such license is issued the Superintendent must obtain full information as to the child's age, parentage, education, etc., and as to the necessity for the child being so employed during school hours. A badge and number are to be furnished with the license free of charge. No such license or badge may be issued to a girl.

By a second section, constables and school teachers are authorized to seize and destroy cigarettes or tobacco in the possession of a child under sixteen years of age found smoking. Constables and school teachers may also search the clothing of any boy under sixteen years of age whom he suspects of having in his possession any obscene book, photograph or other matter, and to confiscate and destroy the same.[1] An extensive Act respecting Industrial Homes for boys, girls and women was assented to.[2]

Steam Engineers' Act.

An Act was passed during the session respecting the incorporation and licensing of steam stationary engineers in the Province of Manitoba. The Act provides for the organization of an association of engineers and for the appointment of an examining board of three by the lieutenant-governor-in-council, to pass upon the qualifications required of candidates for certificates under the Act. Engineers now in charge of a steam plant and who have been in charge for two years or more are to be granted a certificate without examination, assistant engineers being granted a certificate one grade lower than that of the engineer in charge. It is unlawful for any person to serve as an engineer where steam is used at a pressure above 75 pounds who is not licensed by the Board of Examiners. Three classes of certificates are to be issued. These certificates may be revoked or cancelled for drunkenness, negligence or neglect of duty. The law does not apply to traction or threshing engines used for farm services only, nor to heating boilers carrying under 75 pounds pressure, nor to locomotive or steamboat boilers. Any person in charge of a plant of 200 horse-power or over is required to hold a first-class certificate, while persons in charge of boilers carrying from 50 to 200 horse-power are required to hold a second-class certificate, and persons in charge of plants up to 50 horse-power are to hold at least a third-class certificate.[3]

The Steam Boilers Inspection Act is amended by sections requiring boilers to have lock pop safety-valves, a penalty of not less than $50 being imposed for tampering with the seals of the valves in question.[4]

Government Ownership of Grain Elevators.

An important Act of the session is one giving the Government of Manitoba power to "purchase, lease, construct, maintain and operate grain elevators at any place or places in the Province." The Bill was passed after extended negotiations between the Government and the Manitoba Grain Growers' Asosciation, and was described in the Speech from the Throne at prorogation, as designed to permit and further facilitate the storage of grain "in a manner beneficial to the farming community." The Act provides machinery for the fixing of the price of any property purchased by the Government, the selling or leasing of elevators to municipalities, the framing of regulations respecting the maintenance and operation of elevators, &c. All elevators acquired under the Act are to be deemed public works. For the purpose of the Act, the Government is given power to appoint three commissioners to manage the elevators acquired by the Government. No member of the Legislative Assembly may be appointed to this commission, or may hold any office in it. Details of rates and charges for the use of elevators are to be fixed by the commissioners on the principle that all are to be treated alike, in being afforded reasonable facilities. No steps are to be taken under the Act until a petition signed by sixty per cent. of the grain growers in the neighbourhood is received.[5]

Miscellaneous.

An amendment of the Municipal Telephone Systems Act provides means for the sale of municipal telephone systems to the Government.[6]

BRITISH COLUMBIA LEGISLATION AFFECTING LABOUR, 1910.

THE following is a brief review of the more important legislation affecting industry and labour enacted at the session of the Legislature of British Columbia held during the present year.

Mechanics' Liens.

The Mechanics' Lien Act has been amended and the previous legislation on the subject of 1891, 1900 and 1903–04, consolidated. The provisions of the Act are now set forth under the following headings: Interpretation; nature of liens; security; registration; transmission, expiration, cancellation and discharge; enforcement; and costs. Among new provisions are a clause or clauses to the effect that the Act shall not apply to public streets or improvements thereon forbidding "contracting out," and declaring the husband to be the wife's agent under the Act. The clauses defining the nature of mechanics' liens are also considerably extended, miners being now included. Additional security for the payment of liens is provided, and a clause inserted requiring receipted pay-rolls to be posted on works. The requirements as to registration are enlarged in order to suit the enlarged scope of the legislation. Several verbal changes are introduced, the general effect being to materially increase the degree of protection afforded to labour for the prompt payment of wages.[1]

Woodmen's Liens.

The Woodmen's Liens for Wages Act is amended by the addition of sections requiring persons entering contracts for the furnishing of logs or timber to produce pay-rolls of woodmen's wages in specified form. The person not requiring the production of a receipted pay-roll is liable at the suit of the workmen. Sums mentioned in the pay-roll as unpaid must be retained by the person to whom the pay-roll is given.[2]

Steam Boilers Inspection.

A number of important additions and amendments are made to the Steam Boilers Inspection Act of 1901. Steam heating plants in rooming houses and apartment houses (but not in private residences), having a capacity of two-horse power or under, are brought under the Act. The Chief Inspector is empowered to hold an investigation with respect to injuries to persons or property caused by the alleged negligence or incompetency of any engineer holding a certificate under the Act. The following new classification of engineers is adopted:

First class engineers; second class engineers; third class engineers; fourth class engineers; fifth class engineers; engineers with temporary certificates; engineers with service certificates; engineers with special certificates.

There is a re-definition of the classes in accordance with the above. The work to be done under special certificates is as follows:—

Low pressure heating plant; creamery plant, not exceeding twenty-five horse-power; logging donkey; logging locomotive; traction engine or road roller; portable threshing engine.

The procedure for recovering penalties under the Act with costs may now be in a summary manner.[3]

Factory Inspection.

An addition to the Factories' Act declares that an inspector during his tenure of office shall not be competent to give testimony in any civil courts with regard to anything he has seen or done, or with regard to any information he may have obtained in the course of the discharge of his duties as inspector. He is also exempted from giving testimony in any civil case as an expert witness on any subject whatsoever.[4]

A new Act provides for the appointment of inspectors for the inspection of

[1]British Columbia Statute, 1910, chapter 31.
[2]British Columbia Statute, 1910, chapter 54.
[3]British Columbia Statute, 1910, chapter 2.
[4]British Columbia, Statute, 1910, chapter 18.

premises, works, wires and appliances, generating, transmitting or supplying electrical energy. The preamble gives the cause of the legislation as the many fatal accidents which have recently occurred through defects in the construction or operation of such premises or appliances. The powers and duties of the inspector are set forth at length. Provision is also made for the issuing of regulations under the Act, prosecutions, &c. Inspection under the Act is not to relieve from liability.[5]

Safety in Coal Mines.

The Coal Mines Regulation Act is amended by the addition of a section requiring an inspector, when he has reason to believe that a dangerous condition exists in any mine by reason of the approach of workings to old or abandoned workings, to at once report to the Minister of Mines. On receipt of the report the Chief Inspector is required, under direction of the Minister, to make an examination of the districts affected, and to direct mining operations in the district until the dangerous condition is removed or overcome. Another addition to the Act requires the establishment by colliery owners of such a number of oxygen holders, or other form of rescue devices as may be approved by the Minister of Mines. This apparatus is to be constantly maintained in an efficient and workable condition and to be always available for immediate use. The government is also empowered, by way of supplementing the colliery installation of rescue apparatus, to establish mine rescue stations, which may be further utilized for the purpose of training holders of certificates of competency in the use of mine rescue devices. Colliery owners or managers must retain a number of employés trained in the use of the above mentioned apparatus according to the directions of the Chief Inspector. Such stations are to be available in cases of emergency for the use of trained corps of mine rescuers, doctors, first-aid corps, &c.[6]

[5]British Columbia Statute, 1910, chapter 16.
[6]British Columbia Statute, 1910, chapter 34.

Miscellaneous.

Dominion Government annuities are exempted from seizure and attachment, by special statute couched in the same language as recent enactments in Nova Scotia, Quebec and other provinces.[7]

Amendments to the Timber Marking Act and the Timber Manufacturing Act are made.[8] The Bush Fire Act and the Fire Inquiry Act are also amended, the former in the way of further safeguarding against danger from fires set to clear lands.[9]

A consolidation and amendment of the Liquor Act contains a section under which the holder of a license is answerable for any offense against the Act committed by an employé, servant, agent or workman of the licensee.[10]

The most extended Act of the session was an amended and consolidated Companies' Act which takes up altogether 143 pages of the bound volume of the statutes. This Act has been the subject of wide discussion in view of its provisions with regard to unregistered extra provincial companies, which are penalized to the extent of $50 per day for doing business without a license.[11] The Commercial Travellers' License Act of 1907, however, which required extra-commercial travellers representing firms outside of the province to take out a license is repealed.[12]

The Children's Protection Act is amended by the addition of sections providing for the appointment of one or more superintendents to carry out the provisions of the Act and provides payment for the maintenance of children by parents or guardians who do not reside in the municipality. The sum of $1.50 per week will be paid by the government for the maintenance of children in the Children's Aid Society's Homes where not otherwise provided for. Children's Aid Societies are to make monthly returns. The duties of the superintendent are also re-defined.[13] An Act to provide

RECENT INDUSTRIAL AGREEMENTS.

Scale of Prices for Printers at Victoria, B.C.

THE Department recently received a copy of the agreement at present in force, dating from June 1, 1910, to May 31, 1913, between the employing printers of Victoria, B.C., in which the following scale of prices is set forth:

Book and Job Work.

SECTION 1. Forty-eight hours shall constitute a week's work: Provided the hours are between 7 a.m. and 6 p.m.: Provided also that men who do not work a whole week shall receive compensation for any extra time they may work during the week. When it is necessary to change the time for starting work from the established practice of the office, 24 hours' notice must be given.

SEC. 2. Foremen of offices employing on an average of not more than two compositors shall receive not less than $28.50 per week. Foremen of offices employing on an everage of more than two compositors shall receive not less than $30.00 per week. Job compositors, $27.00 per week.

SEC. 3. Overtime shall commence from the regular quittting time as fixed by the Chapel, and shall be charged price and a half. Work after 12 (midnight) in job offices by the same staff of men who have worked through the day shall be double price; Provided that a job office may have a double staff of men.

SEC. 4. Work on New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day shall be charged price and a half. Work done on Sunday in job offices shall be charged double price. When a holiday falls on Sunday, Monday shall be considered the holiday, but the Chapel may arrange with the management to take another day.

SEC. 5. Night forces on book and job work shall receive $5.00 per night of seven and one-half hours; acting foremen not less than $5.50.

SEC. 6. All work in book and job offices to be done as time work.

SEC. 7. Half a day shall be the shortest period for which a member of this Union shall accept pay, less time to be charged half a day.

SEC. 8. Machinists, proofreaders, operators and machinist-operators in job offices to be paid at the same rate as on evening and morning newspapers respectively

Newspapers.

SEC. 1. Seven and one-half hours shall constitute a day's work on morning newspapers. On evening papers a day's work shall consist of eight hours for five days of the week with seven hours on Saturday. One day shall be the shortest period for which a member of this Union shall accept pay, less time to be charged one day.

SEC. 2. Foremen of morning papers shall receive not less than $5.50 per day; foremen of evening papers not less than $5.00 per day; ad. men on morning papers shall receive not less than $5.00 per day; ad. men on evening papers $4.50 per day. Extra or *floor* men shall receive $4.50 per day and $5.00 per night.

SEC. 3. Proofreaders on morning and evening newspapers shall be paid $5.00 per night for night work and $4.50 per day for day work. All work in excess of seven and one-half hours on morning papers and eight hours on evening papers shall be overtime and paid for at the rate of price and a half.

SEC. 4. The interchanging, exchanging, borrowing, lending or buying of matter previously used, either in the form of type or matrices, between newspapers or between job offices, not owned by the same individual, firm or corporation, and published in the same establishment, is unlawful, and shall not be allowed, unless such type or matrices are reproduced.—(Vide I.T.U. law, Sec. 164, p. 74.)

Machine.

SEC. 1. Seven and one-half hours shall constitute a day's work on morning papers. Hours—between 6 p.m. and 6 a.m. On evening papers, eight hours for five days in the week and seven hours on Saturday. Hours between 7 a.m. and 6 p.m.

SEC. 2. Operators on evening papers shall receive not less than $4.50 per day of eight hours for five days in the week and seven hours on Saturday.

SEC. 3. Operators on morning papers shall receive not less than $5.00 per day of seven and one-half hours.

SEC. 4. The pay for machine-tenders shall not be less than $4.75 per day and $5.25 per night.

SEC. 5. Machinist-operators shall receive not less than $5.50 per night and $5.00 per day.

SEC. 6. Work on New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day shall be charged price and a half. Work done on Sunday shall be charged double price. When a holiday falls on Sunday, Monday shall be considered the holiday, but the Chapel may arrange with the management to take another day.

SEC. 7. Operators working on machines outside the hours specified shall be paid the night rate.

SEC. 8. Nothing in this Scale of Prices shall be construed to prevent superior workmen receiving a higher rate of wages.

Machine Tuition.

SEC. 1. Beginners on Linotype or other typesetting machines shall be active members of this Union, and shall receive the following rates of wages (no beginner to work more than six days nor average less than four days per week), and but one apprentice to be allowed for each five machines or fraction thereof. For the period of one month (four weeks), $9.00 per week; for the second month, $13.50 per week; for the third month, $16.00 per week; for the fourth month, $18.00 per week; for the fifth month, $21.00 per week; for the sixth month, $24.00 per week. The period of apprenticeship shall not exceed six months of full weeks.

SEC. 2. Any member in good standing of this Union is eligible to learn to operate typesetting or casting machines.

SEC. 3. It shall be at the pleasure of this Union to grant an applicant an extension of his apprenticeship upon reference to the Executive Committee, who shall fix time and rate of wages.

SEC. 4. Any member who has become proficient as a machine operator, without having served an apprenticeship thereto, shall not be required to do so.

SEC. 5. An operator shall de deemed competent who can set 4,000 ems of minion per hour.

SEC. 6. An operator on Monoline machines shall be deemed competent who can set 3,000 ems per hour.

Monotype Machines.—Same scale as Linotype shall apply.

Victoria Typographical Union, No. 201, reserves the right to refuse to execute all *struck* work received from, or destined for, unfair employers or publications.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF NOVEMBER, 1910.

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

LABORATORY, OTTAWA, ONT.

Testing laboratory at Ottawa, Ont.; name of contractor, A. Boehmer, Ottawa, Ont.; date of contract, November 23, 1910; amount of contract, $4,000.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute, arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable, by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

ALTERATION OF POST-OFFICE, AYLMER, QUE.

Alteration of post-office at Aylmer, Que.; name of contractor, A. Boehmer, Ottawa, Ont.; date of contract, November 23, 1910; amount of contract, $4,200.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable, by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

Totals	2,118	327,543.83

In October, 1909, the number of letters patent issued was 2,175, covering an area of 333,786.62 acres, showing a decrease for the month of October, 1910, of fifty-seven in the number of patents issued, and of 6,242.79 acres in the area patented.

Notes.

The Canadian Immigration Guild was organized at Ottawa, Ont., with W. H. Rowley, President, and Miss Wildman, Secretary.

The following statement was made by the Honourable the Minister of the Interior, in the House of Commons, on November 23:—

Under the provisions of the Immigration Act passed by Parliament last session, which allows the admission of an immigrant by special agreement, it was arranged some time during the summer, in view of the fact that there was a general demand for labour and that labour conditions were buoyant, that in the case of men coming to assured employment, if notice was given to the officers of the department on the other side of the water, they should issue a permission to enable the immigrant to land on this side, coming, as I say, to assured employment, even though he had not the money qualifications. It has not been considered desirable that this arrangement should be continued during the winter months. But that arrangement is still in force, and will be in force until the tenth of December.

THE WORK OF THE DEPARTMENT OF LABOUR.

THE tenth annual report of the Department of Labour, describing the work of the Department during the fiscal year ended March 31, 1910, was published in November, and is now available for distribution.

The work of the Department is classified under the following headings: (1) The *Labour Gazette*. (2) The Industrial Disputes Investigation Act. (3) The Combines Investigation Act. (4) Royal Commission of Inquiry on Industrial Training and Technical Education. (5) Inquiry into Wholesale Prices, 1890–1909. (6) Special Inquiries. (7) Hours of Labour on Public Works. (8) Fair Wages on public contract work. (9) Strikes and Lockouts in Canada during

1909, with comparative statistics for the years 1901 to 1909 inclusive. (10) Industrial accidents in Canada during 1909, with comparative statistics for the years 1904, 1905, 1906, 1907 and 1908. (11) The Library of the Department. (12) The circulation of the *Labour Gazette*. (13) The distribution of the *Labour Gazette* and other publications. (14) Inquiries, correspondence and other departmental work. The volume also contains an Appendix giving the proceedings of the twenty-two Boards established under the Industrial Disputes Investigation Act, 1907, which were in existence during the fiscal year; also the text of the Industrial Disputes Investigation Act, 1907, as amended, and of the Combines Investigation Act.

The Labour Gazette.

In the chapter relating to the *Labour Gazette* an account is given of the general articles which appeared in it, with a brief description of the special articles which were published during the year. Mention is made of the commencement of the publication of monthly tables of retail prices of staple articles of consumption, and of special articles on Industrial Disturbances in the Coal Fields of Nova Scotia, Special Investigation into Wholesale Prices in Canada during the past twenty years, the Combines Investigation Act, Commission of Inquiry *re* Technical Education, as well as many others.

The Industrial Disputes Investigation Act.

In the chapter on the Industrial Disputes Investigation Act, it is stated that up to the end of the fiscal year the total number of references under the Act, since its enactment had reached a total of eighty-two. Reference is made to the interest shown in the Act abroad, similar measures having been introduced in Massachusetts, and Wisconsin, with prospects of other similar ones being introduced in the States of California, Ohio and Illinois, provided their constitutionality is established. An Industrial Disputes Act, closely based on the Canadian law has also been passed in the Transvaal. A brief account is given of the amendments to the Act passed at the last session of Parliament, and a table is published showing the proceedings under the Act since its inception.

The Combines Investigation Act.

An account is given of the nature and objects of the Combines Investigation Act, which was passed at the last session of Parliament, and of the methods of procedure under it.

Royal Commission of Inquiry on Industrial Training and Technical Education.

Reference is made to the events leading to the appointment of a Royal Commission of Inquiry on Industrial Training and Technical Education, and the correspondence with the provincial premiers on the subject is given. The scope of the Commission and the names of the members of it are also mentioned.

Special Report on Wholesale Prices, 1890-1909.

A summary is given of a Special Report issued by the Department on wholesale prices from 1890 to 1909. A series of charts reprinted from this report shows the variations in prices of the principal commodities in Canada from year to year during the last two decades.

Special Inquiries.

The Report contains an account of four special inquiries that were made by the Department during the year, on the following subjects: Industrial conditions in the coal fields of Nova Scotia, strike of freight handlers at Fort William, rates of wages paid workmen on a section of the Grand Trunk Pacific Railway under construction in British Columbia, a dispute among the fishing population at Gaspé.

Hours of Labour on Public Works.

A brief summary is given of a debate in the House of Commons on a Bill respecting the Hours of Labour on Public Works, which was introduced by Mr. Verville,

M.P. It is stated that the Bill was referred to a special committee, which held sittings from January until May, and received valuable evidence bearing on the subject from a large number of persons. The evidence, together with the proceedings of the committee is to be published as an Appendix to the Journals of the House of Commons for 1909–1910.

Fair Wages on Public Contract Work.

During the past fiscal year, it is stated that 148 fair wages schedules were prepared by the Department of Labour for various Departments of the Government for insertion in their contracts. From July, 1900, to March, 1910, there have been prepared 1,625 fair wages schedules, of which almost one-half were for the Department of Railways and Canals. During the same period, the value of supplies furnished to the Post Office Department under Fair Wages conditions amounted to $140,257.51. In the course of the year, twenty-three complaints from different sources arising out of alleged non-compliance with conditions inserted in public contracts were investigated by the Fair Wages Officers of the Department.

Strikes and Lockouts.

It is stated in the Report that during the calendar year 1909, the number of strikes and lockouts in Canada was sixty-nine, the same number as in the previous year. The total number of employés involved in trade disputes which began in 1909, was approximately 17,302, compared with 26,250 in 1908. The loss of time to employés through trade disputes was approximately 872,000 working days in 1909. The Report contains a classified table of trade disputes in existence in Canada during 1909, showing for each dispute the occupation of the employés, the place at which it occurred, the alleged cause or object, method of settlement, result, dates of beginning and ending, number of establishments and employés affected, and the approximate loss of time in working days.

Industrial Accidents.

The statistics of industrial accidents contained in the Report show that during 1909 there were 1,279 fatal and 2,718 non-fatal accidents reported to the Department, being an increase of seven fatal and 441 serious non-fatal injuries reported for the previous year. There were 283 fatalities among men engaged in the railway service, 256 among persons engaged in agriculture, and 160 among miners.

Other Departmental Work.

As in previous reports, a catalogue is given of reports and other documents added to the library of the Department during the fiscal year.

The total circulation of the *Labour Gazette* at the close of the fiscal year is stated to have been 14,204 copies, compared with 13,810 copies in the previous year. During the year there was a total distribution of 162,996 individual copies of the *Labour Gazette*. The total number of publications, letters, &c., mailed from the distribution branch was 183,479.

INTERVIEW OF DELEGATION REPRESENTING TRADES AND LABOUR CONGRESS OF CANADA WITH THE DOMINION GOVERNMENT.

ON November 4, a delegation representing the Trades and Labour Congress of Canada was accorded an interview with the Right Honourable Sir Wilfrid Laurier, Prime Minister of Canada, and the Honourable Mackenzie King, Minister of Labour.

The deputation was accompanied by Mr. Alphonse Verville, M.P., who, in introducing the members, referred to the growth of the Congress during the past year, some 15,000 members having been added during that period.

The interview was for the purpose of submitting certain resolutions passed at the recent annual convention of the Con-

gress, as in accordance with the following statement:—

1. Mr. Powersland presented a resolution asking that railway companies be required to provide proper sheds for carmen, who have at present to work out of doors in all kinds of weather.

2. Messrs. Alexander McMordie and Guy, presented a resoltuion embodying a request of the letter carriers for an eight-hour day, double pay for Sunday labour, an improved uniform, and a Superannuation Act providing for retirement at fifty-five years of age, or on completion of twenty-five years' service.

3. Mr. Nicholas Quesnel presented a petition for an increase in the wages of mechanics in the metal trades employed in the Government yards at Sorel, Que.

4. Mr. Calvin Lawrence persented a resolution asking that a law be enacted requiring proper inspection of locomotive steam boilers. Bi-monthly payment of wages was also recommended.

5. Mr. William Glockling presented a resolution expressing opposition to compulsory arbitration as a means of settling labour disputes.

6. Mr. J. G. O'Donoghue spoke on behalf of a resoltuion favouring old-age pensions, the appointment of additional Fair Wage Officers, the amendment of the Fair Wage schedule conditions, and the enforcement of just regulations with regard to immigrants.

7. Mr. Frederick Roberts presented a resolution opposing military displays on Labour Day.

8. The enactment of Federal legislation with regard to co-operation was advocated by Mr. Francq, while Mr. P. M. Draper spoke on behalf of the Congress, in favour of legislation limiting the hours of labour on public works to eight per day, and favouring the withdrawal of dirty bank notes.

In reply to the representations made by the delegation, the Honourable Mr. King, Minister of Labour, spoke, at the request of the Prime Minister, on behalf of the Government. The Minister in opening, expressed his thanks for the opportunity thus afforded the Government of becoming fully apprised of the wishes of the members of the Congress, and spoke briefly of legislation enacted by the Government. In referring to the request of the carmen, the Minister pointed out the heavy loss sustained by the nation through industrial accidents, the Department's investigation in the matter having shown that between 1,300 and 1,400 workmen are killed each year in Canada, through accidents arising in the course of their employment. Emphasis was laid on the need of careful investigation of conditions affecting industry and labour. In the matter of the requests of the letter carriers and of the employés of Sorel, as well as the representations with regard to military displays on Labour Day, the Minister undertook to bring the same to the attention of the Ministers of the Government immediately concerned. The Minister also discussed at some length the Eight Hour Day Bill introduced during the session of Parliament of 1909, referring in this connection to the information which the Special Committee had gathered, and the new light shed thereby on the condition dealt with by the Bill. Considerations to be taken into account in dealing with matters of this kind were, he stated, first, the fact that the Government is the trustee of all the people; and, secondly, that the Government should be a model employer. Somewhere between these two considerations it should be possible to work out a satisfactory result as to hours of labour. On the point of compulsory arbitration, the Minister dwelt upon the losses and inconvenience arising from a strike like that on the Grand Trunk Railway system during the past summer, expressing the view that the Industrial Disputes Act had worked well, and that the repetition of a struggle like the above was unlikely. Such a strike, he believed would only help to demonstrate the folly of industrial warfare and the elements of justice in the Industrial Disputes Investigation Act. The efficacy of the Act in disposing of disputes in connection with street railways was also pointed out. The other points brought up by the deputation were promised careful consideration.

ROYAL COMMISSION ON INDUSTRIAL TRAINING AND TECHNICAL EDUCATION. PROCEEDINGS DURING NOVEMBER, 1910.

THE Royal Commission on Industrial Training and Technical Education devoted the most of the month of November to an extended tour of Western Ontario, the Northwest Provinces and British Columbia, completing the same at Victoria, B.C., on December 3. The localities visited included Port Arthur, Fort William, Winnipeg, Portage la Prairie, Brandon, Moose Jaw, Regina, Saskatoon, Prince Albert, Edmonton, Strathcona, Calgary, Lethbridge, Medicine Hat, Vancouver , New Westminster Nanaimo and Victoria. A section of the Commission also visited Fernie, Nelson and Vernon, B.C. Several large industrial and educational institutions were visited, addresses being delivered to the latter by the Chairman of the Commission. In every locality the Commission met with the hearty co-operation of the municipal authorities, Board of Trade and educational leaders. The Commissioners especially enjoyed the pleasure of visiting the provincial universities of Saskatchewan and Alberta now in the course of erection at Saskatoon and Strathcona, respectively, as well as certain technical schools at Winnipeg and night schools at Vancouver, which are now in active operation.

ASSEMBLING OF PARLIAMENT OF CANADA.—REVIEW OF PROCEEDINGS AFFECTING LABOUR DURING NOVEMBER, 1910.

THE third session of the eleventh Parliament of the Dominion of Canada was opened at Ottawa, Ont., on November 17, 1910. Reference was made in the Speech from the Throne to the growing prosperity of the Dominion as evidenced by increasing exports and imports and by the crop returns; to the marked progress made in the construction of the National Transcontinental Railway and the construction of a line of railway to Hudson Bay; to the favourable decision of the Hague tribunal affecting the Canadian fisheries; to the progress made in connection with the construction of the Quebec bridge; to the arrangement of friendly trade relations with Italy, Belgium and the Netherlands; and to the forthcoming report of the West Indies Trade Commission. The introduction was promised of Bills respecting terminal elevators at the head of Lake Superior and "with regard to the investigation and betterment of industrial and labour conditions."

Prior to the close of the month two important measures designed for the betterment of social and labour conditions were introduced by the Honourable the Minister of Labour, namely: An Act "to prohibit the importation, manufacture, sale, or use of opium for other than scientific or medicinal purposes," which received its first reading on November 30, and an "Act to prohibit the manufacture and importation of matches made with white phosphorus," which was read for the first time on November 24.

In introducing the latter of these measures the Honourable Mr. King, Minister of Labour, spoke as follows:—

"It was found that the manufacture of opium was making considerable headway in the Pacific Provinces, but the law we then passed had the effect of putting a stop to its manufacture and also largely to its importation. There is reason to believe, however, that a good deal is being smuggled, and, under the existing legislation, it is difficult to obtain a conviction. The Bill I am introducing is an endeavour to make good any deficiency in the existing legislation by giving summary power to search, seize and confiscate all opium in the possession of anybody, and by throwing the onus on any one having opium in his possession, to show that it is held for scientific or medicinal purposes. The Act of 1908 contains no provision with regard to the smuggling of opium but

this Bill remedies that defect, and by it we hope to eradicate an evil imported from the Orient, and prevent its obtaining a foothold in this country."

In introducing the Act prohibiting the manufacture and importation of matches made with white phosphorus the Minister spoke as follows:—

"It has been found from experience that evils of a serious nature arise from the use of matches made with white phosphorus. Various countries of Europe have taken active measures to prohibit the manufacture of matches made with phosphorus, and suitable substitutes have been found for that ingredient. Several European countries have already enacted a measure of this kind. The Bill which I now introduce is similar to a measure passed by the British Parliament in December, 1908.

Another measure of importance to labour was an Act "respecting the hours of labour on Public Works," introduced by Mr. Alphonse Verville, M.P., on November 23.

An extended notice of the provisions of the above Acts and of the objects aimed at, as well as the circumstances suggesting the legislation, will be published in the *Labour Gazette* on the occasion of the second reading of the Acts in question.

On November 21, the Minister of Labour presented to the House of Commons the Annual Report of the Department of Labour for the year ending March 31, 1910.

Bill No. 11, respecting co-operative credit societies was introduced in the House of Commons by Mr. F. D. Monk (Jacques Cartier) on November 24.

RECENT ORDERS OF THE BOARD OF RAILWAY COMMISSIONERS, CANADA, FOR THE PROTECTION OF EMPLOYÉS.

DURING November, 1910, certain important questions appertaining to the protection of railway employés, which have been before the Board of Railway Commissioners for consideration, in some cases at the instance of the employés, have been made the subject of official orders.

Protection of Trainmen.

In the matter of the application of the Trainmen's Association of Canada, for a revision of Order No. 5888, dated December 16, 1908, making provision for the protection of railway employés, the Board has under date of November 9, 1910, ordered as follows:—

1. Whereas subsection 3 of section 264 of the Railway Act provides that:—

"There shall also be such a number "of cars in every train equipped with "power or train brakes that the engineer "of the locomotive drawing such train "can control its speed, or bring the "train to a stop in the quickest and best "manner possible, without requiring "brakemen to use the common hand "brake for the purpose."

Therefore at least eighty-five per cent (85%) of the number of cars in every train shall be equipped as above required.

2. When more than one engine is attached to a train, the engineer of the leading engine shall operate the brakes.

3. Every road locomotive engine shall be equipped with a step or steps and handholds on both sides of and at or near the rear ends of tenders; foot-rests shall be provided on the pilot of every such engine, sufficiently wide for a man to stand on; every switching or yard engine shall be equipped with foot-boards and head-lights on the front and rear ends of the engine and tender,—such foot-boards to be not less than 10 inches wide; the back of such foot-boards shall be protected by a board not less than 4 inches high, and if cut in the centre, the inner ends shall be protected in like manner.

4. No light engine shall be run against the current of traffic a greater distance than 25 miles in any one direction without a conductor in addition to the engineer and fireman.

5. No railway company shall permit

any employé to engage in the operation of trains, or handle train orders, without first requiring such employé to pass an examination on train rules and undergo a satisfactory eye and ear test by a competent examiner.

6. (a) Locomotive engineers must be at least twenty-one years of age; undergo a satisfactory eye and ear test by a competent examiner; and pass an examination on train rules and regulations and the proper care and operation of locomotives and air brakes.

(b) Conductors must be at least twenty-one years of age; undergo a satisfactory eye and ear test; and pass an examination on train rules and regulations and the operation of air brakes.

(c) Telegraph or telephone operators engaging in the operation of trains or handling train orders must be at least eighteen years of age; write a legible hand; and pass an examination on train rules and regulations. Telegraph operators must be able to send and receive messages at the rate of not less than twenty words a minute.

(d) Train despatchers must be at least twenty-one years of age; be familiar with the line over which they have charge, and pass an examination on train rules and regulations.

(e) Railway companies shall (within ninety days from the date of this Order) file with the Board a copy of each examination paper for the examinations herein required to be passed by the employés of such railway company.

7. All railway companies shall strictly conform to the rules and regulations from time to time approved by the Master Car Builders' Association, governing the loading of lumber, logs, and stone upon open cars, and carrying of structural material, plates, rails, and girders; and no material of any kind shall be carried upon the roofs of cars.

8. (a) All open drains crossing tracks in railway yards shall be safely covered for at least 5 feet from the gauge side of each rail, except in times of flood, when temporary open drains may be provided, if necessary.

(b) No semaphores, signals, poles, high or intermediate switchstands, or piles of material, erected or placed in future, shall be nearer than 6 feet from the guage side of the nearest rail.

(c) No structure over 4 feet high shall hereafter be placed within 6 feet from the guage side of the nearest rail without first obtaining the approval of the Board.

(d) Where semaphores, signals, poles, high or intermediate switchstands, or piles of material are nearer than 6 feet from the gauge side of the nearest rail, the same shall be dealt with as follows:—

(1) Semaphores, signals, poles, or high or intermediate switchstands shall, within two years from this date, be either removed or changes made so that the same shall not be nearer than the said 6 feet; or high and intermediate switchstands shall be changed to low or dwarf signals or switchstands.

(2) Piles of material shall, within six months, be removed to a greater distance than the said 6 feet.

(e) Water stand-pipes shall not be nearer than 2 feet and 6 inches from the widest engine cab and the spout of the stand-pipe shall, when not in use, be fastened parallel with main track, and enginemen are required to see that this is done after using any such pipe.

9. The above mentioned Order No. 5888 is hereby repealed.

10. Every person or company offending against any of the foregoing provisions shall forfeit and pay the sum of fifty dollars ($50.00) for every such offence.

Equipment of Locomotives.

In the matter of the resolutions passed by the Dominion Legislative Board of the Brotherhood of Locomotive Engineers at a sittings held in Ottawa, March 29, April 2, 1910, a copy of which was published in the *Labour Gazette* for September, the Board has received report and recommendations from its Operating Officers, and has discussed the matter in the presence of Counsel for the Grand Trunk Railway Company, the Canadian Pacific Railway Company, the Michigan Central Railway Company, and the Canadian Northern Railway Company, the International Brotherhood of Locomotive

Engineers being represented at the hearing. It is now announced that the requests contained in the said resolutions are refused, with the exceptions following, namely:—

(a) That railway companies subject to the jurisdiction of the Board be, and they are hereby required to equip their locomotives with air bell ringers; such equipment to be installed withing 6 months from the date of this Order.

(b) That the consideration of the question of the removal of snow-cleaning devices from locomotives stand pending the receipt by the Board of additional information upon the subject, such information to be furnished by and on behalf of the Applicants.

Equipment of cars with Emergency Tools.

In the matter of the equipment of cars with emergency tools, the Board issued the following order under date of November 3, 1910, on the report and recommendation of its operating officers:

1. That every railway company subject to the legislative authority of the Parliament of Canada, operating a railway by steam power, shall cause its sleeping, dining, baggage, mail, and express cars and coaches used in passenger service on its railway, to be equipped with emergency tools consisting of a sledge, axe, and saw; said tools to be kept in a conspicuous place in every such car, so as to be easy and ready of access in case of need; and said cars to be so equipped on or before April 1, 1911.

2. That every such railway company be liable to a penalty of a sum not exceeding $25.00 for every failure to comply with the foregoing regulation within the time for its coming into force and thereafter.

TRADE DISPUTES DURING THE MONTH OF NOVEMBER, 1910.

THERE were few trade disputes in Canada during the month of November, the only ones of any importance being a strike of coal miners at Springhill, N.S., which had been in existence since August, 1909, and a general strike of plumbers at Montreal, which began in September.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during November was seven, the same number as in October, but two less than in November, 1909. About 117 firms and 1,149 employés were involved in these disputes, three firms and 185 employés being involved in new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during November was approximately 34,550 days, compared with 39,800 days in October and 95,975 days in November, 1909.

Trades affected by new disputes.—One new dispute involving twenty employés occurred in the building trades, and two involving 165 employés occurred in the metal trades.

Localities affected by new disputes.—Two new disputes took place in the Province of Nova Scotia, and one in the Province of Saskatchewan.

Causes of disputes.—The cause of one dispute was a demand for an increase in wages and monthly payments, another dispute was caused by a reduction in wages, and the third by a readjustment of piece-work prices.

Methods of settlement.—Three out of the seven disputes in existence were terminated during the month, two by negotiations between the parties concerned, and one by the resumption of work without negotiations.

Results of disputes.—Two of the disputes resulted in favour of the employers and one in favour of the employés.

Disputes which Commenced Prior to the Beginning of the Month.

The disputes in existence during November, which began in previous months comprised strikes of coal miners at

Springhill, N.S., plumbers at Montreal, Que., and Ottawa, Ont., and plasterers at Edmonton, Alta.

The strike in the mines of the Cumberland Railway & Coal Company to recognize the United Workers of America, to grant an increase in wages, and to make certain changes in the conditions of labour, continued throughout the month of November. The Company continued, however, the operation of its mines, with a daily output of 550 tons.

It was stated in the press that on November 30 an announcement was made by Mr. J. H. Plummer, of the Dominion Steel Corporation, in the following terms:—

"It has been arranged that a controlling interest in the stock of the Cumberland Coal and Railway Company will at once be transferred to the leading directors of the Dominion Steel Corporation. There will be for the present no change in the local management. The general policy to be pursued will be that in force in the Dominion Coal Company."

Strike of Plumbers at Montreal, Que., and Ottawa, Ont.

No settlement was reported in the case of a strike of plumbers at Montreal, Que., and Ottawa, Ont., which began on September 17, on account of the refusal of the employers to sign an agreement providing for an eight-hour day and an increase in wages. About 100 firms and 325 employés were affected by the dispute in Montreal, and one firm and thirty-one employés in Ottawa. The men on strike in Ottawa had been brought from Montreal and had been working under Montreal conditions, for a firm from there.

Strike of Plasterers at Edmonton, Alta.

On October 17, a strike of plasterers took place at Edmonton, Alta., on account of the refusal of the Builders' Exchange to sign an agreement with the Plasterers' Union, providing for a minimum rate of wages of 70 cents per hour. About twelve firms and fifty employés were involved in the dispute. About twenty-five carpenters were also indirectly affected, but they obtained work with other firms immediately. On November 19, the plasterers resumed work under the old conditions, but it was stated that the Union had agreed to demand a rate of 65 cents an hour.

New Disputes.

The new disputes of the month comprised strikes of car builders at Amherst, N.S., carpenters at Saskatoon, Sask., and ship carpenters at Lunenburg, N.S.

Strike of Car Builders at Amherst, N.S.

On November 9, a strike of about 138 employés of the Canadian Car & Foundry Company, Limited, took place at Amherst, N.S. The dispute arose from a readjustment of piece work prices, which the men in the freight car erecting shop thought involved a cut in wages. It was stated by the Company that several days after the men had gone out, a committee of three employés waited on the management, and found that the readjustment would not cause a loss in wages. Work was accordingly resumed on November 17.

Strike of Carpenters at Saskatoon, Sask.

On November 22, a strike of twenty carpenters was reported to have taken place at Saskatoon, Sask., on account of a reduction in their wages from 45 to 40 cents per hour. No settlement of the dispute was reported during the month, but the men involved secured employment from other firms.

Strike of Ship Carpenters at Lunenburg, N. S.

On November 21, twenty-seven ship-carpenters employed by Messrs. Smith and Rhuland at Lunenburg, N.S., went o strike, demanding an increase in wages of two cents per hour on new work and 20 cents per hour on old work, and monthly payment of wages. The work is all by hand, and the rate of pay was $1.50 per day. After the men had been

Plumbers	Montreal, Que.	For increase in wages	100		325				Sept. 17		No settlement reported at end of month.
"	Ottawa, Ont.	For increase in wages	1		31				" 18		No settlement reported at end of month.
Plasterers	Edmonton, Alta.	For increase in wages	12		50				Oct. 17	Nov. 19	Work resumed under old conditions. Plasterers' Union drew up new agreement to be presented to employers.
DISPUTES WHICH BEGAN DURING THE MONTH.											
Building trades—											
Carpenters	Saskatoon, Sask.	Against reduction in wages from 45 to 40 cents an hour	1		20				Nov. 22		No settlement reported, but men secured work with other firms.
Metal trades—											
Car builders	Amherst, N.S.	Readjustment of piece work prices, which strikers thought involved a cut in wages	1		138				" 8	Nov. 17	Work resumed on employers' terms when strikers found readjustment involved no loss.
Ship carpenters	Lunenburg, N.S.	For increase in wages and monthly payment of wages	1		27				" 21	" 25	Increase in wages granted, and wages to be paid monthly as soon as circumstances warrant it.

* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, of both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

out for sixty hours they returned to work, the increase in wages having been granted. There was also an understanding that wages would be paid monthly as soon as circumstances would warrant it.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of November, and which have been reported to the Department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1910.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country to correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario, and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 407 individual work people in Canada during the month of November, 1910, were reported to the Department of Labour. Of these, 140 were fatal, and 267 resulted in serious injuries. In addition, four fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before November, 1910.

In the preceding month there were 115 fatal, and 275 non-fatal accidents reported, a total of 390, and in November, 1909, there were 143 fatal and 279 non-fatal accidents, a total of 422. The number of fatal accidents reported in November, 1910, is therefore, twenty-five more than in the preceding month, and three less than in November, 1909. The number of non-fatal accidents reported in November, 1910, was eight less than in the preceding month, and four less than in November 1909. Altogether there were 17 more industrial accidents reported in November 1910 than in the preceding month and fifteen less than in the same month of the preceding year.

Of 200 returns received during the month giving the ages of the victims of industrial accidents, seventeen referred to persons under twenty-one years of age, sixty-five to persons between twenty-one and forty-five, and twelve to persons over forty-five. One hundred and six persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month, by industries and trades:—

STATEMENT OF ACCIDENTS DURING NOVEMBER, 1910, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total
Agriculture	21	35	56
Fishing and hunting	8	1	9
Lumbering	6	6	12
Mining	16	23	39

Navigation	12	6	18
General transport	3	20	23
Public employés	7	20	26
Miscellaneous	6	14	20
Unskilled labour	13	23	36
Total	140	267	406

Nature of Fatalities and Accidents.

The disasters of the month involving more than one fatality were: The death of three workmen by the collapse of a scaffold at Weston, Ont.; the drowning of two lumbermen near Port Greville, N.S., by the capsizing of their boat; the killing of two farmers at Belair Station, Que., by being run over by a railway train; the burning to death of two railway construction hands in a box-car at Tait, Sask.; and the drowning of two miners while crossing Lake Temiscaming, Ont., in a boat.

Collapse of Scaffold at Weston, Ont.

On November 3, while three men were working on the inside of the water works stand-pipe at Weston, Ont., the scaffolding gave way, precipitating them to the cement floor, 80 feet below, killing them instantly. An inquest was held on November 4, and on November 11, after the evidence had been heard, the coroner's jury rendered the following verdict:

"That Lewis Smith came to his death on the morning of the third of November, at Weston, through injuries received through the giving away of a scaffold on the stand-pipe being erected by the Toronto Iron Works, the accident being caused by a defective ledger; that J. D. McVey, the foreman, was responsible for using the lumber; that in the opinion of the jury brackets should have been used under the cantilever end of the platform, and that tiers should have been left under the platform upon which the men were working."

Level Crossing Fatality at Belair Station, Que.

While driving across the track of the National Transcontinental Railway, at Belair Station, Que., on November 9, two farmers were struck by a locomotive on construction work, and both killed.

Drowning of two Lumbermen near Port Greville, N.S.

On November 7, a boat containing two lumbermen towing a raft of piling from Fraserville to Port Greville, N.S., foundered near the latter point, and the two occupants were drowned.

Fatality at Tait, Sask.

On November 17, two railway employés were burned to death in the railway depot, at Tait, Sask.

Drowning of two Miners in Lake Temiscaming, Ont.

On November 22, two miners while crossing Lake Temiscaming, Ont., in a boat while on a prospecting tour, were upset and drowned.

Records by Trades and Industries.

Agriculture.—During November, 1910, there were twenty-one fatal and thirty-five non-fatal accidents in this industry, compared with nineteen killed and thirty-seven injured in October, 1910, and nineteen killed and thirty-two injured in November, 1909. Six of the fatalities were caused by the victims being run over, four each by falls and by falling material, two respectively by runaways, by live stock and by being burnt to death, and one to being caught between cars. Twelve of the non-fatal accidents were caused by live stock, nine by falls, five by machinery, four by falling material, three by tools and one each by burns and by a runaway.

Fishing and hunting.—During November, 1910, there were eight deaths caused by accidents and one injury, as against four fatalities in the previous month, and two fatalities in November, a year ago. Three of the deaths were due to drowning, two respectively to exposure and to gunshot wounds, and one to falling material. The minor accident was due to a fall.

Lumbering.—In this group six workers were killed during November last and six injured, compared with eight killed and nine injured in October last, and thirteen killed and eighteen injured in November, 1909. Of the fatalities, two were caused by falling material, two by drowning, and one each by the explosion of a boiler and by machinery. Of the non-fatal acci-

dents three were caused by the explosion of a boiler, and one respectively by flying material, by falling material and by a tool.

Mining.

Sixteen mine workers were killed and twenty-three injured during November, 1910, as against ten killed and nineteen injured in the preceding month, and three killed and twenty-three injured in November, 1909. Five of the accidental deaths were due to being run over, four to drowning, three to explosions, two to falling material, and one each to electricity and to asphyxiation. Fourten of the injuries were due to falling material, four to explosions, three to flying material and one each to machinery and to mine cars.

Building trades.—In these trades there occurred during November, 1910, twelve accidental deaths and twenty-four injuries, compared with six killed and thirty one injured the month before, and five killed and twenty-five injured in November, 1909. Falls contributed seven, falling material three, flying material and a runaway one each, to the roll of fatalities, and of the non-fatal accidents, fifteen were caused by falls, four by falling material, two by electricity and one each by machinery, by being run over and by an elevator.

Metal, engineering and shipbuilding trades.—Seven deaths by accident and thirty-eight injuries happened during November, 1910, compared with six killed and fifty-four injured in October previous, and nine killed and fifty-three injured in November a year ago. Two each of the fatalities were due to falls and to falling material, and one each to electricity, to flying material and to being run over. Fifteen of the injuries were due to falling material, seven to falls, five respectively to explosions and to machinery, four to flying material and two to molten metal.

Woodworking trades.—During November last, flying material killed one worker and sixteen others were injured, twelve through machinery, two through falling material, and one each through an explosion and through an elevator. In the preceding month, twenty-five workers were injured, and in Novemebr, 1909, eight workmen were injured.

Printing trades.—During November, machinery injured two workmen; this was also the record in October last; in November, 1909, five workers were injured.

Clothing trades.—A fall caused one accidental death in this group; there were three injuries, two caused by falls and one by machinery. There were no accidents in the previous month; one worker was injured in November, 1909.

Textile trades.—Falling material caused one death, and two other workers were injured, one by a fall and one by machinery. There were four injuries in October last, and two killed and five injured in November of last year.

Food and tobacco preparation.—The record for November, 1910, was three killed and eight injured; for October, 1910, two killed and five injured, and for November, 1909, one killed and ten injured. Falls caused two of the fatalities, and flying material the other. Three workmen were injured by falls, two by being scalded, and one each by an elevator, by a runaway and by an explosion.

Railway service.—There were twenty-three of these employés killed and twenty-six injured during November last, compared with twenty killed and twenty-six injured in the preceding month, and forty-six killed and thirty-eight injured in

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	Lower Windsor, N.B.	Nov. 4	1	By fall in house.
"	Tecumseh, Ont.	" 3	1	Fell from wagon.
"	Belle Plaine, Sask.	" 5	1	In a runaway.
"	Sexsmith, B.C.	" 6	1	Run over by train.
"	Red Deer, Alta.	" 7	1	Run over by wagon.
"	St. Thomas, Ont.	" 10	1	In a runaway.
"	Brampton, Ont.	" 10	1	By fall in barn.
"	Belair Station, Que.	" 10	2	Run over by train.
"	Eden Mills, Ont.	" 11	1	By falling beam.
"	St. Jean Deschaillow, Que.	" 25	1	Kicked by a horse.
"	Raleigh Township, Ont.	" 18	1	Traction engine fell on him.
"	East Angus, Que.	" 23	1	By cave-in of earth.
"	St. Hyacinthe, Que.	" 21	1	Run over by train.
"	Hartland, N.B.	" 2	1	Fell down cellar stairs.
"	Belleville, Ont.	" 20	1	Caught between cars.
"	Poutypool, Ont.	" 30	1	By falling material in well.
Driver	Brandon, Man.	" 1	1	Burned to death in car while in charge of horses.
Farmer's son	Odessa, Ont.	" 5	1	Kicked by horse.
Farm hand	Missisquoi, Que.	" 8	1	Burned to death in granary.
"	Bond Lake, Ont.	" 24	1	Run over by train.
Fishing and hunting—				
Fisherman	Chicoutimi, Que.	" 3	1	Drowned.
"	Off British Columbia coast.	" 19	1	Drowned, swept overboard.
Hunter	Sullivan Township, Ont.	" 10	1	By falling bank of gravel.
"	Kitchener, B.C.	" 15	1	By exposure.
"	Iervis Inlet, B.C.	" 12	1	By exposure.
"	Prince Rupert, B.C.	" 16	1	Shot accidentally.
"	St. Gregorie le Grand, Que.	" 25	1	Shot accidentally.
"	East Angus, Que.	" 26	1	Drowned, canoe upset.
Lumbering—				
Raftsmen	Port Greville, N.S.	" 7	2	Drowned, raft broke up.
Logger	Sacie Coem, Que.	" 21	1	Tree fell on him.
"	Olds, Alta.	" 19	1	Tree fell on him.
Mill hand	Tunmouth Creek, N.B.	" 16	1	Explosion of boiler.
"	Notre Dame du Portage, Que.	" 18	1	In belting.
Mining—				
Miner	Nelson, B.C.	" 1	1	Electrocuted.
"	North Sydney, N.S.	" 7	1	Runover by mine cars.
"	Blairmore, Alta.	" 12	1	Suffocated by gas.
"	Banff, Alta.	" 15	1	Fall of rock.
"	Elk Lake, Ont.	" 18	1	Falling rock.
"	Lourdes, N.S.	" 10	1	Run over by cars.
"	Frank, Alta.	" 18	1	Premature explosion.
"	Hawe Sound, B.C.	" 18	1	Run over by car.
"	Hosmer, B.C.	" 19	1	Run over by car.
"	Cobalt, Ont.	" 22	1	Explosion of gelingnite.
"	Haileybury, Ont.	" 22	2	Drowned.
"	Glace Bay, N.S.	" 25	1	Run over by coal box.
Prospector	Porcupine River, Ont.	" 2	1	Drowned in rapids.
"	Mattazami River, Ont.	" 13	1	Drowned, boat upset.
Quarryman	Montreal, Que.	" 25	1	Explosion of dynamite.
Building trades—				
Carpenter	Hamilton, Ont.	" 3	1	By falling plank.
"	Montreal, Que.	" 7	1	By falling material.
"	Montreal, Que.	" 9	1	Fell 50 feet.
"	Quebec, Que.	" 4	1	Fell from scaffold.
"	Toronto, Ont.	" 23	1	By a fall.
"	Quebec, Que.	" 20	1	Fell from a roof.

"	Winnipeg, Man.	" 17	1	Blood poisoning.
"	Toronto, Ont.	" 19	1	In belting.
"	Blue Bonnets, Que.	" 21	1	Run over by train.
"	Toronto, Ont.	" 24	1	Run over by train.
"	London, Ont.	" 28	1	Run over by train.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MOTNH, BUT ONLY REPORTED TO THE DEPARTMENT IN NOVEMBER, 1910.

Rancher	Cobble Hill, B.C.	Oct. 26	1	In a runaway.
Farmer	Tray Falls, N.B.	" 30	1	Shot accidentally.
Pilot	Hopewell, N.B.	" 29	1	Drowned, fell overboard.
Labourer	Medicine Hat, Alta.	" 31	1	Fell from scaffold.

November, 1909. Twelve of the accidental deaths were due to being run over, four to being caught between cars, two to being burnt to death, and one respectively to a collision, to drowning, to a fall, to electricity and to falling material. Seven each of the injuries were due to being caught between cars and to falls, four respectively to falling material and to being run over, two to collisions and one each to being scalded and to exposure.

Navigation.—During November, 1910, twelve were killed and six injured, compared with nine killed and six injured in October last, and thirteen killed and eleven injured in November of last year. Of the fatalities, ten were caused by drowning and one each by being caught between vehicles and by a fall. Four of the injuries were caused by falls, and one respectively by falling material and by machinery.

General transport.—There were three killed and twenty injured in November 1910, as against ten killed and eighteen injured in October, 1910, and nine killed and nineteeen injured in November a year ago. Two of the deaths were due to being run over and one to a fall. Nine of the injuries were due to collisions, six to runaways, three to falls, and one each to falling material and to live stock.

Public employés.—In the month under review, seven of these employés were killed and twenty injured, compared with one killed and twelve injured in the month previous, and two killed and thirteen injured in November, 1909. Four employés were killed by falls and one each by drowning, by being burnt and by falling material. Seven of the injuries were caused by falls, five by being run over, four by falling material, three by explosions and one by machinery.

Miscellaneous.—Six were killed and fourteen injured in November, 1910, compared with thirteen killed and nine injured the month before, and five killed and twelve injured in November, 1909. Of the deaths, two were due to falls, and one respectively to falling material, to drowning, to being burnt and to an explosion. Eight of the injuries were due to machinery, three to falls and one each to an explosion, to live stock and to being burnt.

Unskilled labour.—Thirteen labourers were killed and twenty-three injured during November just past, as against seven killed and eighteen injured in the preceding month, and six killed and six injured in November, 1909. Eight of the fatalities were caused by being run over, two by falling material and one each by a fall, by blood poisoning and by machinery. Of the non-fatal accidents, ten were caused by falling material, nine by falls, three by being run over and one by machinery.

RETAIL PRICES OF STAPLE ARTICLES

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month previ ing in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement usually occupied by workingmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during November, 1910.

DOMINION REPORTS.

Public Works.

Report of the Minister of Public Works on the works under his control for the fiscal year ended March 31, 1910. Ottawa: King's Printer, 1910. Page, 543. Price, 40 cents.

IN the Report of the Minister of Public Works it is stated that the total expenditure of the department during the past fiscal year was $11,342,365.29, the chief expenditures being $3,207,233.59 for harbours and rivers; $3,669,030.18 for dredging; and $3,478,508.07 for public buildings. The revenue of the department amounted to $485,884.96. Of this sum, $136,747.31 was derived from telegraph lines; $71,767.20 from slides and booms; $45,816.92 from graving docks; $45,138.61 from rents; and $186,514.92 from casual revenue.

Criminal Statistics.

Criminal Statistics for the year ended September 30, 1909. Ottawa: King's Printer, 1910. Page, 354. Price, 20 cents.

The Report on Criminal Statistics in Canada, for the year ended September, 30, 1909, shows that during the year there were 15,350 charges and 11,449 convictions for indictable offences, an increase of 110 charges and 115 convictions over the previous year. A comparison of the various provinces shows that in respect to population there was less criminality in Prince Edward Island, Nova Scotia, New Brunswick and Quebec, while a higher percentage of convictions prevailed in Ontario, Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon district. There were 1,150 young offenders under sixteen years of age, compared with 1,204 in 1908. The number decreased in Quebec, Manitoba, Saskatchewan and British Columbia, and increased in the other provinces. The number of female offenders was 556, against 503 in the previous year, but there was a decrease in every Province except Ontario and Manitoba.

An analysis of the occupations of the convicts shows that 54.20 per cent. in 1909 were labourers, 16.61 were engaged in commerce, 13.68 in industrial occupations, 7.56 in agriculture, 6.70 in domestic service, and 1.25 in professional work. With respect to temperance, fifty-five out of 100 persons convicted used liquor moderately, and twenty-five were immoderate drinkers, the remainder were either non-drinkers or were not given in this classification.

There were 78,503 summary convictions during 1909, of which 31,105 were for drunkenness. There were 711 pardons granted, including 578 ticket-of-leave, as against 683 pardons and 396 tickets-of-leave in the previous year. Four death sentences were also commuted to life imprisonment. Twenty-three convicts out on tickets-of-leave were granted unconditional liberty.

Department of the Secretary of State.

Report of the Secretary of State of Canada for the year ended March 31, 1910. Ottawa: King's Printer, 1910. Page, 596. Price, 35 cents.

The number of charters issued in the office of the Secretary of State, under the Companies' Act, in 1909–10, was 493. The total capitalization of new companies was $301,788,300, and the capitalization of existing companies was increased by $46,589,500, making altogether the largest increase in capital in the history of the Department.

In the year 1909, about 730 returns were received under the Naturalization Act, containing 16,350 names of persons who were granted certificates of naturalization and of readmission to British nationality. Among the naturalized persons were 7,266 from the United States, 1,944 from Russia, 1,588 from Austria, 866 from Italy, 623 from Sweden and 399 from Norway.

ONTARIO REPORT.

International Prison Congress.

Conclusions of the International Prison Congress held in Washington, October 2–8, 1910. Toronto: J. J. Kelso. Page, 6.

A brief report has been issued by Mr. J. J. Kelso, Superintendent of Neglected and Dependent Children of Ontario, on the conclusions of the International Prison Congress, held in Washington, on October 2–8, which he attended as one of the representatives of Ontario. These conclusions were comprised in a set of resolutions adopted by the Congress, which dealt with the following subjects: Juvenile offenders, idle and vagabond children, children born out of wedlock, probation, release on parole, the indeterminate sentence, and complicity in crime.

With reference to juvenile offenders, it was declared that those who are entrusted with the cognizance of the cases of young delinquents should be primarily chosen for their ability to understand and sympathize with children, and they should have the assistance of probation officers to make preliminary examination in each case and to watch over and help those put on probation. Delinquents should not be detained in quarters used for adults, and their cases should never be heard at the same session with cases of adults. In order to prevent idleness and vagabondage of children in large cities, it was recommended that parens should be made responsible for the wrong-doing of their children, deserting fathers should be compelled to return or to support their children, children should be taken from unfit homes and placed in better surroundings, school curricula should be made more interesting and practical, and there should be more kindergartens and manual training, and more playgrounds, gymnasiums and athletic fields.

For the protection of children born out of wedlock, it was the opinion of the Congress that the laws should be so modified as to make the care, support and inheritance of illegitimate and legitimate children as near as possible identical, that whichever parent has not the care of the child should contribute toward its support and education, and that a moral propaganda should be carried on to instruct young people in matters of sex, and to help build up a single moral standard applicable to men and women alike.

The probation system of dealing with convicted persons is recommended in cases where reformation may reasonably be expected, but the probationers should be placed for a reasonable time under the supervision of competent officers. The modern reformatory method is based on the conviction that it is in the public interest not merely to impose a retributive and deterrent sentence upon a criminal, but to make an earnest effort for his reformation. A long period of reformatory treatment is more likely to be beneficial than repeated short terms of imprisonment under severer conditions. Prisoners of all classes should be eligible for conditional release on parole, in accordance with definite rules, after serving for a definite minimum period. Parole should be given on the recommendation of a properly constituted board. The indeterminate sentence should be applied to moral and mental defectives, and also as an important part of the reformatory system, to criminals, particularly young delinquents, whose offences are due mainly to circumstances of an individual character. It was not considered to be in conformity with the spirit of penal law to make of every preliminary agreement to break the law a special crime, but it was thought desirable to regard participation as an aggravating circumstance, and to augment the power of the judge to increase the penalty for such offences.

BRITISH REPORT.

Collective Agreements.

Report on Collective Agreements between employers and workpeople in the United Kingdom. London: Wyman & Sons, 1910. Page, 540. Price, 2s., 2d.

The custom of regulating wages and conditions of employment by means of collective agreements between employers or groups of employers, and their workpeople is very prevalent in Great Britain. In a report issued by the Board of Trade, it is stated that there exist 1,696 agreements of this nature in the United Kingdom, affecting about 2,400,000 work-

people. There are also a large number of workpeople, who though not parties to collective agreements, are in effect governed by them with regard to the conditions of their employment. In some instances a collective bargain is made between a single firm and its employés. In other cases the agreements in force in relation to particular establishments are themselves subordinate to a specific standard, and form an integral part of a general wage-scale in force throughout a large area.

The subjects dealt with in the agreements comprise rates of wages, including piece-wage, time-wage, with or without a bonus, group piece-work prices, where a gang work under a sub-contractor, who is paid according to the output; methods of changing wages and sliding scales; hours of labour, including payment for overtime, for night-shifts and restrictions for overtime work. In addition to matters arising out of wages and hours of labour, many other subjects are dealt with in the agreements, including the number of men to be employed, the distribution of work in slack time, provisions against enticing workmen away from other employers, the demarcation of work restrictions on the employment of youthful labour, and conciliation and arbitration.

AUSTRALIAN REPORT.

Industrial Conditions in Queensland.

Report of the Director of Labour and Chief Inspector of Factories and Shops of Queensland, for the year ended thirtieth June, 1910. Brisbane: Government Printer, 1910. Page, 87.

The fourth annual Report of the Director of Labour of Queensland, deals with the registration of persons in search of employment, the working of the Wages Boards Act, and of the Factories and Shops Acts, during the year ended June 30, 1910. In this period, 10,544 persons seeking employment were registered, of whom 7,047, 66.82 per cent. were found work. The percentage of applicants provided with work in 1909 was 58.04, and in 1908, 60.10. The number of factories registered increased from 1,887, on March 31, 1909, to 1,995 on March 31, 1910, and in the same period the number of employés increased from 22,152 to 24,123. Up to June 30, 1910, there have been established forty-three Wages Boards, and it is stated that, generally speaking, the determinations of the Boards throughout have been very well observed, and they appear to have given satisfaction to both employers and employés.

OTHER REPORTS RECEIVED.

Canada.—Report of the Department of Trade and Commerce for the fiscal year ended March 31, 1910. Part I, Canadian Trade (Imports and Exports from Canada). Part III, Canadian Trade with Foreign Countries (except France, Germany, United Kingdom and United States).

Experimental Farms; Reports for the year ending March 31, 1910.

Sixth annual Report of the Commissioners of the Transcontinental Railway for the fiscal year ended March 31, 1910.

Fifth Report of the Board of Railway Commissioners for Canada for the year ending March 31, 1910.

Forty-third annual Report of the Department of Marine and Fisheries, 1910, Marine.

Steamboat Inspection Report, 1910.

Report of Progress of Stream Measurements for the calendar year 1909.

United States.—Report of the Commissioner of Corporations onTransportation by Water in the United States. Part III, Water Terminals.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

ONTARIO CASES.

Bread Sales Act, 1910.—Weight of Loaf.—"Small Bread."

THE Bread Sales Act (10 Edward VII, chapter 95, section 3) enacts as follows: "Except as provided in subsection 2, no person shall make bread for sale, or sell or offer for sale bread, except in loaves weighing twenty-four or forty-eight ounces avoirdupois. (2) Small bread may be made for sale, offered for sale and sold, in any weight not exceeding twelve ounces avoirdupois."

The defendants were convicted, by one of the police magistrates for the City of Toronto, of selling 10 loaves of bread not in loaves weighing twenty-four ounces or forty-eight ounces avoirdupois each and in weight exceeding twelve ounces, contrary to this enactment. Upon an appeal by the defendants from the conviction, Judge Morson, who heard the appeal, said: "The material facts are not in dispute. The evidence shows clearly that the bread sold by the appellants was small bread as made by them, the mode of baking being by putting the dough in pans in detached portions, but which became joined in the process of baking, in such a manner as to be easily detached if sold separately. The prosecution admitted there would have been no offence if the loaves had been sold detached. The only question, then, for determination is whether, under the Act as it now stands, "small bread," as made by the appellants, is not small bread if sold joined together. The Act has not defined what "small bread" is; it is, therefore, left entirely to each baker to make whatever kind of small bread he likes, so long as it does not exceed twelve ounces in weight. The appellants were, therefore, enabled to say, as they did without contradiction, that the bread in question was small bread, and it was not disputed that each separate portion, if separated, would weigh under the twelve ounces. These were substantially the facts before the Police Magistrate. He appears to have come to the conclusion that "small bread" must be sold in separate portions, otherwise it is not "small bread," because, if allowed to be sold joined together, it would, to quote his own language, give the opportunity to a dishonest baker of selling a customer as a loaf less than twenty-four ounces, which is exactly what the Act desires to prevent. I am unable to agree with him, I fail to see what difference it makes whether the bread is joined together or not, any more than it would if it were buns or tea biscuits, so long as the Act does not require it, and the joining is not for the purpose of deceiving the public. The Magistrate does not say he thinks the joining was for that purpose; had he done so, it would not have been justified by the evidence, unless, of course, he absolutely disbelieved the appellants, which, on uncontradicted evidence, he would not be justified in doing. I think, in his very commendable desire to give effect to what he considered the intention of the Act, he went further than the Act premitted. If the bread was "small bread," as undoubtedly it was on the evidence, he should not hold it was not, because it was not separated when sold, when the Act does not require it. If the intention of the Act was that all "small bread" should only be sold in separate portions for the public protection, it has not so stated. But do the public need protection? It seems to me they can easily protect themselves by asking for the particular kind of bread they want; if they ask for a loaf only, the obvious intention of the Act was, that they should get the standard large or small loaf; and, if the baker sold them his "small bread" joined together as the standard loaf, it would be a fraud at comman law, but not under the Bread Act as at present framed, because the bread so sold was, as in this case, "small

bread" of the required weight when separated, the false representation that it was a standard loaf not changing its character. If any remedy is required, a simple one would be to enact that all bread must be sold by weight. For the reasons, then, that I have stated, I have come to the conclusion that the Magistrate was wrong; and his conviction must be quashed without costs.

(Rex v. Nasmith Co., Limited, 2 Weekly Notes, 116.)

Large Damages to Injured Canadian Pacific Railway Fireman.

George Rogers, the Canadian Pacific Railway Company's fireman, who was struck on the head by a standpipe at the side of the company's tracks at Ayr, Ont., last October, when he leaned from the cab window to ascertain the cause of a noise behind the tender, has been awarded $13,500 damages at the fall assizes. The young man suffered a broken back in the accident, and it is claimed that only a very remarkable operation by physicians at Galt saved his life. Whether he will ever recover the use of his legs sufficiently to walk is only a guess, according to the testimony of the physicians. The injured man stated that his memory as to what happened at the time of the accident was practically a blank. He had earned as high as $90 a month, but when business was slack his pay had dropped to as low as $26. Rogers was carried to and from the court room, but was able to sit up and answer all questions without difficulty. Dr. McKendrick, of Galt, who attended Rogers when he was taken to the Galt Hospital, described the very unusual operation that was performed when it was discovered that the plaintiff's back was broken, and that his injuries might result in his death. Parts of the spinal column were removed, the covering over the cord was sewn up, and cords were drawn over in an effort to form an arch over the part where the vertebræ had been removed. There is no record of any similar operation having been performed on a previous occasion, but the witness believed that the only hope of Rogers' recovery rested in this delicate piece of surgical work. Three weeks after the operation Rogers showed signs of improvement, parts previously paralyzed again became active, and in time he was able to move his feet. The cut in the injured man's head was about six inches long and two inches wide. Dr. C. S. Moore was of the opinion that it is very improbable that the plaintiff will ever be able to walk with crutches without support from some person. Apparently some local affection is causing a stiffening of the legs when he stands. The doctor stated that in his opinion Rogers will never recover sufficiently to maintain himself.

Workmen's Compensation Act.—Limitation of Action.

In an action for damages for injury to the plaintiff by the negligence of the defendants, the statement of claim alleged causes of action at common law and under the Workmen's Compensation for Injuries Act. It was admitted that the accident from which the injury was sustained occurred more than six months before the commencement of the action. The statement of defence omitted any reference to the section of the Act (R.S.O. 1897, chapter 160, section 9.) which requires all cases thereunder to be "commenced within six months from the occurrence of the accident." Upon a motion by the defendants for leave to amend the statement of defence by setting up that the action was barred by the above statutory limitation, the Master in Chambers said that, the failure to plead the statutory limitation being by reason of the solicitor's slip, the amendment should be allowed on payment of costs. This judgement was affirmed on appeal by Mr. Justice Latchford.

(Siven vs. Temiskaming Mining Company, 2 Weekly Notes, 129.)

Fined under Lord's Day Act.

Four Armenians, recently appeared before Magistrate Campbell at St. Catharines charged with wilfully labouring on Sunday unloading a car of brick at the McKinnon Dash & Metal Works when it was not necessary. The men admitted having worked on that day, as did Mr. Long, the foreman of the foundry, who

said that he couldn't get any one to unload the car on Saturday, and, as some repairs were to be made to the furnace early on Monday, he had the work of unloading done on the Sabbath. The magistrate, however, did not agree that the work was a necessity and fined each of the men $2.

QUEBEC CASES.

Damages against Railway Company.

William H. McAlpine sued the Grand Trunk Railway Company for $10,000 damages, claiming that while passing the Guy street crossing, in Montreal, he had been run down by a light engine, sustaining injuries which involved the amputation of his right leg, the fracture of his collar bone, and other harm, which caused permanent incapacity to follow his usual avocation. It was claimed that the accident was due to the negligence of the Company, because for two months surrounding the time complained of, Guy street had been under repair and the gates at the crossing had been kept permanently closed. It was therefore, argued that the gates had become no signal of danger, since street car passengers had to get transfers, cross the tracks on foot and board cars on the other side of the gates, while pedestrians had also to cross in the same manner. It was, therefore, claimed that the practice of persons crossing the tracks had become established and permitted by the Company. This, it was alleged, created a source of danger which had not been properly guarded against by the statutory warning of the approach of trains or engines. It was shown that the law provided that in cities or towns where a train or engine crossed on a level with a street the whistle should be sounded 80 rods before crossing the street, and the bell rung continuously. Further, it was shown that when an engine was being run in reverse order, tender first, as in the case complained of, a man should be stationed on the footboard to warn pedestrians. In this case, it was held, that these precautions had not been observed. The jury, therefore, found the Company responsible for the accident, and assessed the damages at $9,000. They however, deducted $2,500 on the ground that the plaintiff had not looked sufficiently before crossing the tracks. They therefore found damages for the plaintiff in the sum of $6,500.

Damages to an Employé.

In review of a judgement by the Superior Court, the Court of Review at Montreal awarded the sum of $360, with interest and costs to the plaintiff in the case of Deyinne v. Barber. Plaintiff was in the employ of the defending firm, and was instructed to open a steam valve, at a time when there was water in the pipe, which led to an explosion, causing him serious injuries. The defendants claimed that it was through his own negligence the man had been injured; and that he had accepted $10 in settlement of the case. Their lordships, however, upheld the view of the Superior Court, holding that the defendants had no business to send an inexperienced man to open a steam valve, and that the alleged settlement was not proved.

MANITOBA CASES.

Workmen's Compensation Decision.

The Workmen's Compensation for Injuries Act, passed at the last session of the Manitoba Legislature, is invalid unless for "manual" labour, according to a decision handed down by Mr. Justice Metcalfe, at Winnipeg.

The plaintiff in the case was a lady clerk in the Hudson's Bay stores, who claimed damages for injuries arising from slipping on a badly oiled floor. The case was dismissed on the grounds that her duties were not "manual."

UNITED STATES CASES.

Woodtrim Question before the Courts.

The long fight of the union carpenters to get building contractors to use none but union made wood trim on buildings which has been carried on by carpenters refusing to handle trim made by non-union firms, has been taken to the New

York courts. The Albro J. Newton Company, of Brooklyn, a woodworking manufacturing firm which employs its men on the open shop plan, has secured from Supreme Court Justice Crane, of Brooklyn, a preliminary injunction restraining the Joint District Council of New York and vicinity, of the United Brotherhood of Carpenters and Joiners of America, and the Amalgamated Carpenters of America, its officers and members, from ordering strikes against the use of the product of the firm, or otherwise interfering with its business. It is said that the case will be made a test one. The union carpenters have for many years been trying, by ordering strikes or by other means, to induce building contractors to pledge themselves not to use any but union made wood trim, but without success, or only with partial success. The preliminary injunction restrains the defendants from combining to prevent the use of the product of the plaintiff, or by strikes or boycotts preventing its use by contrators.

Appended to the application for the injunction are affidavits from building contractors and others to the effect that, after having contracted with the plaintiff firm for wood trim, the carpenters either refused to handle it, or went on strike at the orders of agents of the two organizations of carpenters mentioned. The application also contains an affidavit by Albro J. Newton, head of the Albro J. Newton Company, to the effect that the firm had on hand a large quantity of valuable stock which had been manufactured to order of contractors, who could not use it because their carpenters, who were all union men, refused to handle it. The question of non-union wood trim had been responsible for many strikes, and this case would be used as a precedent. The carpenters' unions have been for years trying to force the Master Carpenters' Association in its trade agreement to pledge its members to use only union made wood trim. The Association has always refused, on the ground that the union mills could not supply all the trim needed, and on the further ground that, if such a pledge were given, its members would be in unfair competition with independent contractors whose non-union trim came from cities where wages were much lower than in New York.

Damages to Children of Railway Employé.

An action on behalf of the children of one Dell, a sectionman, killed in defenddants' railway yard, by being struck by a locomotive. The action was brought by an uncle of the children. Rule 93 of the Michigan Central Railway Company track rules, says: "All trains and engines will occupy and move in the right-hand track, and will move on and occupy left-hand tracks only on special orders and under a flagman." At the time of the accident the train was on a left-hand track, there being an engine and three freight cars. The engine that struck Dell was running backwards. There was no flagman where Dell was working. Dell was spiking the rails, and had been there fifteen or twenty minutes. Trains ran both ways on the tracks in the yard. The trains in the yard are run under the orders of the yardman, and if no yardman was there, then by the orders of the conductor. The engineer worked by and according to signals. The signals were operated by the brakeman under the instructions of the conductor.

Judge Clute, in delivering his charge to the jury, explained to them the points which they were to consider. "Could Dell have avoided the accident by exercising reasonable care? Was the system itself a poor one and responsible for the accident? Did the evidence show any negligence on the part of the Company, and if so of what did such negligence consist? Is it safe for Company to run trains on either track in either direction without sufficient warning to trackmen? If the system is dangerous, of what does the danger consist?"

The jury found that the accident was because of negligence on the part of the Railway Company, such negligence being the running of trains contrary to rules, (the improper running of trains) and without proper warning to trackmen working in the yard. They awarded the plaintiffs $2,500.

(Dell v. Michigan Central Railway, Welland Fall Assizes, 1910.)

THE

LABOUR GAZETTE

JANUARY, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF DECEMBER, 1910.

I.—GENERAL SUMMARY.

THE month of December, 1910, compared favourably with the corresponding period of 1909 from the standpoint of industrial and trade activity. Mild weather in the first half of the month somewhat curtailed the movement of winter goods. Later, however, lower temperatures ruled, and good snow roads and prevailing high prices for nearly all forms of produce increased the volume of country trade. There was the dullness incident to the season in outside operations, including agriculture, mining and railway construction, though in the latter larger numbers will be given employment than last year throughout the winter. Outside building and civic improvement operations had for the most part ceased, but the labour thereby thrown idle was in a good position to meet a period of inactivity owing to the steady employment and high wages of the past season. Lumbering operations in the woods were facilitated by the snow and frost of the second half of the month, and a good cut is expected. General holiday trade and traffic were estimated to have been considerably higher than last year. Values remained on the whole very firm.

Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during December, 1910.

Metal and woodworking trades.—Moulders (thirty-five) at Carleton Place, Ont., received an increase of ten per cent. in wages.

Printing and allied trades.—Bookbinders, rulers and bindery employés to the number of twenty-three males and twenty-five females, at St. John, N.B., had their hours decreased one per week.

Railway employés.—On December 1 twenty-five engineers in the employ of the Toronto, Hamilton & Buffalo Railway Compnny received a substantial increase in wages, the amount varying according to the nature of their service.

Street railway employés.—A new scale of wages went into effect at Calgary, Alta., for employés of the municipal street railway.

Civic employés.—At Ottawa, Ont., the following employés have recently obtained advances: Market inspectors and other officers; employés of the Isolation Hospital; and employés of the public library. The increases were dated from October 1. Civic firemen at London, Ont., received an advance.*

Interruptions to Industry.

Among industrial establishments, &c., destroyed by fire or through other causes

*See report of London correspondent.

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

during December, 1910, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Store at Glace Bay, loss, $5,000; warehouse at Glace Bay, loss, $5,000; bakery at North Sydney, loss, $5,000; business block at Windsor, loss, $10,000. At Sydney, compressor house, No. 1 colliery, loss, $7,000; business block, loss, $60,000; tailor shop, loss, $2,000. Granary and residence at Stanley. The schooner *Gertie* foundered on December 13, off Seal Cove. The schooner *H. J. Logan* foundered at sea.

New Brunswick.—Barber shop and pool room at Hampton, loss, $2,000; warehouse at St. John, loss, $30,000.

Quebec.—Outbuildings and residence at Acton; outbuildings and residence at Berthierville, loss, $8,000; skating rink at Eastman; manufacturing plant at Iberville, loss, $20,000; passenger elevator at Levis, loss, $30,000; tenements and hardware store at Maisonneuve; school house at Matane. At Montreal, grocery store; laundry, loss, $1,500; coal shed; café, loss, $3,000; electric factory, loss, $4,000; jewellery store, loss, $6,000; hotel (partial) loss, $1,000; six tenements; plumbing establishment; leather factory, loss, $200,000; stable and three horses. Florest's store at Notre Dame de Grâces, loss, $1,000; book store at Quebec, loss, $30,000; labour exchange at Quebec, loss, $3,500; theatre at Quebec, loss, $15,000; railway station at Richmond; stables and residence at Rosemount; tenement houses at St. Henri, loss, $12,000; hotel at Weedon and bakery at Westmount, loss, $15,000.

Ontario.—City Hall (partial) at Belleville, loss, $1,000; livery at Belleville, loss, $2,500; hotel and two stores at Campbell's Bay, loss, $30,000; part of business section of Dresden, loss, $100,000; planing mill at Humberstone, loss, $8,000; steamer *Ottawa* at Kingston, loss, $13,000; canoe factory at Lakefield, loss, $7,000; business section of Latchford, loss, $38,000; mine plant at Gowganda, loss, $30,000; hotel livery at London, loss, $3,600; store at Hamilton, loss, $1,000; business block at Fort William, loss, $10,000; sanitarium at Mount Dennis, loss, $100,000; sawmill at Norwood, loss, $150,000; granary and residence at Markdale; saw-mill (partial) at New Liskeard; transforming station (partial) at Niagara Falls; tug at Navy Island, loss, $6,000; steamer *Dunkelm* at Blake's Point, Ile Royale, Lake Superior, loss, $250,000; elevator at Port Dalhousie, loss, $100,000; woolen mill (partial) at Pembroke, loss $2,000; stable and cattle at Peterborough; business block at Rainy River, loss, $1,800; livery barns at Tilsonburg, loss, $3,000; coal pile at Toronto; garage at Toronto, loss, $8,000; bicycle shop at Windsor, loss, $3,500; church at Wendover, loss, $30,000.

Manitoba.—Business portion of Bradwardine; three business blocks at Dauphin, loss, $25,000; hotel at Portage la Prairie, loss, $50,000; lumber mill at St. Boniface, loss, $250,000; business block at Wawanesa, loss, $25,000; warehouse and contents at Winnipeg, loss, $150,000.

Saskatchewan.—General store at Balgonie, loss, $25,000; iron works at Stettler.

Alberta.—Business block (partial) at Frank.

Conditions in the Industries and Trades.

Conditions of employment during December, in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Farmers had a good month on seasonal employment. The marketing of holiday supplies was facilitated in the latter half of the month by good snow roads. Exceptionally high prices prevailed for all classes of farm produce. Stock feeding, wood cutting and routine work made up the rest of agricultural activity.

An interesting and important incident of the month was the interview accorded by the Right Honourable the Prime Minister to a delegation of agriculturists, numbering several hundreds. A large proportion of these were from the Western Provinces, representing the Western Grain Growers' Association; the more important associations from Ontario and Eastern Provinces were also represented, including local granges, dairymen's associations, fruit growers' associations, &c. Every province was represented, with the exception of Prince Edward Island. Five requests were presented to the Government, namely: The placing of manufactured articles, for use on farms and in the homes, on the free list; the government ownership and operation of a railway line to Hudson Bay; the establishment of facilities to encourage the chilled meat trade in Canada; the passing of legislation to permit the formation of co-operative associations; and government ownership of terminal elevators at Fort William and Port Arthur. Memorials were presented to the Government on each of these subjects. The Premier replied to the delegates on behalf of the Government, expressing his gratification in meeting so representative a gathering. The Government, he stated, was at that moment negotiating with the Government of the United States with regard to a freer interchange of commodities, pending which negotiations it would be inadvisable to revise the tariff. The British preference, he stated, would be maintained. A Bill with regard to terminal elevators was being prepared and would be the subject of conference with the Grain Growers' Association. The Premier also declared himself in favour of government ownership of the Hudson Bay Railway, but not of government operation. Following the interview, the members

of the executive of the National Council of Agriculture had a conference with the Right Honourable, the Prime Minister; the Right Honourable, the Minister of Trade and Commerce; and the Honourable the Minister of Agriculture, relative to the resolutions above set forth. A later conference took place with the Right Honourable the Minister of Trade and Commerce and the Honourable the Minister of Railways and Canals.

Several important conventions of agriculturists were held during December, among them the thirty-sixth annual meeting of the Dominion Grange; the annual meeting of the Pomological and Fruit Growing Society of Quebce, and the annual meeting of the Quebec Vegetable Growers' Association.

The December issue of the *Census and Statistics Monthly* contained a resumé of the live stock industry of Canada. There has been an increase during the past year of 3·3 per cent. in the number of horses; 1·1 per cent. in the number of milch cows; 2·1 per cent. in the number of swine; and 8·0 per cent. in the number of poultry; the number of sheep has decreased to 1·5 per cent; and the number of live stock other than cows, by 2·2 per cent.

The annual crop report for Nova Scotia shows the following return:—

Crop.	Acreage	Yield per Acre.	Total.
	Acres.	Tons.	Tons.
Hay	666,400	1.9	1,266,16
	Acres.	Bus.	Bus.
Oats	144,900	38	5,550,200
Wheat	21,630	25	534,255
Barley	10,900	29	316,000
Buckwheat	18,000	27	486,000
Beans	3,100	21	65,100
Peas	11,500	21	31,500
Potatoes	45,500	160	7,280,000
Turnips, mangles, carrots	21,000	550	11,550,000
Forage crops and fodder corn	3,500	11½	40,250
Apples for home and foreign consumption			225,000bbls

In comparison with the estimates of last year, the above table indicates an increase of hay, 306,160 tons; oats, 1,410,200 bushels; wheat, 122,255 bushels; barley, 72,200 bushels; buckwheat, 18,000 bushels; beans, 3,100; forage crops and fodder corn, 4,000 tons; turnips and other roots, 1,250,000 bushels. On the other hand, a decrease is indicated of apples, about 600,000 barrels; and potatoes, 1,820,000 bushels.

The Provincial Winter Fair held at Guelph, Ont., was a pronounced success, the exhibitions being exceptionally numerous and of good quality. A number of profitable lectures and demonstrations of interest to agriculturists were given during the holding of the exhibition.

Fishing.

Conditions remained quiet for the most part in the Maritime Provinces, though, with the formation of ice on the rivers and bays smelt and eel fishing had begun in some localities. Catches, however, were generally light up to the close of the month. Operations were similarly quiet on the Great Lakes and in British Columbia, from seasonal causes.

The final return of the salmon pack in 1910 places the total pack at 762,201 cases, divided according to districts, as follows:—

Fraser river, 223,148; Skeena river, 222,035; Ricers inlet, 129,398; Naas river, 39,720; outlying districts, 147,900. In 1909 the Fraser river pack amounted to 567,203 cases, and of the last fourteen seasons there have been two only when the Skeena river reported larger packs than the Fraser. The total pack for 1909 amounted to 967,920 cases, but last year was the big fourth year, which accounts for the extra 200,000 cases ahead of this season. The combined salmon packs of Alaska, British Columbia and Puget Sound for the season were considerably below the normal.

An Order-in-Council passed during the month declares that all lobster traps constructed after December 31, 1910, shall have the laths on all portions thereof, not less than 1¼ inches apart, and this space must remain clear and nothing shall be done to diminish it, and any netting that may be used in such traps shall have meshes of not less than 3 inches extension measurement, and nothing shall be done to practically diminish the size of the mesh. The burden of proof that any lobster trap used from January 1, 1911, to December 31, 1912, that has not clear spaces between the laths of 1¼ inches and any netting that may be used in the ends thereof less than 3 inches extension

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, active, very active; (2) quiet and very quiet.

measurement, was constructed before December 31, 1910, shall lie on the person using such trap.

The International Fisheries Commission held a meeting at Ottawa during December.

Lumbering.

There was little change as compared with November. Work in the woods was well under way, under conditions on the whole favourable, though mild weather and lack of snow in some localities interfered with operations. The outlook is that the extent of the cut will be well maintained. In British Columbia the mills were, for the most part, closed down after a satisfactory season, and with the outlook favourable for next year.

An increase in the cut of lumber in Canada last year over the previous season of 396,776,000 board feet, is shown by statistics compiled by the forestry branch of the interior department. Of this increase, 31,704,000 feet, or 47·2 per cent. is to be credited to Ontario for her cut of spruce alone. An increase of twenty-two per cent. in the British Columbia cut, with a decrease of 7·7 per cent. in the cut of Quebec has caused the latter province to drop from second to third place amongst the provinces in point of lumber production. British Columbia now occupies second place. Quebec, however, is still the chief spruce producing province, nearly one-third of the total spruce cut being credited to her. The cut of spruce showed an increase over the previous year in every province except Saskatchewan and British Columbia.

The report of the Chief Fire-Warden of British Columbia for the past year shows that the number of forest fires reported for the season amounted to 1,184. The cause in 335 cases was sparks from locomotives or donkey engines. Campers are charged with 162, and settlers land clearing with 184. Lightning is set down as the cause in 103 cases, and 374 fires are recorded "causes unknown." The total estimate of damage done is $629,915, apportioned as follows: To standing timber, $193,976; to cut timber, $63,974; to improvements, $371,965. Six persons during the fire-fighting were suffocated, one man was killed by a falling tree, two were seriously injured. A total fire-fighting force of 4,452 men was employed by the Government, involving a disbursement of $35,000 by the Government and $37,394 by private employers.

The Conservation Commission issued a statement in regard to the starting of forest fires by locomotives, and the proposed legislation on the question, in which it is stated that the Commission has had investigations made by competent men, and finds that thirty per cent. of all forest fires have been started by locomotives.

Mining.

The usual activity prevailed in the Nova Scotia collieries. On the whole conditions of employment were favourable. An important announcement of the month was that of the purchase of the Springhill collieries, Cumberland County, by the Dominion Steel Corporation. In Quebec there was a cessation of mica and asbestos mining on account of cold weather, and the same conditions affected operations in Eastern Ontario. Copper mining, however, in the former province was active and the reports from the Cobalt and other camps of Northern Ontario were of continued busy conditions. Widespread interest was taken in the development of the Porcupine district. The collieries of Alberta and British Columbia were working steadily, while in the metalliferous camps of the latter province the situation compared favourably with that of the corresponding period of 1909. The Granby and British Columbia Copper Company had a good month. The output of the Trail smelter has largely exceeded that of 1909.

According to a bulletin issued by the Department of Mines at Ottawa the production and value of coal by provinces in 1909 is as follows:—

	Tons.	Value.
Nova Scotia	5,652,089	$11,354,643
British Columbia	2,606,127	8,144,147
Alberta	1,994,741	4,838,109
Saskatchewan	192,125	296,339
New Brunswick	49,029	98,496
Yukon	7,364	49,702
	10,501,475	$24,781,236

Manufacturing.

Industrial establishments with few exceptions reported a continuation of the very active conditions which prevailed throughout Canada for some months past. In the closing days of the year a number of factories closed down for stock-taking purposes, but the period will be curtailed as compared with last year. The iron and steel industry continued especially busy, the Lake Superior Corporation announcing a large volume of orders ahead. The output of the Nova Scotia Steel & Coal Company in November was 8,000 tons of steel and about the same amount of pig iron. The outlook is for a busy winter season.

Railway Construction.

Winter conditions were general, work having ceased on most of the track-laying contracts and being confined largely to rock cutting, bridge building and the assembling of supplies, though in Western Canada operations were more active than in previous years at this season. It was stated that the Grand Trunk Pacific contracts alone in Western Canada 6,000 men would be employed throughout the winter. The labour supply was more abundant.

It was announced by the Premier of Ontario that a branch of the Temiscaming and Northern Ontario Railway would be constructed from Kelso to Porcupine, a distance of 30 miles, at an estimated cost of $450,000.

The Board of Railway Commissioners has directed that in future whenever it is the intention of the Company to construct a permanent station and an application is to be made to the Board for its approval, that a copy of the application and plan be served on the municipal authority of the District in which the station is to be erected; or, if there is no municipal authority then on the Government or other authority having control over the District.

General Transport.

Railway passenger traffic was heavy during the holiday season and earnings were well maintained. Street railway earnings showed large advances in most of the cities. The movement of general merchandize was fair.

It was announced that during the past season records of previous years of traffic through the Sault Ste. Marie canals were broken, the grand total of freight being in excess of 62,000,000 tons.

The steel freight ship *Emperor* was launched at Collingwood, Ont., during December, being stated to be the largest ship ever built in the British Empire outside of the British Isles, the length being 525 feet, beam 56 feet and depth of hull 31 feet.

An important judgement was delivered in December by the Board of Railway Commissioners for Canada as a result of an inquiry begun in 1908 into the rates charged by Canadian express companies. The Commissioners declared that present tariffs are too high and that the existing forms of contracts between shippers and the companies are unfair. The companies are ordered to file new tariffs within the next three months and to issue new forms of contracts. The capitalization of the companies is, in the opinion of the Commission, too high. The judgement, exclusive of classification, covers 114 typewritten pages.

It was announced that a dry-dock of 25,000 tons lifting capacity would be built at Montreal, Que.

The Trades.

Building.—An active month, for the most part on indoor work, was the general experience during December. Exceptionally favourable conditions are expected to rule throughout the rest of the winter season with an unusually large amount of building in sight on the opening of spring.

Metal and woodworking.—Employés in these trades were generally active. The month compared very favourably with December, 1909.

Printing.—The allied trades had a busy month, the volume of holiday business being exceptionally heavy.

Clothing.—Journeymen tailors were active and garment workers and boot and shoe workers had a busy month.

Textile.—Cotton and woolen mills employés had for the most part steady work.

Food and tobacco preparation.—Bakers, confectioners, brewery employés, butchers, cigar makers and tobacco workers had an active month.

Leather.—Tanners, curriers, trunk and bag makers had a normal month.

Miscellaneous.—Retail clerks, hotel and restaurant employés were in their busiest season.

Unskilled labour.—Unskilled labour was generally out of employment, and until the closing weeks of the month had not the usual work of snow removal available. Little distress, however, was reported among members of this class, disbursements to the needy at Christmas time being unusually light in the several cities. Ice harvesting had begun at a few points, but did not afford much employment up to the close of the year.

Canadian Trade and Revenue.

Foreign trade. — During November, 1910, the total value of imports entered for consumption in the Dominion of Canada, was $41,633,227, compared with $35,434,039 in November, 1909. For the first eight months of the present fiscal year the total value of imports entered for consumption was $304,318,375, compared with $240,108,431 in the corresponding period of the last fiscal year. The total value of domestic exports during November, 1910, was $35,518,616, compared with $35,315,713 in November, 1909. The total value of domestic exports during the eight months ending November 30, 1910, was $193,639,731, compared with $183,050,727 in the corresponding months of last year. During November, 1910, there were increases in exports of the mine, the fisheries and manufactures and decreases in exports of the forest, animals and their produce and agriculture. The grand total of Canadian trade for November, 1910, was $79,160,718, as against $73,151,731 in November, 1909, and for the eight months ending November 30, 1910, $512,457,752, compared with $439,959,213 in the corresponding months of 1909.

Complaints are made in Cuba of failure on the part of Canadian exporters to fulfil contracts. Openings in the markets of this Island are reported for Canadian matches and potatoes. A shipment of British Columbia apples to Shanghai, China, received much praise on account of the excellence of the fruit and the character of the packing. Regulations concerning commercial travellers, in Argentina, Belguim, Brazil, China, Corea, Costa Rica, Cuba, Denmark, France, Germany, Guatemala, Peru, Portugal, Russia, Salvador, Santo Domingo, Spain, Sweden, Switzerland, Turkey, United States, Uruguay, Venezuela, Honduras, Italy, Japan and the United Kingdom were published during the month, by the Department of Trade and Commerce, Canada.

Imperial trade.—According to reports of Canadian Trade Commissioners received at the Department of Trade and Commerce, Canada, openings occurred in Great Britain for Canadian phosphates, casein, caps for milk bottles, maple flooring blocks, asbestos, cement sheets and Canadian apples. Large increases in Canadian trade with Great Britain in 1910 are reported, the increase in imports being nearly fifteen per cent. The increase being eight per cent. in the total trade. Openings for agricultural machinery, axes, sawmill supplies, staves, shooks, and wooden hoops in Barbados were mentioned. There is a demand for Canadinan food stuffs, butter, cheese, fish, (fresh and canned), potatoes and condensed milk in British Guiana, and for Canadian poultry in Newfoundland. A very pronounced increase in the exports from Trinidad to Canada is shown, due to the changing of the chief source of Canada's sugar supply from Germany to the West Indies. This change took place about 1904.

A special report on the trade and commerce of South Africa was published by the Department of Trade and Commerce, Canada, during November. It contains: (1) A summary of trade conditions; (2) an analysis of Custom's Statistics; and, (3) Appendices on Imports and Exports, Custom's Tariff and Shipping Rates.

Domesitc trade.—From all sections of the Dominion reports received were of an exceptionally heavy Christmas holiday trade. The prevailing mild weather affected the demand for dry goods in the opening weeks of the month; colder weather towards the close, however, induced a more active movement. A fair snowfall facilitated country trade and brought large numbers of agriculturists to market. Prices were generally firm. Staple lines of winter goods were moving rapidly in the closing days of the month. Collections were generally from fair to good.

A feature of the month was the publication of the annual statement of several of the Canadian chartered banks. Nearly all of these showed an improvement as compared with the preceding year. The Merchants' Bank announced profits of $1,057,140, an advance of over $200,000 upon those of 1909 and of over $300,000 over those of 1908; $400,000 was transferred to rest account and $50,000 contributed to the officers' pension fund. The Bank of Toronto's profits were $589,656, an advance of $10,000 upon those of 1909. The Union Bank's profits were $451,620, an advance of $44,000 compared with those of the pevious year; $5,000 were added to reserve fund. This bank absorbed the United Empire Bank during December. The Bank of Ottawa reported profits of $110,000 in excess of those of 1909, namely, $532,353; the sum of $400,000 was carried to reserve. The Eastern Townships' Bank added $150,000 to reserve fund out of profits amounting to $410,696. The Bank of Montreal's profits were $28,000 less than last year, but deposits have increased $18,000,000 and loans and advances $21,000,000. The Quebec Bank during the six months ending November 15 reported profits of $38,598; and the Banque d'Hochelaga for the year ended November 30 showed profits of $417,197, compared with $360,821, last year.

The November bank statement showed the contraction in the currency usual at this season of the year. Additions to reserve fund amounted to over $3,000,000. Deposits at interest were larger by over $2,000,000, but call loans in Canada fell off. Current discounts also showed a small decrease. Bank clearings have been uniformly upward of late.

The Farmers' Bank of Canada went into liquidation during December.

Notes.

For the first eleven months of the year the municipal street railway of Calgary, Alta., announced a surplus of $51,673.

The volume of postal matter handled during Christmas week was stated to be considerably heavier in the more important cities than in any previous year.

The annual meeting of the Dominion Commercial Travellers' Association was held at Montreal, the attendance being greater than for some years previously, nearly 200 members being present.

A conference of the Provincial Premiers and their colleagues held at Ottawa, on December 9, failed to reach an agreement on the question of representation in the House of Commons, and adjourned *sine die*.

The annual output of the manufacturing establishments of Guelph, Ont., during 1910 was stated to have exceeded $6,000,000 in value. These establishments employed approximately 4,500 men and boys and 1,000 women and girls, and paid more than $1,500,000 in wages.

The eighth annual convention of the Canadian Clay Products Manufacturers' Association was held at Toronto, Ont., December 14–16. Over fifty members were in attendance. Among the subjects discussed were technical education, tile manufacture and the use of electricity in brick making plants.

The report of the Penitentiaries Branch of the Department of Justice, Canada, gives the average daily population of Canadian penitentiaries, during the past fiscal year, as 1,824, compared with 1,625 in the preceding year. In view of the influx of foreign immigrants, the number of foreign-born convicts has increased from fourteen per cent. in 1900, to twenty per cent. in 1910.

A meeting of representatives from nine municipalities between Napanee and Cornwall, Ont., was held on December 14 for the purpose of discussing methods of securing hyrdo-electric power. The Chief Engineer of the Hydro-Electric Commission was present and explained the method in which power was supplied. After discussion, a union of the municipalities was formed for the purpose of co-operating in order to obtain hydro-electric power.

Representatives from thirty-four States will attend the annual meeting of the National Civic Federation, to be held at New York, January 12–14, for the consideration of uniform State legislation. Among the subjects which will be discussed are the following: The regulations of combinations and quasi-public utilities; compensation for industrial accidents; profit-sharing; arbitration, etc. Among the speakers will be Theodore Roosevelt, Andrew Carnegie, Franklin MacVeagh, John Mitchell, Seth Low and many others.

The fourteenth annual report of the Municipal Free Labour Bureau of Montreal, Que., shows that situations were obtained as follows: Tailors and sewing girls, 6; agents, 17; cooks, 46; servant girls, 46; upholsterers, 2; farm labourers, 299; confectioner 1; pressmen, 13; type-setters, 42; scrub-women, 38; kitchen helpers, 99; machinists, 5; chamber maids, 6; coachmen and carters, 17; theatre employés, 56; carpenters and joiners, 70; labourers, 914; office employés, 5; sawmill labourers, 15; clerks, 7; bakers, 3; plumbers, roofers and steam fitters, 5; firemen, 5; yard and stablemen, 28; pattern makers, 1; female cooks, 7; iron moulder, 1; painters, 32; waiters, 27; engineers, 2; dining room girls, 7; boot blacks, 2; electricians, 4; river log drivers, 50; blacksmiths, 5; bottle washer, 1; sailor, 1; bushmen, 153; bookbinder, 1; butcher, 1. The expenses of administration were $386.06, which with the salary of the manager brought this sum up to $1,000.

Under the profit-sharing system of the British Columbia Electric Railway Company, inaugurated in 1902, a distribution of profits amounting to $57.31 to each employé, was made during December. The system will be discontinued, the men having expressed a preference for a higher rate of wages. The individual payments which have been received by the men under the arrangement are as follows: 1903, $25; 1904, $35; 1905, $40; 1906, $45; 1907, $63; 1908, $66.78; 1909, $58.10; 1910, $57.31. Although the individual amount for the last few years has shown a reduction, the gross amount of the fund had annually increased. In 1908, $45,000 was divided, and in 1909 the fund was $50,000, while for the present year the amount is $60,000. The smaller individual amount is due to the fact that the staff of the Company has greatly increased owing to the demands caused by the growth of the district served during recent years.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

GENERAL activity continued throughout this district during December. All the large industries were busy, while smaller ones were more active than is usual at this season. The steel industry was very busy, and the outlook in the steel trade is good. Nearly all departments of the steel works at Sydney were continuously employed. The improvements to the plant have so far been unaffected by weather conditions, and all work of construction will be caried on to completion as rapidly as possible. The steel plant at Sydney Mines continued active, the outputs being fairly large. The usual activity prevailed at the Collieries, and although winter work in the way of development was got well under way, yet most men had very good employment. The building trades were

fairly active, considering the month. The factories and foundries, the tar and chemical works continued active. The Sydney Cement Company, which did a large business during the year, also had a good month. Retail trade was very good, while wholesale business was better than in December, 1909.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Work in general continued brisk throughout this district, all trades and businesses not affected by weather conditions being well employed. In the collieries steady employment obtained. During November the output of coal was 50,000 tons, being about the same as in November, 1909. For the eleven months ending November 30, 1910, the increase in shipments of coal throughout the province was about 785,000 tons. Great activity prevailing at the different foundries and steel plants throughout the province has caused a good demand for coke, this demand in turn facilitating work in handling the slack coal at the different collieries. There were no changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farming throught the district was quiet, winter conditions prevailing. There was a good demand and good prices paid for farm produce.

Lumbering.—With good sleighing in the forepart of the month, brisk conditions prevailed in this industry, many teams being employed hauling out pit timber. In the latter portion of the month there was a lull owing to mild weather.

Manufacturing. — Active conditions were reported.

Mining.—Steady employment was the rule, labour being in demand in some localities. The Spring Hill collieries in Cumberland County have been acquired by the Dominion Iron & Steel Company.

CONDITION OF PARTICULAR TRADE.

Plumbers, gas and steam fitters had a fair month. The other branches of the building trades were quiet. The metal trades had a good month, horseshoers being active. Activity prevailed in the printing, clothing and transport trades. The miscellaneous and food and tobacco preparation trades had a good month.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during December has been fair. Mild weather prevailed and this accelerated building operations of a residential nature to sufficient extent to place the present month in advance of November. Future prospects are good, as with the rumored erection of banking houses, and the construction of new naval structures, the record of 1911 should exceed that of the present year. Then, with the contemplated enlargement of the Halifax dry-dock, which it is proposed to lengthen 50 feet, with an outlay of $400,000, there is a probability that the coming year will be an exceptionally bright one.

Five years ago the printers signed a contract as to wages as follows: Hand compositors (minimum), per week, $11; machine hands, $16. The Union (No. 130, International Typographical Union) has notified the employers that commencing January 1, 1911, the minimum scale shall be: Hand men, $15; machine men, day work, $18; night work, $20. The employers have offered as follows: January 1, 1911, $13 per week, till June 30; then $13.50 per week, till December 31, 1911; then $14.00 per week. The Union has refused this offer, and state their willingness to accept: January 1, 1911, $14 per week, till June 30, then $14.50, till December 31; then $15. This the employers are now considering.

CONDITION OF LOCAL INDUSTRIES.

Fishing was quiet.
Lumbering and *mining* were dull.
Manufacturing was about normal.

CONDITION OF PARTICULAR TRADES.

Carpenters were quiet. Bricklayers and masons were dull. Painters were quiet. Plumbers and electrical workers were fair. Longshoremen were active. Stone cutters and buildiers' labourers were dull. Printers, pressmen and bookbinders were busy. Tailors (custom) were quiet; factory hands were normal. Barbers were active. Delivery employés, hotel, restaurant and theatre hands were active. Railway men were about up to average. Unskilled labour was dull.

DISTRICT NOTES.

Shelburne.—A fishing schooner, 108 feet long and 24 feet beam, registering 114 tons, for Hallett Brothers, Burin, Newfoundland, was launched on December 21. Two other schooners, of eighty-five tons each, for the Newfoundland fishing trade, are under construction.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The year 1910 closed with trade and labour conditions very favourable. The past twelve months have been months of expansion along industrial lines. Labour is now, and has been throughout the year, well employed. The total exports of the town, in manufactured products totaled nearly six million dollars. Estimating the population at 9,000, this total is alone sufficient to prove that the year was a busy one. The Amherst boot and shoe factory has its new extension nearly completed, and the machinery is being installed. Early in January work will be begun, and a number of additional hands will be required. The Malleable Iron Company has also its extension nearly completed, and when this is ready for operation it will give employment to 150 additional hands. The freight receipts for the year show an increase of nearly $100,000, and the custom receipts also show a decided advance. In Springhill the strike still continues without sign of a settlement in sight. During the month a branch of the Railway Carmen's Union was organized in town.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Employment has been dull along agricultural lines. The farmers, however, had a good season. Potatoes and fruit fell short this season, but other crops were above the average.

Fishing.—The smelt catch is reported to be good, and large shipments are being made to the American market.

Lumbering.—The absence of snow has so far retarded lumber operations, but the cut this winter will be well up to the average. There is some demand for lumbermen.

Manufacturing.—The different workshops and factories were all busy with the exception of the Robb Engineering Company, which is only working part of the time in some of the departments.

Mining.—Mining operations continued about the same. The Joggins Colliery shows an increasing output. At Springhill Mines the strike still continues, but the mine is being operated and more coal is being constantly raised. There are probably over 1,200 men and boys in Springhill on strike.

CONDITION OF PARTICULAR TRADES.

In the building trades work has been quiet, but as long as weather permitted all trades were well emlpoyed. Iron moulders have been well employed during the month. Iron workers and coremakers have had steady employment. Machinists have been well employed, and electrical men have been busy. Boiler makers were also well employed, and horseshoers were busy. Woodworkers have had steady work throughout the month. Upholsterers report work dull. Car builders have been working steadily dur-

ing the month. Printers and pressmen have had steady work. Tailors were busy, garment makers very actve and boot and shoe workers very busy. Bakers and confectioners both reported steady work. Butchers and meat cutters were well employed. Leather workers were rather dull. Trunk and bag makers were busy. Clerks and stenographers were very busy. Laundry workers have had steady employment. Unskilled labour has been well employed, considering the season.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month of December was similar to that of December, 1909, with the supply in excess of the demand, a natural circumstance at this season of the year. Outdoor building operations were completed for the season, including the work at the Elmira Branch railway and other smaller contracts. The closing down of summer navigation towards the close of the month closed up the avenues of employment for a number of seafaring men, but the opening of the winter service when the two steamers were placed on the Charlottetown-Pictou route gave a large proportion of the longshoremen and freight handlers a considerable amount of work. The usual Christmas trade was in evidence, and good crops this year, combined with high prices, tended to prosperous condition of the farmers. Both wholesale and retail men state that business was never better and that collections were easy.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This month's operations under this head were confined mainly to shipping produce, for the first three weeks, and routine work.

Fishing.—With the formation of ice on the rivers and bays, smelt and eel fishing, which is an important industry here in winter, was started. The work was interfered with by soft weather, which weakened the ice for a time.

Manufacturing.—The few factories on the Island were carried on under normal conditions, supply and demand being well balanced.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers were active. Painters, decorators and paperhangers had a dull month. Plumbers, gas and steam fitters, and stone cutters were active. Builders' labourers had a dull month. Iron moulders, workers and helpers, machinists and engineers, linemen and sheet metal workers were active. Woodworkers, upholsterers, carriage and wagon makers and car builders were active. Printers and bookbinders were active. Journeymen tailors, garment workers and boot and shoe workers were active. Bakers and confectioners, butchers and meat cutters were busy. Tobacco workers were active. Tanners and curriers and saddlers were active. Barbers, clerks and stenographers were active. Delivery employés were busy. Laundry workers were active. Railway conductors, locomotive engineers, railway telegraphers, trainmen, switchmen, freight handlers, steamboat men and steamboat firemen, longshoremen, teamsters and expressmen were active. The supply of unskilled labour was in excess of the demand.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour, trade and commerce during December were active and fully up to the standard of the corresponding month of 1909. All factories, machine shops and other industrial concerns were in active operation and in some instances were running overtime. Building operations slackened, but there are, at present

in course of construction at the Intercolonial Railway shops a dry house, 300 feet by 40 feet, of wood and also a 50-foot brick addition to the gas-house. The post office is also being enlarged by the addition of an ell, 40 feet square, of brick. Favoured by the open weather, considerable work upon private buildings was carried on. Woodworking factories were also very busy filling orders and replenishing stock. Navigation between Point du Chene and Summerside closed December 16th, being somewhat earlier than last season. Wholesale trade has been healthy and expansive, while retail trade has been particularly good, many merchants reporting their Christmas business considerably in excess of last year's, the pleasant weather and good roads during the week preceding Christmas tending to bring out the country trade. No change in hours of labour or rates of wages were noticed, and there was no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy caring for stock, getting out fuel and marketing produce for which there was a good demand at high prices. Fresh eggs sold at 35 cents per dozen; turkeys at 25 cents per pound; geese, $1.50 to $2.00 a piece; and chickens, from 75 cents to $1.20 a pair. The demand for hay so far is light and but little is moving.

Fishing.—Smelt fishing began December 1, but so far catches have been light along the north shore.

Mining.—The Maritime Oilfields Company intends to continue the work of developing its gas and oil areas at Coverdale all winter. Well No. 18 has been sunk, and at a depth of 1,691 feet oil sands struck. The work of installing the natural gas has commenced, three miles of right-of-way being cut. Specifications for pipe line have been issued, and tenders asked for.

Railway construction and employment.—The estimates of expenditure for construction upon the National Transcontinental Railway in New Brunswick, for the month of November, totaled, $305,156. The total amount spent upon the various contracts in this province to date is $11,168,966.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet, carpenters and joiners in fair demand, painters and plumbers fairly busy, stonecutters and builders' labourers quiet. Iron moulders, workers and helpers, machinists, linemen, stove mounters, blacksmiths and boilermakers were active and in fair demand. Woodworkers, upholsterers and carmen were active. Carriage and wagon makers were quiet. Printers and pressmen were active. Journeymen tailors, garment workers, bakers and butchers were active. Leather workers and saddlers were busy. Barbers were active; clerks and stenographers busy; hotel and laundry workers steady. Railway crews were in good demand owing to heavy passenger traffic, and much special work. Freight handlers, carters, teamsters and expressmen were busy. Few unemployed are found among unskilled labourers; when winter conditions became steady the demand will brighten, but at present it is limited.

DISTRICT NOTES.

Campbellton.—The cash contributions received by the Fire Relief Committee amounts to $107,572. The amount so far expended is $57,000. Besides the work done by the Intercolonial Railway reported in November, about 400 dwellings have been erected, several of these of brick. The electric light and water systems have also been restored. About 3,000 persons are now living in the town.

Sackville.—The breakwater at Pink Rock has been completed, also a 150-foot addition to the wharf. Several hundred tons of gypsum are now ready for shipment.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active during December, but in some trades

remained dull. Ship labourers were busy but the building trades were inactive. Messrs. Manchester-Robertson- Allison, Limited, have been making some important changes in their premises, which are now nearly completed. A new two-storey brick building 40 by 80 feet in dimension, with a 15-foot square jog, has been erected in the rear of the King street building. Other improvements are in contemplation. Messrs. T. S. Simms and Company, Limited, have purchased the properties on either side of their present factory which will give them a frontage on Union street of nearly 300 feet. The employés of this firm have been compelled to work overtime to supply the demand for brooms and brushes. The Wilson Box Manufacturing Company is erecting a plant at Lancaster, near Fairville, and the Canada Woodenware Company one at South Bay. The Intercolonial Railway commenced the construction of a trestle siding across the Marsh Creek, on December 21, which will be about 150 feet in length. Bank clearings for the four weeks ending December 22 were $6,208,846, and for the corresponding period last year, $6,253,005 being $44,159 less in 1910 than in 1909, and $103,655 less than during the four weeks ending November 24, of the current year. Up to December 24, there had been filed at the Custom's House cargoes for fifteen steamships, one of which sailed for Australia. These vessels took away Canadian goods valued at $1,496,930, and foreign goods valued at $598,643, making a total valuation of $2,095,513. The wheat shipments were 908,049 bushels. Wholesale and retail dealers report business as being more brisk during Christmas week than ever before at this season. The express companies and railroads report that traffic, both passenger and parcels, was unprecedentedly heavy, extra cars having been used to accommodate the heavy traffic. The country market was well supplied with vegetables and Christmas delicacies. Turkeys retailed at from 26 to 30 cents per pound; chickens, 75 cents to $1.75 per pair; geese, $1.75 to $2.00, each; ducks, $1.50 to $2.50, some of the very best selling as high at $3.25.

CONDITION OF LOCAL INDUSTRIES.

Mining.—The Atlantic Coal Company, Limited, met for organization and election of officers on December 21, at St. John. This Company has been incorporated under Dominion letters patent, with an authorized capital of $290,000, half of which is in seven per cent. preference stock, and half in common stock. The head office is at Maccan, Nova Scotia. The Jubilee Mines, formerly owned by the Empire Coal & Tramway Company, and lately by J. P. Sherry, have been taken over and will be operated by the Company.

The mines are situated on the Maritime Coal, Railway & Power Company's branch line, three and a half miles west of Maccan. The property includes 640 acres, on which there are seven workable mines and a number of undeveloped seams. The plant is complete and has a present capacity of 100 tons a day. It is the intention to increase the production to 250 tons. During the summer the production can be shipped from the Joggins pier on the Bay of Fundy. A conservative estimate places the amount of coal available at fifteen million tons.

It is understood that the Company has secured a contract with the Intercolonial Railway, which will ensure an immediate market for a large amount of its output. Recent tests have shown the coal to be of excellent quality, and the directors are very confident of the success of the Company.

Lumbering.—The Alexander Gibson Railway and Manufacturing Company, Limited, will carry on its lumber operations this winter and will cut about 21,000,000 feet. This lumber will be the property of the Company, and will not be sold with the property at the equity sale in February.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull. Carpenters and joiners were active. Painters and decorators were dull. Plumbers and gas and steam fitters were active. Stone cutters and builders' labourers were dull. Iron moulders, iron

workers and helpers, machinists and engineers and steam engineers were active. Electrical workers and linemen were busy. Blacksmiths and boilermakers were active, sheet metal workers were busy. Wood workers were active; shingle weavers very dull. Printers were quiet; pressmen and book binders active. Journeymen tailors were active. Bakers and confectioners were busy. Cigar makers active. Broom and brush makers were very busy. Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen, and freight handlers were busy. Steamboat men and firemen were dull. Ship labourers, street railway employés, teamsters and expressmen were busy. Unskilled labour was dull.

DISTRICT NOTES.

Fredericton.—The Hartt Boot and Shoe Company shipped a carload of its goods by Canadian Pacific Railway direct to Calgary, December 22, and recently a carload was shipped to Vancouver. Next month a carload will be sent to Winnipeg.

St. Stephen.—Ganong Brothers will distribute among their employés a special annual bonus for faithful services of $3,000.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the month has been very quiet. There was hardly any sleighing until the twentieth of the month and the roads were very rough for wheeled vehicles. After that date a slight snowfall improved matters and merchants became busy with the Christmas trade. As most of the men in the woods come out at this season money circulates more plentifully. A large number were engaged fishing, and catches of bass and smelts have so far been very good. Although these catches have been somewhat lighter and less general than usual the price for smelts, six cents per pound on the ice, is higher than usual. Butchers were very busy. Prices of all meats were high, good roast beef selling at from 12 to 18 cents per pound, being slightly lower than formerly. Turkeys brought 30 cents per pound and fowl of all kinds were high. Butter sold at from 24 to 27 cents per pound; eggs from 30 to 35 cents per dozen and potatoes at $2.00 per barrel.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were quiet, a large number of farmers having left for the woods for the hauling of logs.

Fishing.—This industry was brisk, hundreds of men being engaged at present. Catches were only fairly good.

Lumbering.—The present season has been one of the best for lumbering ever recorded. For a long time clear weather has been the rule with just enough snow for good work. If the balance of the season is as good as the first part there ought to be a large cut. Seven degrees below zero was the coldest weather yet.

CONDITION OF PARTICULAR TRADES.

The building trades generally have been quiet, bricklayers and masons being idle. Carpenters and joiners have been fairly well employed, but have nearly finished their contracts. Blacksmiths and horseshoers were the only mechanics very busy at the present time, being rushed on sharp-shoeing.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and *P. J. Jobin, correspondents,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been a very quiet one, without much snow and with changeable weather. The building trades were dull, as is usual at this season. The period immediately preceding the Christmas holidays is very seldom a busy one for any form of labour other than the shops and stores. Trade with these has been very

brisk, purchases having been very heavy this year. The Free Employment Bureau is expected to open about January 3, 1911, the offices being located and furnished, and there remaining but the appointment and installation of the officers in charge. The outlook is that there will be a better demand for labour in January, 1911, owing to the number of works to be then started, the Transcontinental terminus being one of them. The steamer *Bornu*, the last outward bound ocean steamer for the season, left this port on December 2, for the West Indies. The Royal Mail steamer *Aranmore*, from the North Shore, arrrived in port on December 6. She is the last inward bound vessel of the season.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy killing and marketing live stock and poultry. Prices were high. By the carcass, dressed hogs sold at from 9 to 10 cents per lb.; mutton, 9 to 10 cents; beef, by the quarter, 7 to 8 cents per lb.; chickens, 15 cents per lb., and turkeys from 25 to 27 cents per lb.

Lumbering.—Complaints were made in some sections that there was scarcely enough snow to make good logging roads, but, generally, conditions were reported most favourable. It is anticipated that the winter's cut will not be as large as last winter's, owing to the new law prohibiting the export of pulp wood cut on Crown lands. This, however, will be counterbalanced by the increase in the cut of the Canadian pulp mills.

CONDITION OF PARTICULAR TRADES.

Carpenters and joiners were active, with plumbers, gas and steam fitters busy. The other building trades were dull. Iron moulders, iron workers, coremakers, machinists, engineers and electrical workers were active. Other metal workers were dull. From active to busy conditions were reported in the printing, clothing and leather trades. Cigar makers and tobacco workers were active, bakers and confectioners busy, but butchers and ice cutters were dull. Delivery employés were active, but the other miscellaneous branches were quiet. Railway employés were busy. Other transport trades were dull, as was also unskilled labour.

DISTRICT NOTES.

Murray Bay.—A new pulp mill is being erected by the Eastern Canadian Power & Pulp Company. About 150 men will be employed therein.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During December, the condition of the labour market was satisfactory, there being but little unemployment. Lumber mills were closed, as is usual at this time of the year, all their stock of logs being sawn, but most of the men employed in the mills were sent to the bush for the cutting season. There was no exceptional activity in any particular trade, but employment in general was fairly good. Banks reported a good month. Retail trade was more active than wholesale, being always so in December. The cotton factory and the whiteware shops were short of hands. The Corporation of this City is rebuilding its city hall, rushing the work through. The North Shore Power Company has completed an extensive building on St. Maurice street to be used as a transformer house and for other purposes.

Rates of wages remained the same as in November, and good feelings prevailed between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the holiday season, agriculturists had a busy month. Farm and dairy produce sold well, and at good prices.

Fishing.—Fishing was quiet, even with tommy-cod, which has not made its

appearance yet this season, in this district.

Lumbering.—There will be about the same number of logs cut this season as last year.

Manufacturing.—All factories were running full time.

Railway construction was quiet this month, but regular employment was good.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet. Carpenters and joiners, lathers and plasterers were fairly well employed. Gas and steam fitters and builders' labourers were very active. Iron moulders, iron workers and helpers, coremakers, machinists and engineers, and all others employed in the metal trades have been very busy. Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers and pattern makers were well employed. Printers, pressmen and bookbinders had plenty of work. Journeymen tailors, garment workers, glove makers and boot and shoe workers were very busy, and had plenty of orders ahead for the holidays. Bakers and confectioners, butchers and meat cutters, ice cutters and drivers, cigar makers and tobacco workers were very active. Tanners and curriers were fairly active. Leather workers and saddlers were very busy. Barbers were active. Clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés and laundry workers had plenty to do. Railway transportation was active. Unskilled labour was fairly well employed.

SHERBROOKE, QUE., AND DISTRICT.

Mr. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was in good demand during December, the only exception being bricklayers and masons, who had to suspend operations. All other industries were running full time, and there are orders ahead, so that there will be no scarcity of employment in the machine shops this winter. Work has been suspended on the extension of the Sherbrooke Power & Railway Company's system, but will be resumed again in the spring. The large dam and power plant for the Sherbrooke Power & Railway Company is finished, and the new power will be in operation at the beginning of January. As a result, the street car system has been greatly improved, but will be more so when the whole line is finished. The City Council has let the contract for a power plant on the Magog river, to a Peterborough firm, while the concrete work will not be commenced until spring, a number of men will be employed throughout the winter in preparation for this. The People's Telephone Company have a gang of men employed installing a private line from Sherbrooke to Rock Island, a distance of some 40 miles. Work is about finished on J. S. Mitchell & Company's new business block, on Wellington street. It was the largest in Sherbrooke.

The City Council will give a grant of $2,000 a year towards the movement for a greater Sherbrooke. The Board of Trade has pledged $3,500, which gives a fund of $5,500 yearly which will be spent in advertising Sherbrooke as an industrial centre. A trade commissioner has also been appointed, who will devote his time in spreading the merits of Sherbrooke.

At the fiftieth annual meeting of the Eastern Townships Bank a very satisfactory report was submitted. The dividend has been increased from eight to nine per cent.

The retailers report a very good Christmas trade.

The annual report of the fire department shows that the total fire losses adjusted by the underwriters amounted to $11,976.96, while the value of the property threatened and insured amounted, in the aggregate, to $380,000.

There were 321 deaths in the city, or a rate at a little over thirteen per thousand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — Outside agricultural work is at a standstill, and many of the

smaller farmers are engaged hauling cord and pulp wood to the city or railway sidings.

Lumbering.—Lumbering operations are still somewhat quiet, as there is very little pulp wood moving.

Manufacturing.—All branches of manufacture are running full time, and in some cases help is being taken on.

Mining.—Mining operations in the asbestos district are quiet, and many of the pits have closed down. At Eustis, however, the copper mines are being run to the full capacity of help. Men are in demand at this place.

Railway construction has been suspended for the winter.

CONDITION OF PARTICULAR TRADES.

The building trades, with the exception of plumbers and gas fitters are dull. The two trades mentioned are busy. Iron moulders, machinists, electrical workers, blacksmiths, horseshoers and jewellery workers are busy. The woodworking trades are busy. Printers and bookbinders were busy. Journeymen tailors are active, garment workers busy, and glove makers active. Bakers and confectioners are busy, butchers active, ice cutters busy, and cigar makers quiet. Barbers, clerks, stenographers, delivery employés, furriers, hotel, and laundry workers are busy. Railway employés were quiet, cab drivers and expressmen busy. Unskilled labour was in good demand for the season.

DISTRICT NOTES.

Brompton.—At a meet ng of the directors of the Pearl Shirt Waist Manufacturing Company the reports submitted showed that the business was steadily increasing.

Richmond.—The sixteenth annual meeting of the Richmond and Drummond Counties Cheese and Butter Syndicate was held in the Court House, Richmond, Mr. E. J. Dunbar, president, presiding. The inspector reported a considerable falling off in the manufacture of cheese. Butter, however, had increased by some 80,000 pounds over 1909, and the cash received for those two articles exceeded all previous years, but one, in his experience,

Thetford Mines.—The Johnston Mine closed down for the usual Christmas holidays. On account of the press of business, the Beaver Mine did not close till the twenty-fourth, and will reopen on the ninth, occasion being taken of the vacation to do some necessary repairs to the mill.

Farnham.—Another storey is being added to the J. M. Fortier Tobacco Factory in order to handle the large amount of tobacco which has been purchased for delivery about January 1.

Beebe.—Sixteen new granite cutters commenced work.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly active during December, although work in the building trades somewhat slackened for seasonable causes. A large number of men, such as joiners, plumbers, masons and painters, were thrown out of work and will remain so until early February, when they will start repairs on the 200 boats of all kinds now in winter quarters here. In the shipbuilding yards, hauling boats ashore, to get them ready for repairs, has given employment to a number of men at $1.50 per day. In the machine shops there has been plenty of work and part of the staffs has been working overtime. The number of men in the Government yards has not decreased. Business in general was good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were obtaining high prices for their products, as there was a keen demand. Some market quotations for December are as follows:—

Fresh eggs, 40–45 cents per dozen.
Butter, 28–30 cents, per pound.
Beef, by the quarter, 9–10 cents, per pound.
Beef, by the pound, 1 – 15 cents.
Pork, by the pound, 11–12 cents.

Poultry, per pair, $1.50–$1.60.
Turkeys, 21–25 cents, per pound.
Geese, each, 90– 95cents.
Ham, 18– 20 cents, per pound.
Bacon, 20– 22 cents, per pound.
Potatoes, 45 cents, per bushel.
Maple sugar, 12 cents, per pound.
Turnips, 40 cents, per bushel.
Onions, 90 cents, per bushel.
Beans, 10 cents, per pound.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of outside labour during December was very active, but the local supply was more than enough to meet the demand. The month was a very active one for industrial establishments. Boot and shoe factories worked full time. The iron industry had a good month. Much activity prevailed in the leather industry. Sash and door factories were busy enough to employ full staffs. Organ builders were very active. A large number of men were employed on the cathedral, finishing the painting and woodwork. Business, wholesale and retail, was very good. Banks reported easy collections.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural conditions were very prosperous. Fruit and vegetables found a ready market. The demand for men to press hay was satisfactory, but there was no lack of supply.

CONDITION OF PARTICULAR TRADES.

Carpenters, painters and plumbers were fairly active. Bricklayers were very active, but masons were quiet. Stonecutters and builders' labourers had a fair month. The metal and engineering trade were very active. Woodworkers were very busy. The printing trades had a fair month. Garment workers had a busy month. Bakers, confectioners and butchers had a very good month, as well as tanners and curriers. Barbers were quiet. Clerks, stenographers and delivery employés had a satisfactory month. Railway employés were well employed, but cab drivers, hackmen annd carters were quiet. Unskilled labour was fairly well employed.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour continued good, although the severe temperature caused the closing up of several yards. Factories, however, absorbed all these men and in some cases asked for more. The prospect is for steady work throughout winter in manufacturing establishments. None of them will stop work for weeks to take stock, and several have decided not to stop at all except the day after Christmas and New Year's. Wholesale and retail merchants reported trade very good, the dry goods trade being extra good this year. Bank clearings reached a high figure and bank deposits increased considerably over last year. Seven families in all were assisted, as against thirty-seven last year and fifty-seven in 1908. Work is being rushed on the superstructure of the new railroad bridge, a large number of men being employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are very prosperous this year. Farm products find a ready market at high prices. Beef, by the quarter, sold for $8 to $9 per hundred pounds, pork $9 to $10. Turkeys were from $3 to $4.50 each; geese from $1.25 to $1.75, chickens, $1.50 a pair; eggs from 40 to 45 cents a dozen, and butter from 28 to 30 cents a pound.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were rather quiet. Carpenters and joiners, lathers and plasterers reported a good month. Painters and decorators, plumbers, steam fitters, stone cutters and builders'

labourers were active. Iron moulders, iron workers and helpers, coremakers, machinists and engineers reported a good month. Electrical workers, linemen, metal polishers, brass workers, blacksmiths, boilermakers, shipwrights, ship carpenters and calkers were rather quiet. Tinsmiths, tool sharpeners and jewellers reported a fair month. Woodworkers, upholsterers, varnishers and polishers were busy. Wood carvers, carriage and wagon makers, pattern makers and gilders were busy. The printing, clothing, food preparation, tobacco and miscellaneous trades were active, as well as railway employés. Cab drivers, hackmen, carters, draymen, teamsters and expressmen were well employed. Unskilled labour was active.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

December, 1910, although not quite as active as November, was more active than the corresponding month of last year. Almost all workmen were fairly busy, with the exception of unskilled labourers who form a large portion of the unemployed, on account of city and railroad work being stopped for the winter. All branches of business have been very busy during the month, a majority of the stores having increased their staffs for the holiday season. There is now no labour dispute, the striking plumbers and steamfitters having returned to work. This will increase activity in the building trades.

CONDITIÓN OF PARTICULAR TRADES.

Bricklayers were active, masons quiet, lathers and plasterers and painters and decorators active. Steam fitters, stone cutters and builders' labourers were fairly active. The metal trades were all fairly active with the exception of linemen. Woodworkers, upholsterers, varnishers, polishers, carriage and wagon makers were active. The printing trades were busy. Journeymen tailors were in demand, the other clothing trades being active. The food and tobacco preparation and the leather trades were busy. Barbers were in demand, as well as clerks, stenographers and delivery employés. Broom makers, hotel, restaurant and theatre employés and laundry workers were active. The transportation trades were well employed.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audette, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The value of new buildings contracted for in Montreal during November, 1910, was $425,887 more than during the same month of last year. The inspector of buildings issued during the year, up to November 30, 3,412 permits, giving the city a revenue of $12,138.50. The year was the most active in the history of Montreal as far as building is concerned. The following table shows the number of permits issued each month in the year up to November 30, with their value, as compared with the corresponding months of 1909:

	Permits.		Value.	
Month:	1909	1910	1909	1910
January	50	73	$ 120,120	$ 159,510
February	120	188	245,330	264,030
March	188	260	376,275	670,704
April	342	490	1,111,891	1,755,402
May	327	453	1,269,504	1,709,200
June	219	350	1,771,790	1,585,254
July	257	245	712,126	3,384,360
August	205	412	990,275	1,530,339
September	227	506	716,840	993,386
October	216	285	589,075	1,911,240
November	159	295	479,580	905,427
Total	2,310	3,478	$7,680,766	$15,239,852

The following table shows the number of permits issued and their value, each year since 1899:—

Year.	Permits.	Value.
1899	357	$2,370,080
1900	331	3,089,403
1901	443	2,368,372
1902	826	3,089,734
1903	1,010	4,094,596
1904	1,335	3,654,164
1905	1,694	5,550,698
1906	2,013	8,639,388
1907	1,990	8,406,299
1908	1,808	5,062,226
1909	2,426	7,785,621
1910	3,478	15,239,852

CONDITION OF PARTICULAR TRADES.

The building, metal, printing and clothing trades were active. The food and tobacco preparation trades were good, with the exception of ice cutters and drivers, who were quiet. The leather and miscellaneous trades were active, as well as railroad employés. Steamboat men, steamboat firemen, ship labourers and longshoremen were quiet. Street railway employés were active. Cabdrivers, hackmen, carters, draymen, teamsters and expressmen had a good month. Unskilled labour was fairly well employed.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

December has been a busy month owing to the extra demand in connection with holiday traffic. The weather has been cold with light snow falls. In consequence of the latter, the large mill owners have kept their men at work in the mills instead of sending them to the bush. Compared with November, industrial activity has been well maintained though building has shown a falling off, except among plumbers who were busy on repairs. The holiday trade was heavy, comparing favourably with last year, though the roads during the first half of December were in poor condition for hauling. General labour was somewhat quiet but found some employment at snow-shovelling.

CONDITION OF LOCAL INDUSTRIES.

Mining.—The mica industry has been fairly active but less so than was expected.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A marked decline in the demand for unskilled labour characterized the month of December. The lumber camps were filled a little earlier than usual and hiring agents were instructed, the first week of the month, to engage only expert bushmen. Teams and teamsters, however, were needed at several points. The wages advanced for these to the record figure of $2.75 per day. Mr. J. R. Booth has 3,000 men in the woods, and logging operations in general are as extensive as last year. The absence of snow storms was felt by the unemployed who are accustomed to earn something clearing sidewalks and the electric railway tracks during December. There was not enough snow in the first half of the month for business conditions. This also tended to quietness in respect of employment. Still a very limited number of men were out of work and by the end of the month the outlook had improved. The reports of charitable organizations which investigated needs of families around Christmas found the number of people in want no larger than last year. Recipients of aid were nearly all persons unable to work.

Most of the city merchants reported trade better than ever before during the Christmas period. Ottawa bank clearings for November were $17,300,000 as against $16,000,000 the previous November. The first three weeks of December showed a total of $11,183,000, a gain of $400,000 over the corresponding period of 1909. The customs receipts of the port of Ottawa confirm the estimates of buoyant trade. November collections were $7,000 greater than a year ago. The city tax collector at the end of 1910 had received $50,000 more than in 1909. Money was plentiful enough to permit ratepayers to take advantage of the discounts for prompt payment of taxes.

The City Council increased salaries in three branches of the civic service. Weighmasters and market toll collectors to the number of thirteen were advanced $50 per year, making their wages range from $600 to $700. The market inspector whose salary was $1,200 a year was placed on a salary schedule providing increases of $100 a year until $1,400 is reached. At the public library four clerks paid from $250 to $350 per year

were increased $50 per year. One was raised from $675 to $750 and the librarian from $1,500 to $1,800. At the isolation hospital two nurses were increased from $30 to $35 per month; superintendent from $50 to $55 and four miscellaneous employés were advanced $3 per month. All these cases were dealt with individually by the council, as it had been found difficult to frame a schedule covering all the employés. The increases date from October 1st.

The public school board altered salary schedules governing female teachers which will add a total of $4,350 to next year's account. The minimum of $450 for second-class teachers was raised to $500 and the maximum from $800 to $900. The minimum of $500 for first-class teachers was raised to $600 and the maximum from $850 to $1,000. The Carleton county inspector reports difficulty in obtaining teachers for rural schools. In the last year male teachers received an average increase of $31 per year and females $12, but the inspector says this is not sufficient. Sewing will be taught to 1,500 girls in the Ottawa public schools next year during one hour each week.

The Ottawa publicity commissioner reports that the city obtained twelve new industries in the last year. The total is now 168, employing 14,000 hands. The commissioner estimates the annual output of these factories at $37,700,000.

The strike of plumbers which occurred on the new Grand Trunk hotel on September 17, terminated during the month by the return of the men to work at the former wages wherever their places had not been filled.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—A slight drop in the quotations for beef and pork affected farmers' market receipts. Many of them are feeding cattle expecting better prices in the new year. Turkey offerings were heavy on Christmas and prices ranged from 20 to 28 cents a pound. Geese sold at 15 cents. Butter, honey and meat are more plentiful than a year ago, but potatoes are scarcer.

Lumbering.—Lumbering was delayed in the woods for want of snow. Loading will be brisk during January and more than the usual number of teams will be employed to catch up with the haul. The demand for high grade lumber is brisk in the Ottawa valley.

Manufacturing.—Quietness prevails in the local mica factories. Clothing factories are busy on next autum's orders. The mild weather hurt early winter trade.

CONDITION OF PARTICULAR TRADES.

Printers and publishers were busy. Bank note production is swelled by many outside orders. Except in the overcoat branch garment workers were actively employed. Butchers were busy. The leather industry was quiet. Some stores have been laying off salesmen after the Christmas rush, but the majority of houses will retain all the help as the quiet period in business is expected to be less marked than usual in the mid-winter season. Furriers were busy. Hotel employés and theatre hands were busy and more than ever before were engaged this winter in Ottawa. Railway traffic except for Christmas visiting was quiet. Usual winter staffs were employed in all branches of transport. Building was very active for the winter. There was a plentiful supply of both skilled and unskilled labour, however, as the number of small houses under construction is smaller than last year. The metal trades were busy. Electric linemen were actively employed. The woodworking trades were less rushed than last month.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

December was an active month, industrially, in Kingston. Labour generally was well employed. The demand for all kinds of labour was above the average for this season of the year. During the month representatives of the

Wilbur Iron Mine Company held a conference with the City Council. At the meeting a proposition to erect a concentrating plant in Kingston at an approximate cost of $160,000 was presented. At the final meeting of the board of works a statement was presented showing that $24,125 had been expended in local improvements during 1910. There were 1,690 building permits issued during the year. The value of building operations here during the year will probably total a quarter of a million dollars. The exports from Kingston to the United States during October and November were: $9,758.65, more than they were during the same period in 1909. The local import duties during November amounted to $24,776.90, an increase of $3,200 over the same month last year. For the season 1910, the amount of grain that arrived at this port was 14,959,418 bushels. One hundred eighty-eight cargoes came through the Welland Canal. During the year 9,650 tons of coal, and 445 tons of flour arrived here. The quantity of grain brought here this year constitutes a record. The fire losses at Kingston this year only totaled $11,000.

During the month a deputation representing Kingston and district waited on the Honourable the Minister of Railways and Canals about the closing of the Rideau Canal. A request was also presented for improvements to the Canal. It was intimated by the Minister that actual navigation needs would have to take precedence.

The annual reports of banks represented locally, are showing evidences of marked prosperity. Wholesale houses report an active month. Retail houses of all kinds had the usual Christmas volume of business, and cash receipts exceeded those of last year. There were no changes in the hours of labour, rates of wages, strikes, or lockouts reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture, fishing, mining and railway construction were quiet during the month; while *lumbering, manufacturing* and other industries were active.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades, the metal, engineering and shipbuilding trades, as well as the wood-working branches, continued active considering the season of the year. Printers, clothers, tanners, curriers, barbers, broom makers, clerks, delivery employés, furriers, hotel, restaurant, theatre and laundry employés reported an active month. All branches of the transportation business reported an active month. Towards the end of the month heavy snow storms caused blockades, and the slow moving of freight in this district. Unskilled labour reported an active month.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour situation in this district has shown very little change from last month. Outdoor workers, however, had a quiet month. Manufacturing lines showed the same activity as last month. The Bonnerworth Company, Limited, may erect a factory here; it is asking the city to assist them by a loan of $12,000 without interest and exemption from municipal taxes for a period of ten years. They will manufacture worsted yarn. C. E. Hittman is asking the city the right to lay mains on the streets to convey natural gas. These two by-laws will be voted on at the time of the municipal elections. Messrs. Rose and Hickey have been awarded the contract for the extentions and improvements to the Peterborough Post Office; the amount of the tender is a little in excess of $8,000.

An order was made by Honourable Justice Sutherland at Osgood Hall for the winding up of the Canadian Cordage Manufacturing Company, Limited, on the ground that the Company was insolvent. The nominal assets of the Company over and above all liabilities are over $200,000. The committee rep-

resenting the citizens sent a cable order to Taylor and Company, Loughborough, England, for a chime of eleven bells; they will cost $5,600, and will be placed in St. John's Anglican Church. The Charlotte Street Methodist Church is preparing plans for a new church. They have $40,000 subscribed at present; work will be started in the early spring. Over five hundred immigrants have been placed from the local immigration office during this present year. Since the office was opened here four years ago fifteen hundred have been supplied with places. Most of them have been sent to farmers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There was a good demand for farm produce and good prices prevailed.

Lumbering.—Lumbering is not so extensive as for several years past. Fifty men employed by the Gull River Lumber Company were thrown out of work by the breaking up of the Hawk Lake Camps, enough timber having been already cut for the season.

Manufacturing.—The various industries are running full time.

Railway construction. — Conditions were quiet, but preparations are being made for a larger amount of work in the coming spring.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet. Plumbers were active. Iron moulders, iron workers and helpers, coremakers, machinists and engineers were active. Electrical workers and linemen were also active. Brass workers were rather quiet. Wood workers were active. Printers had a good month. Journeymen tailors and garment workers were active. Bakers and confectioners had a very busy month. Butchers and meat cutters also had a good month. Leather workers were busy. Railway and street railway workers were active. Unskilled labour was fairly well employed.

DISTRICT NOTES.

Lakefield.—The Electric Light Company has started operations on the new power house.

Young's Point.—Mr. John Miller is erecting a sawmill on the site formerly occupied by Mr. E. Young's mill.

Lindsay. — Horn Brothers, woollen mills, are erecting an additional storey to their blanket department. Active conditions prevail in every department.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment was more general during December than is usually the case at this season. The building trades continued active, the weather during most of the month being favourable. The influx of unemployed from outside places has been small as compared with previous years. The holiday trade set in earlier than usual and the volume of business showed a considerable increase, giving temporary employment to many as extra help. The discontinuance of civic work and the general slackening of industrial activity, which always occurs at this season has thrown a number of men out of work, but general conditions are decidedly more favourable than in recent winters. Snow storms towards the end of the month furnished work at snow-clearing for a number. The report of Park Superintendent James Wilson shows a total expenditure for the year on parks and exhibitions of $286,954, of which $145,764 was for maintenance. The City Engineer's annual report shows that upwards of $4,000,000 has been expended this year on new streets and sidewalks, repairs and incidental work in connection with his department. In connection with the approaching civic elections an unusually large number of money by-laws will be submitted to the ratepayers as follows: $1,157,293 for civic street railway lines in the northern and north eastern districts; $1,040,395

for the Bloor street viaduct; $824,400, for overflow sewers; $205,128 for the improvement of Ashbridge's Bay; $102,-564 for the improvement of highways leading into the city, and $51,282 for the Western Hospital. About seventeen miles of concrete poles for the civic lighting plant have been put in place by the Civic Electrical Department. A permit has been issued for an addition to the public school on Avenue Road to cost, $40,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are generally in a prosperous condition, having had a good year. They were principally occupied with the care of stock and attending market. There was a heavy demand for produce for the Christmas season and good prices were obtained. Until quite late in the season applications were made for additional help and there is every prospect that as soon as spring opens the services of farm labourers will be eagerly sought for.

Manufacturing.—Many lines of industrial activity were quiet especially towards the close of the month, excepting those which cater to the holiday trade, which were busy. Many of the plants closed down about the new year for a week or two for repairs and stock taking.

Railway construction. — Operations have slackened since the setting in of cold weather but were still carried on to some extent. The cut-off of the Canadian Pacific Railway between Mimico and the terminals at West Toronto will be ready for operation in a few days, as the Grand Trunk has almost completed the interlocking plant at Mimico, where the new construction branches off. This will enable the Canadian Pacific Railway to forward through freight *via* North Toronto and relieve pressure at the Union Station yards. The Canadian Pacific Railway Company has purchased about four acres of land adjoining its right-of-way on the corner of Bloor and Dundas streets.

CONDITION OF PARTICULAR TRADES.

A number of outdoor workers including builders' labourers, bricklayers, masons and carpenters, were laid off, but a considerable proportion of these trades found steady work as far as the weather permitted. Indoor workers on buildings were generally well employed on unfinished contracts. Machinists, moulders, blacksmiths, boiler makers, structural steel workers and sheet metal workers found trade considerably quieter than last month. Electrical workers, excepting those engaged on city work, were also slack. Brass workers were quiet. Silversmiths and jewellers were busy. Woodworkers had generally steady employment. Piano workers were active. Printers, book binders and allied trades had a good month. Custom tailors were busy. Garment workers, hat and cap workers, boot and shoe workers and furriers had plenty of work. Harness and leather workers were fairly well employed. All classes engaged in food and tobacco preparation had continuous work. Hotel and restaurant employés, barbers and laundry workers were active, especially during the latter part of the month. Clerks, salesmen, delivery men and all engaged in connection with the retail trade were very busy up till Christmas. Railway and street railway employés, teamsters and expressmen were busy. Unskilled labour was more in demand than is usual at this season, but a large number were out of work.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Unusually cold weather and heavy snowfalls characterized December, and the result was a decided disturbance of industrial conditions. Out-of-door operations in the building trades were stopped, and certain other lines of employment

suffered interruption. Counterbalancing features were the employment of a few snow-shovellers by railways and the extra holiday work for salespeople, delivery employés and trainmen. Both wholesale and retail interests reported a good holiday trade. There was a demand for money for industrial, building and real estate investment. A company was formed, charter applied for and factory-building secured for the manufacture of goods from waste products. Shavings, sawdust, &c., combined with cement, form a substitute for certain lines of wooden-wares. The new free mail delivery system will be organized in January. About $10,000 was raised for the erection of the King Edward Memorial Home for nurses, as an adjunct to the general hospital. Master barbers at the north-end of the city organized for the regulation of open hours for their shops.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural operations will be entirely stopped until March.

Manufacturing.—Manufacturing concerns were generally busy, and employing full staffs.

Railway construction.—Railway employment was generally good. There was a noticeable increase in freight traffic about the middle of the month, and the holiday passenger traffic was heavy.

Other industries.—Unfavourable weather considerably checked the operations of the Ontario Power Company, but a large number of men were steadily employed even under adverse conditions.

CONDITION OF PARTICULAR TRADES.

Masons, bricklayers, carpenters, plasterers, painters and builders' labourers all suffered loss of employment through bad weather. There was considerable work for carpenters and bricklayers if weather conditions should permit the resumption of outdoor operations. Plumbers, gas and steam fitters were fairly active. In metal-working plants employment was steady and good. Electrical workers were also active, but linemen were quieter. Journeymen tailors were active. Employment was good in the shirt, suspender and tie factories. The hat factory employed additional hands and apprentices. Bakers and butchers were active. The shredded wheat biscuit factory was very busy. Barbers were active. Salespeople, office employés and delivery men had a busy month. Hotels and restaurant employés were quiet, laundry workers were active. December was a good month for all classes of railway employés. Cab drivers were quiet, teamsters and expressmen, busy. Unskilled labour found less employment than for nine months previous.

DISTRICT NOTES.

Welland.—Manufacturing concerns were very active. The Dain implement factory was running overtime. The Billings-Spencer plant has been running day and night, and will be enlarged. The Beatty ship-building and machinery works secured heavy orders and increased its staff of workmen. The Page-Hersey Tube Company and the Ontario Iron & Steel Company have pay-rolls aggregating $40,000 per month, while the Beatty plant pays about $15,000 per month.

Ridgeway.—The planing mill is being enlarged.

Port Colborne and *Humberstone.*—The foundry, recently burned, will be re-built. A summary of the season's business at the Government elevator shows that, although the grain trade was at a low condition all summer, the elevator paid expenses, paid for extensive improvements to its equipment and had a balance for capital account. Marine men state that it was instrumental in keeping grain transportation rates via the all-Canadian route very low. Its operations were as follows:

	Bushels.
Total grain handled	3,309,000
Previous season	1,747,550
Transhipped for Montreal	2,000,000
Unloaded for local milling points	1,041,000
Lighterages for Port Dalhousie	43,600
Lighterages to barges	225,000
Storage at close of navigation	809,000

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity prevailed in the labour market for December. The building trades which have enjoyed one of the best seasons in years, showed some abatement in activity owing to weather conditions preventing outdoor operations. The assessment returns for the city show an increase in population of 345, and an increase in the assessment of $371,807. The civic Board of Works report showed twenty-two streets graded, twenty-five repaired, several cindered, 17,900 feet of concrete curbing, and 26,000 feet of concrete sidewalks laid, over 2 miles of sewers laid, besides a large amount of other work. The concrete curbing and walks were done by day labour. Christmas trade proved unusually heavy, merchants reporting it the best in many years. Shipping through the Welland Canal showed a new record this year. Six hundred more vessels of all kinds passed through the canal than last year, the total this year being 2,656. The bulk of the cargoes, consisting of grain down and coal up. Notwithstanding the rate-cutting by American lines, Canadian boats carried the bulk of the grain from the Canadian North-west this season

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Work in this line is now confined to light work between seasons.

Manufacturing.—All mills, factories and works were from active to busy. Canning factories worked well up into the month, but are now winding up the season's work, which has been very heavy.

CONDITION OF PARTICULAR TRADES.

The building trades had a good month's employment. All lines of engineering and metal trades were well employed. Woodworkers, upholsterers, varnishers and polishers, woodcarvers, carriage and wagon makers and coopers were active. The allied printing trades were all busy. Journeymen tailors were busy, as were also boot and shoe workers. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers were active. Tanners and curriers, leather workers, saddlers, trunk and bag makers were active. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés, and laundry workers were busy. All lines of transportation were busy, with a heavy volume of trade. Unskilled labour was active.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed for the month. Fire destroyed the Grand Trunk Railway Company's grain elevator here, on December 7, and with it the oil house, ice house, coal sheds and 200 feet of the harbour wharf. A fire steamer arrived from St. Catharines in time to save the Maple Leaf Rubber Company's warehouse. It was the worst fire Port Dalhousie has had in many years. The loss to the Grand Trunk Railway Company is estimated at $25,000. A contract has been let for the building of a new boat by the N. St. C. & L. Railway Company to ply between Port Dalhousie and Toronto, next season.

Merritton.—All mills and factories were running full time.

Thorold.—Labour was active to busy.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the various branches of the city's industrial life were active during the month. The manufactures continued busy, and the demand for skilled workmen by some of the new industries, as the buildings approached completion, absorbed all available labour. The usual seasonable slackness in the building trades was not as pronounced as usual. Building permits for December, 1910, were valued at $49,550. The year's per-

mits totaled in value $2,604,605; in 1909, $1,623,100, an increase of $981,505 this year. Bank clearings for the month were $9,578,521; December, 1909, $8,646,926. Clearings for the year were $101,226,496; 1909, $84,853,936. Retail merchants reported the Christmas trade the largest in the city's history. The Retail Grocers' Association is taking a vote of its membership on a proposal to close stores at 9 P.M. Saturdays. Most of the stores are kept open until 11 P.M.

Ontario Hydro-Electric Commission power was installed in the city's waterworks pumping-station December 21. The City Council has recommended next year's council to increase the wages of the city fire department empoyés seven per cent., the increase to go to a benefit fund, which is to be incorporated. Male assistant teachers in the Collegiate Institute have been granted an increase in salary of $100 per year. The minimum salary is raised from $1,200 to $1,300, and the maximum from $1,600 to $1,800. Industrial Commissioner Mulliss reported that new industries representing an investment of over $4,000,000 located in the city during the year.

Busy conditions continued during the month among the manufactories, and skilled workmen and labourers were fully employed. Inquiry was made for machinists, pattern makers, metal polishers, stove-mounters, millwrights, woodworking machine hands, boxmakers, sewing machine oprators and hand sewers on garment work.

The wages of Toronto, Hamilton & Buffalo Railway engineers were raised from $4 to $4.25 per 100 miles for freight engineers, and from $3.75 to $4.15 for passenger engineers, making their scale the same as Canadian Pacific Railway engineers.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The Diamond Flint Glass Company has purchased ten acres of land in the east-end factory district, and will erect a large glass factory thereon. The Company manufactures jars, bottles and canners' packages by automatic machinery.

The Egg-O-See Baking Powder Company has removed to this city from Regina, Sask.

The Robinson Box Manufacturing Company, of Lowell, Mass., has established a factory here. It has taken temporary quarters in the old Hart Emery Wheel Company building, and will build a new factory in the spring.

The Dominion Power & Transmission Company will install a new 8,500 horse power generator to cope with the increasing demand for electric energy. The Company has taken out a building permit for a third sub-station. Orders have been placed for a supply of new and modern cars for use on its Radial railway lines.

Application for a Dominion charter is being made by the Imperial Traction Company for authority to build and operate electric railway lines in districts between Niagara Falls and Sarnia. Hamilton will be a terminal of two of its electric lines, and the promoters state work will begin from here in the spring, if their application is granted. The lines from Hamilton will be to Guelph and to Brantford.

The Toronto, Hamilton & Buffalo Railway Company is acquiring property to extend its Aberdeen avenue yards.

CONDITION OF PARTICULAR TRADES.

The building trades as usual slackened off somewhat during the month, but inside workmen found enough to do. Iron and steel workers were busy, as were woodworkers. The printing trades were rushed with work, also the clothing trades. Tobacco workers and cigarmakers were busy most of the month, but were off duty over the holidays. Boot and shoe workers had a fair month. Bakers, confectioners and butchers were very busy. Barbers, clerks, delivery emlpoyés, hotel and restaurant employés and laundry workers were all employed. Transport employés had an exceedingly active month, as had street railway men. General labourers were more fully employed than is usual at this time of year. Ice cutting will probably begin the first week in January, and will absorb any unemployed labourers

who may be available. About 350 men are usually employed during the progress of the ice harvest.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during December. Though not as active as in November conditions were better than in the corresponding month of last year. Considering the time of year the building trades were busy. The iron trades were especially busy, and prospects are very bright. The Waterous Engine Works Company has taken out a permit for a $45,000 addition. The large additions for the Penman Manufacturing Company, and the new factory of the Ham & Nott Company, are being erected as rapidly as weather conditions permit, while the Cockshutt Plow Company is contemplating large additions to be erected in the spring. Merchants, wholesale and retail, had a busy month. Christmas trade was exceptionally brisk, due largely to the steady employment of labour, particularly during the past few months. So far as steady employment is concerned, the past year was perhaps the best in many years, and prospects for 1911 are very bright.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing continued brisk; overtime was worked, and further factory additions are being arranged for.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons found employment as active as weather permitted. Considerable brick was laid during the month. Carpenters and joiners were from active to busy, the majority being in the first class. Lathers and plasterers were active. Painters and decorators found work a little quiet. Plumbers, gas and steam fitters were active, and in some cases busy. Iron moulders, coremakers, machinists, engineers, electrical workers, blacksmiths, boilermakers and sheet metal workers were busy. Metal polishers, buffers and platers in most cases were busy. Stove mounters were not very active. Horseshoers were active. Linemen were quiet. Woodworkers and pattern makers were busy. Carriage and wagon makers and coopers were active. The printing and allied trades were busy. Tailors, tailoresses and shoe workers were busy. Bakers and confectioners were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were active. Barbers, clerks, delivery employés, hotel and restaurant employés were steadily employed, and were particularly busy during the Christmas season. Laundry workers were busy. Railway trackmen were active. Freight handlers and draymen were busy. Street railway employés, carters and teamsters were actively employed. There were not many unskilled labourers unemployed.

DISTRICT NOTES.

Paris.—Labour generally was well employed. The fabric mills still require more operators. Steady employment, under good sanitary conditions, is offered those desiring work.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during December continued active though building operations were practically at a standstill, with the exception of work on the new Canadian Pacific Railway station, which is being rushed to completion. Manufacturing plants were generally busy, with orders ahead in most cases, and prospects of an active winter. At a joint meeting of a committee from the Board of Trade, the Co-operative Association and the Trades and Labour Council it was decided to start a Co-operative Furniture factory, provided sufficient capital, namely $10,000, can be raised. Subscription

sheets are now being circulated, shares being placed at $10 each, bearing six per cent. interest. Wholesale and retail merchants report an exceptionally busy month, the Christmas trade in almost every line showing marked improvement over last year. The Provincial Winter Fair, which was held from the fifth to the tenth of the month proved to be the best on record, both in point of attendance and number of exhibits. At a conference of the City Council and Winter Fair Board it was decided to have plans prepared for enlarging the winter fair building, further accommodation being deemed necessary. A settlement has been reached in the dispute between the Brussels carpet weavers and the Guelph Carpet Company, whereby the firm agrees to employ seven of the eleven men who still remain in the city. Wages to be the same as when the men ceased work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were occupied mainly with the care of stock and marketing produce. The Christmas market was one of the largest of the year, good prices being realized for produee. Turkeys ranged from 22 to 25 cents a pound, chickens, $1.10 to $1.25 a pair and geese 10 cents a pound. Eggs sold at 40 cents a dozen, butter sold at 30 cents a pound; honey at 20 cents a pound. Apples brought from 20 to 50 cents a basket, according to quality.

CONDITION OF PARTICULAR TRADES.

Bicklayers and masons reported a dull month, with carpenters, lathers, plasterers and painters fairly busy. Plumbers and steam fitters had an active month. Iron moulders, coremakers and tube mill workers were busy. Machinists and electrical workers were well employed, also stove-mounters and blacksmiths. Piano and organ workers had a fair month, with carriage and pattern makers active. Printers and allied trades were well employed. Journeymen tailors and garment workers had a fair month. Bakers, eonfectioners and butchers were very busy. Hotel and restaurant employés had a very active month. Unskilled labour had a fair month, with the supply in excess of the demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of December was a busy one, especially among factory employés, many of whom had to work overtime. Activity in industrial establishments exceeded that of the corresponding month of last year. Other labour was well employed. Good progress was made in construction work. The Dominion Sugar Beet Factory completed its season's activity in the early part of the month and reported the most successful year in the history of the Company, the supply of beets being of unusually good quality and the percentage of sugar high. The total output of sugar during the season was 5,250,000 pounds, or 17,500 barrels. This was an increase of 2,250,000 pounds over the production of last year. Shipments, commercial activity and bank clearings were more active than in many years. Wholesale and retail trade was very good. There were no changes in rates of wages or hours of labour, except among outdoor workers who were on short time owing to seasonal causes.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were fully employed during the last part of the month in the hauling of hay, wood, saw logs and marketing produce. There was a large offering of poultry on the market, Christmas turkeys selling at from 25 to 28 cents per pound, 30 cents being asked for choice ones. Geese sold for from 15 to 17 cents per pound; ducks, 90 cents a piece; chickens, 50 to 75 cents each; dressed hogs $10 per cwt.; beef, hindquarters, 10 cents per pound, and forequarters 9 cents per pound. Eggs sold at 35 cents per dozen.

Lumbering.—Active conditions prevailed.

Manufacturing.—Very busy conditions were reported, most of the furniture factories working overtime, as were the Jackson & Cochrane foundry, the McBrine Trunk and Bag factory, the Berlin Robe & Clothing Company, the Berlin Interior Hardwood Company, the Berlin Felt Company and others.

Railway construction. — Construction on the People's Railway progressed satisfactorily.

CONDITION OF PARTICULAR TRADES.

Plumbers, gas and steam fitters were active, but the other building trades were somewhat quiet. Active conditions prevailed in the metal, woodworking, printing, clothing, food and tobacco preparation, leather, miscellaneous and general transport trades. Unskilled labour was inactive during the latter half of the month.

DISTRICT NOTES.

Labour in Waterloo, Elmira, Galt and Preston was well employed, with manufacturing establishments very busy, overtime being worked in some cases.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial and commercial conditions were probably as active and encouraging last month as for any Christmas season in the history of the community. Christmas business in all departments was reported good, and in many cases exceptionally good. Practically all the factories were busy, some of them rushed. The wagon factories were working to full capacity. The piano and organ factories and the Canadian Furniture Manufacturers were very busy. The Oxford Knitting Company was very busy, and in need of girl help, as usual. The James Stewart Manufacturing Company (stoves and furnaces) reported trade better than usual. The Richard's Pure Soap Company reported business above the average for this season.

CONDITION OF LOCAL INDUSTRIES.

Work is being rushed on some new factories recently secured for the city, and there is the promise of some others at an early date. Altogether it may be said that the industrial conditions here were never better. There is some demand, though not a great deal, for skilled workmen, chiefly for the piano, organ and furniture trades. There is no longer a demand for unskilled labour, due to the fact that so many men who were employed on the farms during the summer have now returned to town.

CONDITION OF PARTICULAR TRADES.

There is still some work in the building trades, and bricklayers, carpenters and joiners, lathers and plasterers were fairly busy. Painters and paper hangers were busy. Plumbers seemed constantly busy. Moulders and iron workers generally were well employed, though this was not the busy season in the stove and furnace trade. Stove mounters and blacksmiths were busy. Wood-workers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers were busy, and there was demand for skilled men in those trades. The printing trade was very good, but there was no demand for men. All garment workers were reported busy. Bakers, confectioners, butchers and cigar makers reported business very good. Tanners and leather workers reported business steady. There was plenty of work for unskilled labour.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active during December; considerable outside

work being done, such as shovelling snow and finishing the season's work in the building line. Building permits to the value of $1,583 were isused. In manufacturing prospects are good for a steady winter's work. A number of men were engaged in finishing the stringing of wires for Hydro-Electric Niagara power and current was turned on in parts of the city. Contracts were awarded for civic improvements and buildings which will be carried out next year. Wholesale and retail merchants reported business very good, especially the holiday trade. The customs' returns for November were $12,405.10, an increase of $1,000 over the corresponding month of last year. There was no trouble in the labour market during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy during the month feeding their cattle and marketing. The market for the Christmas trade was well attended.

Turkeys sold for 20 to 23 cents per pound.
Geese, $1.40 to $1.50 each.
Ducks, 75 to 80 cents each.
Chickens, 40 to 50 cents each.
Eggs, 30 to 35 cents per dozen.
Butter, 25 cents per pound.
Apples, $1.50 to $1.75 a bag.
Potatoes, 75 cents a bag.

Manufacturing.—All industries have been very busy. Railway shopmen were well employed.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters and paper hangers reported very little new work this month. Plumbers and tinsmiths were very busy. Iron moulders, iron workers and helpers were active. Machinists, engineers and electrical workers were busy. Blacksmiths and boilermakers engaged in the factories were busy. Wood workers, upholsterers, varnishers and carriage and wagon makers had a busy month. Coopers and stave workers had a good month. Printers were very busy, especially ad. hands. Journeymen tailors and all engaged in the factories were active. Bakers, confectioners and butchers had a busy month; cigar makers were active. Harness makers did a good trade. Barbers, clerks and delivery employés had a busy month. Hotel, restaurant and laundry workers were busy. Railway conductors and locomotive enigneers, firemen and trainmen were active. Freight handlers and expressmen were busy. Cab drivers, draymen and teamsters had a busy month. Unskilled labour had a very good month.

DISTRICT NOTES.

Goderich. — The re-building of the Grand Trunk Railway station has been pushed along rapidly and the workmen are engaged on the interior.

St. Marys.—All establishments were busy here. The farmers in the vicinity were busy drawing timber and cord-wood to town.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of December and up to Christmas business was exceptionally good in all the foundries and manufacturing establishments, and a lot of overtime was worked to get orders out; but a number of firms closed down from Christmas until the beginning of the new year, for stock taking purposes. The railroads were extremely busy. Very little was done by outside workers during the month. Retail trade was very good, and Christmas trade heavy. One interesting feature was the few cases of absolute need discovered by the societies who dispense Christmas cheer. The prices of chestnut and mixed anthracite coal advanced from $7.00 a ton to $7.25 and $7.15 respectively on December first. Christmas turkeys went up from 22 to 25 cents a pound. The manufacturers of the city are pleased at the item of $60,000 placed in estimates by

Dominion Government for improvements to Port Stanley Harbour, which is the lake port for this city. The Forest City Bent Goods Company organized in this city, has secured a site, and will immediately commence to manufacture. At the last session of the City Council the rate to be paid city teamsters when employed by the city was increased from 45 cents to 50 cents per hour for team, wagon and driver. At the same meeting the city firemen received increases as follows: Chief, from $1,500 to $1,600 per year; assistant chief, $1,000 to $1,100; first year men from $1.50 to $1.75 per day; second year men from $1.80 to $1.95 per day; third year from $2.00 to $2.15; and fourth year from $2.10 to $2.25.

CONDITION OF PARTICULAR TRADES.

There was very little work in the building trades during the month. Moulders, iron workers and machinists were busy. Eletcrical workers were very busy. Metal polishers, stove mounters and brass workers were busy. Wood workers, carriage and wagon workers, and coopers were busy. Car builders were working but five days a week. This has been a very active month for printers, pressmen and electrotypers. Tailors, garment workers and boot and shoe workers were very busy. Bakers and confectioners were extremely busy. Cigar makers were mostly laid off for ten days for stock taking. Tanners and curriers were busy. Broom makers were busy. Furriers were exceptionally busy, and working overtime. Railroad hands, and more especially train crews, were busy. There is no employment for unskilled labourers at outside work, but quite a number have got inside work for the winter.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The advent of cold weather during the latter part of November and throughout December prevented outside work in the building trades and closed the building season with the exception of a few inside contracts. In local industries, and on the railways, the month was favourable. A considerable number of trainmen were added to the working staffs of the railways, and the regular men had a busy month. Skilled labour was only fairly well employed, the supply being slightly in excess of the demand. Local merchants reported Christmas trade brisk. The foundation has been completed for the new Monarch Knitting Company, and the factory will be rushed to completion once the weather is sufficiently open. The Hydro-Electric plant is about ready for operation, but the installation of the lights has not yet been completed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The markets were well attended during Christmas week with buyers and sellers. Good prices prevailed, with a plentiful supply of fowl.

Manufacturing.—Local industries reported December a busy month.

CONDITION OF PARTICULAR TRADES.

Mechanics employed in the building trades were obliged to discontinue outside work on account of the cold weather. A number of inside contracts were being completed during the month. With a continuance of cold weather, there will be little or nothing done in the building trades until spring. Railway shop moulders, machinists and metal workers were fairly well employed during December. Printers were busy. Journeymen tailors reported a quiet month. Railway traffic employés were busy during the month of December. The working forces were added too, considerably, in anticipation of a brisk winter's business. While there were no cases of distress reported among unskilled labourers, there were a few idle men seeking employment. Altogether the supply of unskilled labour was slightly in excess of the demand.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during December showed very little change compared with November. Employment was good in practically every branch of industry. The municipal works continued to employ a large number of men who during the year constructed over six miles of cement walks in the city. All municipally aided industries in the city have made a better showing for 1910, than ever before. The Chaplin Wheel Works, Wolverine Brass Company, Dowsly Spring and Axle Company and Chatham Bent Goods Company have all employed more men than the agreement with the city calls for and all the firms worked overtime during the whole of December. Planing mills and carriage and wagon factories were particularly busy, all were working full time. The ice companies began harvesting the ice crop the last of the month, but finds considerable difficulty to secure labourers. The building trades have had plenty of work. Outside men, of course, were working nine hours. Inside men full time, and prospects seem good for plenty of work during the balance of the winter.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were less active than the preceding month and were merely marketing their products. Grains of all kinds remain firm in price, but hogs, live weight, have fallen in price from $9.50 in June to $6.50 in December. Beef sold for 8 cents for front quarter, and 10 cents for hind quarter. Butter and eggs remain firm. Butter, 30 cents and eggs, 35 cents per dozen. The price of poultry at the Christmas market was the highest on record: Turkeys, $2.00 to $5.00; geese, $1.50 to $2.50; ducks, 75 cents to $1.00, and chickens, 35 cents to 75 cents. Clover hay was $9.00 a ton, timothy, $10.50.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were practically idle. Carpenters and joiners on interior finish were busy. Painters and paperhangers were quiet. Plumbers, gas and steam fitters were busy. Builders' labourers were fairly well employed. Iron moulders, machinists, engineers and electrical workers were busy. Metal polishers, buffers, platers and brass workers were very busy. Blacksmiths, boilermakers had a fair month. Sheet metal workers were quiet. Horseshoers were busy. Woodworkers, upholsterers, carriage and wagon makers were working overtime. Printers, pressmen and book binders reported a busy month. Journeymen tailors and garment workers and boot and shoe workers were well employed. Bakers, confectioners, butchers and meat cutters, cigar makers and tobacco workers were active. Barbers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés and laundry workers had a very good month. Railway trackmen, freight handlers, street railway employés, carters, draymen and unskilled labour were well employed.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed with the exception of the bricklayers and labourers who had to stop work on account of the cold weather. As soon as it moderates they will be back at work, as there is plenty to do. There are about forty houses and stores under way, which will keep the building trades well employed all winter. There were forty-four building permits issued during the month of November, the largest number in the history of the city, with a valuation of $84,200, mostly houses that will rent from $12 to $15 per month. For the first eleven months of this year there have been 226 permits issued, an increase of fifty over the number issued for the first

eleven months of last year. The total valuation of the year amounted to $369,340. Custom returns show, for November, 1910, $99,503.30, as against $80,125.69 in November, 1909. At the municipal election in January, the electors will vote on a by-law to decide whether or not the city will be governed by a commission. Wholesale and retail merchants reported the best Christmas trade they ever had.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturers were working full time.

CONDITION OF PARTICULAR TRADES.

Owing to the cold weather bricklayers and masons were not very busy, but the other building trades had plenty of work. Iron moulders and iron workers were busy. Electrical workers were very busy. Blacksmiths and horseshoers were busy. The woodworking and furnishing trades were fairly busy. Printers and pressmen were well employed. The clothing trades continued good, and employment was steady. Boot and shoe workers were busy. The food and tobacco industries were busy. Leather workers were busy on repair work. Barbers, clerks, delivery employés, hotel, restaurant and laundry workers were busy. Transportation on the railways was good. Street railway employés were well employed. Teamsters were not very busy. Unskilled labour was equal to the demand.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly well employed during December, but, as is usual, at this season of the year, building operations have ceased, leaving a number employed in the building trades idle. Jewellers and kindred trades were very busy during the month. Commercial and business activity was satisfactory. Hours of labour were decreased for those working during daylight. The past year has been the most successful in the history of the town. Business was good in all lines. The number of buildings erected was greater than ever previously. Labour was fully employed during the year, a scarcity prevailing in some branches. The new works under construction by the Lake Superior Corporation are being carried on with vigour. During the past year several miles of cement sidewalks were laid, as well as a number of sewers. By-laws will be voted on by the ratepayers on January 2, as follows: $30,000 for a new school; $34,000 for sewers; $30,000 for sidewalks; also for the appointment of a Park Commission, according to the Ontario statute in that behalf.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This industry was inactive.

Fishing.—Normal conditions prevailed.

Lumbering.—Operations were brisk.

Mining was normal.

Manufacturing.—Brisk conditions were reported. The pulp and steel mills, blast furnaces and the various small manufacturing plants reported business good. The building trades were quiet from seasonal causes, but the other skilled trades were active.

DISTRICT NOTES.

Steelton.—By-laws will be voted on in this municipality as follows: $48,000 for a lighting plant; $6,000 for fire protection and prevention; and $5,000 for cement walks. A bonus to the Dominion Tar & Chemical Company, of London, Eng., which will handle the by-products of the Lake Superior Corporation coking plant, will be voted on.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. Fred. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The employment of labour for December has been lighter than the previous

month, and on the whole a little lighter than the corresponding month of last year.

No new industries have started, and with the closing of navigation early in the month everything settled down to the quiet of the winter. The active building season is over and many building operatives are idle or have left for bush or railway work. There has been no exceptional activity in any particular trade. On the whole, merchants have found Christmas trade this year lighter than they expected. There has been no unrest in any of the trades, and no new unions have been started or boards or associations formed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy with their winter work. Fire wood, ties and poles are coming in to the cities and railway sidings. The roads are in the best condition.

Lumbering.—Lumber and tie camps are fairly busy.

Railway construction.—Men have been recruited from these cities to the railway camps to the north.

Other industries.—The Blast furnace at Port Arthur is in operation, and it is reported that it will be kept going the whole of the winter. The grade of iron now turned out is the best, and there is a growing demand for it.

The dry-dock is progressing towards completion.

CONDITION OF PARTICULAR TRADES.

The building trades are quiet. Many men are on short time, and some find it difficult to get employment. The printing and allied trades have had a very busy month, the Christmas printing, followed by the muincipal election litreature, is held accountable for this. The newspapers are all exceptionally well housed in modern buildings and with the latest machinery are well equipped to deal with every branch of work. This applies to the *Times-Journal* and *Morning Herald* at Fort William, and the *Evening Chronicle*, of Port Arthur, for the past year and a half. The *Daily News*, of Port Atrthur, has just completed fine premises, and will move in early in the new year. Journeymen tailors have had a very quiet time; this has been especially disappointing during the Christmas month. There is very little work in the cities for unskilled labour.

DISTRICT NOTES.

The labour men of both cities are this year taking a direct part in the muincipal elections. The Fort William Trades and Labour Council have placed candidates in the field and have also indorsed the candidature of other men. The Port Arthur Trades and Labour Council have nominated four labour men, three English speaking and one Finlander. There are some 2,000 Finnish people in the city, mostly working people.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During December a large number of men returned to Winnipeg after completing the season's work in occupations where labour ceases during the cold months of the year. There still remains, however, a good demand for such men for work in the woods.

Activity in the retail trade created a demand for assistance in stores.

As compared with conditions existing at the corresponding period of last year, there are more men at work now than at that time; the demand for indoor assistance has also been greater.

For the year closing, the bank clearings show a gain of 23·60 per cent. over last year. The returns for the year are as follows, together with the corresponding figures for last year:

	1908	1909	1910
January	$48,755,463	$51,729,453	$69,703,144
February	37,665,201	41,211,683	52,677,562
March	41,126,609	49,707,694	60,067,844
April	41,393,487	54,395,883	70,546,417
May	44,003,603	55,916,690	70,380,839
June	39,154,282	49,452,797	69,889,227
July	42,119,516	70,701,664	78,409,478
August	36,938,567	46,796,404	72,588,070
September	47,478,626	60,827,428	76,951,048
October	73,794,782	97,862,843	104,341,220
November	86,080,626	116,569,351	126,717,720
December	75,601,239	95,477,412	100,142,569
	614,111,801	770,649,332	952,415,138

The percentage increases of the last seven years are as follows:—

1904 increase over 1903.....19·50%
1905 increase over 1904.....25·50%
1906 increase over 1905.....36·50%
1907 increase over 1906.....18·86%
1908 increase over 1907..... 4·70%
1909 increase over 1908.....25·50%
1910 increase over 1909.....23·60%

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During the month the movement of the crop has been lighter than for the corresponding period of the year previous. Quite a number of the farmers are holding wheat and oats because of the lower prices prevailing and in consequence there is a large quantity of these grains in store at Fort William.

It is estimated that there is more fall ploughing done this year and more fallow than in any previous year; conditions regarded as very favourable for the crop of next year.

Building.—At the present time there is in progress an unusual amount of indoor work upon new buildings and the number of men employed is larger than for the corresponding period of last year. There is also a larger demand for skilled help in the building trades because of the larger amount of building taking place in cities and towns in the Prairie Provinces west of Winnipeg.

The following are the year's building statistics provided from the building inspector's office for 1910:

Months.	Permits	Buildings	Cost
January.....	76	97	$ 188,000.00
February.....	91	126	335,900.00
March.....	265	336	2543,150.00
April.....	496	610	2,320,900.00
May.....	497	579	2,104,450.00
June.....	273	467	2,413,700.00
July.....	296	331	1,065,600.00
August.....	427	482	1,447,800.00
September.....	287	330	814,350.00
October.....	270	310	531,150.00
November.....	711	189	371,200.00
December.....	51	59	970,250.00
Total.....	3,291	3,916	$15,306,450.00

On the sixteenth of December, 550 motormen and conductors in the employ of the Winnipeg Electric Railway Company went on strike to enforce the reinstatement of four discharged men. The cause of the dismissal of those men was the subject of an investigation under the Industrial Disputes' Act. The finding of the Board was not unanimous. Two members found that the Company was justified in its action, as the men discharged, in their opinion, broke rules which they agreed to respect. The third member of the Board did not agree with this finding. After the reports of the members of the Board had been placed in the hands of the Company a committee of the men waited upon the manager of the Company and asked that the men be reinstated. Their request was not granted. To enfore the demand the men went on strike on the twenty-third. The Company proceeded to operate their cars to a limited extent immediately following the strike and in the course of a few days had nearly a full service in operation. On December 30, through the intervention of a committee of citizens the members of the Street Carmen's Union agreed to end the strike on condition that the Company would reinstate immediately 200 of the strikers and subsequently, as vacancies could be found would take back another hundred. The strikers taken back were also required to sign an agreement to the effect that they would not interfere with any of the men who had been secured to take the place of strikers. The men selected by the Company to be taken back will be given the same standing occupied by them before the strike took place. The men whose reinstatement the Union tried to enforce will not be amongst those to be taken back.

Immediately after the strike took place an announcement was made in the public press by the manager of the Company to the effect that the men could have the option of coming back and assuming the same positions and standing as they left. The limit to this option was set for Tuesday noon following the strike on the Friday previous. Through the intervention of a committee of representatives of the City Council and the Industrial Bureau this option was extended one day longer. The men, however, refused to take advantage of the offer made by the Company.

Incident to this strike about thirty employés of the Manitoba Clothing Company went out on strike because they were asked to work on uniforms intended for the employés of the Winnipeg Electric Railway Company. The strike commenced on Wednesday, the 22nd instant, and had not been settled at the end of the month.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the past month, labour was not so well employed as during the previous month, but was equally as well employed as in the corresponding month of last year.

The sash and door factories, the machine works, and the pump works, were running full time.

Brickwork is still being done on the new Canadian Northern Railway station; it is expected that the outside will be finished in January.

Wholesale and retail business has been very good this year, owing to the good weather prevailing.

The Winter Fair Building and a warehouse formerly used by the Hughes Lumber Company have been fitted up for a temporary home for the inmates of the destroyed hospital for the insane. It is expected that work will commence in the early spring on a reinforced concrete building to take the place of the one destroyed by fire. The labour market was free from unrest.

CONDITION OF PARTICULAR TRADES.

The majority of bricklayers and masons were employed, though a complete cessation of work may come at any time. Carpenters and joiners were fairly busy. Lathers, plasterers and plumbers were dull. Builders' labourers were active. Machinists also were active. The allied printing trades were busy. Cigar makers were busy. Railway transport was active. Unksilled labour was dull.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been a general slackening in all branches of the building trades during the past month; but the prevailing conditions were more favourable than in corresponding period of last year. By the end of the year, the buildings now under construction will be nearing completion, when it is expected a large percentage of the building trades will be unemployed, but taking into consideration the number of permits issued for blocks, warehouses, &c., the prospects for a busy spring are very favourable. Both wholesalers and retailers reported business as good, and on the increase.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Little or nothing is in progress as regards agriculture, though farmers are endeavouring to engage the immigrants who frequently arrive in the city.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a quiet month, conditions being less favourable than the peceding month. Carpenters and joiners were fairly busy, also lathers and plasterers. Painters and paperhangers were very quiet. Plumbers, steam fitters, stone cutters and builders' labourers had a fair month, with a marked falling off the latter part of the month. Electrical workers were quiet.

The printing and allied trades had a busy month. The journeymen tailors and garment workers had a busy month and reported business to be on the increase. Bakers and confectioners were fairly well employed, as were butchers. Cigar makers were busy. Barbers had a good month, but there was little or no demand for clerks and stenographers. Delivery employés were busy. Hotel

and restaurant employés were quiet. Laundry workers were very active, ironers being in demand. Freight handlers were busy, as also were hackmen, draymen, teamsters and expressmen. There is no demand for unskilled labour.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were satisfactory during the month of December, comparing favourably with the corresponding period last year. The weather was comparatively mild, and during most of the time outdoor labour was carried on. Even during the last few days of December civic labourers were to be seen with pick and shovel digging trenches for water pipes in some streets in the city. Work on the new oatmeal mill of the Saskatchewan Flour Milling Company has proceeded rapidly during the past month, and the building will soon be completed. The latest development in regard to this mill is the purchase of the necessary machinery, which it is claimed represents the most modern ideas and very latest principles in milling machinery. Retail merchants reported, on the whole, a very satisfactory turnover during the past month, although in some quarters the Christmas trade was hardly as brisk as was anticipated. From the standpoint of labour, the outlook for the winter is fairly satisfactory. Trade in many lines continues brisk; while in those in which weather conditions may necessitate a cessation of activity the workers for the most part have enjoyed a longer season of steady employment, and very little distress is anticipated.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were rather quiet, carpenters and joiners were fairly active. Lathers and plasterers were active. Painters and paperhangers were quiet. Electricians and linemen were fairly active. Iron workers, moulders, machinists were fairly busy. Printers and pressmen were very busy. Tailors, bakers, butchers and meat cutters and confectioners were all very active. Railway conductors, locomotive engineers, firemen, trainmen, switchmen, trackmen and freight handlers were all active. Barbers, clerks, delivery employés, laundry workers, teamsters and expressmen were busy. Unskilled labour was rather quiet.

SASKATOON, SASK., AND DISTRICT.

Mr. A. B. Jones, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market for the month of December experienced a decided slump. The building trades were practically at a standstill, which is not unusual at this season. A few buildings have yet to be completed. When these few jobs are finished building operations will, in all probability, close for the remainder of the winter.

The customs revenue for 1910 shows an increase over 1909 of over three hundred per cent. In 1909, the total figures were $97,001, and with ten and a half days yet to finish the year, the figures for 1910 are $291,117. The month of October showed the smallest amounts, while December shows the greatest, the figures being $18,533.21, and $35,000, respectively. Wholesale and retail trade continued very heavy throughout the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The absence of snow is causing considerable amount of inconvenience to farmers, the land being very dry. It is feared, if an abundance of snow does not come this winter there will not be sufficient moisture in the ground to warrant a good crop.

Manufacturing.—The brick and lumber manufacturing firms have about concluded the season's work, and are contemplating closing down their plants for the balance of the winter.

CONDITION OF PARTICULAR TRADES.

The building trades were at a standstill, with the exception of a few carpenters, lathers, plasterers and painters who are finishing the few remaining jobs. Electrical workers and blacksmiths were fairly well employed. Printers and pressmen have had a good month. Tailors, bakers, butchers and confectioners were fairly busy, while cigar makers were very slack. Barbers, clerks and laundry workers were well employed. Railway employés and freight handlers were busy. Unskilled labour was practically at a standstill.

CALGARY, ALTA., AND DISTRICT.

Mr. Geo. Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of December witnessed considerable change in opportunities for employment in Calgary and district. The influx from the East, and railway construction gangs, coupled with winter weather conditions, caused the supply to considerably exceed the demand. As compared with the corresponding period of last year, however, conditions are considerably better. Every effort is being made by the contractors to rush jobs to completion. Excavations for the foundations of the new Market Hotel have been started; its estimated cost is $45,000, and it is expected to be completed in three months. Next spring will see the erection of a six or eight storey building, with a frontage of 125 feet, on Seventh avenue.

Wholesalers and retailers reported trade very satisfactory, and much better than at the corresponding period of last year.

CONDITION OF PARTICULAR TRADES.

Bricklayers had a fair month. Lathers, plasterers, plumbers, gas and steam fitters and builders' labourers reported trade much quieter. Masons had a dull month. Painters and paperhangers were fairly well employed. Stone cutters had a very dull month. Iron moulders, iron-workers and helpers, coremakers, machinists, engineers, electrical workers, linemen and blacksmiths reported trade slackening. Sheet metal workers were well employed. Woodworkers and upholsterers reported a fair month. The printing trades had a fairly active month. Tailors, butchers, bakers and confectioners were fairly well employed. Miscellaneous trades were quiet. Railway and street railway employés, teamsters and expressmen were fairly well employed. Unskilled labour is now plentiful.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to the exceptionally mild weather all classes of labour were well employed during the month, and conditions compared favourably with the previous month and were better than in the corresponding month last year.

The volume of business done in Edmonton continues to increase steadily, as shown by the following comparative figures, for eleven months of each of the last three years:—

	1908	1909	1910	Increase 1910 over 1909
Customs Returns	$214,696	$251,980	$324,889	29%
Building Permits	2,246,712	2,120,572	2,007,685	
Bank Clearings	34,386,176	45,988,177	63,347,435	38%
Post Office (Stamps only)	52,270	65,001	73,535	13%
Street Railway:				
Passengers Carried		1,912,350	3,306,937	73%
Revenue		$79,686	$141,529	78%

For the first time in any month in the history of the city the total bank clearings have passed the eight million mark. The record established in November shows an increase of forty-eight per cent. over the same month last year. Homestead entries show a considerable increase over the corresponding month of last year, 400 entries having been made in November, 1910, and 333 in November, 1909. Immigration was brisker during November of this year than in the same month of 1909,

109 immigrants having been received at the hall, as compared with a total of fifty-three for November, 1909. Returns from the building inspectors department show a falling off, due somewhat to the strike of the plasterers, which deterred many people thinking of building from commencing operations this fall. The civic year closing the thirty-first of October has been remarkable for the amount of dwellings constructed. In that period there were nearly five hundred of these erected. This gives some idea of the city's growth. The building inspector, in his annual report, estimates that the actual work executed during 1910 exceeds the work done in the previous year by $500,000. The report of the superintendent of the power plant shows that the cost of operation for the year increased eight per cent., and the revenue forty-nine per cent. Wholesale trade was fair, and retailers reported trade very active during the latter part of the month. While the local demand for coal is not as great as last year, prices are from 25 to 50 cents higher.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to mild weather and lack of snow, sleighing has been very poor in this district. Consequently, farmers did not bring the usual amount of poultry and vegetables into the public market, and prices were higher than in former years.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have about finished the season's work. Carpenters and joiners were very active. Lathers were busy, plasterers were very active. Painters, plumbers and steam fitters were active. Stone cutters were quiet. Builders' labourers were active. Iron moulders, coremakers, machinists and engineers, electrical workers, linemen, blacksmiths, sheet metal workers and horseshoers were active. The printing and allied trades were busy. Journeymen tailors were active. Bakers and confectioners, butchers and meat cutters and cigar makers were active. Barbers, clerks, delivery employés, hotel, restaurant and theatre employés were very active. Railway employés and street railway employés and expressmen were active. Owing to the number of unskilled labourers coming in from railway construction camps, the supply is greater than the demand.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of December the labour market has remained much the same as in November. All outside work has been carried on without hindrance from weather. With two exceptions the supply of labour has been equal to the demand. In coal mining increased activity is on record. The sinking of new coal shafts is being pushed ahead as well as underground development. The building trade was very active. The local clearing house reports bank clearings for the week ending December 22 show a gain of $87,165.43 over last week, the total clearing being $616,148.49. The wholesale and retail trade was very brisk. There is no change in the rates of wages. The Building Trades Council has given the Builders' Exchange notice of some to take effect on the first of April, 1911.

There is no unrest in labour circles, other than two plumbers leaving their work on account of a labourer trying to do plumbers' work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—At present there is little doing in the farming line. In bringing in farm implements and warehousing the same there is great activity. Every implement used on the farm is in stock at the warehouses. It goes to show that both the farmer and the implement man has unbounded faith in this district as a farming country.

Manufacturing.—There is one planing mill in active operation, with two others being started. The local foundry and iron works keeps busy, and is always extending trade.

Mining.—Coal mining is the most active industry at present. About 2,000 tons daily is about the output.

CONDITION OF PARTICULAR TRADES.

Bricklayers have been very busy, the fine weather enabling them to carry on some of the building started late in the fall. Masons are at present very busy. Carpenters and joiners have had a good month; there has been no one idle. Lathers and plasterers have been fairly busy. Painters and plumbers were very busy. Gas and steam fitters were busy. Stone cutters and builders' labourers were very busy. Electrical workers were very busy. The demand exceeding the supply, they were working short-handed. Linemen are still in demand. Sheet metal workers were very busy, the supply did not equal the demand, and they were all working overtime.

NELSON, B.C. AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour throughout Kootenay district during the month of December has been quiet, the supply of labour being greater than the demand for men for the lumber woods, miners and workmen in general. The Yale-Columbia saw mill has shut down for about two months of the winter, leaving about sixty men out of work, while one of the few sawmills that regularly operates throughout the winter, J. B. Winlow's mill, at Winlow, B.C., has again started operations, with a crew of about thirty-five men at the mill, and a somewhat larger number in the woods. The "Standard Group" of silver-lead mines, situated near Silverton in the Slocan district, has been reported as sold to Patrick Clark and his associates, of Spokane, for $2,500,000. A new Company is to be formed, which will proceed with the erection of an up-to-date concentrator and tramway. This is considered one of the best silver-lead mines in Kootenay. The Van Roi Mines, near Silverton, were reported shut down, awaiting the erection and installation of further and more complete plant. In the meantime, this places their force, said to be nearly one hundred men, on the labour market. The Mother Lode gold mine, at Sheep Creek, after about thirty months' steady development work, has closed down, to await the erection of a stampmill, which is to be proceeded with next spring. Thus its force of about fifty men is out of employment. It is said that enough ore is blocked out at this mine to run the prospective stamp mill over three years, and yet but one vein has been partially developed out of a series of veins. The Dundee gold mine in Ymir Camp, which is being developed by cross-cut tunnel, has struck the ledge and cut 15 feet of ore, though the hanging wall has not yet been reached. A new compressor is now being employed, and the drill makes 4 feet a shift, working two shifts. The Wilcox free-gold mine, in Ymir Camp, has considerable development, exposing sufficient ore to ensure a continuance of its activity. Several groups of claims have recently been reported bonded in Ymir Camp, so that district may be said to be in a healthy condition, with further improvement in sight. The "Society Girl" mine, at Moyie, B.C., made a rich strike of ore early this month, and gives promise of being a large shipper in the near future.

Customs duties collected at Nelson, for November, 1910, were $9,032.71, an increase of $1,056.57 over November, 1909, while the Inland Revenue office showed an increase of $833.17 over November of last year. According to the report of the Postmaster General for the year ending March 31 last, Nelson takes fourth place among the cities of British Columbia as regards total postal revenue, the amount being $24,796.42, or a little more than $600 less than New Westminster. The Kootenay Fruit Growers' Uinon, Limited, has been incorporated as a joint-stock company. The first issue of stock amounts to $10,000, being 1,000 shares of $10 each. The union is first of all a commercial organization, and deals with both members and non-members on a commission basis. The co-operative principle

comes in, however, after the annual dividend reaches eight per cent., all profits above that figure being returned to shippers on a *pro rata* basis. It is expected that the first warehouse will be built the coming season, at Nelson. The erection of warehouses at central points throughout the district is contemplated, upon the different localities taking a certain amount of stock. The offices of the Company will be in Nelson, and the first general meeting of the shareholders is to be held in the spring of 1911.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have been active for the past month, and will compare very favourably with the corresponding month of last year. There are very few unskilled labourers out of employment, the majority being employed on sewer and street improvements. The work has been started on the tearing down of the present British Columbia Electric Railway depot, to make room for a much larger and up-to-date building, which will give employment to skilled as well as unskilled labour. Improvements are also being made to the Provincial Court House and the surrounding grounds.

A new wharf and sheds are under construction for the Chilliwack branch of the British Columbia Electric Railway, which when completed, will greatly add to shipping facilities. Business in the wholesale and retail trades has been larger than ever, and indications point to a large increase next year. There is no new development in regard to the machinists' strike.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The fishing industry is rather quiet, as is usual this time of the year. The total salmon pack in the Fraser river district, for the year 1910, is 223,148 cases. This is naturally considerably below the salmon pack in the large fourth year runs, but is a fairly good average for an off year. The total pack for British Columbia, during the 1910 season is 762,201 cases. The different kinds of salmon packed during the season included chiefly sockeyes, red springs, white springs, cohoes and steel heads.

Lumbering.—The lumbering industry still continues active, although the shipments for the present month have not been as large as in preceding months. The mills are all working, and in some cases are making improvements and additions to their plants.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, lathers, plasterers and masons are all working, and will be for some time to come, unless severe weather sets in. Painters on outside work have lost some time lately owing to the wet weather, but decorators and paperhangers are busy. Plumbers, gas and steam fitters, with but a few exceptions are working full time, while builders' labourers have not been quite so fortunate. Iron moulders, iron workers and helpers are active, while machinists are quiet. Electrical workers and linemen are busy, as are blacksmiths. Sheet metal workers are all working, the supply not being equal to the demand. Woodworkers, upholsterers, varnishers and polishers are active, as are the electric car builders. Printers and pressmen report trade good. Journeymen tailors, garment workers, boot and shoe workers have been active. Bakers and confectioners, butchers and meat cutters are busy, and cigar makers quiet. Barbers, clerks, stenographers, delivery employés and laundry workers are busy. Railway employés, both steam and electric, are active, as are draymen, teamsters and expressmen.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in general were hardly fair in the labour market. Work was very slack with the building trades and cigar

makers. The Trades and Labour Council will place a business agent in the field on February 1, 1911. It was reported to the Trades and Labour Council that Mayor Taylor stated that the police commissioners would be advised to at once place two men provisionally at the work of inspection of bake shops, and as soon as the civic estimates for the coming year could be arranged, regular inspectors would be detailed.

After the middle of the month, the Christmas poultry from the East began to arrive, and it was estimated on the twenty-fourth, that over 100,000 pounds alone of turkey had been imported into the city, which had retailed at from 30 to 35 cents a pound. There was also a heavy supply of fruits and groceries, and dealers reported a big demand for same. The demand increased in other lines of trade, such as hardware, flour and feed, which had experienced a temporary dullness towards the close of a very prosperous year.

Shipping was very active, but a few days heavy fog was a hindrance, and kept a number of ocean-going vessels outside the harbour. The Vancouver Shipyards have three large motor boats under construction, and preparations are being arranged for two more.

The British Columbia Electric Railway Company's payment to the city on the percentage basis of the operation of the street cars, for the present year, amounts to about $42,000, compared with $28,000 a year ago. Last month, the city's share was $5,270.06. The employés of the Company received as bonuses for the year, $60,000, or $57.81 each.

An investigation into the Chinese immigration into this city was opened by a commission appointed by the Federal Government.

Permits were issued to Smith, Davidson & Wright, the wholesale stationers, who will erect an $80,000 warehouse. T. A. Fee, who will also erect a six-storey block on Seymour street, at a cost of $115,000, received a permit.

CONDITION OF PARTCULAR TRADES.

Bricklayers reported a membership of 223, with state of trade fair. Brotherhood of Carpenters and Joiners reported trade dull, and plenty of men in the city, with little work. The Amalgamated Society of Carpenters reported that they had contributed $250 towards the campaign fund in the British elections. The lathers reported trade fair. The painters reported that they were fairly well employed. The stone cutters reported all members working, chiefly owing to the construction of solid stone buildings at North Vancouver, which were somewhat taking the lead over Vancouver, where terra cotta seemed to be the favourite material used. Builders' labourers reported an increase of membership, with several unemployed.

Moulders reported trade conditions quiet. Iron workers and helpers reported a number out of employment. Shipbuilders reported trade good. Electrical workers reported all hands working. Sheet metal workers reported progress, and trade fair. Horseshoers reported trade active. Jewellers, watchmakers and engravers reported trade very active, owing to the holiday work.

Woodworkers reported trade fairly active. Upholsterers reported trade active. Varnishers and polishers were slack. Carriage and wagon-makers were very busy. Pattern makers reported trade quite.

Newspaper printers reported trade fair, with a surplus of substitutes. Job printers reported trade quiet, with a falling off of work over this time last year. Pressmen were fairly well employed, as were tailors.

Workers on horse goods reported trade fair. Barbers reported an increasing membership, and trade fair. The cigar makers reported work exceedingly slack, owing to competition with eastern firms.

DISTRICT NOTES.

North Vancouver.—Building was as active as weather permitted. Considerable activity in all lines is looked for by spring. Ship-building yards are very active. Real estate in the business section continues firm. It was announced that a new sawmill will be built at Roche Point.

Hastings Townsite.—This suburb voted to be annexed to the city. Building operations promise to be active. The mills were busy.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chrow, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour during December has been very fair, considering the season of the year, and considerably better than December of last year. The city has 400–500 men employed on corporation work of various kinds, and with the coming of the new year additional works will be commenced, for which appropriations have already been made. As is usual at this season of the year there is a surplus of unskilled labour, caused to some extent by an influx from outside places. The building trades have been moderately well employed during the month, with more than sufficient men to do the work. Wholesale trade is reported above the average, while the holiday retail trade has been the greatest in the history of the city, excellent prices being obtained for all classes of produce. The machinists strike is still on. This has been the only labour trouble of any consequence during the year. In all the other trades the relations between employers and employés have been harmonious, and at the present time everything points to a continuance of present conditions.

For the eleven months to date a total of 700 building permits were issued, compared with 537 for the same period a year ago. Permits for structures erected, or in course of erection, aggregating in value $2,066,295, were issued by the building inspector. These figures compare with $1,673,420 for the whole twelve months last year. When the building in adjacent districts is taken into account the year's figures will not be far from the $2,500,000 mark.

The bank clearings for November, 1910, were $10,386,173, as compared with $8,750,129 for October. As compared with the same period a year ago, the aggregate clearings increased over 100 per cent. The November figures for the past five years were as follows: 1910, $10,386,173; 1909, $7,200,485; 1908, $5,049,844; 1907, $5,030,519; 1906, $4,024,506.

The total customs duties for the month of November amount to $275,866.27, being duty, $132,917.47; Chinese, $142,907; other imports, $41.80. The total for October this year was $163,486.43, and for November last year, $146,098.62.

During the month all employés of the British Columbia Electric Railway Company who have been in the employ of the Company for two years, received the Company's annual bonus, amounting to $58 per man. Last year the amount was $66.78. Hereafter, the bonus system will be abolished, the men having applied for and having been granted an increase of pay, which they considered would be more satisfactory to all concerned.

The transfer of the business of the Pacific Whaling Company to the Canadian Northern Pacific Whaling Company for the sum of $1,000,000 has been completed.

A new lumber mill with a capacity of 25,000 to 30,000 feet per day is in operation at Tyee Siding on the Esquimalt & Nanaimo Railway, known as the Tyee-Sidney Lumber Mill, owned by the Vancouver Island Mining & Development Company, of Victoria.

The new power house and plant of the British Columbia Electric Railway Company, located at Jordan river, is almost completed, and it is expected will be in operation about April 1. It is expected that when the plant is running in order the cost of electric power for both lighting and manufacturing purposes will be reduced to one-half the present rates, thereby giving Victoria and surrounding districts rates as low, if not lower, than any other city in Canada. The cost of the plant, including power house, dams, reservoirs, pole line, &c., will be about $1,500,000. A large staff of white men, varying from 500 to 1,200 have been employed for the past eighteen months constructing the various works.

The entire teaching staff of the High School have been granted a substantial increase in salary.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The total salmon pack of British Columbia for the season of 1910 was 762,201 cases. These were divided among the principal fishing districts as follows:—

Fraser river, 223,148; Skeena river, 222,035; Rivers inlet, 129,398; Naas river, 39,720; Vancouver Island, 147,900. Total, 762,201.

While the pack is much lighter than last year, when 967,720 cases were put up, it must be remembered that 1909 was the big fourth year, and as compared with other years that have followed the fourth, 1910 holds its own quite well. For example, while the pack of 1905 reached the high mark of 1,167,460 cases, that of 1906 was only 629,460 cases, and there was a continuous faling off from that year till 1909. The biggest pack in the history of the province was in 1901, when 1,236,165 cases were packed. The only years when over a million cases were packed was 1898, when they reached 1,015,477, and 1905, when the pack was 1,167,460. The big falling off during the past year was in the Fraser river canneries, which only packed 223,148 cases, as against 567,203 cases in 1909. There is also a falling off of a little over a thousand cases in the Naas river; but the Skeena river, Rivers inlet and Vancouver Island all show substantial increases. In fact, in all these latter mentioned districts, the yield is greater than for any previous year.

Several of the sealing schooners of the local fleet are making preparations to start on their annual cruise.

Railway construction.—The plans for the first section of 20 miles of the Island division of the Canadian Northern Railway have been filed with the Provincial Government, and tenders for the work will be invited about the new year. The agreement between the railway and the Govenment provides that none but white labour shall be employed, and that standard wages and hours must be observed by the contractors. Active construction work will commence early in the spring.

CONDITION OF PARTICULAR TRADES.

The majority of the building trades reported work as fair, with prospects good. Painters reported work as being slack. Iron workers reported work as only fair in most of the shops. All woodworkers were fairly busy, and working full time. Tailors were busy but complained of competition from Chinese and Japanese shops. Garment workers reported work brisk. The printing and allied trades were busy, and no one idle. Leather workers were well employed. Jewellers were enjoying the usual holiday rush, and reported business ahead of previous years. Barbers, hotel and restaurant employés, laundry workers, clerks, salesmen, &c., were busy and reported increased trade. Considerable work was being done, but a number of unskilled labourers were idle.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. W. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour conditions in this district showed a slight improvement over last month, owing to better weather for outside workers, but there are a number of men looking for work, principally owing to large arrivals from Great Britain. Business men, wholesale and retail, report a very successful holiday trade. There have been no changes in hours of labour or rates of wages during the month.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The herring fishing season is now open, but catches so far have been light; there is a very small run, so far, and there are not nearly as many companies working as at this time last year.

Lumbering.—Work in the local sawmills is quiet, the mill in this city being closed down for some time, but the first of the year may show some improvement. There is not much work going on in the logging camps at present, although a good many of them are still running.

Mining.—The coal mines in the district are all working to their full capacity trying to keep up with the demand for

coal, which is almost larger than the supply.

Other industries.—The city is still doing a lot of work on the sewerage system and cement sidewalks, and will continue active as long as the weather permits. There are also several men and teams employed on the construction of a new dam at the waterworks. The city has done more work this year than ever before.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been well employed when weather permitted. Carpenters and joiners have been very active, there being still a large amount of new work on hand. Lathers and plasterers report work as fair. Painters and paperhangers are still active. Plumbers were busy, as in addition to the usual winter work there is a lot of new work on buildings being erected. Builders' labourers have not had a very steady month. Blacksmiths and carriage makers reported work as good for the time of year.

Printers have been fairly active. Cigar makers reported work as fair. Teamsters and expressmen, especially teamsters have been very active during the month. Unskilled labour has not been very steadily employed, owing largely to wet weather, and there are many idle men in the district.

REPORT OF INVESTIGATION REGARDING CONDITIONS IN CONSTRUCTION CAMPS ALONG THE LINE OF THE GRAND TRUNK PACIFIC RAILWAY WEST OF EDMONTON, ALTA.

IN the middle of the month of October the Department of Labour received a communication from the Edmonton Trades and Labour Council alleging improper treatment of men employed in connection with construction work on the Grand Trunk Pacific Railway west of Edmonton. Mr. F. J. Plant, an officer of the Department, was instructed to make an investigation of the complaint. The full text of Mr. Plant's report is as follows:—

To the Acting Deputy Minister of Labour,

SIR,—

I have the honour to submit the following report of the investigation which I have made in accordance with your instructions of November 11, 1910, into the complaint of the Edmonton Trades and Labour Council regarding the conditions in the construction camps along the line of the Grand Trunk Pacific Railway west of Edmonton, and other matters relative thereto.

The Complaint.

The communication containing the formal complaint is as follows:—

"*Edmonton Trades and Labour Council,*
"*P.O. Box* 1565

EDMONTON, ALTA., October 10,1910.

"HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa.

"DEAR SIR,—

"I have been instructed by the above Council to bring to your attention the disgraceful conditions obtaining in the construction camps along the line of the Grand Trunk Pacific Railway west of this city. Conditions have been going from bad to worse for some months, but the present case (a copy of the evidence in which I am enclosing) has served to direct public attention to the matter, which amounts practically to a scandal. It has been the custom of the contractors to hire men through the employment agencies in Winnipeg and the East, giving no idea of the conditions obtaining at the camps, lock them in box cars with insufficient food and frequently leave them stranded for days together at some remote place on the line. When in desperation the men left the camps, they were given a time check and left to make the best of their way to Edmonton, and there wait for six weeks or two months

for their pay cheques. In scores of cases this summer the Board of United Aids of this city (on which body this Council has a representative) has had to advance money to these men to tide them over till the pay cheques came in, in addition to the large numbers of men who have been sent by the Aids employment office to other work.

"In addition to this, typhoid fever has been epidemic in the camps all summer, and many men have died, of whom it has been impossible to obtain any definite information, in addition to the scores of cases treated in the city hospitals.

"We believe that this is a matter calling for a thorough investigation by your Department, seeing that the road is being built largely by Government funds, and hope to see you take the matter up at once.

"Yours faithfully,

(*Signed*) T. H. CLARK,
Secretary."

(The copy of the evidence referred to in the above had reference to a case in which the contracting firm of Foley, Welch & Stewart charged a number of men with breaking their contracts in refusing to go to work after having signed contracts and having their railway fares advanced from Winnipeg to Edmonton.)

This matter will be dealt with later in the present report.

The Secretary of the Trades and Labour Congress of Canada wrote supporting the claim of the Edmonton Trades and Labour Council for an investigation in the following letter:—

"*Trades and Labour Congress of Canada,*

"OTTAWA, ONT., October 19, 1910.

"HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa, Ont.

"DEAR MR. KING,—

"I am in receipt of a letter from T. H. Clark, Secretary Trades and Labour Council, Edmonton, Alta., directing the attention of the Congress to the alleged mal-treatment of men by the contractors doing work on the constructon of the Grand Trunk Pacific, west of that city.

"May I suggest to you the advisability of making inquiry as to the truth, or other wise, of these allegations. It is certainly very desirable in the public interest.

"Thanking you in advance in anticipation of a compliance with the request contained in this communication.

"Yours very respectfully,

(*Signed*) P. M. DRAPER."

Before dealing with the complaints it may be as well to explain that the contractors for the grade work on the section of the Grand Trunk Pacific Railway west of Edmonton, as far as the Yellowhead Pass, are Foley, Welch & Stewart, and that although there are a number of subcontractors, all the construction camps along the line are provisioned by the main contractors, who also furnish the hospital accommodation.

The laying of the ties and rails, as well as the ballasting of the road, is undertaken by the Grand Trunk Pacific Railway Company itself. The men employed at this work are accommodated in what are called boarding cars, the firm of Peterson & Fells having the contract of catering.

As will be observed, the complaint alleged (1) disgraceful conditions in the construction camps along the line of the Grand Trunk Pacific Railway, west of Edmonton; (2) inadequacy of food and accommodation furnished to workmen while en route to employment; (3) delay in payment of wages; (4) an epidemic of typhoid fever. This report will, therefore, deal with the complaints in the above order.

Inquiry in Edmonton.

On my arrival in Edmonton on the evening of November 16, I met Mr. T. H. Clark, the Secretary of the Edmonton Trades and Labour Council. I inquired if he had any specific complaints or evidence to submit in substantiation of the allegations contained in his letter of October 10, 1910, to the Honourable the Minister of Labour. Mr. Clark replied in the negative, but promised to do what he could to bring forward any evidence which he might be able to secure during my stay in the city.

It was announced in the Edmonton local press that I was in the city for the purpose of making an investigation into the alleged ill-treatment of workmen engaged in construction work on the line of the Grand Trunk Pacific Railway west of Edmonton, for the Minister of Labour, and that any persons who had complaints to submit were invited to do so. To this request only two charges were made—one regarding the accommodation of workmen in the tie gangs of the Grand Trunk Pacific Railway Company, and the other as to food supplied to a workman while an inmate at the grade contractor's hospital at Prairie Creek. Both of these complaints are dealt with in the present report.

I remained in Edmonton from the evening of November 16 until the morning of the 21, during which time I called on a number of persons with the object of affording to those interested an opportunity of substantiating, if possible, the charges made in the communication of the Edmonton Trades and Labour Council, above referred to.

Among others called on was the Edmonton and District Council of United Aids, a charitable organization which administers the city's poor relief law. This organization, early in October, wrote to the Commissioners of Edmonton calling their attention to newspaper reports of alleged inhuman treatment of men employed on the construction work along the line of the Grand Trunk Pacific Railway, west of Edmonton. On the strength of this letter, a communication was sent to Mr. Chas. M. Hays, President of the Grand Trunk Pacific Railway Company, directing his attention to the said reports. In reply, Mr. Hays informed the Commissioners that he was ready to hear and deal with any specific charges, but that he did not consider newspaper reports, which were evidently published with a desire for sensationalism, as coming within that category.

Believing that I might be able to secure some information from the United Aids, I called on Mr. Turnbull, the Secretary, but he had no direct evidence to offer as to camp conditions. Of two young men whom he had advised to go on construction work, one when he had arrived at Edson, on the Grand Trunk Pacific Railway line, 125 miles west of Edmonton, had turned back. The other had, however, continued on his way and gone to work. Mr. Turnbull had since received word that the latter young man was receiving $50 per month and board, and was well pleased with his treatment.

On a second visit to the United Aids, on Friday evening, November 15, I met a number of the members of the Executive Committee. On this occasion I renewed my request for information as to specific cases of ill-treatment of men in the construction camps, but no one present was able to furnish any. On the other hand, when I mentioned that I had spoken to men who had worked in the camps and were going back to seek re-employment, Mr. Kenway an Executive member present, stated that he himself knew a man who had been employed on grade construction work and was going back for re-employment.

I also visited the Canadian Northern Railway depot daily, where I met men who had been employed on Grand Trunk Pacific Railway construction work during the past summer. None of those questioned had any complaints to make, and in many cases the men were going to seek re-employment for the winter.

Opinions re Camp Condition

Others interviewed by me, who had either been in the camps themselves some time during the past summer, or had received reports from those who had visited them, made the following statements:—

Inspector Worsley, of Royal Northwest Mounted Police, Alta., believed conditions in the camps to be good, according to the reports he had heard.

W. E. Mann, Divisional Engineer, Grand Trunk Pacific Railway, Edmonton: All the contractors' camps along the line were in good shape. The men were well looked after. The food was good and substantial.

Louis Johnson, Edmonton: Had worked in construction work, was well satisfied

with treatment. Was going back to work in a short time.

Mr. Cavanagh, of the White Employment Agency, Edmonton: Had heard no complaints *re* camp conditions. He had sent men into the camps for the third time.

Dr. Hislop, Grand Trunk Pacific Railway physician, Edmonton: In nearly all cases where men had been taken ill while employed in camps and attended to by him, they had returned to their former employment upon convalescence.

Dr. A. E. Clendenan, Public Health Inspector, Edmonton: Had travelled over the line west of Edmonton as far as Moose Lake, B.C., and found the camps in good condition; men well fed. Had heard no complaints.

Alfred Miller, Edmonton: Had worked in camp at mile 39. Had no complaint to make regarding camp conditions. Intended to seek re-employment on the line, for the winter.

Harry O'Hanlon, who came from Omaha, Neb., to work for Shirley & Phelan, sub-contractors for Foley, Welch & Stewart, and who had had experience on United States railway construction: Had been employed on grade construction west of Edson all last summer. The camp he was in was the best he had ever seen. Mr. O'Hanlon intended to return to work on the grade all winter.

Fred. Burgess, representative of Woods Limited, Winnipeg, who had had occasion to visit some of the construction camps: Had eaten and slept in the camps. The food was good, well cooked, and there was plenty of it.

Officer Wells, Royal North-west Mounted Police, Edson: Had been through all the camps quite recently and they were in what he considered good condition. The food was good, and the Mounted Police were always glad to dine in Foley, Welch & Stewart's camps.

Inspector Raven, Royal North-west Mounted Police, Edson: Believed the camps were in good condition. No complaints, as far as he knew, had been made to the officers under his charge.

Simeon Humphries, who had worked on the grade construction since last January: Had been employed on railway construction for twenty-two years, and the camps of Foley, Welch & Stewart, on the present contract, are the best he has ever seen.

J. McLaggan, Superintendent of Jasper Park, a forest reserve: The camps he had passed through from time to time were, he considered, kept in good condition.

Personal Inspection of Camps.

After securing what information I could in Edmonton, I went to Wolf Creek, Alta., a distance of 117 miles west of Edmonton, at which point the head offices of the firm of Foley, Welch & Stewart, for the mountain division of the Grand Trunk Pacific Railway, are at present located. Here I met Mr. H. J. Fetter, the superintendent for Foley, Welch & Stewart, and Mr. J. Roberts, the accountant, both of whom were very willing to supply any information desired and were pleased to learn that I intended to make a personal inspection of the camps then in operation. Mr. Fetter accorded every facility to me to reach and inspect the camps.

Before giving a description of the camps visited and the condition in which I found them, I desire to state the terms, etc., as explained by the contracting company, under which the occupants of these camps accept employment. The men are for the most part engaged by employment agencies in different localities. Sometimes the men pay their own fares as far as the railway will carry them. In other cases when there is a keen demand for men, the contractors advance the fares, the amount being deducted from the first month's pay. The men are expected to provide their own food during the journey until they arrive at Edson. From this point meals are provided gratis along the line until the men reach the camps in which they are to be employed, to which point they are told they have to walk. When men are on the road over night, they are given sleeping accommodation at places known as road houses. The baggage of the men employed is transferred free of cost from the end of the railway to the camps where they are to work. Pay commences when the employé reports for

duty at the camp, the minimum rate being $40 per month and board, with time-and-a-half for overtime, and no deductions on account of stoppage of work owing to inclement weather. The hours of labour are ten per day, with an hour at noon, except in the summer time, when work ceases for two hours at mid-day. From the monthly pay $1 is deducted for hospital and medical fees, which entitles the workman to hospital treatment and medicine. A mail service is provided, two deliveries a week being made between Wolf Creek and 50 miles further west, and one a week to points beyond where work is in progress. Those who desire to avail themselves of this service are charged 25 cents per month.

The first camp visited was at mile 37, (Steamshovel Camp) 37 miles from Wolfe Creek, Alta., at which point the mountain division begins. This camp was situated on high sloping ground. The well from which the water for camp purposes was drawn was a considerable distance above the stables, and the closet for the use of the men was separated from the camp by at least 500 feet. The men are housed in tents, the sleeping bunks for the most part being constructed of limbs of trees, on which straw is spread for bedding. Each man provides his own bed clothing, which usually consists of heavy blankets. Each tent is provided with a stove of good size, the heat from which keeps the tent quite comfortable. In inspecting the sleeping quarters, I observed that some of the tents presented a better appearance than others, no doubt indicating the tastes of the occupants. There is plenty of cut wood which is kept in a convenient place. The dining hall is a large tent, in which rows of tables and seats are provided. The cook house occupies a portion of this tent, but is separated by a canvas wall. In this camp about 100 men are accommodated. There is a wire covered meat house in which all the meats are stored. The contractors have a store in which a supply of blankets, clothing, boots, overshoes, tobacco, &c., are on sale at prices which I do not consider exorbitant. In this store is also a chest in which a stock of medicinal supplies are kept for use of workmen. There is a telephone system in operation with connection between each camp and hospital along the line. I mingled with the men while at this camp, at which I had two meals and remained over night. I questioned a number of men who had been in the camp for periods varying from one to eight months, and no one had any grievance as to treatment, food or accommodation. One complaint, however, which was made was that the supply of medicine was not kept up as it should be, and that the camp had not in many months been visited by a doctor.

At supper time I went into the dining tent with the men and had the evening meal. The menu consisted of meat pie, cold roast beef, tea buns, bread and butter, apple pie, prunes, cookies, pan cakes, layer cake, tea and coffee, with milk and sugar. For breakfast oatmeal porridge with cream and sugar, beef steak, toast, bread and butter, apricots, pan cakes and cookies. The food was well cooked and there was plenty of it. There was an ample supply of knives, forks and spoons.

Supper call, morning call, and breakfast call were given on a large triangle which could be heard all over the camp. At seven o'clock the camp foreman made a round of the tents, calling "All out," indicating that it was time to commence work.

The next camp inspected was at mile 37 (bridge men's camp), where I had dinner with the men. There was roast beef, boiled beef, potatoes, corn, beans, bread and butter, pies, cakes, tea and coffee, with milk and sugar. About fifty men are employed and those whom I questioned had no complaints to make. Equipment about the same as in the camp at mile 37.

Other camps visited were those at mile 57, where forty men were accommodated; at mile 63 where there was 100 men, and two camps at mile 65, Prairie Creek, (grade camp with 100 men and bridgemen's camp with sixty men.) All these camps were situated with a view to sanitation and I found the accommodation and equipment similar to that provided in other camps previously in-

spected. I had two meals at camp at mile 63, where I found a good supply and variety of food, including plenty of fresh meat.

No complaints regarding camp conditions or treatment were made by these interrogated.

While each camp is supplied with a meat house I observed that the meat in some of them was not hung on the hooks provided for this purpose. I would, therefore, suggest that those in charge of each camp be instructed to have the meat hung up immediately on delivery, and every precaution taken to prevent the same from becoming contaminated.

I believe that the decorum of the camps would be improved by having the call for commencement of work given in the same manner as the meal calls instead of having the foreman make a round of the tents making verbal announcement to the men.

Alleged Inadequacy of Food and Accommodation.

The clause in the letter from the Edmonton Trades and Labour Council alleging inadequacy of food and accommodation says: "It has been the custom of the contractors to hire men through the employment agencies in Winnipeg and the East, giving no idea of the conditions obtaining at the camps, lock them in box cars with insufficient food and frequently leave them stranded for days together at some remote place on the line."

In order to endeavour to verify this statement I remained in Winnipeg for some time and interviewed those who might be able to furnish some information. I learned that large numbers of men have been hired through employment agencies in Winnipeg to work on Grand Trunk Pacific construction work for Foley, Welch & Stewart. Each man hired, signed a contract made out by the employment agency for which a fee of $1 was charged which specified the nature of work, place of employment and the rate of wages. Two of the agents on whom I called informed me that they had instructed all the men whom they had employed from time to time, to work for Foley, Welch & Stewart, that they should provide themselves with food to sustain them during the journey to the place of employment, which occupied about two days. Other agents who had also hired men for Foley, Welch & Stewart refused to give any information. Upon inquiry at the Canadian Northern Railway station at Winnipeg the depot from which all Grand Trunk Pacific passenger trains depart I was informed that never had any box cars containing men been sent out from that place for Edmonton. The Company always provided colonist cars for the transportation of the men. This statement was corroborated by the policeman at the Canadian Northern Railway station in Edmonton, at which depot all Grand Trunk Pacific passenger trains arrive.

The charge of insufficiency of food being supplied to workmen was apparently made at the time when a number of men who were brought by Foley, Welch & Stewart from Winnipeg to work on construction were summoned for violation of contract. It appears that on September 27 and October 7, two lots of men of 167 and 139 respectively, arrived from Winnipeg on the regular Grand Trunk Pacific trains in colonist cars, the journey to Edmonton, a distance of 792 miles occupying 30 hours. From Edmonton station the cars containing the men to the Grand Trunk Pacific yard, a distance of about three miles, and allowed to remain there until the following morning at 6:30, when they were attached to the regular train for Edson, a distance of 125 miles, where the men arrived about 8 o'clock in the evening. The fare from Winnipeg to Edson, $10 for each of the men in these two parties were advanced by the contractors. These men, the contractors presumed, were to supply their own food en route to Edson. Mr. G. A. Latter, an employé of Foley, Welch & Stewart who had accompanied these gangs, when questioned by me as to whether or not he had warned the men to take provisions with them, stated that he had told them to do so; many had food with them; others had bottles of liquor, which they claimed were all they desired. Of the first lot of

167 men, nine were summoned before Inspector Worsley, of the Royal North-west Mounted Police, at Edmonton, Alta. In the evidence given at the trial on October 1st, for violation of contract for refusing to go to work, it was stated that there were no complaints until the men reached Edmonton. There they wanted to get out of the cars which had been locked upon arrival at the station. The cars were not locked while en route or when they were in the Grand Trunk Pacific switching yard at Edmonton. The train had stopped at all division points between Winnipeg and Edmonton where there were refreshments on sale, as well as at Stony Plain, a point between Edmonton and Edson, where the men had had an opportunity to buy food. In the testimony it was stated that several of the men were short of food on the journey. At Edson the men were given restaurant tickets entitling them to supper. Some of the men complained about the food furnished while others stated that they were compelled to sleep in box cars or poorly ventilated bunk houses. The baggage of the men had been put off the cars at Edson by the train men in the rain and allowed to remain in the mud all night. The men also stated that no one for the firm had told them to go to work the next morning. The action was dismissed by Inspector Worsley who held that the men had not been sufficiently instructed as to where their work was or when they would be sent to it. The costs in this action amounting to $2.50, were paid by the complainant.

On October 9th, at Wolf Creek, fourteen of the second lot of 139 men were proceeded against for neglecting to go to work, when requested to do so. The evidence produced at the trial showed that these men were engaged at Winnipeg by an employment agent. Their fares of $10 were advanced, to be deducted from the first month's pay. On arrival at Edson the men were met at the station and taken to the office of Foley, Welch & Stewart, where they signed their identification cards. They were then given a meal ticket to secure supper, after which they were shown where to sleep. In the morning they were given their breakfast. Their baggage was handed to them, but they would not go to work. Ten men pleaded guilty, while four pleaded not guilty, and set up as a defence that they heard there was much sickness in the camps, and also that they had not been able to get enough to eat between Edmonton and Edson. Inspector C. H. H. Sweetapple, of the Royal North-west Mounted Police, before whom the case was heard, found the accused guilty under the Masters and Servants' Ordinance of the Northwest Territories, and impoesd a fine of $10 and costs amounting to $1.25, and in default of payment fourteen days imprisonment in Royal North-west Mounted Police guard room at Fort Saskatchewan. One of the accused paid the fine. One other who did not go to work, claiming that he was ill, was not proceeded against. The contractors offered him free treatment at their hospital, but he declined.

From the complaints made at both of the above trials, notwithstanding that the firm of Foley, Welch & Stewart disclaimed responsibility for providing the men with food during the journey from Winnipeg to Edson, it would appear that many of the men engaged by the employment agencies in Winnipeg understood that they would be fed by the contractors and suffered hardship in consequence. In corroboration of this I had statements from two men at Camp 63, who came in the second party from Winnipeg to the effect that they had understood the man in charge of the gang to say that they would be furnished with food en route. They also complained of the water tanks in the cars being emptied soon after leaving Edmonton and not being refilled during the journey to Edson. This matter was also reported to me in Edmonton. (These two men at Camp 63 were satisfied with the work and treatment accorded them in the camp.)

The Contractors denied to me any responsibility for the men being locked in the cars during any part of the journey. The door of the men's car adjoining the regular passenger coaches they understood had been kept fastened by the

train officials, to prevent the men from wandering through the train. The other doors of the men's cars were not kept locked at any time, except when the trains were nearing the Edmonton station, and then only until the train had been run from the Canadian Northern Railway station to the Grand Trunk Pacific yard, a distance of about three miles. This was said to have been done so as to prevent any of the men being left behind.

During the past season, according to the statements of the contractors representatives, there have been approximately 800 cases of men whose fares had been advanced, deserting from the trains whilst en route to Edson or vicinity, representing a monetary less of about $6,000. In the case of men accustomed to work on railroad construction the conditions of employment are usually well known, and they can provide for themselves accordingly, but in the case of others who are going to such employment for the first time, care should be taken that they are fully informed before hand as to what is required in respect of food, &c., during the journey. The contractors claim that they believe many men engage for work and get their fares advanced, but have no intention of fulfilling their contracts. While this may be true, I consider that possibly some of the men who desert are those who have been under the impression that they were to be fed by the contractors while en route, and finding that this is not to be done, and not having money with which to buy food, become discouraged.

As above stated the contractors claim a monetary loss of about $6,000 through the desertion of men whose fares have been advanced. It would be in the interests of the firm itself to minimize the number of desertions and thus to reduce the financial loss. I believe that with a proper system for providing the men with food while en route when the journey takes more than one day, the leakages would be very much reduced and would possibly offset the additional expense involved.

Another way in which the service to employés could be materially improved is by providing a proper baggage checking system, whereby the baggage of the men would be taken charge of and checked from the point of entrainment and turned over to the owners at the respective camps where they have been given employment. While this system would ensure the safe transmission of baggage, it would also, in my opinion, ensure the owner undertaking to do the work for which he had been engaged, and lessen the likelihood of his deserting.

At all points where men are handled or are compelled to remain over night when they leave the cars at the end of the rail journey preparatory to undertaking the walk to the place of operations, ample housing and sleeping accommodation should be furnished.

The railway company officials should also be compelled to provide an ample supply of drinking water in the cars during the journey west of Edmonton, and thus prevent any complaints on this account.

Alleged Delay in Payment of Wages.

In reference to the alleged delay in payment of wages, I called on the Edmonton and District Council of United Aids who, it is stated in the complaint, had in scores of cases last summer had to advance money to men till their pay cheques were recevied from the Grand Trunk Pacific Railway Company. In support of this Mr. Thos. R. Turnbull, Secretary of the United Aids, and other members of the organization, assured me that in many cases the society had assisted men who had been compelled to wait for the payment of their time checks. In some instances where the men had other work waiting for them the time checks had been left in the custody of the United Aids, who looked after the securing of the pay cheques and forwarded the same to the addresses of the payees, who in most cases promptly made payment to the United Aids for assistance rendered. In some instances, however, legal action had to be threatened before the Association was reimbursed. Mr. Turnbull also stated that while there had been these delays in payment, he believed that in

many cases the men themselves were to blame, owing to the fact that they neglected to comply with the regulations governing payment of wages.

In order to ascertain to what extent legal proceedings had been instituted to recover wages, I called on Magistrate Cowan and Mr. D. F. Byers, who was acting magistrate for a few months during Mr. Cowan's absence. With the exception of the case of six men of the Grand Trunk Pacific Railway telegraph gang, the records did not show any other actions having been taken during the season against the Grand Trunk Pacific Railway Company, or any of the contractors on the line. The case of three men was brought to the attention of Mr. E. J. Chamberlin, Vice-President and General Manager of the Grand Trunk Pacific Railway Company, who communicated with the Manager of Telegraphs in reference thereto. The following correspondence will show the cause of the police court case, and the desire of the Company to avoid a repetition of the delay:—

(COPY.)

"WINNIPEG, MAN., October 4, 1910.

"MR. E. J. CHAMBERLIN,
Vice-President and General Manager.

"DEAR SIR,—

"Replying to your letter of October 3, file 218.6. It has been the custom to furnish our City Agent at Edmonton with blank Discharge Tickets, and heretofore have not been called on to issue more than three or four during any month, on Telegraph Department account.

"It appears that out of our construction gang consisting of about twenty men, which arrived at Edmonton from Camrose and Tofield, on the night of Friday, the twenty-third ultimo, thirteen men decided to quit the service, practically without notice, and presented their identification slips at noon, Saturday, the twenty-fourth.

"The wages claimed were verified by wire, our City Agent was instructed to issue all checks on hand, and a further supply was mailed by No. 1, Sunday, the twenty-fifth, reaching Edmonton the night of the twenty-sixth, but in the meantime several of the men had taken action in the Police Court.

"The balance of the checks were issued to the men on Tuesday morning, the twenty-seventh. The large number of men unexpectedly claiming wages was the sole cause for the trifling delay experienced.

"Yours truly,

(*Signed*) A. B. SMITH,
"*Manager of Telegraphs.*"

(COPY.)

"WINNIPEG, MAN., October 5, 1910.

"MR. A. B. SMITH,
Manager of Telegraphs.

"DEAR SIR,—

"Referring to yours of the fourth, relative to trouble experienced by some of your men in obtaining prompt payment of wages due, and trust you have now arranged for an ample supply of discharge tickets to be kept on hand at the different points where there may be occasion to use them.

"Yours truly,

(*Signed*) E. J. CHAMBERLIN,
"*Vice-President and General Manager.*"

Police Magistrate Cowan informed me that he had had men complain to him that they could not get the money due them, and wished to take action against the Company, but that he had counselled them to be patient for a day or two in order to give the officials an opportunity to get the time-slips from the foremen under whom they had been working, and that in all such cases, in the course of a few days, the money was forthcoming.

As stated in a former portion of this report, the Grand Trunk Pacific Railway Company is doing the work of track laying and ballasting, the grade work being performed under contract by the firm of Foley, Welch & Stewart. The system of wage-payment of the former, as explained to me is as follows: Upon a man accepting employment with the Company he is given an identification slip which bears a number corresponding to that which he

has been given on the pay-roll. These identification slips are renewed monthly and are of different colors, designating each of the twelve calendar months. Should an employé leave or be dismissed from the Company's service before the end of the month, a foreman's discharge check giving the hours worked, rate of pay, and amount due after deduction for board has been made, is filled out. Two stubs are also filled out with the same particulars. The form has to be o.k'd by the roadmaster, who forwards the same to the official authorized to issue pay cheques. There are five pay offices in Edmonton, at which Grand Trunk Pacific Railway Company discharge checks are honoured upon identification slips being presented, viz.: Mr. W. H. Olver issues cheques for the operating and construction department; Mr. Corregan, for the telegraph department; Mr. W. E. Mann, for the engineering department; Mr. A. Bell, for the mechanical department; and Mr. D. Robertson, for the stores department. As these discharge checks, after being made out and certified to, have to be forwarded by mail it frequently happens that the person in whose favour the check has been issued reaches the paying office two or three days before the arrival of the duly certified checks, as there are only three trains per week into Edmonton from Edson. Where a man continues on the work until the end of the month his time is entered on the monthly pay-sheet and forwarded to headquarters, at Winnipeg, from whence, on the fifteenth of each month, the pay-car is sent out to all points along the line, stopping wherever any man may be working, and the pay cheques issued to all whose names appear on the roll.

From correspondence which I had been given access to while in Winnipeg, by Mr. C. W. Gage, assistant to the Vice-President and General Manager of the Grand Trunk Pacific, Railway Company I observed that as early as December of last year Mr. H. H. Brewer, General Superintendent, had addressed communications to Mr. C. Chalmers, agent at Edmonton, Alta., and to Mr. P. H. McFadden, General Roadmaster, Melville, Sask., giving instructions as to how discharge tickets should be made out in order to avoid any unreasonable delay in the issuance of pay cheques. Some cases were brought to my attention where the men had continued in the employ of the Company until the monthly pay-roll had been sent to Winnipeg, and then left and came to Edmonton and demanded their money. In the ordinary course these former workmen could not secure what was due them until the pay-car arrived, possibly not for a week or ten days, but the official at Edmonton had through the use of the telegraph found out the amounts due, had the names cancelled on the monthly pay-list, and issued pay cheques in the course of one or two days. It was also related to me that during the season a number of men lost their identification slips. This occasioned delay in payment of wages, but the communication necessary in such cases had been carried on by telegraph in order to expedite payment.

While it would appear that there have been some delays in payment of wages to Grand Trunk Pacific Railway workmen, the Company has apparently endeavoured to overcome the difficulty.

Where men leave the Company's service it might be advisable for the foreman to state explicitly the time when the discharge ticket would be expected to reach the office of the person authorized to issue pay cheques, in order to, is possible, eliminate the disappointment consequent on the arrival of the payee in advance of the time checks. Where any considerable number of men have been discharged, it is only reasonable to expect that there should be some delay, as the time checks have to be made up in triplicate before being sent to the pay-office, but the officials who handle these time checks should be urged to make provision for payment as speedily as possible.

The employés of Foley, Welch & Stewart are paid monthly by cheque, at the Company's office, upon presentation of identification forms, which give the employés name, pay-roll number, and amount due, and must be signed by the payee. If a workman leaves or is dismissed from the contractor's service before the close of the month a time certificate is issued, which is honoured at the

office of the Company at any time during working hours. I did not hear of any complaints regarding delay in payment of wages by the contractors, either in Edmonton, or along the line.

Alleged Epidemic of Typhoid Fever.

While conducting the inquiry in Edmonton I called on Dr. Whitelaw to ascertain to what extent fever patients had been brought from the railway construction camps to the hospitals in Edmonton. Medical health officer Dr. Whitelaw furnished me with a copy of the returns of typhoid fever patients who had been admitted into the city hospitals during the months of August, September and October, 1910, from places outside of Edmonton. In August there were twenty, September nineteen, and October twenty-one, making a total of sixty cases. All of these except two came from west of Edmonton. Five were recorded as coming from the camps of Foley, Welch & Stewart. As a large number were entered as having contracted the disease in Grand Trunk Pacific Railway camps, I interviewed Dr. J. A. Hislop, Grand Trunk Pacific Railway physician, who informed me that frequently patients when being admitted would claim that they came in from work on the Grand Trunk Pacific Railway, when as a matter of fact they had not been connected with the railway at all, and in support of this indicated on the list I had received from Dr. Whitelaw five such cases. There were in reality nine Grand Trunk Pacific Railway patients in the records furnished, which made fourteen fever cases of men employed on railway work west of Edmonton. The balance of forty-four were brought in from Edson and Wolfe Creek, and were not recorded as having contracted the disease in any railway or construction camp. Four of the forty-four were members of one family at Wolfe Creek.

To ascertain to what extent the men in the camps had been afflicted with sickness, and the accommodation which had been provided, I visited the hospitals at Big Eddy and Prairie Creek. The third hospital, that at mile 42, was closed at the time of my visit, the two being sufficient for present requirements. From the hospital records I learned that from April 1, 1910, to November 25, 1910, the Big Eddy and Prairie Creek hospitals had handled 416 in-patients, while mile 42 hospital, from its opening until the close, had twenty-six, a total of 442. Of these, 253 were fever cases, divided over the different hospitals as follows: Prairie Creek, 212; Big Eddy, fifteen; Mile 42, twenty-six. There were in all twenty-five deaths from fever, and from seven other causes. To form a fair estimate of the prevalency of illness and the death-rate it should be borne in mind that during the past season there have been, according to the contractor's statement, approximately 10,000 men employed for longer or shorter periods, with an average of about 2,500 employés in the camps at all times. Some of the doctors whom I met informed me that the fever from which most of the stricken employés suffered was not typhoid as popularly called, but was termed mountain fever. This disease, the physicians stated, in some cases only caused a feeling of illness for a short time, and came on very suddenly; in some cases the patient recovered in a couple of weeks, while others were quite sick for a month. There are rarely any relapses. Furthermore, the doctors did not believe that camp conditions were entirely responsible, because many men employed in isolated places, such as station men and freighters, were afflicted with the disease, as well as the Grand Trunk Pacific Railway engineers, whose camps did not contain more than three or four men, and were in most cases situated a considerable distance from the grade camps. The country through which the railway passes, I was informed, is usually infested with mosquitoes, but during the past season there was an entire absence of these pests. Flies in great numbers, however, were everywhere, and were a source of much annoyance, and in the opinions of the physicians were no doubt responsible in some measure for the spread of the fever.

Hospital Accommodation.

The buildings at Big Eddy and Prairie Creek are well constructed of logs, and at the time that I visited the hospitals, I

found everything neat and clean and the buildings were well heated. The bedsteads are of iron, with spring mattresses. During the summer many of the patients were accommodated in tents on canvas cots. Each hospital had a dispensary which was well supplied with drugs, while the Prairie Creek institution had a well-equipped operating-room. Books in which patients' names, relatives' names and addresses, &c., are entered are kept in each hospital, and similar bed-side charts to those used in the city hospitals are in use.

At Big Eddy hospital Dr. Baker is in charge with a staff of six orderlies and nurses. There were thirteen patients at the time of my visit, most of whom were nearly convalescent.

At Prairie Creek, Dr. Richardson is in charge, with Drs. Myers and Schillerberg assisting, and a staff of eight orderlies and nurses. There were thirty-three patients, about half of whom were in the convalescent class.

The hospitals were supplied with eggs, cocoa, malted milk and other nourishing foods.

The monthly cost of the staffs of the two hospitals now in operation is $1,155. The cost of maintenance and medicine could not be ascertained, but I was informed that it would amount to several thousand dollars. The contractors claim that there will be a very heavy loss in the hospital service for this year.

At Prairie Creek I met Engineer Smith, in charge of the Grand Trunk Pacific Railway engineering staff, who informed me that the engineers, ten in number, who had been treated for fever in the contractor's hospitals were well looked after, and paid a high tribute to the doctors in charge.

Complaint.

A complaint which I received during my stay in Edmonton regarding the hospital service on Messrs. Foley, Welch & Stewart's contract was in the form of a communication from Mr. William C. Kerry, of Edmonton, Alta., who stated that during his stay in the hospital at Prairie Creek he had been given sour bread to eat. He also stated that sick men had been given the work of washing towels, sheets, &c., as well as carrying wood and water. I brought this complaint to the attention of Dr. Richardson, who informed me that Mr. Kerry was a patient at the hospital from November 6 to 15, during which time he made no complaint to him, but that just previous to leaving the hospital, Mr. Kerry had made application for the position of laundryman at $45 per month and board, and because he did not receive it was much annoyed. The noon meal was just being prepared at the time of my visit and I went into the kitchen to ascertain what was being cooked. There was roast beef, boiled potatoes, rice and blanc mange. The cook informed me that bread was baked every day, that of the previous day's baking being used, and rarely was there any left over after all had been fed.

Grand Trunk Pacific Boarding Cars.

The complaint regarding accommodation of men working for the Grand Trunk Pacific Railway Company was made by Mr. H. T. Moddrel, who had worked in tie gang No. 1 for a few weeks, and had been discharged for refusing to do work in connection with transferring ties from box to flat cars. Mr. Moddrel considered the work dangerous, as one man who had been at the work had already fallen and injured himself. Mr. Moddrel stated that in the gang in which he was employed there were about thirty-six men, some of whom were compelled to sleep in box cars without windows or ventilation of any kind. One man who had some tools had bored holes in the car to permit of ventilation. The complainant also informed me that if he had not been discharged he would have remained on the work as long as it lasted.

On the journey from Edmonton to the end of steel, I took note of all boarding cars, and I failed to find any without windows. In fact, the equipment of gang No. 1 appeared to be better, if anything, than that of the others.

The boarding cars of the Grand Trunk Pacific Railway Company are cleaned out every day, and a doctor visits and inspects once a week the accommodation provided for the workmen.

Employment Agencies.

Before concluding this report I desire to call attention to what appears to me to be a misrepresentation on the part of some of the employment agencies in Winnipeg, who had sent men up to work as teamsters and labourers for Foley, Welch & Stewart. I secured a number of contracts made out by different employment agents in Winnipeg, in which it was stated that the work for which the person had been engaged was either in the vicinity of Wolfe Creek or Edson, to both of which points there is rail connection. Some of these contracts were made as late as September 23, 1910, when there was no work for teamsters or labourers in the localities mentioned. In fact, the scene of operations was much further west, from 40 to 50 miles. It is quite possible that men who expected to find their employment in the vicinity of Wolfe Creek or Edson would be disappointed upon their arrival to find that such was not the case, and could not well be blamed for expressing dissatisfaction. One of the agents in Winnipeg, however, who had engaged men, had it clearly stamped across the contract form that work was 100 miles west of McLeod river. This stream runs close to Wolfe Creek. This agent stated to me that he had always endeavoured to inform the prospective employés of the exact locality in which work was being carried on, and I would suggest to the contractors that all other agents who are requested to secure men for them in the future be instructed to give similar information.

Recommendations.

A matter which was brought to my attention was the difficulty experienced in securing postage stamps in the camps, some of the men who are desirous of writing to relatives or friends having to wait for days before being able to post their letters, I would recommend that where construction work is being carried on in districts remote from post offices that the contractors should be given licenses by the Post Office Department to sell postage stamps and post cards to their employés.

In conclusion, I desire to recommend that an inspector of railway construction, under the control of the Minister of Labour be appointed, with power to inspect camps and construction work, and to hear and investigate any complaints in connection therewith. Much of the railway construction work is necessarily carried on in parts remote from civilization, where it is difficult for workmen to secure speedy redress of any grievance. The appointment of a Government officer to make regular visits of inspection through these remote regions, to look after the welfare of the men engaged in this class of labour, would, I feel, inspire confidence among the workmen, and would also afford a much more ready method of investigating grievances than at present prevails.

I have the honour to be,

Sir,

Your obedient servant,

FRANK J. PLANT.

SETTLEMENT OF COMPLAINTS RE ALLEGED NON-PAYMENT OF WAGES IN CONNECTION WITH CONSTRUCTION OF THE ATLANTIC, QUEBEC AND WESTERN RAILWAY.

A letter was received in the Department of Labour on August 11, 1910, from the Honourable Rodolphe Lemieux, Postmaster-General, with which was enclosed a communication from Mr. Sylvain Lancup, of Little River, Quebec, in which complaint was made of alleged non-payment and short payment of wages due certain workmen for work performed in connection with the construction of the Atlantic, Quebec & Western Railway between Paspebiac and Gaspé.

In declarations made by employés working on the railway in question it was stated that wages had been withheld by one of the sub-contractors who had undertaken work for the New Canadian Company, Limited. This sub-contractor,

Peter Johnston by name, was operating in the vicinity of Brèche à Manon, and the outstanding claims against him related to non-payment and short payment of workmen, non-payment of hire of horses, non-payment of blacksmith's account, non-payment of doctor's fees, &c.; also it was alleged that wrong figures of the employés' time and rates of wages had been inserted in the pay-sheets.

Mr. Victor DuBreuil, one of the Fair Wages Officers, by instruction received from the Acting Deputy Minister of Labour, proceeded to Gaspé to investigate the cause of the complaints.

As the circumstances disclosed by the inquiry of Mr. DuBreuil appeared to indicate a breach of the subsidy contract with the Atlantic, Quebec and Western Railway, the matter was brought to the attention of the Honourable the Minister of Railways and Canals, in order that the necessary steps might be taken to secure a settlement of the outstanding claims.

On November 23, a letter was received in the Department from the General Manager of the Atlantic, Quebec & Western Railway, requesting the Minister to again send an officer to Gaspé in order to ascertain if all reliable claims had since been paid. Mr. DuBreuil was instructed accordingly, but before reaching Gaspé, was furnished by the General Manager of the Atlantic Quebec & Western Railway Company, with letters which the latter had received from the Mayor of Brèche à Manon, and also from the party who originally made the complaint on behalf of the workmen, in which it was stated that the matter had been satisfactorily settled, and that there would, therefore, be no necessity for Mr. DuBreuil to proceed to Gaspé. The General Eanager also assured the Department, on behalf of the Atlantic, Quebec & Western Railway Company, that should any reasonable complaints be made against the contractors, he would see that the same were settled immediately.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF DECEMBER, 1910.

Report Received.

DURING the month of December, the report was received of the Board of Conciliation and Investigation established in the case of the dispute between the Winnipeg Electric Railway Company and its conductors and motormen. A minority report was also submitted, bearing the signature of Mr. L. L. Peltier, member appointed on behalf of the employés concerned.

Other Proceedings Under the Act.

On July 2, an application was received in the Department for a Board of Conciliation and Investigation on behalf of the telegraphers, train despatchers, and station agents on the Intercolonial and Prince Edward Island Railways. In the application it was stated that the dispute arose out of the refusal of the Canadian Government Railways Managing Board to live up to the terms of the existing schedule of rules and rates of pay, and also its refusal to agree to certain proposed amendments to the same schedule. The number of employés concerned in this dispute was said to be 490.

At the request of the parties concerned the establishment of the Board was postponed as it was decided to hold conferences with a view of adjusting the differences in question. These conferences having failed to accomplish the desired result, a Board was established by the Minister of Labour on December 17, Mr. J. H. Gilmour, of Brockville, Ont., and Mr. J. G. O'Donoghue, of Toronto, Ont., being appointed members on the recommendation of the Managing Board and of the employés, respectively.

REPORT OF BOARD OF CONCILIATION AND INVESTIGATION IN THE DISPUTE BETWEEN THE WINNIPEG ELECTRIC RAILWAY COMPANY AND ITS CONDUCTORS AND MOTORMEN.

THE Minister of Labour received on December 13, the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Winnipeg Electric Railway Company and its conductors and motormen; on December 15, a minority report was also received, bearing the signature of Mr. L. L. Peltier, member appointed on behalf of the employés concerned.

The Board in this case was constituted as follows:—

Captain Wm. Robinson, of Winnipeg, Man., appointed on behalf of the employing Company; Mr. L. L. Peltier, of Fort William, Ont., appointed on behalf of the employés concerned; and Mr. W. J. Christie, of Winnipeg, Man., Chairman, appointed on the joint recommendation of the other two members of the Board.

The number of employés concerned in this dispute was given in the application as approximately 603.

The dispute related to the discharge of four employés whom the Company claimed had violated its rules by drinking while in uniform; the employés alleged, however, that it was a case of discrimination as the dismissed men were active members of the Amalgamated Association of Street and Railway Employés of America.

In its report the Board finds that the men had broken the Company's rules and that the Company was justified in their dismissal; also that the Company had not discriminated against any of the men. The Board also recommends that the reinstatement of the four men should be left to the judgement of the Company as the latter was financially responsible to the public for damages in case of injury or loss of life.

The minority report by Mr. L. L. Peltier, member appointed on behalf of the men, stated that the evidence showed that there existed a certain freedom of conduct among the employés while off duty and that they occasionally entered places where liquor was sold, and also occasionally drank intoxicating liquor. The dismissal of the four men without any previous personal warning by the Company aroused a strong suspicion among the men that discrimination had been shown and that the Company desired to get rid of two of the Union's most active official members. The minority report concluded by recommending that the men should withdraw the charge against the Company of discrimination; that the Company should reinstate the dismissed employés and institute a system of overseeing the men before going on duty; and that the Company should co-operate with its employés towards a better understanding.

The majority report of the Board not being acceptable to the employés, the men ceased work on the morning of December 16. A reference to the strike in question will be found elsewhere in the present issue of the *Labour Gazette*.

Report of Board.

The text of the majority report of the Board of Conciliation and Investigation in this matter is as follows:—

WINNIPEG, MAN.,
December 9, 1910.

To the Honourable
W. L. Mackenzie King,
Minister of Labour,
Ottawa, Ontario.

Sir:

In the matter of dispute between the employés of the Winnipeg Electric Railway Company and the Winnipeg Electric Railway Company your Board of Conciliation and Investigation beg respectfully to report as follows:—

The Board held its first meeting on the 14th day of November, A.D., 1910, and completed its work on the 9th day of December, A.D., 1910. The nature and cause of dispute is as follows:—

The employés claimed that the Company had discriminated against certain of the employés on account of said employés having taken a very active interest in the Street Railway Employés' Union, and have discharged some four men claiming that these men were seen in bar rooms and saloons while in uniform although not on duty. The Company claim to have a rule that employés while in uniform and off duty shall not enter any bar room or hotel for the purpose of drinking and claim that the men discharged were guilty of breaking this rule, which is denied by the men; and the men claim that the sole reason for the discharge of these men is that they are men who are very active in Union matters.

Every assistance was given by both the employés and the Management of the Company to bring out all the evidence bearing on the matter in dispute. We were pleased to find that the object of the Amalgamated Association of Street Railway Employés of America was to discourage in every way the use of intoxicating liquor and as the Company and its employés are responsible to the public for lives and injuries, it would be to the future benefit of both the employés and the Company to assist in every way to discourage the drinking habit and, therefore, minimize the possibility of accidents.

The Board decided to take evidence under oath and about forty-eight witnesses were examined. There were statements produced signed by about three hundred and fifty motormen and conductors to the effect that in their opinion, they were not breaking the rules of the Company by going into a hotel or bar room and drinking intoxicating liquor while wearing the uniform of the Company.

The following are the rules of the Company bearing on the cause in dispute:—

"Habits and personal conduct."

"5. The following acts are prohibited:

"(*a*) Drinking intoxicating liquors of any kind while on duty."

"(*b*) Entering any place where the same is sold as a beverage while in uniform or while on duty, except in case of necessity."

"(*c*) Contsant frequenting of drinking places."

"(*d*) Carrying intoxicating drinks about the person while on duty."

"(*e*) Carrying intoxicating drinks on the Company's premises at any time."

"(*f*) Indulging to excess in intoxicating liquors at any time."

"(*g*) Gambling in any form, including the laying of bets (and playing raffles) while upon the premises of the Company."

"(*h*) Smoking tobacco while on duty."

"(*i*) Smoking tobacco while off duty in any part of the Company's buildings, except in the conductors' or motormen's rooms."

"(*j*) Reading books or newspapers while on duty."

As the motormen and conductors are working under the above rules we cannot understand their interpretation of same to justify their going into a bar and drinking intoxicating liquor while wearing the uniform of the Company. The evidence went to show that every man employed as motorman or conductor receipted for a book of rules and regulations and that there was no complaint that they had any objections to same. There were about twenty-three motormen and conductors discharged for drinking intoxicating liquor between the first of July, A.D., 1909 and the first of October, A.D., 1910, and the evidence went to show that in these cases there were no complaints made as to wrongful dismissal. On October the 12th, A.D. 1910, three motormen and one conductor were dismissed from the Company's services, to which exception was taken, and which is the cause in dispute. From evidence taken and admissions of the four men dismissed, we are satisfied that they entered bar rooms where intoxicating liquors were sold and drank same while wearing the Company's uniform, which is prohibited by the Company's rules.

We find that the Company was justified in dismissing these four men, and we also find that there was nothing pro-

duced in the evidence to substantiate the charge that the Company had discriminated against any of the men. The Manager of the Company states that no motorman or conductor was ever dismissed from the Company's service, who was seen going into a hotel or bar room after his day's work was finished.

Your Board have seriously considered the matter of asking the Company to reinstate the dismissed motormen and conductor, but as the Company are finacially responsible to the public for damages in case of injuries or loss of life, we believe the matter should be left to the Company to decide on the merits of each individual case, as they have in the past disposed of similar cases.

The most recent rules that govern the use of intoxicating liquors are cited from a report of a Board of Conciliation and Investigation in a disupte between the Toronto Street Railway Company and its employés, dated the 29th day of August, A.D., 1910, which report states that for serious cases, including drunkenness, drinking in uniform or drinking on cars, employés may be suspended or dismissed at the discretion of the proper officials. These rules were accepted by both the Company and its employés.

All of which is respectfully submitted.

(*Sgd.*) W. J. CHRISTIE,
Chairman.

(*Sgd.*) WILLIAM ROBINSON,
For the Company.

Minority Report.

The text of the minority report in this matter is as follows:—

THE HONOURABLE MACKENZIE KING,
Minister of Labour,
Ottawa, Ont.

SIR,—

In the matter of the application of the Motormen and Conductors of the Winnipeg Electric Railway Company for the appointment of a Board under the provisions of the Industrial Disputes Act, to investigate and conciliate matters in dispute between themselves and the Winnipeg Electric Railway Company, I beg to submit to the Honourable the Minister of Labour this report in dissent to the majority report of the said Board.

The dispute, as shown in said application, grew out of the dismissal of four employés, members of Division 99 Street Railway Employés Union, two of said employés being active officers in the said Union. The dismissal was based upon the alleged violation of the Company's personal conduct rules, which I reproduce below, said infraction consisting of:

September 8.—Conductor No. 358 and motorman No. 133 on leaving their cars met conductor No. 636 and went to the Criterion Hotel, where No. 133 drank two brandies, No. 358 drank two port wines, and No. 636 drank gin and ginger beer. All three men were fully uniformed and had their badge numbers on caps.

September 21.—Conductor No. 123 and conductor No. 358 when going off duty at 11.45 A.M. met conductor No. 636, and went to the Criterion Hotel, where all parties took intoxicating liquor. All parties were fully uniformed.

October 4.—As motorman No. 133 was going off duty he met conductor No. 636, who was at that time in plain clothes, and went to the Criterion Hotel. Motorman No. 133 drank G. & W. whiskey, and No. 366, in plain clothes, drank gin and ginger beer. This was repeated twice.

October 11.—As conductor No. 358 came off duty he met conductor No. 636 who was in uniform, but wore a Christie stiff hat, and they went to the Criterion Hotel. No. 358 took the badge off his cap before entering, and put it in his pocket. No. 636 drank beer. No. 358 drank beer also. On the second treat No. 358 drank beer again, and No. 636 drank gin and ginger beer. These parties were fully uniformed with the exception of No. 358 who took his badge off his cap, and No. 636 wore street railway uniform, but did not wear any badge. No. 358 is Ruttle. Motorman No. 133 is Dunn, and No. 636 is Whelen.

The above charges were furnished the Board by the Company several days after its first meeting, and after repeated requests.

The above specific charges against these men were not to my mind, satisfactorily

proven. The allegation against conductor No. 358 and motorman No. 133 were denied under oath by both these men. No witnesses were offered by the Company in rebuttal to prove the charges given as having been committed on September 21. In fact, the evidence produced by the Company in support of the above charges was meagre and not entirely reliable, and in most cases it is a matter of one man's word against another's. However, your Department might find it of interest to go over the voluminous evidence taken, and thereby satisfy yourself that my statement as to the meagreness and unreliability of some of the evidence is warranted.

For obvious reasons, numbers of motormen and conductors' badges, as furnished by the Company, are given in lieu of names.

It has been customary for the employés to wear their uniforms off duty.

The following is the exact wording of the Company's rules relating to the question at issue:—

"*Rule* 5.—The following acts are prohibited:—

(*a*) Drinking intoxicating liquors of any kind while on duty.

(*b*) Entering any place where same is sold as a beverage, while in uniform or while on duty, exept in case of necessity.

(*c*) Constant frequenting of drinking places.

(*d*) Carrying intoxicating drinks about the person while on duty.

(*e*) Carrying intoxicating drinks in the Company's premises at any time.

(*f*) Indulging to excess in intoxicating liquors at any time.

Section (*a*) of Rule 5 is decidedly and admittedly proper, and is strongly endorsed by the employés. Evidence in abundance was furnished that the Union had refused to defend or intercede on behalf of those guilty of the violation of this section of Rule 5, also that the Company had reinstated men guilty of transgressing this section of the rule, although the Union had refused to intercede on their behalf.

(*b*) is manifestly not capable of literal enforcement, or at least it would be difficult to compel its observance. It debars employés, while in uniform, though off duty, from entering any place where intoxicating liquor is sold. As liquor is dispensed in nearly every room in a hotel it would debar employés from entering a hotel, while the word "necessity" in the rule gives wide latitude of interpretation.

(*c*) clearly conveys the idea that occasionally entering drinking places is permissible, and only habitual entering is prohibited. This allows a wide range of individual liberty.

(*d*) and (*e*) come under the same category as section (*a*), and has the approval of the employés.

Sections (*b*), (*c*) and (*f*) are not consistent with each other. (*f*) it will be seen leaves much to personal judgement and inclination.

To my mind, the unproven specific charges against these men come under the last mentioned section of the rule, which to quote again, reads "Indulging to excess in intoxicating liquors at any time." But assuming that these men were guilty of the charges preferred against them, they manifestly had not drank to excess. It may be worth while to point out that the existing agreement between the motormen and conductors and the Winnipeg Electric Railway Company was the finding of a board appointed under the Act, and whose decision was accepted by both parties. And I find from the stenographer's report of the proceedings of the said Board, under date of May, 1909, that the Company, through Mr. Phillips, their Manager, asked the Board to have the following clause incorporated in the said agreement, as Clause 25, namely, "Any motorman or conductor under the influence of drink when on duty, or drinking intoxicating liquors, or frequenting saloons or bar rooms while wearing any part of the Company's uniform, may be discharged;" but the Board did not consent, and therefore the clause was not incorporated into the working agreement. It will be seen that the proposed Clause 25 is more definite and in scope more drastic than the Company's rules quoted herein.

I find further that the Company's present rule book bears date of December 15, 1909. The question that arises here is, was Manager Phillips' desire to put

the above rule in the men's agreement an admission that the Company's own rules were indefinite and ambiguous, and especially sections (*b*), (*c*) and (*f*) wide open or nearly so; if this was the Manager's feeling, why did he not include this clause in the Company's rules issued some months later?

The evidence showed overwhelmingly that under the Company's rules and management there prevails a common usage and freedom of conduct among the employés while off duty, in uniform or otherwise, wherein the employés openly, unhesitatingly and feeling that they were privileged to do so, entered occasionally places where intoxicating liquors were sold, and drank intoxicating liquors occasionally. This custom prevailed not only among the motormen and conductors, but also among the Company's officers, as was proven under oath. It did not develop, in fact the evidence showed that the Company did not to any extent whatever use its prerogative of moral suasion or seek the co-operation of the Committees representing the men in individual cases in an effort to restrict even the excessive use of liquor. Therefore, what had been going on so openly so long, when checked or attempted to be checked by the dismissal of the four men in question, there developed a strong suspicion among the men that discrimination had been shown, and that the stringent method so suddenly employed without any previous personal warning by the Company, was prompted by its desire to get rid of two of the Union's most active official members. Further, the evidence established in my mind a conviction that the Company through its officers alone, without the aid of secret service agents, could have secured any day evidence of the fact that their employés did enter places where intoxicating liquors were sold, while off duty and in uniform, so that the employment of said secret service agents, upon whose reports the Company acted, was unnecessary, lends strength to the men's charge of discrimination, and has created a spirit of unrest and revolt among the Company's six or seven hundred employés.

And in addition to the sworn evidence, some 400 of the following statements, signed individually by the Company's motormen and conductors, were handed in to the Board and accepted by the Board in lieu of personal evidence.

"WINNIPEG, October 25, 1910.

"I, the undersigned, desire to make the following statement in lieu of personal evidence, which personal evidence I may not have the opportunity to give before the Board of Conciliation now about to investigate the dismissal of certain employés of the Winnipeg Electric Railway Company, the reasons for said dismissal being (as I understand) drinking in uniform.

I make statement in effect as follows: I have on various occasions gone into a hotel or saloon while in uniform for the purpose of taking a drink, and have felt perfectly free to do so as far as I understood and realized the rules of the Company in the matter of drinking in uniform. My impression and understanding of said rules was not that it carried a prohibition of taking a drink while in uniform, but only a prohibition of becoming drunk or getting under the visible influence of drink while on duty. I have never been under the influence of drink, but as stated before I sometimes have gone into a hotel for a drink, wearing uniform, and in doing this I did not feel that I was under chastisement by the Company to the extent even of reprimand, much less suspension or dismissal.

To this statement I truthfully subscribe.

(*Signed*) .....

The Company submitted a statement to the Board showing some twenty-three motormen and conductors as having been dismissed from the service of the Company from July 1, 1909, to October 1, 1910 for drinking intoxicating liquors. Under criticism, the statement was afterwards modified, and most of the men, it is alleged, were discharged for being intoxicated or drinking on duty, or coming on duty under the influence of liquor, and not for merely having entered a place where intoxicating liquors were sold while off duty, in uniform, and taking a drink.

Although some thirty-eight of the oldest employés testified on oath that the privilege always enjoyed by the men of moderate drinking—taking a drink on the way home, was the usual way of putting it—while off duty, whether in uniform or not, and that this usage was general among the employés, the staff as a whole is composed of temperate men, though not all teetotalers. (Again, this would apply similarly to any large body of men). Nevertheless, it should be, and is, the imperative and manifest duty of the Company and the men to give the public the largest possible measure of protection and best possible service. But this surely can be attained without either reflecting on the men or management or either, or taking from either liberty or movement and conduct off duty, so long as they behave themselves as good citizens. This protection can be given more effectually by the Company instituting a system of overseeing when the men report for duty, or at change-off points; thus the Company, at a moderate additional expense, could more effectually prohibit any employé going on a car unfit from any cause, than by ambiguous or unenforceable rules. What rule, for instance, can prevent an employé having intoxicating liquor in his home, a practice more dangerous than anything else, and to which above ambiguous rules or the arbitrary enforcement thereof would drive them; therefore overseeing going on, and on duty is to my mind the fairest and most effectual way of protecting the Company's property and the public from hazard.

I find further that Clause 17 of the men's working agreement with the Company provides as follows: "That when any motorman or conductor has been suspended or discharged from the service of the Company, and after investigation has been found not guilty of *sufficient cause* to warrant such discharge or suspension, he shall be reinstated and paid for all time lost." I especially draw your attention to the wording of this clause, "*found not guilty of sufficient cause to warrant such discharge or suspension he shall be reinstated and paid for all time lost.*" It will be seen from the charges against the dismissed men that even if guilty they had not gone beyond or transgressed section (*f*) of Rule 5, which refers to indulging to excess in intoxicating liquor *at any time*, and therefore that the men are justified under their agreement in maintaining that according to the provisions of Clause 17 of their agreement, if they have been found "not guilty of sufficient cause to warrant discharge, they shall be reinstated and paid for time lost."

I attach to this report, portion of the paragraphs from the official stenographer's report of the proceedings at the first meeting of the Board. I think that after perusing same you will bear me out in the contention that the procedure insisted upon by the management of the Street Railway Company was technical in its nature, and from the standpoint of conciliation, unfortunate. The Company had refused from the time of dismissal to furnish the three men, Dunn, Ruttle and Hall with specific charges, date, etc. The Company would not place these charges upon which it had based its action in dismissing the men, before the Board at its first meeting, but insisted upon using and did use the discharged men themselves, under oath, in an effort to prove the Company's contention that they had offended against the rules sometime. At the evidence given by the men they admitted having, in line with the prevailing custom among the employés, while in uniform and off duty, entered places where intoxicating liquors were sold, and occasionally drank intoxicating liquors, but in this admission they were only admitting that which the nearly 400 employés who signed the above statement had admitted, therefore the men feel that they have been discriminated against, and if the three men's admissions made under the circumstances I have recited are used against them it will but confirm them in their belief.

Manifestly, the conclusions reached herein are based upon local conditions, long existing usages among the men, the Company's rules, and the men's working agreement as assented to by the Com-

pany, and not as to rules embodied in working agreements between street railway employés and companies elsewhere.

In my efforts for conciliation I suggested, among other things, as a compromise having regard to all the circumstances, that the Board recommend the reinstatement of at least three of the dismissed men, namely Dunn, Ruttle and Hall, without pay for lost time, and subject to the men as a body consenting to a rule on personal conduct that would prevent future misunderstandings and would clearly state the limitations which should be put on the men's movements off duty and in uniform or otherwise. I believe the present to be an opportune time to reach such an agreement between the Company and its employés. The reinstatement of these men was also to be subject to the men withdrawing the charge of discrimination against the Company.

Having further regard to all the facts, as developed, and to the usage among the men, I am driven to the conclusion that the punishment was excessive, and in view of the strained relations existing between the Company and the men, and the evident imperative need of restoring harmony between the management and the men, so necessary to the maintenance of discipline and service, and in the interests of the public for whose comfort and convenience public service corporations are permitted to operate on the public streets, I feel it my duty to make the following recommendations with a view of affording an opportunity for further negotiations looking to an amicable settlement of the dispute:—

1. That the men withdraw the charge of discrimination against the Company.

2. That the Company reinstate the men dismissed without pay for lost time, subject to the men agreeing to a clause as part of their working agreement defining clearly the Company's personal conduct rules, whose ambiguity I have endeavoured to point out.

3. That the Company institute a system of overseeing the men going on duty.

4. That the Company through its management co-operate with its employés through their accredited representatives toward a better understanding and the wiping out of misunderstanding to each other's mutual interests and the public weal.

Finally, I beg respectfully to submit for your consideration the advisability of your Department using its resources in a further effort at conciliation, all of which I respectfully submit.

(*Signed*) L. L. PELTIER.

WINNIPEG, December 12, 1910.

INDUSTRIAL AND LABOUR CONDITIONS IN CANADA DURING 1910.

THE year 1910 may be characterized as one of general prosperity throughout Canada as a result of a continuance and acceleration of the buoyant tendency which was a feature of 1909. It will be remembered that in the latter year the process of recovery from the depression of the closing months of 1907 and the beginning of 1908 had become general. The effect of the past year was to accentuate this tendency, the year being more active and prosperous for general labour than any period since the phenomenal activity of 1906 and 1907. Some conservatism was expressed in the closing months, based on a reduction in the volume of business in the United States, but the immediate outlook was satisfactory, and the working class was entering upon the winter season under exceptionally prosperous circumstances.

Analyzing in brief the current industrial and trade prosperity, its leading features may be stated as follows:—

The Western agricultural yield of 1910 showed a falling off, but yields in Ontario and the Eastern Provinces were well maintained, and the prevailing high prices made the year a prosperous one for agriculture. Fishermen had on the whole a good year, and the lumbering industry showed considerable expansion. Mining outputs were heavy. Railway construction, as in the past two years, continued

to give employment to many thousands of men, and to exercise a far-reaching effect on the general market for labour. Transportation employés of all classes had a busy year, traffic returns and transportation companies' earnings showing large increases on the preceding year. The building year was, in the most important localities very active, and the total returns will probably equal or exceed previous records. A similar statement may be made with regard to the scale of municipal improvements. Indoor employment in the manufacturing industry was more active than at any time since 1906, a considerable expansion in the industry and a constant demand for labour being reported.

From the standpoint of general trade the year showed a pronounced increase upon its predecessor. It is estimated that exports and imports increased by over $70,000,000, while domestic trade was characterized by activity throughout the year. Financially, the year showed some depression in securities; relatively to the general movement Canadian securities appeared in a favourable light, being in good demand in the United States and European markets. Dominion revenues for the nine months of the fiscal year to December 31 were as follows:—

	1909.	1910.
Customs	$44,184,349	$53,949,964
Excise	11,620,007	12,695,490
Post Office	5,475,910	6,288,201
Public Works, Railways and Canals	7,676,189	8,362,291
Miscellaneous	4,433,623	4,369,885
Total	$73,390,080	$85,665,833

The immigration movement was probably the heaviest yet recorded in any one year, and the outlook is that 1911 will establish a still higher record. Wages and cost of living were both firm to upward.

Elements of uncertainty in the general outlook were chiefly in connection with speculation in lands and the large borrowings of Canadian industry.

Immigration.

Final returns with reference to the number of immigrants arriving in Canada during 1910 were not available at the close of December, but the year was characterized throughout by a heavy influx, both by way of ocean ports and from the United States. According to the latest statistics available the increase in the volume of the movement, as compared with that of 1909, was over seventy per cent. It is estimated that total arrivals will number considerably over 300,000, while the outloook is for a still further increase in the movement during 1911. As in the past few years careful supervision has been exercised by the Government to ensure the quality of immigrants entering Canada. Homestead entires show a heavy increase, in number, as compared with last year, which showed a decrease compared with 1908, for which the returns were unprecedentedly heavy.

Wages and Prices.

There was a continuance in 1910 of the upward tendency of wages which b gan in 1909, following upon the stationary conditions which prevailed during 1908. Wages of farm hands and general labour were on a very high level, nearly all of the changes recorded, as compared with 1909, being in an upward direction. In lumbering and mining the changes were nearly all of the nature of increases. As a result of the marked activity which existed in the building trades, wages were very firm, and some important increases took effect in several of the cities. Employés in industrial establishments reported an increasing tendency. In the printing trades, several important increases went into effect. There was a continuance also of the tendency so marked in 1908 and 1909 towards higher levels in the wages of railway employés. Several municipal corporations granted higher rates of wages to their employés during 1910.

The general tendency in cost of living was upward. Especially was this marked in the case of farm products and rentals. The upward movement was noticeable chiefly during the early summer months.

Trade.

A good indication of the volume of trade throughout the country is afforded

by statistics of bank clearings. The returns by cities in 1909 and 1910 are as follows:—

City.	1909.	1910.
Montreal	$1,866,646,829	$2,088,558,566
Toronto	1,437,700,477	1,593,954,254
Winnipeg	770,649,322	953,415,182
Vancouver	287,528,944	444,988,818
Ottawa	173,181,973	193,714,888
Calgary	99,453,662	150,677,003
Quebec	118,803,773	123,710,055
Victoria	70,695,882	101,567,074
Hamilton	84,803,936	101,226,496
Halifax	95,278,462	95,855,316
St. John	72,404,500	77,843,546
Edmonton	51,561,012	71,635,122
London	62,093,337	67,154,297
Total	$5,190,802,109	$6,064,300,645
Regina	[1]14,153,244	50,739,159
Brandon	.....	[2]21,278,869
Lethbridge	.....	[3]9,378,091
Saskatoon	.....	[4]9,004,823
	$5,204,955,353	$6,154,701,587

[1]Three months. [2]Nine months. [3]Four months. [4]Two months.

By months, the returns are as follows:—

	1910.	1909.	Increase.
January.	$484,718,035	$381,118,715	$103,599,320
Febru'ry	405,575,726	331,058,586	74,517,140
March. .	470,747,604	376,292,871	94,454,733
April. ..	486,712,773	383,871,156	102,841,617
May....	472,951,103	402,674,737	70,276,466
June....	495,076,795	433,854,458	61,212,337
July....	530,379,809	441,804,315	88,575,494
August .	480,686,006	389,007,142	91,674,864
Sept....	500,498,757	415,674,003	85,824,754
October	560,755,921	526,738,763	34,107,158
Nov'ber	618,518,946	570,700,425	47,818,521
Dec'ber.	574,770,818	552,366,380	22,404,438
Total..	$6,081,492,371	$5,204,955,353	$876,537,018

The increase shown in the above totals amounts to 16·84 per cent.

Conditions in the Industries and Trades.

Conditions of employment during 1910 in the several industries and trades throughout Canada may be briefly summarized as follows:—

Agriculture.

Though the agricultural return was lower than in 1909, conditions were not unfavourable, especially in Ontario and the Eastern Provinces, where returns were, on the whole, above the average. A bulletin of the Census Office gives the total area of field crops grown in Canada in 1910 as 32,711,062 acres, and the value of crops as $507,185,500, compared with 30,065,556 acres, and a value of $532,992,100 in 1909. In Western Canada there was a falling off in the yield, the result chiefly of drought during July. Apart from this, weather conditions were generally favourable. An unusually mild winter was followed by an exceptionally early spring, seeding being completed at a considerably earlier date than in the previous year. The early summer was similarly favourable, while the prolongation of mild weather in the late autumn enabled good progress to be made with ploughing and other reasonable employment. In the dairying industry the milk flow was abundant, pastures having been in good condition, especially in the spring and fall. Fruits were on the whole a fair yield, though apples have been a light crop in Ontario and Nova Scotia. It was a favourable year for live stock, and the export movement from Western Canada was very heavy. Prices for grains, animals, and other farm produce were uniformly high throughout the year, and agriculturists generally were in prosperous condition at the close of the season. The demand for labour was in excess of the supply at many points of Ontario and the Eastern Provinces throughout the year. In connection with the western harvest there was a falling off in the number of harvesters required. Exports of Canadian dairy produce for the past season show a decrease in value when compared with those of last year. Shipments of cheese, however, show a slight advance. Since the opening of navigation exports from Montreal and Quebec totaled 1,910,255 boxes, as compared with 1,866,275 last year. The total exports of butter during 1910 were 27,884 packages, as against 39,443 packages last season. In 1905 there were exported 573,449 packages, since when there has been a steady decline. The home demand for milk, butter and cheese has, of course, increased greatly during the past five years. Cream to the value of $1,000,000 was exported from Ontario and Quebec to the State of New York between April 1 and November 30.

Fishing.

The Canadian fisheries have, on the whole, had a fair year. In the Maritime

Provinces mackerel and herring were scarce, lobster and oyster fisheries were below the average, and other coastwise fisheries were generally light. The banking fleets, however, had a good year, and prices were on high levels. On the Great Lakes the year was quiet, though some heavy runs of herring were taken in Lake Erie. In British Columbia the salmon run exceeded expectations, and the fishermen received good prices. Whaling operations off Vancouver Island were very successful. Herring and halibut catches in this province were also satisfactory. The sealing fleet of Victoria was more successful than in many years past.

Lumbering.

The lumbering industry had a good year. The mills ran continuously throughout the summer season, closing down only with the advent of frost in November. Prices were well maintained, and market conditions were generally favourable. Improvement compared with 1909 was especially marked in British Columbia, where the industry throughout the year was on a much more favourable basis than for some time previously. Though the early spring brought winter operations to a close somewhat earlier than usual, the drives were successful, employés receiving somewhat higher wages than in 1909. Similarly, during the autumn season, wages were slightly higher, in connection with the hiring of men for the winter, than in the previous year. The outlook is for a normal cut during the present winter season.

An important incident of the year was the prohibition of the exportation of pulp wood cut on Crown lands in the Province of Quebec, after May 1.

Mining.

The mining output was well maintained throughout 1910. The Nova Scotia collieries had a busy year, notwithstanding the continuance of strike conditions at Springhill. Shipments were much heavier than in 1909, during which the strike of the employés of the Dominion Coal Company occurred, and were only slightly below those of 1908. The asbestos and copper mines of Quebec produced steadily. The mica trade in the same province was more active than in the preceding year, though showing dullness at the close. Operations in Frontenac county, Ont., were exceptionally active, but there was a falling off in oil production in the southwestern portion of the province. Returns from the Cobalt camp showed a continuance of very active and profitable operations. A feature of the year was the opening up of the Porcupine river district and the further development of the Gowganda and other northern fields. The production of copper, nickle and iron in the northern and western portions of the province was steadily maintained. In Alberta, the coal mines had a very active year, as was the case also in the Crow's Nest Pass and Vancouver Island mines. The metalliferous camps of the interior of British Columbia made steady progress, the annual reports of the large companies, with few exceptions, presenting a uniformly favourable showing, outputs generally comparing favourably with those of the preceding year, though there was a falling off in lead, copper and zinc.

Manufacturing.

The year was one of steadily increasing activity in this industry; not since 1906–7 has the process of expansion been more marked. Establishments in nearly all branches and localities were working full time with full staffs throughout the year, and in many cases overtime was resorted to, perhaps the most notable exception in this respect was the flour milling. A notable example of revival occurred in the case of the woollen industry. Cotton mills reported a decided improvement in conditions during the second half of the year. A scarcity of female labour for whitewear and similar establishments was complained of, following the very pronounced resumption of activity in these branches. Additional male employés, especially skilled hands, could also have found work in certain localities. While all branches, as above stated, shared in the general activity, those engaged in the production of building ma-

terials were especially affected. The outlook at the close of the year was for a good winter season in industrial establishments.

Ottawa has 168 factories or manufacturing plants. During the past twelve months it has gained twelve, or at the rate of one a month. It is believed that these conditions are fairly typical of other leading industrial centres.

The milling industry during the year 1910 has not had the benefit of the favourable world's market conditions which were so important a factor in enabling that industry to realize phenomenal profits during the year 1909.

The past year in the iron and steel industries is stated by a leading authority to have been one of "preparation, rather than of advance." The settlement of the acute differences as between coal producers and iron and steel producers, in the Maritime Provinces, permitted a forward movement there. Ontario's production of pig iron in 1910 should be about eight per cent. greater than in the year previous, and the returns of the Bureau of Mines for the nine months ended with September, make it appear that the added value of that product would be about $300,000. In iron ore production, however, there was a decided falling off. There was an increase of ten per cent. in the steel tonnage, and the value of the product is estimated to be close to $7,500,000. "All things considered," says a competent authority, "Canadian iron and steel corporations, particularly those identified with the production of iron ores, are anticipating expansion."

Railway Construction.

The year saw a continuation of the extremely active conditions which prevailed during 1909; estimates at the close of the year were that an approximately equal amount had been expended with a similar result in extension of mileage. Nearly 6,000 miles of railway were in various stages of completion in 1910. The mild weather of January and February and the early opening of spring enabled relatively rapid progress to be made with rock cutting and bridge construction in the first quarter of the year. With the advance of the season activity rapidly increased, and in the summer months the demand for labour exceeded the supply at several points, especially in British Columbia, notwithstanding the high wages generally offered. These conditions continued throughout the rest of the season. The chief work of the year was in connection with the trunk line and branches of the National Transcontinental Railway, and with extensions of the Canadian Pacific Railway and Canadian Northern Railway Companies in the Northwest Provinces. Several new branches were opened for traffic by these Companies during 1910; noteworthy, also was the completion of several important contracts in New Brunswick, and of the line of the Grand Trunk Pacific Railway connecting Edmonton with Lake Superior. At the close of the year it was stated that the number who would be employed during the coming winter season, in connection with railway construction operations, would considerably exceed that of last year.

Operating companies added largely to equipment during 1910, it being stated in general terms that the output of car and locomotive shops exceeded that of any previous year.

General Transport.

Employés engaged in transportation had a more active year than in 1909. Evidence of this was to be found in the steadily increasing earnings of the large railway companies, which continued almost up to the end of the year. Except for the strike of trainmen on the Grand Trunk Railway system the year was comparatively free from labour disturbances. The heavy increase in the volume of immigration and the active movement of general merchandize accompanying the general trade buoyancy were the accounting causes of these conditions. The Canadian water transportation companies had a good year, not-

withstanding that east-bound traffic on the lakes fell off towards the close of the season. Canal returns were very heavy. The winter port business was also satisfactory, showing an increase over that of the winter of 1909. The number of vessels entering the harbour during the same period was 1,408, of which 760 were ocean liners. The grain exporting season from Montreal was not a very good one this year. The quantity exported was 26,859,268 bushels, as against 27,559,395 bushels last year. The largest decrease was in wheat, 5,700,000 bushels, which, however, was partly offset by a large increase in exports of corn and oats.

Though much was written concerning shortages in western grain production, the low rates for grain traffic, and the general dullness in the shipping business, the aggregate amount of grain sent out from the two ports of Port Arthur and Fort William, between August 31 and November 30, was almost as large as that for the same period in 1909. Of the four leading cereals, wheat, oats, barley and flax, the shipments this fall were 44,396,070 bushels, as compared with 45,763,566. The total in each case includes screenings. The figures are:—

	1910, Bushels.	1909, Bushels.
Wheat	35,337,859	35,400,874
Oats	5,584,959	7,232,357
Barley	862,471	1,290,810
Flax	2,023,222	1,606,356
Screenings	587,559	233,169
Total	44,396,070	45,763,566

Western wheat inspections in 1910 and 1909 were as follows:—

Spring Wheat.	1910, Cars.	1909, Cars.
No. 1 hard	10	235
No. 1 nor	7,334	19,994
No. 2 nor	15,563	18,050
No. 3 nor	12,097	6,044
No. 4	3,897	1,086
No. 5	1,302	206
No. 6	862	82
Other grades	2,613	3,377
Total	43,678	49,074

The grain-carrying trade during the past season was the most disappointing that vessel-owners have experienced in recent years. It was not that shipments ran behind the average so much, as that low rates ruled for the greater part of the season. The rate on wheat ranged fully a cent a bushel below last season, and cases were instanced where freighters facing the alternative of running down light carried grain at an actual loss.

The Trades.

Building.—The year was considerably more active than its predecessor. From nearly every centre of importance the monthly returns showing the number of building permits issued and the estimated values of the building and repairs represented therein showed a considerable increase as compared with returns during 1909. No summary statement was available up to January 1, 1911, but estimates were to the effect that the general amount of building would equal that of the years 1906 and 1907, which represent the most active previous building seasons of which statistical records are available. Employment, as a consequence, in the building trades was very active, and skilled labour was in good demand. The outlook, moreover, at the close of the year was for an exceptionally busy season on indoor finishing, while in most localities contracts already in hand indicate an active resumption of outdoor work on the opening of spring.

The great activity in building which has characterized the past year or two in all parts of Ontario, is set forth in the report of the brick production of the province. As compared with 1908 the output of common brick rose from 222,361 thousand to 246,308 thousand in 1909. A still larger production was reported in 1910.

The following details up to the end of November, as published by *Construction*, show increases over the figures for any previous year:—

	—Eleven Months— 1910	1909.
Berlin, Ont.	$ 347,546	$ 194,500
Brandon, Man.	936,385	350,120
Brantford, Ont.	519,130	279,985
Calgary, Alta.	5,235,294	2,268,900
Edmonton, Alta.	2,700,685	2,120,572
Fernie, B.C.	400,000	200,000
Fort William, Ont.	1,977,040	2,722,565
Halifax, N.S.	452,370	614,425
Hamilton, Ont.	2,555,355	1,653,799
Kingston, Ont.	219,597	141,030
Lethbridge, Alta.	1,174,740	1,234,330
London, Ont.	741,989	817,979
Montreal, Que.	14,871,042	7,622,236
Moose Jaw, Sask.	1,045,640	497,390
Ottawa, Ont.	2,847,550	4,423,465
Peterboro', Ont.	508,718	341,394
Port Arthur, Ont.	985,816	584,810
Regina, Sask.	2,331,763	749,194
Saskatoon, Sask.	2,639,896	942,905
St. John, N.B.	507,475	363,650
St. Thomas, Ont.	276,250	255,900
Sydney.	343,754	162,770
Toronto, Ont.	19,774,518	16,545,882
Vancouver, B.C.	12,196,240	6,745,764
Victoria, B.C.	2,066,295	1,601,720
Windsor, Ont.	369,340	421,385
Winnipeg, Man.	14,136,200	9,192,900
Totals.	$92,161,628	$62,908,540

Metal and woodworking.—Employés of metal and woodworking establishments had very active employment. The iron and steel industries were very busy and were adding largely to plant; large orders in hand were reported at the close of the year. Establishments for the manufacture of structural material had also an exceptionally busy year. Similarly, the various furniture and musical instrument establishments offered steady employment to full staffs. Planing mills, &c., had a very busy year, as a result of the activity in building.

Printing.—The general tone of employment among printers and pressmen was buoyant. Employés of bookbinding and stationery establishments had a busy year.

Clothing.—Favourable conditions were reported by journeymen tailors. Garment working establishments were very busy, and in several localities could have given employment to additional help. Female help for these establishments was in demand throughout the year. Boot and shoe factories had a fair year.

Textile.—Cotton mill employés had increasingly active employment, undisturbed by labour difficulties. A feature of the year was the pronounced increase in activity in the woollen mills, several of which largely increased their staffs and scale of operations.

Leather.—The year was more favourable than 1909 in the tanning industry, as a result of more settled price conditions. Trunk and bag makers and other subsidiary trades were actively employed.

Food and tobacco preparation.—Bakers had a good year and confectioners a very busy one. Cigar makers and tobacco workers reported an improvement as compared with 1909.

Miscellaneous.—General trade buoyancy gave active employment to retail clerks and delivery employés. Hotel and restaurant employés had an improved year, as compared with 1909, owing to an increase in tourist and general passenger traffic.

Unskilled labour.—The year was very active, the season opening at an earlier date than that of 1909, and the amount of employment for workmen of this class in connection with railway construction, civic improvement works, building, &c., being greater than during the preceding year. Steady employment at good wages was available in nearly every section of the Dominion, with the demand in excess of the supply at several points. At the close of the outdoor season the increased earnings resulting from these conditions enabled this class to face the winter under favourable circumstances compared with 1909. In the closing days of the year relief associations reported a large falling off in the demands usually made upon them at this season.

Labour Legislation.

Several enactments of importance as bearing specifically on the interests of labour were passed by the Parliament of Canada and by the Legislatures of the several Provinces during 1910. A brief enumeration of these is of interest in a summary of the present nature.

Dominion legislation of the year provided for the investigation of combines in restraint of trade; for the amendment of the Industrial Disputes Investigation Act; for encouraging the building of dry-docks capable of accommo-

dating the largest vessels; for the leasing of lines connecting with the Intercolonial Railway; for revising and amending the Insurance and Currency Acts; for the reconstitution of the Immigration Acts; for the appointment of a Commission on Industrial Training and Technical Education; for the final ratification of the Franco-Canadian convention; for the ratification of the arrangements concluded between the United States and Canada averting a threatened tariff conflict; and for the termination of the tariff dispute between Canada and Germany. In addition to the above, Acts were passed providing for a Pension Fund for employés of the Merchants' Bank; amending the Annuities Act; amending the Meat and Canned Foods Act; and giving jurisdiction to the Exchequer Court as to claims for death, injury or loss on Government railways.

Nova Scotia legislation of the year included a comprehensive amendment with respect to compensation to workmen for accidental injuries; amended the law relating to the employment of women; authorized the formation of co-operative associations among fishermen's unions; amended the Coal Mines Regulation Act; provided for the payment of annuities to school inspectors; established a Juvenile Court; exempted from seizure Dominion Government Annuities; consolidated the Crown Lands' Act, giving the Governor-in-Council power to prohibit the export of pulp wood cut on Crown lands; and facilitated the incorporation of farmers' warehouse associations.

In *New Brunswick* the creation of a Commission for the purpose of supervising public utilities; the amendment of the Act establishing a Bureau of Labour; and the exemption by statute of Dominion Government annuities were the principal measures assented to.

The statutes passed by the Legislature of the Province of Quebec, during 1910, included Acts for the establishment of employment bureaus; for the protection of child and female labour; respecting co-operation; making a grant in aid of forestry education; protecting Dominion Government annuities; amending the charter of the Montreal Firemen's Benefit Association; ordering the manufacture in Canada of timber cut on Crown lands; providing for the appointment of a commission to submit rules regarding running waters; and compelling the issue in French and English of all railway tickets. Provision was made for the inspection of butter and cheese factories, the licensing of the same, and the closing of unsanitary establishments.

The most noteworthy feature, from the standpoint of labour, of the legislation passed by the *Ontario* Legislature in 1910, was an extensive revision and consolidation of the labour laws of that Province. Acts governing the sale of bread and the construction of steam boilers were passed. The sale of liquor on Christmas day was prohibited. The jurisdiction of the Railway and Municipal Board over railways and street railways was enlarged; and the Act regulating the manufacture of dairy products, respecting riots near public works, and making more clear the rights of the Hydro-Electric Commission to enter upon lands for the construction of its transmission lines were passed.

A revision and consolidation of previous legislation, with important additions, comprised in a Workmen's Compensation Act, was, from the standpoint of labour, the most important measure enacted by the *Manitoba* Legislature, in 1910. Important Acts of the session were for the protection of children selling newspapers in the streets; for the incorporation and licensing of steam engineers; authorizing the Government ownership of grain elevators; and providing means for the sale of municipal telephone systems to the Government.

During the 1910 session of the *Saskatchewan* Legislature the most important enactment from the standpoint of labour was an Act for the Protection of Persons employed in factories. Other important legislation was a "Public Health Act," an "Act respecting Public Works," and amendments to the "Steam Boilers Act," and to the "Children's Protection Act."

In *British Columbia*, the more important legislation enacted by the Legislature in 1910 consisted of, amendments to the Mechanics' Liens Act, the Woodmen's

Liens Act, the Steam Boilers Inspection Act, the Factory Inspection Act, the Coal Mines Regulation Act, the exemption from seizure of Dominion Government annuities, amendments to the Timber Marking Act, and the Timber Manufacturing Act; a consolidation and amendment of the liquor Act, an amended and extended Companies Act, and amendments to the Children's Protection Act.

REVIEW OF TRADE DISPUTES IN CANADA DURING 1910.

THERE was an increase of eighteen in the number of strikes and lockouts in existence in Canada during 1910, compared with the previous year, there having been sixty-nine in 1909 and eighty-seven in 1910. Of the latter, six disputes began in the previous year. There was, however, a reduction of over 164,000 in the estimated number of working days lost. The principal disputes were a strike of coal miners at Springhill, N.S., which, commencing in August, 1909, lasted throughout the whole of the year 1910, and a strike of employés of the Grand Trunk Railway Company, which lasted for a fortnight. Building operations were impeded at Montreal, Que., through disputes affecting bricklayers and masons from June 20 until September 9, and through a general strike of plumbers, which began on September 17, and continued about three months.

Strike of Coal Miners at Springhill, N.S.

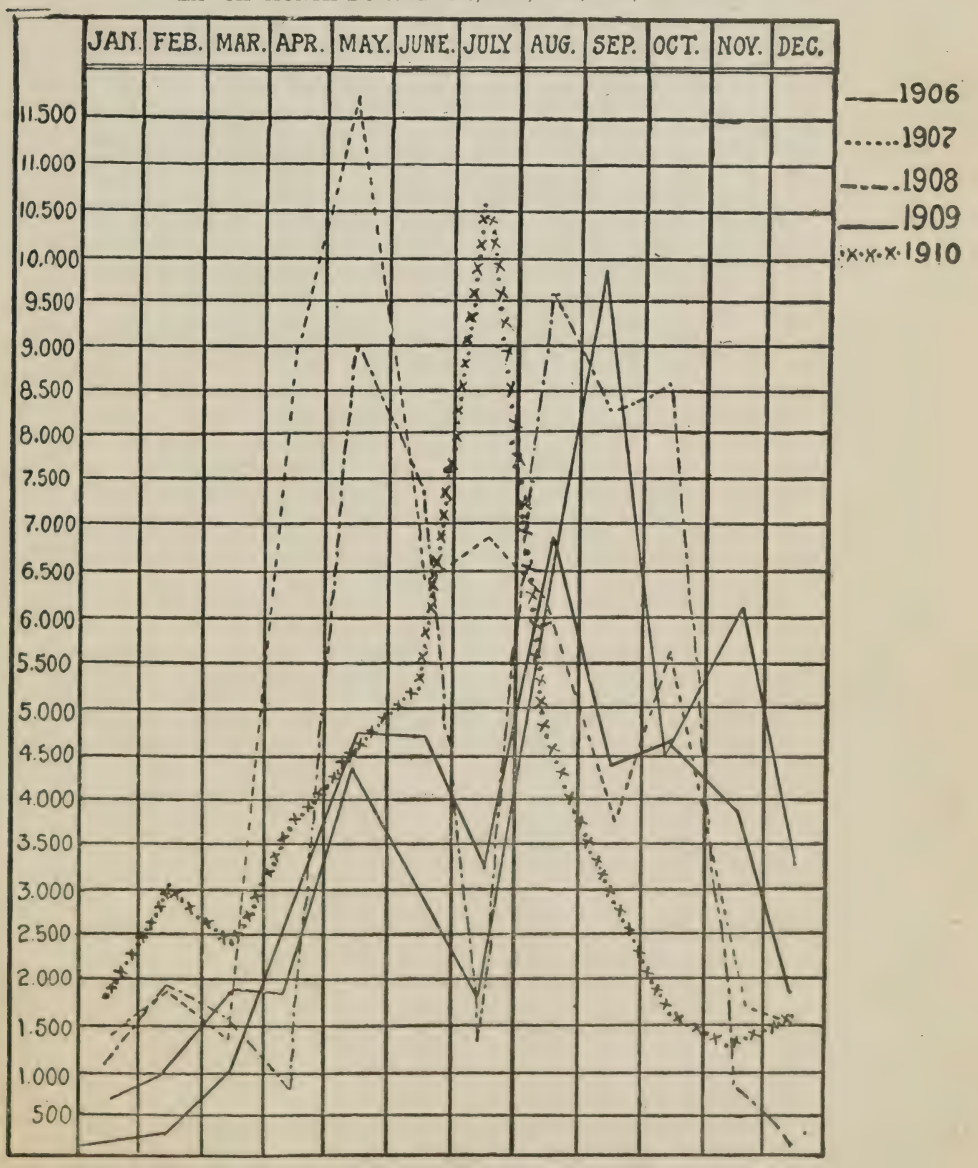
A strike of coal miners employed by the Cumberland Railway and Coal Company, at Springhill, N.S., which began on August 10, 1909, was still in force at the end of the year 1910, although there was some improvement compared with the previous year. Originally about 1,700 men had gone out, on account of the refusal of the Company to recognize the United Mine Workers of America, or to agree to certain changes in the conditions of their employment. In the course of the year, however, about 700 strikers left the place to seek work elsewhere. In the month of January, the Company reopened one of their mines, having secured a few non-unionists to work it. Mining operations continued throughout the year to a limited extent, and in November the daily output amounted to 550 tons. A change in the ownership of the mines was effected towards the end of November, by the transference of a controlling interest to the leading directors of the Dominion Steel Corporation. The change, however, had no immediate effect on the strike.

Strike of Employés of the Grand Trunk Railway Company.

On July 18, a strike of employès in the train and yard service of the Grand Trunk Railway System took place, on their failure to reach an agreement with the Company with reference to proposed new rates of wages and working rules. The strike was settled on August 2, through the friendly intervention of the Minister of Labour, and the Minister of Militia and Defence. While the strike was in progress business interests suffered through the congestion of freight at all points of the line, and the loss in earnings to the railway company alone was estimated at about $1,000,000. About 2,750 employés were directly involved in this dispute, and 4,800 men were thrown out of employment for a week by it.*

*A full account of the dispute is given in the *Labour Gazette* for August, 1910; page 194.

Magnitude of Trade Disputes.



There were approximately 19,543 employés involved directly or indirectly in trade disputes, which began during 1910, compared with 17,880 in 1909. The following table shows the numbers affected, according to the months in which the disputes began.

TOTAL NUMBER OF EMPLOYES INVOLVED IN TRADE DISPUTES WHICH BEGAN DURING 1910.

	Directly.	Indirectly.	Total.
January	28	.....	28
February	1,221	15	1,236
March	345	187	532
April	1909	7	1,916

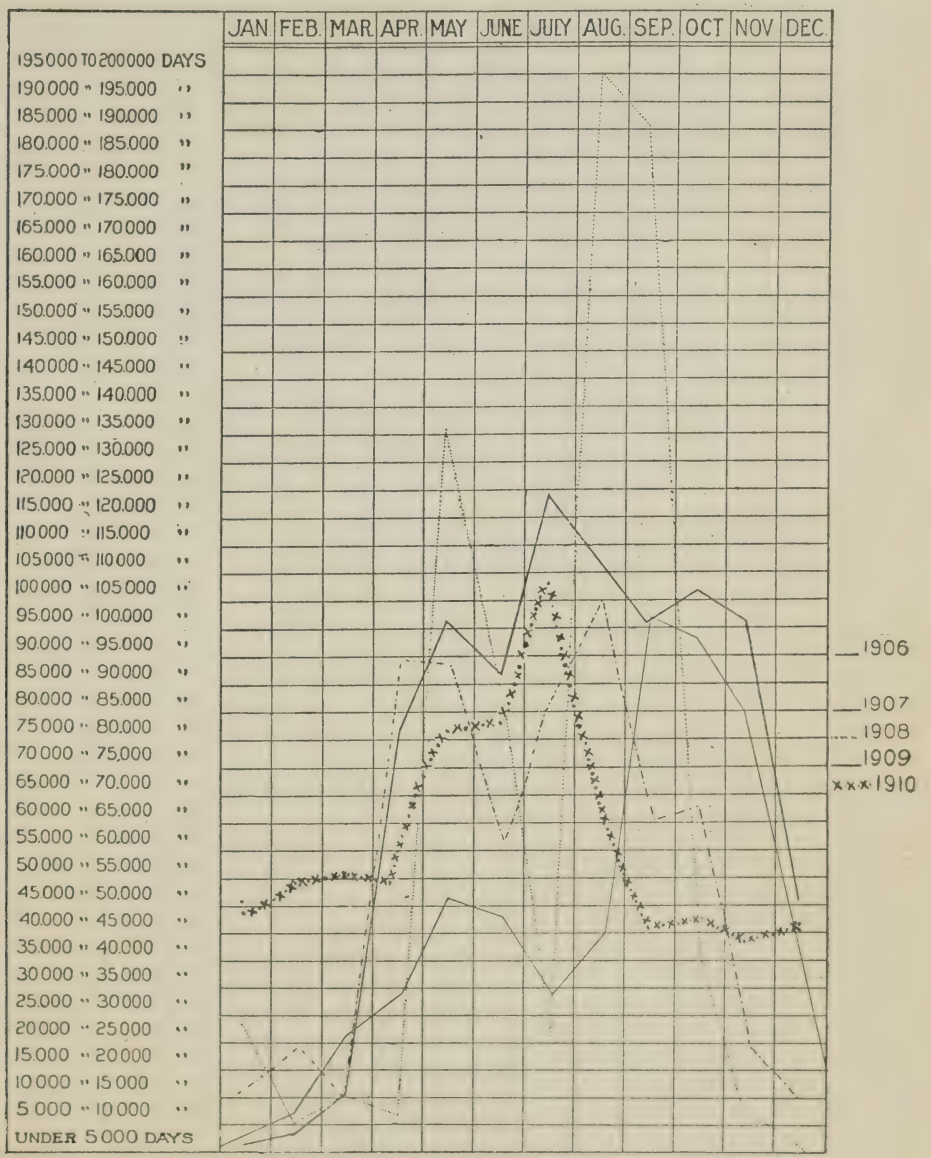
Loss of Time in Working Days.



The loss of time to employés through trade disputes during 1910, amounted approximately to 677,534 working days, compared with a loss of approximately 842,275 days in 1909. An estimate of the loss of time by months is given in the following table.

TABLE SHOWING LOSS OF TIME IN WORKING DAYS TO EMPLOYES THROUGH TRADE DISPUTES BY MONTHS DURING 1910.

	Approximate Loss in Working Days.		Approximate Loss in Working Days.
January	44,650	July	103,400
February	49,484	August	62,600
March	50,570	September	40,280
April	49,110	October	42,400
May	77,030	November	38,290
June	78,450	December	41,270
		Total	677,534

The following diagram shows the monthly variation in the number of working days lost during the last five years.

Disputes by Localities Affected.

Of the eighty-one disputes which began in 1910, thirty-four occurred in the Province of Ontario, and seventeen in the Province of Quebec. No strike took place in the Province of Prince Edward Island. In the following table the number of disputes is given by provinces, according to the months in which they began.

TABLE SHOWING TRADE DISPUTES IN CANADA BY PROVINCES DURING 1910.

[1]Dispute affected all provinces in Dominion with exception of Prince Edward Island.
[2]First dispute affected Ontario, Manitoba, Saskatchewan and Alberta; second, affected same provinces with the addition of British Columbia.
[3]Dispute took place in Quebec and Ontario.
[4]One dispute took place in Quebec, Ontario and Manitoba, and the other in Alberta and British Columbia.
[5]Disputes affected all provinces except Prince Edward Island and Nova Scotia.
[6]One dispute took place in Quebec and Ontario, and the other in Manitoba, Saskatchewan and Alberta.

Disputes by Months.

The following table shows the number of disputes which have occurred each month during the past ten years, from which it may be seen that the greatest number took place in the month of May.

TABLE SHOWING TRADE DISPUTES IN CANADA BY MONTHS DURING 1901, 1902, 1903, 1904, 1905, 1906, 1907, 1908, 1909, AND 1910.

Months.	Number of Disputes.

Causes of Disputes.

Of the eighty-one disputes which began in 1910, thirty-five arose from demands for higher wages only. Questions of wages entered also into eighteen other disputes. The following table shows the causes of trade disputes during 1910, according to the months in which they began.

TABLE SHOWING CAUSES OF TRADE DISPUTES IN CANADA DURING 1910.

Cause.	Number of Disputes.												
	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total

ROYAL COMMISSION ON INDUSTRIAL TRAINING AND TECHNICAL EDUCATION. PROCEEDINGS DURING DECEMBER, 1910.

THE Royal Commission on Industrial Training and Technical Education completed their tour of Western Canada on December 3, 1910, having since November 1, visited the following points: Port Arthur and Fort William, Ont., November 1 and 2; Winnipeg, Portage la Prairie and Brandon, Man., November 3 to 9; Moose Jaw, Regina, Saskatoon and Prince Albert, Sask., November 10 to 15; Edmonton and Strathcona, Calgary, Lethbridge and Medicine Hat, Alta., November 17 to 23; Fernie, Nelson, Vernon, Nanaimo, Vancouver and Victoria, B.C., November 21 to December 3. The commission divided for part of British Columbia, Dr. Bryce and Mr. Forsyth visiting Fernie, Nelson and Vernon, and Dr. Robertson (*Chairman*), Hon. Mr. Armstrong, Messrs. Murray and Simpson finishing Calgary, Lethbridge and Medicine Hat on the same dates, the balance of the Canadian tour being taken by the united Commission.

Everywhere there was hearty approval of the objects of the Commission, and co-operation in its work by representatives of Provincial Governments, school authorities, municipalities, manufacturers, and organized labour.

On the completion of the Western itinerary, as above, the Commission proceeded to Portland, Oregon, where a splendid reception was accorded by the mayor, Chamber of Commerce, the Commercial Club and Board of Education of that city. The publicity thus given to the work of the Commission proved an excellent introduction to other American cities, in several of which the leading newspapers gave prominence to the mission of the Canadian visitors.

The following points in the United States were visited by various members of the Commission, who divided into three sections in order to cover the largest amount of territory with the greatest economy of time and money: San Francisco, Berkeley (University of California), Palo Alto (Leland Stanford, Junior, University), Santa Fe, Sault Lake City, Denver, Kansas City, Mo., Columbia, Mo. (Missouri University), St. Louis (Washington University, The University Manual Training High School, The David Rankin Trades School, the Soldan High School, and the Field Grade School), Cincinnati, Indianapolis, Detroit. Much valuable information and numerous official documents were collected on this American tour. At Columbia, St. Louis and Salt Lake City the Chairman and Secretary had opportunities of speaking to educational audiences on the work of the Commission.

The Canadian tour will be completed by visits to the following points: January 10–18, Ottawa; sessions for testimony, and preparing summary of work to date; January 19–21, Toronto; January 23–24,

Sault Ste. Marie; January 26, February 11, Province of Quebec, Montreal (including Maisonneuve and Valleyfield), Three Rivers, Grand Mere and Shawinigan, Sorel, St. Hyacinthe, Sherbrooke.

On the completion of this itinerary the Commission will have covered about 100 cities and towns and taken the sworn testimony of some 1,500 witnesses, representing every grade of society — Deputy ministers of Education, School Inspectors, manufacturers, superintendents and foremen of factories, miners, fishermen, lumber men, farmers, journeymen in all trades, educational specialists, teachers of Manual Training and Domestic Science, representatives of Women's Councils, Trades and Labour Councils, mayors, aldermen, chairmen and members of boards of education, high and public school teachers from the highest rank to the humble teacher of the one-room rural school.

About the end of February, the Commission will sail for Europe, spending approximately two months in Great Britain and Ireland, one month in France, one month in Germany, and one month divided among the smaller countries, Switzerland, Belgium, Denmark, Holland, &c.

Although the function of the Commission is simply to carry on an inquiry, it is gratifying to note that the interest which has been stirred up by its visits and investigation has already resulted in definite progress. At the conclusion of its tour of the Maritime Provinces, the pleasing announcement was made that the Government of Nova Scotia had increased the staff of the Technical College in Halifax by the addition of three new professors, and had also appointed an inspector of manual training for that province. In Chatham, Ont., shortly after the visit of the Commission, the Board of Trade met and decided to organize evening classes at once, and also to push for a technical school in that town.

REVIEW OF PARLIAMENTARY PROCEEDINGS AFFECTING LABOUR DURING DECEMBER, 1910.

ON December 12 a statement was made to the House by the Honourable the Minister of Labour with reference to the reinstatement of the employés of the Grand Trunk Railway Company who had gone on strike during the past summer. The Minister outlined the nature of the agreement signed on July 31. He also described the action of the Department in connection with the settlement of the strike.

On December 16, the following estimates for the Department of Labour during the fiscal year 1910–1911 were passed by the House:—

Salaries	$37,850
Contingencies	13,000

Among Bills of special interest to labour introduced in the House of Commons during December, were the following: Bill No. 29—"An Act respecting Co-operation," introduced by Mr. Ralph Smith (Nanaimo), for Mr. Martin (Regina), and being a copy of the measure brought in by Mr. Harris (Brantford) last session, and referred to a Select Committee; and Bill No. 30—"An Act to provide for the safety of employés and travellers upon railways," introduced by Mr. Pardee (Lambton) providing for the construction, equipment and inspection of boilers on steam railway engines.

The Honourable the Minister of Mines moved on December 9 that the House go into Committee to consider the following proposed resolution:—

Resolved, that it is expedient (a) to regulate the manufacture, importation, storage, handling, testing and use of explosive material of every description; (b) to grant licenses to factories and magazines for the manufacture and storage of explosives and to provide for the inspection thereof and the payment of fees for such licenses; (c) to make inquiries into the cause of explosions, and of accidents caused by explosives; (d) to provide for the appointment of inspectors and other officers required for the administration of the Act, and the payment of the salaries thereof; (e) to authorize the Governor in Council to make regulations for carrying out the purposes of the Act; and (f) to provide for the imposition of penalties in contravention thereof.

On December 7 the second reading of a Bill to amend the Railway Act (No. 2) was moved by Mr. Lancaster, (Lincoln and Niagara) the general purpose being to diminish the number of deaths caused by railways, by providing in each case for an investigation by a coroner. The Bill to provide for the incorporation of co-operative credit societies was discussed in committee of the whole House and progress reported.

The Senate Committee on Immigration and Labour, constituted on November 24, recommended on the twenty-ninth that its quorum be reduced to two members. The Committee consists of nine members.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, &c., are published except where otherwise stated, by courtesy of the Department of the Interior, Canada.

DURING the month of November, 1910, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

BRITISH EMIGRATION DURING NOVEMBER, 1910 AND 1909.

Nationality.	1910	1909
English	3,314	2,161
Welsh	43	51
Scotch	1,020	477
Irish	151	131
British Colonial	116	61
Total British subjects	4,644	2,881
Foreign	1,652	1,985
Total	6,296	4,866

During the eleven months ending November 30, 1910, the number of passengers leaving the United Kingdom, as above, was:—

Nationality.	1910	1909
English	103,990	57,488
Welsh	2,108	1,170
Scotch	34,974	17,955
Irish	6,310	4,070
British Colonial	6,691	3,086
Total British subjects	154,073	83,769
Foreign	37,924	26,105
Total	191,997	109,874

The following table gives a detailed return of the total immigration to Canada, for the months of April, May, June, July and August, 1910, compared with the corresponding months of 1909.

Total	309	1,783	1,073	18	3,183

Number of souls represented by above entries 7,491.

Of 806 homestead entries made during November, 1910, by persons coming from the United States, there were 286 from North Dakota, 155 from Minnesota, fifty-three from Iowa, forty-four from South Dakota, forty-three from Wisconsin, thirty-seven from Washington, and twenty-seven from Illinois and Michigan, respectively.

A statement of letters patent, covering Dominion lands situated in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon territory, issued during the month of November, 1910, as compared with November, 1909, is as follows:—

Nature of Grant.	November, 1910.	
	No. of Patents.	No. of Acres.
Alberta Railway & Irrigation Company's sales	8	4,656.00
British Columbia homesteads	4	640.00
British Columbia sales	13	1,976.32
Coal lands' sales	3	800.00
Commutation grants		
Homesteads	1,505	238,758.781
Hudson's Bay Company		
License of occupation	1	
Military bounty grants		
Mining lands' sales	10	1,958.34
Mineral rights (4,765.30 acres)	21	
North-west half-breed grants	29	4,930.13
Parish sales		
Quit claim, special grants[0] (160 acres)	1	
Railways:—		
Calgary and Edmonton Railway	2	471.00
Canadian Northern Railway	8	5,476.33
Canadian Pacific Railway grants	102	1,116.838
Canadian Pacific Railway grants, Souris Branch	2	252.00
Grand Trunk Pacific Railway	26	326.26
Qu'Appelle Long Lake and Saskatchewan Railway & Steamboat Company	3	800.00
Sales	44	6,073.815
School lands' sales	39	6,006.67
Special grants	15	669.97
University of Manitoba	1	160.00
Yukon Territory sales	9	347.99
Totals	1,846	275,420.44

In November, 1909, the number of letters patent issued was 2,265, covering an area of 357,430.49 acres, showing a decrease for the month of November, 1910, of 419 in the number of patents issued, and of 81,960·05 acres in the area patented.

Notes.

The Royal Commission appointed by the Government of Canada to investigate alleged frauds in connection with the entry of Chinese into Canada, and the bringing of opium illegally into the country began taking evidence at Vancouver, B.C., on December 19.

During the first seven months of the present fiscal year, from April to October inclusive, Chinese arrivals in Canada totaled 3,536. Of these, 2,868 paid the head-tax of $500 each, making a total contribution to the public treasury from this source of no less than $1,434,000. The number who were admitted as exempts totaled 668. Of these, 170 were classed as merchants, and 417 as merchant's sons. The latter figures are interesting in view of the investigation now being conducted at Vancouver, relative to the admission of Chinese under fraudulent certificates.

Japanese and Hindu immigration returns show that the arrivals are now very restricted. Since the agreement entered into three years ago with Japan, 1,457 Japanese have entered Canada, or less than 500 per year. The influx of Hindus, which was assuming alarming proportions two years ago, has practically stopped in consequence of the restrictive legislation adopted by the Government. Since April 1 of last year, only fifteen Hindus have entered the country.

Figures supplied by the Immigration Department, in reply to a question by Mr. Lake, in the House of Commons, relative to the destination of immigrants entering Canada since 1900, shows the following: Total arrivals, 1,453,391; Distributed as follows: Maritime Provinces, 60,265; Quebec, 215,906; Ontario, 323,864; Manitoba, 274,970; Saskatchewan and Alberta, 431,305; British Columbia and the Yukon, 133,870; not shown, 13,211.

RETAIL PRICES OF STAPLE ARTICLES

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month preliving in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement usually occupied by workingmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the the Department.

Driver, 1 horse and cart	2.00
Driver, 2 horses and wagon	3.00

PIERS, RIVER DES PRAIRIES, QUE.

Reconstruction of piers, &c., at River des Prairies, Que.; names of contractors, Morrow & Beatty, Peterborough, Ont.; date of contract, December 9, 1910; amount of contract, $8,520.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter	$2.25
Foreman mixing concrete	2.00
Foreman laying concrete	2.00
Foreman stone crusher	2.00
Carpenters	1.75
Blacksmiths	2.25
Blacksmiths' helpers	1.50
Ordinary labourers	1.50
Driver, 1 horse and cart	2.25
Driver, 2 horses and wagon	3.50

PIER, WINNIPEG BEACH, MAN.

Protection pier at Winnipeg Beach, Man.; names of contractors, John Gunn & Sons, Winnipeg, Man.; date of contract, December 12, 1910; amount of contract, $19,192.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter	$4.00
Engineman for pile-driver	3.00
Carpenters	3.50
Blacksmiths	3.00
Blacksmiths' helpers	2.00
Labourers	2.00
Driver, 1 horse and cart	3.50
Driver, 2 horses and wagon	5.00

REPAIRS PUBLIC BUILDING, GALT, ONT.

Electric wiring and fittings at public buildings, Galt, Ont.; names of contractors, Scott & Bennett, Galt, Ont.; date of contract, December 12, 1910; amount of contract, $988.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shal l be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the person entitled to payment for the use or hire of horses or teams shall have the rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

WHARF, PROVIDENCE BAY, ONT.

Extension to wharf at Providence Bay, Ont.; name of contractor, C. H. Sherwood, Port Arthur, Ont.; date of contract, December 13, 1910; amount of contract, $15,438.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter	$3.50
Carpenters	2.75
Blacksmiths	2.75

Supplying Railway Mail Clerks' Tin Travelling Boxes and repairing portable letter boxes, parcel receptacles and Railway Mail Clerks' tin travelling boxes	143.00
Making and repairing miscellaneous articles of Postal Stores	113.55
Making and supplying articles of official uniform	697.90

FOR A UNIFORM LAW ON WORKMEN'S COMPENSATION.

NINE states and the United States Governments were represented at a conference of commissioners on compensation for industrial accidents, recently held in Chicago, Ill., to discuss the fundamental points which should be covered by legislation of this character, and upon which it is desirable to secure uniform state laws. The conclusions reached by the conference should prove of value wherever there is a movement to secure employers' liability or accident compensation laws.

The conclusions of the conference as to what a law should cover were as follows:—

1. That all employments should be included.

2. That all injuries should be covered, irrespective of employers' negligence and of employés' negligence, except where injury is self-inflicted for the purpose of recovery—burden of proof that injury was self-inflicted to be placed on the employer.

3. That all persons engaged in the employments should be included.

4. That compensation shall be paid in instalments in the case of temporary disability, and in the case of permanent disability or death by instalments with right to commute after a given time with approval of some public official.

5. That the amount and duration of compensation shall be as follows:—

(*a*) Temporary disability. Fifty per cent. of the impairment of wages; maximum of $10 per week, minimum of $5 per week; or if wages less than $5, then full wages (or sixty-six and two-thirds per cent of wages up to $7.50 of wages per week, then fifty per cent. of balance until compensation amounts to the maximum of $10 per week, maximum). Payments not to exceed beyond period of 300 weeks.

(*b*) Permanent disability. Same as temporary disability.

(*c*) Partial permanent disability. Fifty per cent. of impairment of wages. Maximum of $10 per week. Payments not to exceed beyond period of 300 weeks.

(*d*) Death.

(1) Total dependents:—

If orphans, fifty per cent. of wages of deceased.

If widow alone, twenty-five per cent. of wages.

If widow and one child, forty per cent. of wages.

If widow and two children, forty-five per cent of wages.

If widow and three children, fifty per cent. of wages.

If widow and four children, fifty-five per cent. of wages.

If widow and five children or more, sixty per cent. of wages.

If widow, father or mother, fifty per cent. of wages.

Children under sixteen years of age only to be included, and only during period they are under sixteen years of age.

Maximum of $10 per week, minimum of $5 per week, or if full wages less than $5, their full wages (or sixty-six and two-thirds per cent. of wages up to $7.50 of wages per week, then fifty per cent. of balance until compensation amounts to $10 per week, maximum). Payments not to extend beyond period of 300 weeks.

(2) Partial dependents. Fifty per cent. of the portion of the wages contributed by the deceased to the partial dependents.

(3) No dependents. Expenses of last sickness and burial not exceeding $200.

6. That the length of waiting period shall be two weeks, during which period employer shall furnish medical treatment or hospital care to an amount not exceeding $100 in value.

7. That dependents shall not include aliens residing outside the country, and illegitimate children are not to be mentioned.

8. That employés shall not contribute.

9. That it shall be permissible for employers to subtitute voluntary schemes, provided the voluntary scheme covers all points covered by the law, and is approved by some public official to be determined in the law.

10. That the method of determination of controversies shall be by a board of arbitration.

11. That the scheme shall involve compulsory state insurance or if this is not possible, compulsory compensation, providing that the employer may transfer his liability by insuring in companies approved by a legally constituted public body or official.

12. That all other laws in conflict shall be repealed.

RECENT INDUSTRIAL AGREEMENTS.

Agreement in Hosmer Mine, Alberta.

SUPPLEMENTARY agreement to the agreement entered into June 30, 1909, between District No. 18, United Mine Workers of America, and the Western Coal Operators' Association, in which the following contract prices for the No. 2 seam at the Hosmer Mine, are made a part of said agreement:—

NO. 2 SEAM HOSMER MINE.

Gangway.—Eight feet collar between notches, 11′ clear spread, 8′ and 9′ legs, timber not to exceed 14 ″, lagged top and sides, timbers 5′ from centre to centre. Mining and loading coal, rock to be loaded separately, including temporary track and ditch, $11.10 per lineal yard.

Counter Gangway.—Seven feet collar between notches, 11′ clear spread, 7′ and 8′ legs, timber not to exceed 12″, lagged top and sides, timbers 5′ from centre to centre. Mining, loading, handling and dumping coal into chutes, including track laying, rock to be separated and stowed, $9.55 per lineal yard.

Chutes.—Ten feet collars between notches, 10′ sill between notches, three 7′ posts, lagged top and sides, timbers 5′ from centre to centre. Mining coal and putting into chute, building of chute, stairway and air-tight brattice. Company to furnish cutting machines for the purpose of shearing the coal, to be operated by the miner $9.70 per lineal yard.

Breasts.—Twelve feet collar and sill, three 9′ posts, lagged top and sides, timbers 5′ from centre to centre. Mining, loading, handling and dumping coal into chute, including track laying and brattice. Rock to be separated and stowed, $11 per lineal yard.

Where the coal is abnormally hard, the Company to furnish, when practicable, a cutting machine for the purpose of shearing the coal, to be operated by the miner.

On behalf of District No. 18, United Mine Workers of America,

(*Signed*) W. B. POWELL,
President.

(*Signed*) A. J. CARTER,
Secretary-Treasurer.

Witness:
H. B. FULLER.

On behalf of The Hosmer Mines, Limited,

(*Signed*) LEWIS STOCKETT,
General Manager.

(*Signed*) D. G. WILSON,
Superintendent.

Witness:
H. B. FULLER.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF DECEMBER, 1910.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country to correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario, and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 351 individual work people in Canada during the month of December, 1910, were reported to the Department of Labour. Of these, 154 were fatal and 197 resulted in serious injuries. In addition, two fatal accidents were reported as having taken place prior to the beginning of the month, information not having

been received by the Department before December, 1910.

In the preceding month there were 140 fatal and 267 non-fatal accidents reported, a total of 406, and in December, 1909, there were 126 fatal and 218 non-fatal accidents, a total of 344. The number of fatal accidents reported in December, 1910, was, therefore, fourteen more than in the preceding month, and twenty-eight more than in December, 1909. The number of non-fatal accidents reported in December, 1910, was seventy less than in the preceding month, and twenty-one less than in December, 1909. Altogether, there were fifty-five less industrial accidents reported in December, 1910, than in the preceding month, and eleven less than in the same month of the preceding year.

Of 201 returns received during the month giving the ages of the victims of industrial accidents, nineteen referred to persons under twenty-one years of age, thirty-seven to persons between twenty-one and forty-five, and thirteen to persons over forty-five. Eighty-two persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month, by industries and trades:—

STATEMENT OF ACCIDENTS DURING DECEMBER 1910, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total
Agriculture	25	15	40
Fishing and hunting	4	.....	4
Lumbering	7	12	19
Mining	41	14	55
Building trades	5	17	22
Metal trades	10	41	51
Woodworking trades	.....	8	8
Printing trades	.....	1	1
Textile trades	.....	3	3
Food and tobacco preparation	2	7	9
Railway service	17	29	46
Navigation	26	3	29
General transport	4	19	23
Civic employés	2	8	10
Miscellaneous	5	7	12
Unskilled labour	6	13	19
Total	154	197	351

Nature of Fatalities and Accidents.

The disasters of the month involving more than one fatality were: The death of thirty-one miners in the disastrous mine explosion at Bellevue, Alta.; the drowning of twenty-one in the foundering of the steamer *St. Denis*, off the coast of Vancouver Island, B.C.; the killing of three train hands in a railway collision near Ste. Rosalie Junction, Que.; the death of three quarry workers by a slide of gypsum, at Hillsboro, N.S.; the drowning of two fishermen in French river, P.E.I., and at Reindeer Island, Man., respectively, and the killing of two farmers by the bursting of a buzz saw in London township, Ont.

Disastrous Mine Explosion at Bellevue, Alta.

Thirty-one lives were lost as a result of a disastrous explosion which occurred on the evening of Friday, December 9, in mine No. 1, of the Western Canadian Collieries, Limited, situated at Bellevue, about 3 miles east of Frank, Alta. There were forty-six men on the shift at the time of the explosion. A rescue party, which was formed of volunteers from the Crow's Nest Pass and other neighbouring mines, was imprisoned by a cave-in early Saturday morning. A fire had occurred in the mine during October, and it is supposed that it had not been wholly extinguished, and hence led to the explosion. A jury was empanelled on the tenth instant, and immediately began an investigation into the circumstances attending the explosion. No verdict had been reached up to the close of December. It was announced by the Premier of the Province, in the Legislature, that a full investigation into the conditions of the mines in the southern portion of the Province, and particularly of the mine at Bellevue, where the disaster occurred, would be made under the auspices of the Government.

Wreck of the Steamer St. Denis off Vancouver, Island, B.C.

On November 21, the steamer *St. Denis*, owned by a Vancouver company, left that port for Salina Cruz, Mexico, and was wrecked off the coast of Vancouver Island, B.C., going down with her crew of twenty-one in the storms which occurred on the Pacific ocean in the be-

ginning of December. On December 26, a message was received at Gonzales Hill from the Canadian Pacific Railway Company's steamer *Tees* to the effect that wreckage had been found off Cape Scott, Saturday, December 10, marked *St. Denis*, including pilot-house, life boat and life-belts.

Disastrous Railway Collision near Ste. Rosalie Junction, Que.

On December 9 the Intercolonial Railway Nicolet passenger train westward-bound ran into a Grand Trunk Railway light engine from Portland, Maine, near Yamaska bridge, between St. Hyacinthe and Ste. Rosalie, Que. In the head-on collision four railway employés were instantly killed, and two seriously injured; six passengers were also injured. The coroner's jury held the crew of Grand Trunk Railway engine No. 450 responsible, they having taken the wrong line.

Quarry Disaster at Hillsboro, N.B.

On December 16, a slide of rock and earth took place in the plaster quarries at Hillsboro, N.B., and three workers lost their lives, a fourth being badly injured. The verdict found by the coroner's jury, empanelled in the case, on December 19, was: "That the deceased, Fred. Nelson, Edward Collette and Henry Allain, were accidently killed at one of the Albert Manufacturing Company's gypsum quarries in the County of Albert, on December 16, 1910, by reason of a fall of gypsum from the face of the quarry, and we believe that their deaths were purely accidental."

Two Lake Fishermen at Reindeer Island Man.

On December 17, two young fishermen while fishing at Reindeer Island, Man., were drowned.

Drowning of Two Fishermen in French River, P.E.I.

While two fishermen were on their way to their smelt fishing grounds on December 22, they broke through the ice in French river, P.E.I., and were both drowned.

Disastrous Bursting of a Buzz-Saw in London Township, Ont.

On December 20, while taking part in a "buzzing" bee in London Township, Ont., the bursting of a buzz saw instantly killed one farmer, and so seriously injured another that he died a few hours later.

Records by Industries and Trades Centre.

Agriculture.—In this industry during December, 1910, twenty-seven were killed and fifteen injured, compared with twenty-one killed and thirty-five injured in the preceding month, and twenty-eight killed and twenty-one injured in December, 1909. Six of the fatalities were caused by falls, five by falling material, four by being run over, three by machinery, two by live stock and one each by burns, by drowning and by a runaway. Of the injuries, five were caused by falls, four by live stock, three by machinery, and one each by tools, by a runaway and by flying material.

Fishing and hunting.—During December, 1910, two fishermen were drowned at Reindeer Island, in Lake Winnipeg, Man., and two fishermen were also drowned in French river, P.E.I., while in pursuit of their calling. In December, 1909, there were no accidents, and in November, 1910, eight workers in this industry were killed and one injured.

Lumbering.—During the month under review there were seven killed and twelve injured, as against six killed and six injured in the month before, and twelve killed and twelve injured in December of last year. Four of the deaths were due to falling material, and one each to drowning, to exposure and to machinery. Seven of the injuries were due to falling material, three to tools, and one each to flying material and to a fall.

Mining.—Forty-one mine workers met death by accident (thirty-one of these being in the disastrous mine explosion at Bellevue, Alta., elsewhere described), and fourteen recieved serious injury, compared

STATISTICAL TABLE, SERIES F. No. 86.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF DECEMBER, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—	C			
Farmer	herry Valley, Ont.	Dec. 1	1	Burned to death in barn.
"	Blanshard, Ont.	" 1	1	Fell from threshing machine.
"	St. Augustin, Que.	" 5	1	Tree fell on him.
"	Staco, Ont.	" 8	1	Drowned, broke through ice on lake.
"	Carberry, Man.	" 12	1	Run over by locomotive at crossing.
"	Maidstone, Ont.	" 13	1	Thrown from vehicle.
"	Westminster, Ont.	" 14	1	By cave-in of gravel.
"	Ste. Famille, Que.	" 14	1	Tree fell on him.
"	Brandon, Man.	" 12	1	Fell into well.
"	Holland, Man.	" 11	1	Fell on circular saw.
"	Tilsonbury, Ont.	" 19	1	Fell from vehicle.
"	Vankleek Hill, Ont.	" 19	1	Threshing machine fell on him.
"	Leitrim, Ont.	" 19	1	Fell from load of hay.
"	London Township, Ont.	" 19	2	By bursting of buzz saw.
"	Masham, Que.	" 20	1	Trampled on by horse.
"	Logan, Ont.	" 23	1	Trampled by a steer.
"	Dunnville, Ont.	" 27	1	Run over by train at crossing.
"	Sprucedale, Ont.	" 27	1	By upsetting on him of load of wood.
Farmer's son	Welland, Ont	" 10	1	Run over by train at crossing.
Farm hand	Brandon, Man.	" 12	1	Fell down well.
"	Montreal, Que.	" 29	1	Run over by heavy sleign.
Farmer's wife	Tracadie, P.E.I.	" 6	1	In a runaway.
Well digger	Onion Lake, Sask.	" 21	1	Overcome by gas in well.
Fishing and hunting—				
Fishermen	French River, P.E.I.	" 22	2	Drowned; broke through ice on way to fishing ground.
"	Reindeer Island, Man.	" 17	2	Drowned; went through ice with outfit.
Lumbering—				
Logger	Olds, Alta.	" 2	1	Tree fell on him.
"	Lakeville, N.B.	" 8	1	Drowned, broke through ice.
"	Rock Island, Que.	" 13	1	Tree fell on him.
"	Kamouraska, Que.	" 15	1	Frozen to death.
"	Victoria Hill, Que.	" 19	1	Tree fell on him.
"	Fernie, B.C.	" 24	1	Tree fell on him.
Pulp mill hand	Hull, Que.	" 15	1	Caught between rollers.
Mining—				
Miner	Cobalt, Ont.	" 9	1	By falling machinery.
"	Bellevue, Alta.	" 9	31	By explosion in mine.
"	Black Lake, Que.	" 13	1	Run over by mine car.
"	Hazleton, B.C.	" 16	1	Fell 40 feet.
"	Asbestos, Que.	" 23	1	By fall of rock.
"	Extension, B.C.	" 28	1	By fall of rock.
Smelter	Midland, Ont.	" 10	1	Asphyxiated by gas.
Quarrymen	Hillsboro, N.B.	" 17	3	By fall of stone.
"	Shisler's Point, Ont.	" 2	1	Steam pipe burst.
Building trades—				
Carpenter	Dundas, Ont.	" 7	1	Fell from scaffold.
Tile worker	London, Ont.	" 14	1	By cave-in of earth.
Stone mason	Parry Sound, Ont.	" 10	1	By exposure.
Plumber	Montreal, Que.	" 24	1	Explosion of gasoline.
Hoist runner	Hamilton, Ont.	" 5	1	Fell 30 feet.
Metal, engineering and shipbuilding trades—				
Electrical worker	Montreal, Que.	" 1	1	Elevator fell on him.
"	Sintaluta, Sask.	" 2	1	In shafting.
"	Saskatoon, Sask.	" 10	1	Fell from pole.
"	Montreal, Que.	" 29	1	Fell in elevator shaft.
Plumber	Shisler's Point, Ont.	" 4	1	Explosion of valve plug.
Iron worker	Lachine, Que.	" 9	1	Asphyxiated by gas in trench.
"	Cornwall, Ont.	" 13	1	Fell 40 feet.
"	Windsor, Ont.	" 24	1	Struck by iron arm of machine.
"	Galt, Ont.	" 24	1	Caught in belting.
"	Kananaskis, B.C.	" 30	1	By falling rock.

STATISTICAL TABLE, SERIES F. No. 86.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF DECEMBER, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Food and tobacco preparation—				
Milkman	Montreal, Que	" 12	1	Collision of vehicle with street car.
Meat cutter	Toronto, Ont	" 30	1	By fall in abattoir.
Railway service—				
Conductor	Ste. Rosalie, Que	" 10	1	In head-on collision.
Engineer	Ste. Rosalie, Que	" 10	2	In head-on collision.
"	London, Ont	" 24	1	Fell from engine.
Fireman	Macklin, Alta	" 11	1	In a derailment.
"	Ste. Rosalie, Que	" 10	1	In head-on collision.
"	North Portal, Sask	" 23	1	Caught between cars.
Brakeman	Souris, Man	" 5	1	Run over by train.
"	Niagara Falls, Ont	" 7	1	Run over by train.
"	Parry Sound, Ont	" 22	1	Caught between cars.
"	Mimico, Ont	" 23	1	Run over by train.
Construction hand	Byng Inlet, Ont	" 14	1	Frozen to death.
"	Hazleton, B.C	" 14	1	Overcome by gas in tunnel.
"	Mile 77, B.C	" 9	1	Thrown from hand car.
Sectionman	Swansea, Ont	" 21	1	Run over by cars.
Yardman	Toronto, Ont	" 24	1	Run over by train.
"	Saskatoon, Sask	" 7	1	Fell from telegraph pole.
Navigation—				
Seaman	Point du Chene, N.B	" 2	1	Drowned, fell from gang plank.
"	Parrsboro, N.S	" 27	1	Drowned, vessel wrecked.
Crew of S. S. St. Denis	Off coast of Vancouver Island	" 27	21	Drowned in wreck of vessel.
Engineer on vessel	Clarke City, Que	" 10	1	Caught in machinery.
Fireman	St. John, N.B	" 24	1	Run over by train.
Ship labourer	St. John, N.B	" 21	1	Fell into hold.
General transport—				
Carter	Toronto, Ont	" 12	1	In collision with street car.
"	Cobalt, Ont	" 20	1	Run over by team.
"	Toronto, Ont	" 25	1	Run over by team.
Driver	Niagara Falls, Ont	" 26	1	In a runaway.
Public employés—				
Special constable	Winnipeg, Man	" 24	1	Assaulted by thugs.
Armourer	Ottawa, Ont	" 30	1	Explosion of shell.
Miscellaneous—				
Cement mill worker	Belleville, Ont	" 10	1	Caught in belting.
Window cleaner	Montreal, Que	" 21	1	Fell from two-storey window.
Clerk	Montreal, Que	" 13	1	Fell down elevator shaft.
Domestic servant	Montreal, Que	" 15	1	Burned to death; explosion of gasoline.
"	Amherst, N.S	" 21	1	Burned to death; clothing caught fire.
Unskilled labour—				
Labourer	Montreal, Que	" 12	1	Asphyxiated by gas in trench.
"	Vancouver, B.C	" 9	1	Run over by train.
"	Agassiz, B.C	" 9	1	Run over by train.
"	Calgary, Alta	" 6	1	Cave-in of earth.
"	Campbellton, N.B	" 6	1	Run over by train.
"	Port Arthur, Ont	" 19	1	Run over by coal loading machine.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN DECEMBER, 1910.

Construction hand	Prince Rupert, B.C	Nov. 30	1	In collision of hand cars.
	Winston, Ont	" 14	1	By cave-in of earth.

with sixteen killed and twenty-three injured in the previous month, and eleven killed and fourteen injured in December, 1909. As aforementioned, thirty-one fatalities were caused by the explosion in the mine at Bellevue, Alta. Of the others, falling material killed six, and mine cars, a fall, asphyxiation and machinery one respectively. Five of the injuries were caused by falling material, three each by mine cars and by machinery, two by an explosion of dynamite and one by flying material.

Building trades.—Among these workers five were killed during December, 1910, and seventeen were injured, as against twelve killed and twenty-four injured in November last, and two killed and fifteen injured in December, 1909. Two of the deaths were due to falls, and one respectively to falling material, to exposure and to an explosion. Of the injuries, eleven were due to falls, four to explosions and two to falling material.

Metal, engineering and shipbuilding trades.—During December just past there were ten killed in this group and forty-one injured, compared with seven killed and thirty-eight injured in the preceding month, and sixteen killed and fifty injured in December of last year. Three of the fatalities were caused by machinery, two each by elevators and by falls and one each by an explosion, by asphyxiation and by falling material. Twelve of the injuries were due to falls, and to machinery respectively, six to molten metal, two respectively to flying material and to electricity, three respectively to asphyxiation and to falling material, and one to an explosion.

Woodworking trades.—Machinery injured seven and a fall one of these workers. The record of the month previous showed one killed and sixteen injured, and of December, 1909, one killed and fifteen injured.

Printing trades.—Machinery injured one workman in December last. In the previous month two workmen were injured, and in December, 1909, one workman was also injured.

Textile trades.—During December, machinery injured two, and flying material one of these trades, compared with one killed and two injured the month before, and two injured in December, 1909.

Food and tobacco preparation.—In this group two workmen were killed in December, 1910, and seven injured, as against three killed and eight injured in the preceding, and one killed and eight injured in the month of December, 1909. A collision and a fall were responsible for one fatality each, while tools injured three, explosions two and machinery and an elevator one respectively.

Railway employés.—In the month under notice seventeen railway employés were killed by accident and twenty-nine injured, compared with twenty-three killed and twenty-six injured in November, 1910, and fourteen killed and twenty-nine injured in December, 1909. Five of the fatalities were due to being run over, four to collisions, three to falls, two to being caught between cars and one respectively to a derailment, to exposure and to asphyxiation. Seven of the injuries were due to being caught between cars, five to collisions, six to being run over, four to derailments, three to falls and one each to exposure, to falling material and to being struck by an object in passing.

Navigation.—During December, the record was twenty-six killed and three injured, compared with twelve killed and six injured in the previous month, and twenty-four killed and three injured in December, 1909. Twenty-one of the fatalities occurred in connection with the foundering of the steamer *St. Denis*, off the coast of Vancouver Island, above described, and of the others, two were caused by drowning and one each by machinery, by being run over and by a fall. Of the injuries, two were caused by falls and one by an explosion.

Transport.—There were four killed and nineteen injured, as against three killed in November, 1910, and seven killed and sixteen injured in December, 1909. Two of the fatalities were due to being run over and one respectively to a collision and to a runaway. Of the injuries, five were due to falls, four to collisions, three each to derailments and to falling material, two to runaways, and one respectively to flying material and to live stock.

Public employés.—Two of these employés were killed during December, 1910, and eight injured, compared with seven killed and twenty injured in the preceding month, and thirteen injured in December of last year. One of the fatalities was caused by a constable being assaulted by thugs, and the other to an explosion of a shell. Two each of the injuries were caused by falls, by collisions and by falling material, and one each by flying material and by an explosion.

Miscellaneous.—Five of these workmen were killed and seven injured in December, compared with six killed and fourteen injured the month before, and six killed and four injured a year ago. Three deaths occurred through burns and scalds, and one each through machinery, a fall and an elevator. Of the injuries, three occurred through machinery, two through falls, and one respectively through an explosion and through an elevator.

Unskilled labour.—During December, six labourers were killed by accident and thirteen were injured, as against thirteen killed and twenty-three injured the month previous, and four killed and ten injured in December, 1909. Four of the fatalities were due to the victim being run over, and one respectively to asphyxiation and to falling material. Four of the injuries were due to being run over, three each to falling material and to falls, two to tools and one to an explosion.

TRADE DISPUTES DURING THE MONTH OF DECEMBER, 1910.

THE principal trade dispute which occurred in Canada during December was a strike of street railway employés at Winnipeg, Man., which continued throughout the latter half of the month, and was the indirect cause of two smaller disputes. Until December 19, building operations were more or less impeded by a general strike of plumbers at Montreal. Conditions at Springhill, N.S., remained unchanged with regard to a strike of coal miners which has been going on since August, 1909.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during December was ten, being two more than in November, and one more than in December, 1909. About 109 firms and 2,083 employés were involved in these disputes, four firms and 612 employés being involved in new disputes.

Trades affected by new disputes.—The following table shows the trades affected by the new disputes and the number of employés in each group of trades.

Trades.	No. of disputes.	No. of employés.
Mining and quarrying	1	24
Clothing trades	2	38
Transport	1	550
Total	5	612

Localities affected by new disputes.—One new dispute of the month occurred in the Province of Quebec, and the remaining three in the Province of Manitoba.

Causes of disputes.—The following were the causes of the new disputes of the month:—

Cause.	No. of disputes.
Aganist new system of payment	1
Against discharge of employés	1
Refusal to make clothes for strike-breakers	2
Total	4

Methods of settlement.—Out of the ten disputes that were in existence during December, seven were terminated, leaving three still in existence at the end of the year. Of those that were terminated, one was settled through conciliation, two through negotiations between the parties concerned, and two through the resumption of work without negotiations.

Garment workers	Winnipeg, Man.	Lockout on refusal of employés to make suits for Street Railway Company during strike	1	.....	23	.....	.....	"	22	.....		No settlement reported during the month.
Cap workers	Winnipeg, Man.	Lockout, on refusal of employés to make caps for Street Railway Company during strike	1	.....	15	.....	.....	"	30	.....		No settlement reported during the month.
Transport—												
Street Railway employés	Winnipeg, Man.	For reinstatement of discharged employés	1	.....	550	.....	.....	"	16	Dec.	31	Settled by conciliation; discharged men not reinstated.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

Results of disputes.—The employers were successful in six of the disputes that were terminated, and the employés were successful in the remaining one.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes in existence during December, which began in previous months, comprised strikes of coal miners at Springhill, N.S., plumbers at Montreal, Que., and Ottawa, Ont., carpenters at Saskatoon, Sask., and papermakers at Shawinigan Falls, Que.

Strike of Coal Miners at Springhill, N.S.

No change in the situation was reported in the strike of coal miners at Springhill, N.S., in which about 1,000 members of the United Mine Workers of America were involved. The Cumberland Railway & Coal Company continued to operate its mines to a limited extent. This dispute, which was caused by the refusal of the Company to recognize the Union, and to grant an increase in wages and certain changes in conditions of employment, had begun on August 11, 1909.

Strikes of Plumbers at Montreal, Que., and Ottawa, Ont.

On December 21, a general strike of plumbers which had been in force in Montreal, Que., since September 17, was declared off, and the men returned to work, where their places had not been filled, under the old conditions of employment. On September 18, the strike had extended to Ottawa, Ont., two Montreal firms of contractors having brought men from there to work on the new Grand Trunk Railway station and hotel. Owing to the advanced stage of the work at the station, the strike had little or no effect, but operations on the hotel were retarded by it. About 325 men and 100 firms were involved in Montreal, and thirty-one men in Ottawa. The strike was declared off at Ottawa at the same time as at Montreal. The dispute arose from a demand for an eight-hour day and in increase in wages.

Strike of Carpenters at Saskatoon, Sask.

A strike of twenty carpenters at Saskatoon, Sask., which began on November 22, on account of a reduction in wages from 45 to 40 cents an hour, was terminated on December 10, the employers agreeing to pay the Union rate of wages.

Strike of Papermakers at Shawinigan Falls, Que.

A strike of papermakers took place at Shawinigan Falls, Que., on November 7, involving the employés of the Belgo-Canadian Pulp & Paper Company. It was alleged by the men that the strike arose from their refusal to work on Sundays, and from discrimination against members of this union. It was stated by the company that the men working on paper machines wanted to have their lunch sent for at noon and evening. This was refused as they had an eight-hour day. The company claimed that normal conditions prevailed since November 9, most of the places of strikers being filled by advancing men working on the same machines. No settlement of the dispute was reported during the month.

Strike of Shoe Workers at Montreal, Que.

On November 26, a strike of about seventy-five shoe workers took place at Montreal, Que., effecting the Regina Shoe Company. According to the employers the strike was declared on account of their refusal to take back two men who had been discharged. The employers claimed to have filled the places of the strikers, and to be conducting their establishment as an "open shop."

New Disputes.

The new disputes of the month involved street railway employés, garment workers and cap workers at Winnipeg, Man., shoe workers at Montreal, Que., and quarrymen at Hull, Que.

On December 16, about 550 employés of the Winnipeg Street Railway Company went on strike on account of the refusal of the Company to reinstate four employés who had been discharged for entering a bar in uniform. The matter had previously been submitted to a Board under the Industrial Disputes Investigation Act, 1907. During the progress of the dispute a limited car service was provided by the Company, numbers of men being engaged from time to time to take the places of the strikers. Various efforts were made to bring about a settlement of the dispute, and on December 31, the strike was declared off. It is understood that the Company agreed to reinstate 300 of the strikers, giving them the standing they occupied before the strike. The settlement was reached through the friendly mediation of a committee of citizens.*

Disputes of Garment Workers and Cap Workers at Winnipeg, Man.

On December 22, about thirty garment workers employed by the Manitoba Clothing Company, at Winnipeg, were locked out, on account of their refusal to make clothing for the Winnipeg Street Railway Company while the strike was in progress. On December 30, about fifteen cap workers of the North-western Cap Company, of Winnipeg, were reported to have been locked out for a similar reason. No settlement of these disputes was reported during the month.

Strike of Quarrymen at Hull, Que.

On December 17, about twenty-four quarrymen employed by the Canada Cement Company, Limited, at Hull, Que., stopped work on account of dissatisfaction with a change in the method of payment of wages. The Department was informed by representatives of the men that they had been receiving $1.75 per day of ten hours for the extraction of stones at the quarry, but on December 17, they were notified that in future they were to receive 25 cents per bucket of 5,000 pounds of stone quarried. The men refused to accept this as they believed they would not be able to make more than $1.05 per day in the winter months.

*A full account of this dispute is given in the monthly report of the correspondent for Winnipeg and District, on another page of the present issue.

The Company reported that they wished to increase the wages of the men and adopted this plan to do so, and that the men went back to work on December 19, as soon as they understood the terms of the new arrangement.

Strike of Shoeworkers at Montreal, Que.

On December 1, a strike of about eighty shoe workers was reported to have taken place at Montreal, Que. The dispute arose from a readjustment of wages, which the men alleged to have involved a decrease. No settlement of the dispute was reported during the month.

The table which is published herewith is a compliation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of December, and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during December, 1910.

DOMINION REPORTS.

Government Annuities, Bounties and Chinese Immigration.

Report of the Department of Trade and Commerce for the fiscal year ended March 31, 1910. Part IV. Canadian Trade. Miscellaneous Information, Ottawa: King's Printer, 1910. Page, 96.

PART IV of the Report of the Department of Trade and Commerce for the fiscal year ended March 31, 1910, contains information on the following subjects: Government annuities, bounties, Chinese immigration, lumber and staple products, revenue and expenditure of the Department of Trade and Commerce, statistical record of the progress of Canada, tonnage tables, Trade Commissioner service.

With regard to Government annuities, it is stated that to March 31, 1910, there had been issued 646 annuities, aggregating $151,107.60, and the total purchase-money received on account thereof was $484,882.21. Of the annuities purchased, 102 were immediate and 468 were deferred. Eight of the annuities were on the last survivor plan. A full explanation is given of the various annuity plans offered.

The total sums paid in bounties during the last fiscal year amounted to $2,414,-171.15, of which 1,808,533.33 was on iron and steel, $340,542.19 on lead, $61,506.83 on manila fibre used in binder twine and cordage, and $203,588.80 on crude petroleum.

The returns on Chinese immigration show that during the year ended March 31, 1910, 1,614 Chinese entered paying the tax, being the largest number for any year since 1904, when the tax was increased from $100 to $500. There also entered during the last year 688 exempted Chinese. Since 1886, there have entered Canada 3,244 exempts and 49,272 taxpayers, from whom was derived a total revenue of $5,339,442.50.

ONTARIO REPORTS.

Bureau of Labour.

Tenth report of the Bureau of Labour of the Province of Ontario for the year ending December 31, 1909. Toronto: King's Printer, 1910. Page, 282.

The tenth Report of the Bureau of Labour of Ontario, for the year 1909, deals with a wide variety of subjects. Among these are included Municipal Statistics, Municipal Public Utilities, Free Employment, Bureaus Labour Organizations, Wages and Hours of Labour, Industrial Statistics, Labour Legislation, Legal Decisions affecting labour in Ontario, Trade Disputes in Ontario, British and Foreign Labour News.

It is stated that the four free employment bureaus established in Hamilton, London, Ottawa and Berlin were more successful than in the previous year in placing applicants for positions, and it is suggested that greater local publicity would increase their usefulness. There were received 756 returns from municipal clerks, compared with 704 in the previous year. The tabulation of the 751 returns which give statistics shows

that during 1908 14,626 new buidlings were erected, costing $31,611,934, and there were expended on permanent improvements $5,169,379, and on sanitation, $1,330,127.

Mining Statistics of Ontario.

Nineteenth annual report of the Bureau of Mines, 1910. Part I. Toronto: King's Printer, 1910. Page, 253.

Part I of the Nineteenth Annual Report of the Ontario Bureau of Mines contains a statistical review of the mining industry of the Province for 1909, an account of the water powers of Ontario for working mines, and chapters on the Kent gas field, magnetic concentration of low-grade magnetites, Lake Savant iron range area, and nepheline syenites of Port Coldwell.

The following table shows the mineral production of Ontario in 1909, with the number of employés in the various branches of the mining industry, and the wages paid them.

Product.	Quantity.	Value.	Employés.	Wages.
Metallic:—		$		$
Gold, ounces	2,042	32,445	100	68,206
Silver, ounces	25,903,985	12,464,722	3,251	2,605,128
Cobalt, tons	1,533	94,965		
Nickel	13,907	2,790,798	1,796	1,276,091
Copper, tons	7,933	1,127,015		
Iron ore	263,777	465,622	391	230,446
Pig iron, tons	407,013	6,301,528	2,231(a)	1,379,308(a)
Zinc ore, tons	895	8,950	20	7,700
		23,466,045	7,779	5,566,879
Less value Ontario iron ore (220,307 tons) smelted into pig iron		537,549		
Net metallic production		22,928,496	7,779	5,566,879
Non metallic:—				
Arsenic, refined, tons	1,085	61,039	(b)	(b)
Arsenic, crude, tons	3,218			
Brick, common, no	246,308,000	1,916,147	3,166	961,881
Tile, drain, no	27,418,000	363,550	3,166	961,881
Brick, pressed, no	53,166,941	490,571	488	254,950
Brick, paving, no	4,067,620	73,700		
Building and crushed stone		660,000	944	357,821
Calcium carbide, tons	2,349	151,676	60	39,580
Cement, Portland, tons	2,303,263	2,897,348	1,354	631,137
Corundum, grain, tons	1,508	140,817	65	96,168
Feldspar, tons	11,001	36,204	53	14,858
Graphite, refined, tons	730	7,624	117	34,193
Gypsum, crude, tons	11,488	23,604	41	3,500
Iron pyrites, tons	28,946	78,170	132	104,637
Lime, bush	2,633,500	470,858	438	173,905
Mica, tons	350	73,124	123	38,632
Natural gas		1,188,179	171	103,672
Peat fuel, tons	60	240	7	1,200
Petroleum, Imp. gal	14,723,105	559,478(a)	436(d)	261,014
Phosphate of lime, tons	272	1,904	2	4,371
Pottery		43,214	33	12,837
Quartz, tons	63,172	75,329	11	46,906
Salt, tons	77,490	389,573	176	89,995
Sewer pipe		311,830	200	96,815
Talc, tons	4,350	8,700	12	3,316
		10,052,879	8,239	3,331,388
Add metallic production		22,928,498	7,779	5,566,879
Total production		32,981,375	16,181	8,898,267
Total for 1908		25,637,617	15,189	7,858,267

(a) Includes steel making. (b) Included in cobalt and silver. (c) Value crude, exclusive of Dominion Government bounty. (d) Petroleum refineries only.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

ONTARIO CASES.

Fines Imposed on Russian who Imported Garment Workers.

Jacob Rakow, a Russian Jew, was recently fined $600 by the Police Magistrate of Hamilton, upon a plea of guilty to a charge of having smuggled aliens into the Dominion to work as tailors. Failing once in an attempt to evade the immigration authorities, when he dumped a party of six Russians into Toronto, Rakow devised another scheme, and had the six sent to Rochester. Three were later smuggled in by boat, and three were brought in by rail.

Counsel for the immigration department, declared that Rakow had tried to intimidate witnesses. He pleaded guilty. His counsel said he had gone into the matter fully with counsel for the department, and from the investigations he made it seemed that as to six cases discussed with him Rakow was guilty of a violation. "It appears to be the wisest course to plead guilty, and under the circumstances I understand my learned friend does not intend to ask for a heavy fine."

"The penalty is from $50 to $500," said counsel for the department. "The Department has been flouted time and again, and while we don't ask for the extreme penalty, we want a sufficient fine imposed to teach Rakow that he cannot do this. Rakow brought six men to Toronto, who had worked for him in New York. They were caught by an officer and deported. Rakow had them sent from New York to Rochester. They had been instructed how to evade the law, and three got into the country by rail, and three by boat. Witnesses have been intimidated, and in view of this I don't think the lowest fine should be imposed. I think defendant's counsel is agreeable to a $100 fine in each case." Rakow did not have sufficient money to pay the fine in the court, but he was allowed to go on

his counsel's assurance that the money would be paid.

Ladinski, another Russian Jew, who was found guilty of the same offence as Rakow, in Niagara Falls, some time ago, was in court at the same time, and, immediately after court adjourned, he was taken in charge by an immigration officer, who, after hearing his story, ordered that he be deported. Ladinski pointed out to the immigration officials that it would be a hardship for him to leave at once, and consequently they accepted his bond of $100 to appear at Bridgeburg on the thirty-first of the month. The immigration officer who ordered the arrest of Rakow, stated that the six men whom Rakow brought into this country will be deported as well. He also stated that he is investigating the case of Rakow, with the idea of deporting him if he cannot show good reason why such should not be done.

Rakow, by pleading guilty on the advice of his counsel, prevented the submission of evidence which might have been an interesting revelation of the methods employed by him and others to trick the immigration officials.

Death of Brakeman—Alleged Negligence —New Trial.

Appeal by the defendants from the judgement of Judge MacTavish, sitting for Chief Justice Mulock, on the findings of a jury in favour of the plaintiff, in an action to recover damages for the death of Silas Taylor, a son of the plaintiff, who was a brakesman in the employment of the defendants, and was killed, while in the discharge of his duties in the defendants' yard at Madewaska, owing, as the plaintiff alleged, to the negligence of the defendants' servants. The jury found that the cause of the accident which resulted in the death of Silas Taylor was the negligence of the foreman, Kilfoyle, in ordering the deceased to climb to the top of a car while it was in motion, and acquitted the deceased of contributory negligence; and they assessed the damages at $500. There was, in the opinion of the Divisional Court, evidence that Kilfoyle was guilty of the negligence found by the jury; but the difficulty the Court saw in the way of the plaintiff, upon the evidence, was as to the connection between the negligent order and the accident. No witness was able to tell how the accident happened. The finding of the jury was based on mere conjecture, and was not a reasonable inference from the facts proved. There were, however, some matters mentioned by the witnesses which were not fully developed, and which, if more fully investigated, might have enabled an inference to be drawn in support of the theory that the accident happened while the deceased was in the act of getting on the car. While, upon the present evidence, the judgement could not stand, the ends of justice would be best served by directing a new trial, to enable the plaintiffs to develop the matters referred to; but as the granting of a new trial was, in the circumstances, an indulgence to the plaintiff, the costs of the last trial and of the appeal should be costs to the defendants in any event of the action.

(Dunsmore v. National Portland Cement Company, 20, Ont., W. N., 281.)

Work and Labour—Reversal of Judgement on the Facts.

Appeal by the plaintiff from the judgement of the County Court of Essex dismissing the action. Lorne & Son, contractors, of Windsor, agreed with the town corporation of Sandwich to construct a sewer from Bedford street in the town to the Pittsburg dock on the Detroit River, a distance of 1,600 feet, according to plans and specifications prepared by the town engineer. Part of the work undertaken, the outermost 75 feet, was sublet by Lorne & Son to the plaintiff. The price agreed upon for this outlet was $600. The plaintiff alleged that, after he began work, a new contract was made with Lorne & Son, involving an expenditure much in excess of $600, and that the defendant, who, as surety for Lorne & Son, was obliged to take over and complete their contract, was liable as a matter of law to the plaintiff for such excess. Upon the law the trial judge held that the defendant

was not liable; but, on the facts, he found that a second contract was made between the plaintiff and Lorne & Son. Upon the evidence, the Court did not agree with the finding of fact of the trial judge, but were of opinion that there was no new agreement, and that the defendant was, upon that ground, entitled to have the action dismissed. The Chancellor (Boyd) said, the Court will not readily interfere with the conclusion of a judge based upon facts and pronounced after seeing and hearing the witnesses, but the power exists and is to be exercised in proper cases. This is such a case. The evidence of the plaintiff is overborne by the weight of evidence opposed to him. Appeal dismissed with costs.

(Drake v. Cadwell, 20, Ont., W. N., 282.)

Workmen's Compensation.

In the case of McDonald v. Murphy, an appeal was taken to the Divisional Court by defendant from the judgement of Mulock, C. J., of October 4, 1910. This action, brought by the widow and children of John McDonald, under the workmen's compensation for injuries act, claimed $6,000 damages for the death of said John McDonald, alleged to have been caused while in defendant's employ by the falling of a derrick upon him in defendant's quarry. At the trial judgement was given plaintiffs for $1,000 and costs. Judgement : The common law obligation of the Master is to maintain a suitable and safe place for machinery and appliances for the work to be done, and to warn the servants of all dangers known, or which ought to be known to him unless already known to the servant. The jury have found that the Master was negligent in removing the third guy from the derrick without first making the boom fast by anchoring and so securing the stability of the whole until this was brought about by the placing of the "stiff legs." This was the cause of the accident. The jury have found that there was no contributory negligence. The deceased was lawfully upon the premises, and the fact that at the time the derrick fell he was climbing the mast is a mere incident, unless his so doing amounted to contributory negligence. The appeal should be dismissed with costs.

MANITOBA CASES.

Contract for Work and Materials, Engine, etc.

The plaintiff installed in the defendant's theatre an engine and appliances to operate a lighting and ventilating plant, and claimed the balance of the price contracted for the Court (Mr. Justice Robson) held, that the transaction was not a sale of goods, but a supply of work and materials, and the Sales of Goods' Act did not apply.

The plaintiff's submitted a written proposal to the defendant to supply and erect in operating order, on foundations supplied by the defendant, an engine, generator, and switchboard, for a sum mentioned. This proposal embodied specifications for each of these pieces of machinery. The engine specifications described an "Ideal" engine and stated that they were submitted by the manufacturer to the plaintiffs; they referred to the "Ideal" engine as "quiet running." The proposal was accepted by the defendant. The Court held, that this was not a warranty, but only a recommendation, and the plaintiff's right to payment did not depend upon their showing that the engine was "quiet running," and this view was confirmed by reference to the surrounding circumstances, to which reference might properly be made.

It was also held, that there was no collateral warranty or undertaking by the plaintiffs that the machinery should be suitable for the defendant's special purpose—the choice of engine being made on the independent judgement of the defendant's agent, uninfluenced by the plaintiffs; nor should the Court imply an undertaking on the part of the plaintiffs that the engine would operate in a way suitable for the defendant's purpose. It was also held, upon the evidence, that the plaintiffs had erected the engine "in operating order," and were entitled to recover.

(Allis-Chalmers-Bullock Company v. Walker, 15 Western L. R., 357.)

Injury to Switchman—Alleged Negligence —New Trial.

The plaintiff, a switchman employed by the defendants, was, while engaged in his duties as such in the yard of the defendants, struck by a train and injured. In an action to recover damages for his injuries, he alleged a defect in the ways, works, &c., of the defendants, in that there was not sufficient room between the tracks in the yard to enable him to carry on safely the operations of switching and signalling; that there was negligence in the operation of the train by which the plaintiff was injured, by reason of excessive speed and no warning given; and that he was under the orders of a foreman to which he was bound to conform and did conform, and was injured as the result of having so conformed.

The Court of Appeal held, upon the evidence, that there was nothing in the plaintiff's actions that was not in accord with his duties and the orders of his foreman. Although there was no express order from the foreman for him to take certain paces backward in order to give himself a clear vision of the foreman, and to give the engine-driver a clear vision of himself, he was apparently acting within the best of his judgement in order to carry out his orders faithfully, properly, and promptly; in fact he did, in the circumstances, what a switchman in the position might be expected to do, and what his employers might reasonably expect him to do. With reference to the location of the tracks in the yards, there was some evidence upon which a jury might base a finding that the "lay-out" was defective. The real questions in controversy were the inferences proper to be drawn from facts which were practically not in dispute; and it was the province of the jury, and of the jury alone, to draw those inferences. If the defences of contributory negligence and that the plaintiff voluntarily incurred his injuries, were to be established, they must be established to the satisfaction of the jury. The decision in Toronto Railway Company v. King, (1908) English Appellant Case, 260, was followed. The judgement of Mr. Justice Perdue, of the Court of Appeal, in favour of the defendants, withdrawing the case from the jury, was reversed, and a new trial ordered.

(Wood v. Canadian Pacific Railway Company 15, Western L. R., 293.)

SASKATCHEWAN CASES.

Damages for Act of Municipality's Servant.

The defendant M., acting as road-boss under instructions from the reeve and one of the councilmen of the defendant municipality, entered upon the plaintiff's land for the purpose of making a road diversion around a slough on the road allowance. The plaintiff forbade the construction of the road diversion on his land, but M. proceeded to make it. The preliminary steps necessary to give the municipality the right to enter and appropriate the plaintiff's land had not been taken. The Court (Mr. Justice Lamont) held, that the defendants were guilty of trespass and liable for the damage resulting therefrom.

It was also held (1) that the plaintiff was entitled to general damages for the trespass and deprivation of the use of the portion of his land taken, assessed at $75; but not to damages for having nine acres separated from the rest of the farm by the road diversion; whatever loss be sustained in this connection was a matter for consideration in awarding compensation in the expropriation proceedings since taken; (2) that the plaintiff was entitled to special damages, assessed at $99, for the loss of flax and wheat destroyed by water backed on the land by reason of the construction of the road diversion without proper culverts; and (3) that the defendant M. was the servant of the defendant municipality, and, in constructing the road diversion, was acting within the apparent scope of his authority, and, therefore, the municipality was liable for his acts. The decision in the Citizen's Life Assurance Company v. Brown, (1904) English Appellant Case, 423, was followed.

(Foley v. Municipality of South Qu'Appelle, 15, Western L. R., 264.)

Damages for Negligent Spreading of Fire.

In an action for damages for loss sustained by the burning of the plaintiff's pasture, by a fire set out by the defendant on his land, which escaped to the plaintiff's adjoining land, through the negligence of the defendant's servants, the Court (Mr. Justice Lamont) held, on the evidence, that the fire which consumed the plaintiff's pasture had its origin in the fire set out by the defendant; and that the defendant did not, in setting out the fire, observe the precautions required that the fire shall be "guarded" during the whole period of its continuance by three adult persons.

It appeared that the defendant's servants took a load of straw on a wagon to the northwest corner of the defendant's land, and scattered some of the straw on the ground and then set fire to it. There being a very strong wind from the west or northwest, this fire was driven eastward. The defendant's servants, instead of following up this fire and guarding it, let it go, while they continued to spread straw and fire it along the whole west side of the defendant's stubble, with the result that the fire which they first started was soon more than half a mile distant from them, burning with great fury. The requirements of the statute as to guarding by three adult persons mean that they shall stand guard over it so to prevent its escape—that is, accompany it so as to be on hand to extinguish it in case it should leave the defendant's land. The defendant, therefore, was guilty of permitting a fire in charge of his servants to pass from his own land, within the meaning of section two of the Ordinance, and was liable for the damages caused by such fire. The decisions in McCartney v. Miller, 2 W. L. R. 87, were followed.

It was also held that, apart from noncompliance with the statute, the defendant was guilty of negligence in setting out the fire on a day on which the wind was blowing so strongly as the evidence shows it was blowing on the day in question. On this point, the decision in Kennerman v. Canadian Northern Railway Company, 13 W. L. R., 191, was followed. Damages were assessed for the loss of the pasture and for extra expense incurred in taking care of the plaintiff's cattle.

(Armour v. Marshall, 15, Western L. R., 173.)

Fined for being Drunk on Duty.

For being drunk while on duty, operator at Rumford Junction was fined $50 and costs, or in default one month's imprisonment, in the Sudbury police court. The Canadian Pacific Railway Company caused the man's prosecution. He paid his fine. All Canadian Pacific Railway trains stop at Rumford Junction for orders, but the crew of a freight found conditions on the morning of October 2 which they, or other trainmen, had not seen for a long time, and in all likelihood will not see again for many a day. They found the operator drunk and in a stupor at his post. The matter was at once reported to the railway officials.

Damages to Car Cleaner.

In the case of Joseph R. Paquette, car cleaner, v. the Grand Trunk Railway Company, an Ottawa jury has awarded plaintiff $1,287 and costs for personal injuries. The action was for $5,000 damages. When going to clean a car alongside a track at the Central station, Paquette was struck by an engine and had his left leg badly hurt. It had not healed at the time of the trial, and the doctor feared that it would be permanently twisted. He claimed that the Company was careless, as a pipe was lying along the ground on which he tripped, and the ground was not safe to walk on at night. He also claimed that the engine was going at an excessive rate of speed, and that the bell was not ringing.

Damages for Railway Company's Negligence.

Plaintiff claimed damages for injuries caused him by the train of defendants', which injured his left arm so that it will be stiff for life. The accident was caused by the lid of a journal-box flying off and striking plaintiff's arm. Plaintiff was working on the track, and stepped aside twelve or thirteen feet from the track,

and, as the train passed, the journal-box lid struck him on the left arm. It was not likely that plaintiff would ever regain the movement of his arm as formerly, though it would get strong again. His physician's bill was $35.

Mr. Justice Clute told the jury that the questions to consider were these: "Was the Company guilty of negligence? If the train was allowed to leave Buffalo with a bad journal-box was it a good exercise of care? Did the evidence show a satisfactory inspection? (None of the inspectors had raised the journal-box lid to see the interior.) The jury must, if they decide that there was negligence, explain the nature of such negligence, and in assessing damages, if any, they should bear in mind the physician's bills, the two months' wages while defendant was out of work, and also consider whether or not his earning power had been lessened by such accident. They must award for the money loss and for the pain suffered.

The jury found the railway Company negligent, the negligence being the allowing of an improperly fastened journal lid, and for which they assessed damages for the plaintiff $150.

(Brooks v. Michigan Central Railway, Welland Fall Assizes, 1910.)

BRITISH COLUMBIA CASES.

Death of Workman Travelling on a Pass.

A man employed by the defendants as a painter was travelling to the place where he worked, upon a car of the defendant's, into which a freight car of the defendant's, which had got loose from the motor which drew it, ran, and in consequence the man was killed. The man was travelling on a pass issued by the defendants to him, and upon the back of the pass was printed a condition relieving the defendants from liability in case of accident. The deceased had not signed his name on the back of the pass, as required by the condition. In an action, under the Fatal Accident's Act, to recover damages for the death of the man, the jury found that he was travelling on the pass, but was not aware of the condition, and assessed damages to the plaintiff, but were not asked to make, and did not make, any other findings.

The Court (Judge Murphy) held that the relation of master and servant existed between the deceased and the defendants at the time he was killed. The decisions in Tunney v. Midland Railway Company, L.R.1, C.P. 291, and Goldrick v. Partridge, 79 L. J. K. B., 173, were followed.

There might be a question whether the rule, "the thing speaks for itself" applied. But it was held, that the proper inference from the evidence was that the coupling between the freight car and the motor broke; and no proof being adduced that the coupling was a proper one and in good repair, or that the defendants had in force a proper method of inspection and competent men to inspect, that the defendants were liable at common law. It was also held that there was evidence to sustain the finding of the jury as to the pass. Judgement was given for the plaintiff for the damages assessed.

(Farmer v. British Columbia Electric Railway Company, 15, Western L. R., page 136.)

Building Contract—Failure to Comply with Plans, etc.

By a written agreement the plaintiffs agreed to build and furnish all material for a certain building for the defendant, according to plans and specifications, for a lump sum of $4,367, payable in "three equal payments, one to be made when roof is on building, one when plastered, balance when job is completed (thirty days after completion of building.)" It was held by Mr. Justice Clements, upon the evidence, that the plaintiffs had not built and furnished all material for the defendant's building according to the plans and specifications; and that there was no evidence that the defendant had accepted what work the plaintiffs did do as a fulfillment of the contract. The plaintiffs were, therefore, not entitled to recover upon the written contract. The doctrine of "substantial performance" has no place in the British Columbia jurisprudence. The decisions in Ellis v. Hamlen, 3 Taunt. 52, Lakin v. Nuttall, 3 S.C.R. 685, Sherlock v. Powell, 26 A.R. 407, and The Madras, 67 L.J.P. 53, were followed.

The plaintiffs asked leave to amend so

as to claim as upon a contract to pay as much as they were entitled to, but it was held that no such implied contract was to be inferred merely from the taking or retaining possession of the land and the building which had become part of the land; and that there was nothing more than that in this case. There was no evidence of knowledge on the defendant's part of the plantiff's departure from the plans and specifications; to make out a case either of waiver and acceptance, or the substitution of a new agreement, knowledge of the breach on the defendant's part must be shown and must be followed by or coupled with some attitude of acquiescence adopted towards and made manifest to the plaintiffs, and sufficient to warn reasonable men in concluding, either that what the plaintiffs had done was accepted as a fulfillment of the actual existing contract, or that the defendant was a consenting party to an alteration in the contract and the substitution of a new scale of payment. On these points the decisions in Munro x. Butt, 8 E. and B. 738, Sumpter v. Hedges, 67 L.J.Q.B. 545, Whitaker v. Dunn, 3 Times L. R. 602, and Forman v. The Liddesdale, 69 L.J.P. 44, 49, were followed.

The defendant had paid the plaintiffs $1,400, and this action was for a few dollars of the first payment, and for the whole of the second and third payments. As to this, the Court held that, although the defendant had at one time intimated his willingness, upon certain conditions, to make the second payment, there was no evidence thereby of waiver and acceptance, because it was not shown that the intimation was made with knowledge of the breaches of the agreement.

The Court also held, (1) that the right of the plaintiffs to call for any one of the three payments was conditional upon the work, so far as completed up to the period specified, being completed according to contract; (2) that, upon the evidence, the plaintiffs were entitled to recover for work done and goods supplied outside of the written contract, at the request, expressed or implied, of the defendant; and (3) that the defendant's counterclaim for damages, being much more than offset by the difference between the value of the building and what he had paid for it, should not be allowed; the claim for $5 a day for delay in the completion of the building was a claim for a penalty, and the plaintiffs should be relieved therefrom.

(McDonald v. Simons, 15, Western L. R., page 218.)

Transient Traders By-law—An Improper Conviction.

The defendant was convicted as agent for a company doing business in the City of V., of unlawfully soliciting or taking orders, in the City of C., for the sale by retail of certain goods, wares, or merchandise, namely, a certain newspaper, published by a company doing business outside the City of C., without having taken out a license from the corporation of C., contrary to sub-section six of section one of by-law No. 64, of the corporation of C. The by-law followed the wording of the provisions in the Municipal Clauses Act respecting transient traders, and imposed a licenes fee on all persons carrying on business within the meaning of the by-law. The penalty clause in the Act and by-law provided that "no person shall use, practise, carry on, or exercise, a trade, occupation, profession, or business described or named," &c. Evidence was given of only one sale. Judge Wilson, of the County Court of East Kootenay, held that there was not sufficient evidence upon which to convict the defendant, and that one act did not bring him within the by-law. The decision in the City of Victoria v. Belyea, 5 W. L. R. 161, 428; 13 B. C. R. 5, was distinguished from the present case. It was also held that, as there was no evidence that the alleged goods, &c., were to be supplied by a person doing business outside the municipality, the conviction could not be supported.

(Rex v. Ogle, 15, Western L. R., 325.)

YUKON TERRITORY CASES.

Master and Servant—Damages to Workman.

In an action for damages for personal injuries sustained by the plain-

tiff while working for the denfendant company in a tunnel, by the breaking of a jam, the jury found, in answer to questions: That the foreman might have explained the danger more fully to the men; that "to a certain extent," the servants of the Company, by their acts of commission or omission, had caused injury to the plaintiff; that the person who committed such act or made such omission was the foreman; that the plaintiff might have used better judgement; that the plaintiff did "to a certain extent," appreciate his danger, but not fully, under the circumstances.

The Court (Judge Macaulay) held that the answers of the jury amounted to a finding that the defendant company, throughtits foreman, omitted to explain fully to the plaintiff and his fellow-workmen the danger surrounding them in the position in which they were when the accident occurred, which a person of ordinary care and skill, in the circumstances, would have done, and that, by such omission or negligence, injury was caused to the plaintiff; and, therefore, that there was some negligence on the part of the Company, which caused injury to the plaintiff.

The evidence also showed that, when the jam in the tunnel broke, the plaintiff started to run out of the tunnel, thinking, as he said, that he "could beat it out;" and that one of his fellow-workmen jumped on the side of the sluice-box and escaped injury. Upon this evidence, it was held that the finding of the jury that "the plaintiff might have used better judgement," was not to be taken as a finding of contributory negligence, the plaintiff being placed in a perilous position in which he could not be expected to use as good judgement as in a cooler moment. Judgement was entered for the plaintiff upon the findings of the jury.

(Skoropata v. Yukon Gold Company, 15 Western L. R., page 83.)

Woodmen's Lien Ordinance—Meaning of "Holiday."

In an action by plaintiffs to enforce their liens, it appeared that claims of lien, under the Woodmen's Lien for Wages Ordinance, were filed on May 21, 1910, May 20 being the last day for effective filing under sections six and seven of the Ordinance. By section 21 of the Interpretation Ordinance, if the time limited by any ordinance for any proceeding, or the doing of anything under its provisions, expires or falls upon a holiday, the time so limited shall be extended to, and such thing may be done on the day next following. The Court (Judge Macaulay) held that May 20, being the day proclaimed by the Governor-General as a day of general mourning for King Edward VII, was not a holiday within the meaning of the Interpretation Ordinance, nor of the Dominion Interpretation Act; but, apparently, if it had been a holiday, the plaintiffs would have been entitled to maintain their liens by the filing on the twenty-first. It was also held that Rule 554, of the Judicature Ordinance, did not apply, because the reference in that Rule to "Sunday or other day on which the offices are closed," means "or other day on which the offices are legally closed." The plaintiff's actions to enforce their liens were dismissed, but the plaintiffs were awarded personal judgements for the amounts claimed, under the amending Ordinance of 1909.

(Peterson v. Drabeson and Scholt v. Drabeson, 15 Western L. R. 87.

UNITED STATES CASES.

Important Labour Law Judgement.

The largest judgement ever entered by a United States Court in favour of the Government, growing out of a prosecution for attempting to bring alien labourers into the country, in violation of law, has been reported from Tucson, Ariz., where the jury rendered a verdict for $45,000. This was $1,000, the penalty fixed by statute, for each of forty-five aliens whom it was attempted to import. The defendant in the suit was a construction company in Los Angeles.

THE

LABOUR GAZETTE

FEBRUARY, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JANUARY, 1911.

I.—GENERAL SUMMARY.

INDUSTRIAL and trade conditions during the past month compared favourably with those of the corresponding period of 1910. There was the usual lull in the opening weeks of the year, following upon the holiday season, but the amount of general employment available was noticeably larger than in the preceding season. In connection with railway construction, the number of men employed at rock-cutting, bridge-building and the assembling of supplies was larger than in the preceding year, especially in Western Canada. Building also was active for the season. Manufacturing establishments were for the most part running full time with complete staffs, the general tendency being to curtail the period of the annual shut-down for stock-taking and repairs. The prevailing weather was cold, and transportation was interfered with in certain sections of the Northwest Provinces. The abundant snowfall and steady frost, however, had the effect of stimulating activity in the lumber woods of Eastern Canada, and rapid progress was made with the cut. Agriculturists had the advantage of good snow roads in the marketing of produce, for which prices continued on high levels. The mining industry, apart from seasonal inactivity, reported favourable conditions. Snow removal and the harvesting of the ice crop gave the usual employment to unskilled labour, and few cases of unemployment attended with privation were reported. The ice crop was being harvested under exceptionally favourable conditions, the ice being thick and of excellent quality.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during January, 1911.

Printing and allied trades.—Printers at Halifax, N.S., obtained a new scale, from January first. Printers and stereotypers at Vancouver, B.C., also received an increase.[1]

Civic employés.—The Toronto City Council advanced the wages of various workmen in its employ by $1.50 to $3.00 per week. The class included waterworks' labourers, inspectors, engineers, firemen, oilers and tree-trimmers, numbering in all about 120. Civic employés at Niagara Falls, Ont., also received an advance.[2]

Miscellaneous.—Some fifty-five male and seventy female employés of the Somerville Paper Box Company were voluntarily granted a new hours' arrangement, involving an increase in earnings of forty cents to $1.50 per week.

[1]See reports of local correspondents.
[2]See report of Niagara Falls, Ont., correspondent

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

On the first of January amendments to the Factories' Act of the Province of Quebec went into effect, by which the hours of women and children employed in cotton and woollen factories were reduced from sixty hours to fifty-eight hours per week. In certain instances no reduction in the weekly earnings was made by the employers to the class effected.[3]

Interruptions to Industry.

Among industrial establishments, etc., destroyed by fire or through other causes during January, 1911, as reported in the press of the Dominion, the following may be mentioned.

Nova Scotia.—Pulp and saw mill at Weymouth, loss $50,000; offices of the Dominion Steel Company, at Sydney, C. B., loss $35,000; business section of Middleton, loss, $150,00; drug store at Truro, loss $20,000.

Prince Edward Island.—Woodworking steam mills at Souris, loss $8,000; lumber mill at Summerside, loss $5,000.

New Brunswick.—Tailoring establishment at Moncton, loss $6,000; warehouse at Moncton, loss $5,000; gristmill at Andover, loss $8,000; part cargo of cotton on steamer *Manchester Spinner*, loss $12,000.

Quebec.—Dry goods store at Quebec, loss $150,000; grocery store at Acton, loss $15,000; hotel at Windsor Mills, loss $22,000; business block at Lake Megantic, loss $30,000; Canadian Northern Railway Company's round house and shops at Roberval, loss $15,000; terminal station of the Quebec, Montreal & Southern Railway, at Sorel, loss $12,000; business block at St. Remi, loss $12,000; four stores in Montreal, loss $4,000.

Ontario.—Laboratory of the Inland Revenue Department, at Ottawa, loss; $10,000; business block at Ottawa, loss $25,000; ice-house partly stocked at Ottawa, loss $6,000; boot and shoe store at North Bay, loss $15,000; business section at Gowganda, loss $100,000; theatre and public library at Pembroke, loss $15,000; shirt factory at Belleville, loss $65,000; cold storage ware house at Belleville, loss $5,000; office and buildings of Ontario Steel Company at Welland, loss $2,000; steel and iron works at Hamilton, loss $35,000; ice house at Hamilton, loss $15,000; wholesale paper warehouse at Toronto, loss $16,000; fur store at Toronto, loss $18,000; hotel at Aylmer, loss $2,000; gristmill at Mount Elgin, loss $6,000; sanitarium at Guelph, loss $75,000; hotel at Parkhill, loss $10,000; business block at Bracebridge, loss $2,000; brick works at Port Credit, loss $1,000.

Manitoba.—Business block at Virden, loss $15,000; three stores at Gilbert Plains, loss $12,000; papermill at Winnipeg, loss, $10,000; business block at Winnipeg, loss $40000; grain elevators at Brandon, loss $75,000.

Saskatchewan.—Business section at Moosejaw, loss $100,000.

Alberta.—Three stores at Strathcona, loss $40,000; hotel and stores at Lethbridge, loss $85,000; business block at Ryley, loss $20,000; business section at Lacombe, loss $50,000.

British Columbia.—Furniture factory at Vancouver, loss $3,000; departmental store at Stewart, loss $12,000.

Yukon Territory.—Business block at Dawson, loss $22,000.

[3] See the *Labour Gazette* for September, 1910.

Conditions in the Industries and Trades.

Conditions of employment during January, in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

The feeding of stock and the marketing of produce formed the chief item of agricultural employment. The weather since the new year has been generally cold, with good snow roads. These conditions, with the high prices pervading, stimulated the movement of farm products. There was little demand for labour; wages offering in Manitoba ranged from twelve to fifteen dollars per month, with board.

Several important meetings of agriculturists were held in January. The Nova Scotia Farmers' Association met at Windsor with 150 delegates present. The Eastern Ontario Dairymen's Association held an important meeting at Perth; it was stated that 933 cheese factories were in operation during the season, being 19 less than last year, though the total output of these, amounting to 97,253,407 pounds, represented an increase of 83,324 in the number of boxes produced. Similarly, the yield of cheese in western Ontario factories, as reported at the meeting of the Western Ontario Dairymen's Association held at Stratford, showed an increase of 16,525 boxes over 1909. The thirty-second meeting of the Ontario Agricultural and Experimental Union was held at Guelph and the eighth annual convention of the Manitoba Grain Growers' Association at Brandon. The United Farmers of Alberta decided at a meeting of the directors to establish a permanent office in Calgary at an early date, and to make this the headquarters of the organization.

The *Census and Statistics Monthly* gives the total area of field crops grown in Canada in 1910, as 32,711,062 acres, and the value of crops as $507,187,500,

compared with 30,065,556 acres and a value of $532,992,100 last year; with as good a harvest as last year's, this year's crop would have reached $557,723,000. in value.

The following statistics gathered by the Department of Agriculture of New Brunswick, show the crops for 1910, to have been better than last year, with the single exception of the potato crop. The yield per acre of wheat was last year 18.5 bushels per acre, this year 19; of oats last year 29·1 bushels, this year 29·7; of buckwheat last year 24·7, this year 24·6; of potatoes last year 187 bushels; this year 127; of turnips last year 511; this year 500·8. The hay crop, for which statistics are not gathered, was an unusually large one, running, it is estimated, fully twenty-five per cent. above the average crop. The number of live stock kept on farms in December, 1910, compared with December, 1909, was as follows:

	1909.	1910.
Horses	57,715	61,042
Cattle	199,481	215,829
Sheep	143,274	147,480
Swine	70,010	80,022

Following are the crops and total yields of the crops for which statistics were gathered in the two years:

	1909.		1910.	
	Acres.	Bushels.	Acres.	Bushels.
Wheat	14,447	268,079	13,988	265,848
Oats	194,815	5,682,358	196,795	5,847,877
Buckwheat	56,735	1,405,775	56,305	1,390,717
Potatoes	47,853	8,968,098	47,744	6,067,276
Turnips	6,531	3,340,862	6,310	3,160,158

Fishing.

The month was generally quiet. Some fair shipments of smelts and eels were made from the Maritime Provinces and preparations have begun for the opening of the lobster season. In British Columbia the run of herring has been very light. Preparations are being made by the Canadian North Pacific Fisheries Company for the coming season. Ten vessels will be operated this year, five of which were in use last year.

Reviewing the fishing operations in Nova Scotia for 1910, a prominent fish dealer states as follows:

"The fishing operations in Eastern Canada, so far as the production of dry and pickled fish is concerned, may be summarized as follows:

"Cape Breton and Gaspé Shore codfishery, and Lunenburg Bank fishery, twenty-five per cent. above an average; South Shore of Nova Scotia codfishery, twenty-five per cent. under the average; Bay of Fundy scale-fishery, thirty-three and one-third per cent. under the average. Mackerel and herring fishery almost a complete failure."

Prices compare about as follows:

	Dec. 1909.	Dec. 1910.
Small shore codfish	$ 5.00	$ 5.75
Large shore codfish	5.50	6.50
Bank codfish	4.75	6.00
Haddock	3.50	4.25
Hake	2.75	4.25
Pollock	3.00	4.00
Spring mackerel	11.00	13.00
No. 1 fat mackerel	18.00	20.00
No. 2 fat mackerel	15.00	18.00
No. 1 shore herring	2.75	4.00
No. 2 shore herring	2.25	3.00

The growth of the fisheries industry of the Canadian Maritime Provinces during the last forty years is shown by a return which was tabled in the Commons during January. The value of the catch by Canadian fishermen in 1909–10 was $11,887,899. In 1870, the total catch was $3,295,702. There has been less increase in the catch of cod than in any other class of fish.

To prevent the over-exploitation of the salmon fisheries of British Columbia and the consequent depletion by canneries and curing establishments, an order-in-council has been passed declaring that no boat will be allowed to engage in salmon fishing except under license from the Minister of Marine, while the number of boats which will be allowed to each cannery and curing establishment has been named. The canneries in all will be allowed 1,990 boats.

Various statements have recently appeared in the daily press respecting the results of the International Fishery Conferences held in December, in Ottawa and Washington. It is asserted that the opposition of American fishermen in Saginaw Bay, and objections raised by Lake Erie fishermen have caused delay in the promulgation of the uniform and common Fishery Regulations, submitted by President David Starr-Jordan and Professor Edward E. Prince, on May 29, 1909. The further statement has been widely published that the Commissioners have agreed that the objections raised are well-founded and have revised the regulations in order to

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, active, very active; (2) quiet and very quiet.

meet the opposition of the fishermen.

It is now authoritatively stated that the two Commissioners have not reached any such agreement and that any such revision is precluded by the terms of the Treaty. It is out of the power of the Commissioners to change or revise the uniform Fishery Regulations laid before the two Governments, in order to make any provision or clause applicable or inapplicable to a locality on one side of the boundry line only. Article II of the Fishery Treaty (April 11, 1909) specifically requires that the fishery laws shall form "a system of uniform and common international regulations," and does not provide for exceptions or modifications applicable to the boundry waters of one country and not to the other country. Again, merely local objections from Saginaw Bay men, or any other body of fishermen, cannot over-ride Article III, of the Treaty which binds the United States and Canada to carry out the recommendations of the Fishery Commissioners. "The two Governments engage to put into operation and to enforce by legislation and executive action" the regulations, according to Article III of the Treaty. Lastly, it is out of the power of the Commissioners to formulate and recommend such changes or revisions as has been recently alleged, unless both Governments are agreed that revision is necessary. Article VI provides that either Government may after four years give notice to the other of its desire for revision; but, both Governments have power, if they agree to do so, to modify the regulations at any time by joint or concurrent action upon the recommendation of the two Commissioners. Hence, it is clear that both Commissioners must agree upon any proposed modification and must make a formal recommendation, upon which both Governments must then agree to act together and by joint or concurrent action carry out the changes. The statement, therefore, that Saginaw Bay, or any other area in the Treaty waters, can be exempt, pending amendment of the regulations by the Commission, is contradicted by the terms of the Treaty.

The Conference last month was held in accordance with an arrangement agreed upon between the two International Commissioners immediately after their appointment, that once a year in November or December a meeting should be held either in Ottawa, Washington or New York, to review the work of the preceding twelve months, to consider any representations made regarding the fisheries, and to confer generally upon any new aspects which the international fishery questions may have assumed.

On January 19th, the Honourable the Minister of Justice announced in the House of Commons the result of certain negotiations conducted between Canada and the United States at Washington earlier in January, in regard to the regulations and laws governing operation of Canadian fisheries in Atlantic waters. Fifteen objections against the laws of Canada and Newfoundland had been filed by the United States. Those referring to Canadian regulations and laws covered four points, namely:

1. The right of the Canadian Government to issue licenses to American fishermen on the treaty coasts.
2. The prohibition by Canada of purse seines.
3. The prohibition by Canada of Sunday fishing.
4. The right of officers of the British Navy or in the Canadian service to board and search American fishing vessels.

In the agreement which was formally drawn up yesterday, the objections to the first three of these points were withdrawn, while Canada waived the question of boarding and searching vessels.

In the agreement which was drawn up, the contentions of the Canadian representatives were conceded with minor concessions.

Lumbering.

Work in the woods was going forward actively in Ontario and the Eastern Provinces, being facilitated by plenty of snow and favourable weather. Low water in the Ottawa river and elsewhere hampered some of the mills, but otherwise conditions were favourable. In British Columbia the mills were generally quiet, but the tone of the market was firm.

An important incident of the month was the holding of the Dominion Forestry Convention in the Legislative Council chamber, City of Quebec, January 18 to 20. The Convention was called by the Right Honourable the Prime Minister

and was opened by His Excellency the Governor-General, the attendance being larger than at any previous convention since that held at Ottawa in 1906. The president of the Canadian Forestry Association, the Honourable Senator W. C. Edwards, occupied the chair. On the opening day a feature of the proceedings was an address by the Honourable Clifford Sifton, chairman of the Commission of Conservation, who dealt with various forestry problems and especially with the subject of forest fires. Several addresses on forestry administration followed. On the second day of the Convention, the Honourable the Minister of Agriculture, for Canada, delivered an address; this was followed by addresses on the protection of forests against fires, lumbering regulations, forestry education and injurious insects. On the third and closing day of the Convention, the principal subjects dealt with were water powers and waste land planting. Resolutions were passed, recommending that additional responsibility be placed on railway companies for forest fires caused by locomotives; approving the policy of utilizing timber cut on Crown lands; and recommending the building of additional highways and the improvment of existing roads.

According to statistics collected by the Forestry Branch of the Department of the Interior, there were 622,129 cords of pulpwood used in Canada during the year 1909. Of this the total value at the mill was $3,464,080. In spite of a decline in the price of pulpwood the value of the wood consumed increased more than $550,000 over that used in 1908, the quantity used being more than thirty per cent. in advance of that used in the preivous years.

There are some sixty pulp mills in the Dominion, and of these reports were received from fifty. Half of these mills are in Quebec, one-fifth in Ontario, and the rest are located in New Brunswick, Nova Scotia and British Columbia. The Province of Quebec furnished over half the pulpwood, Ontario gave one-third, while the rest was obtained from New Brunswick, Nova Scotia and British Columbia.

Mining.

Conditions show little change as compared with those of the previous month. On the whole there was steady employment in the Nova Scotia collieries, the outlook being for larger outputs in 1911 than last year. Winter dullness prevailed in the asbestos, nickel, feldspar and other mines of Ontario and Quebec, but the copper, silver, nickel and other mines were in active operation. There was a heavy output from the Alberta collieries, though the severe winter, resulting in interruption of traffic, somewhat curtailed operations in certain districts of the province and in the Crows' Nest Pass district. The metalliferous camps were on the whole active. Very active employment was the rule in the Vancouver Island collieries.

A preliminary review and estimate of the mineral production of British Columbia during the year 1910, has been issued by the Provnicial Mineralogist. The estimated value of the 1910 mineral production in the province is $26,183,505. If the revised returns prove this estimate to be approximately correct, as is believed they will do, the total for the year will be the highest yet recorded in the history of mining in British Columbia, it will compare favourably with that for 1907, which, at $25,882,560, has been the largest yearly total on record. The estimates of production are as follows:

		Quantity.	Value.
Gold, placer		.....	$ 482,000
Gold, lode	oz.	251,500	5,198,505
Total gold		.....	$5,680,505
Silver	oz.	2,500,000	1,282,500
Lead	lb.	37,000,000	1,480,000
Copper	lb.	39,000,000	4,972,500
Zinc	lb.	4,000,000	184,000
Total, metals		.....	$13,599,505
Coal	tons	2,800,000	9,800,000
Coke	tons	214,000	1,284,000
Building materials		.....	1,500,000
Total value of production			$26,183,505

The annual report of the British Columbia Copper Company showed that, notwithstanding dullness in the copper market and six weeks' suspension of operations, net earnings were approximately $275,000, compared with $236,000 in the preceding twelve months. Cost

of production estimated at 9·624 cents a pound, was the lowest yet recorded and compares with 9·829 cents in the preceding year, and 9·996 cents two years ago. The output totalled 6,009,780 pounds of copper, against 6,325,000 pounds in1909. The Company has pursued a progressive policy during the year, both by increasing its smelter capacity and in the development and acquiring of new properties. At the present time three furnaces are in operation.

The report of the Commission appointed by the Government of the Province of Quebec, to investigate and report on the mineral wealth of the Chibougamou district, was presented to the legislature in January. While private prospecting is advised, the Commissioners report that they failed to discover mineral deposits of sufficient merit to justify the spending of public money in the building of a railway, as proposed, from Lake St. John to Chibougamou.

The mineral production of Nova Scotia during the last year showed a substantial increase compared with that of the previous year. There was a total increase of 300,000 tons in coal production. Iron ore to the extent of 700,000 tons was imported and manufactured into 412,000 tons of steel ingots and 350,000 tons of pig iron. Gold and gypsum production increased.

The jury in the coroner's inquest into the cause of the deaths of thirty-one men in the Bellevue mine on December 9, arrived at the following verdict in January:

That the men came to their deaths by carbon monoxide poisoning, and one by a combination of carbon monoxide poisoning and fractured skull. The said carbon monoxide and fractured skull being caused by a percussion of air caused by a cave of rock over chutes No. 76 to 78.

The jury respectfully submit the following riders to their verdict:—

1. That more mine inspectors be appointed;
2. That a Draeger apparatus station be provided in this district.
3. That telephones be installed under the supervision of the Chief Inspector of Mines, where practicable, in the underground workings of coal mines.
4. That a thorough investigation be made of means of preventing the loss of life by caves in coal mines.
5. We consider that negligence is in evidence on the part of both operators and miners in the carrying out of the provisions of the Coal Mines Act, and we would most strongly recommend a stricter adherence to the intent of this Act.

Manufacturing.

Manufacturing establishments were more active than at the corresponding period last year. Reports from several centres are to the effect that the annual cessation of operations for stocktaking purposes is being curtailed and that staffs are larger than for some time previously.

Railway Construction.

Unusual activity for the time of year was reported in connection with various large contracts now standing for the construction of railway lines. The number of men employed on rock-cutting and bridge building in connection with the National Transcontinental Railway line in Western Canada was exceptionally large. The abundant snowfall afforded good facilities for the transportation of supplies in the more remote districts.

Estimates of the amount of railway construction completed in 1910 show an exceptionally large amount of work completed. In Western Canada 1330 miles of new grades were finished; in Saskatchewan alone it is estimated that 500 miles of steel were laid. The outlook is that equal and even greater activity will prevail in 1911.

General Transport.

The railway companies reported a fair volume of traffic. Earnings comparing favourably with last year. Up to the close of January, no general interference with traffic had occurred through weather conditions, except in the Northwest Provinces where some delays were reported, with the result that grain shipments showed a falling off. Street railway systems were also operated under favourable conditions. Winter port business at St. John and Halifax has been heavy.

The annual statement of the Niagara Navigation Company shows total earnings of $124,703, the largest in the history of the Company.

The gross earnings of the Quebec Cen-

tral Railway Company during its last year amounted to $1,105,867 and expenses to $759,556.

The revenue of the Montreal Harbour Commissioner was $104,233 compared with $250,883 in 1909.

The following statement, prepared by F. E. Gibbs, Grain Inspector, Fort William, Ont., shows the bushels of grain shipped from the different elevators at Fort William and Port Arthur of the 1910 crop, from September 1 to close of navigation, December 6, 1910, with ports of destination. The last two figures in each column after the period, represent pounds.

A draft of proposed regulations for the inspecting, testing and washing of locomotives' boilers was submitted by the Board of Railway Commissioners to the various railway companies during January.

The Trades.

Building.—Conditions were for the most part unchanged from December, the amount of outdoor work in progress being small. Work on indoor finishing was exceptionally active in nearly all the cities, while the outlook is for an active resumption of outside operations on the opening of spring.

Metal and woodworking.—These trades had a good month, industrial establishments being exceptionally well employed.

Printing.—The light trades were generally well employed.

Clothing.—Journeymen tailors were somewhat quiet. Garment working establishments had, however, a fairly good month.

Textile.—Both cotton and woollen mills were producing steadily.

Leather.—(Tanners and curriers).—The boot and shoe trade was fairly active. Hide prices continued strong, but rubber was downward.

Food and tobacco preparation.—Bakers and confectioners had an active month, while cigar and tobacco workers were well employed.

Skilled labour.—The supply of this class was in excess of the demand at many points. Snow removal and ice-cutting gave employment to the usual number, weather conditions being favourable to the harvesting of an abundant supply of ice of good quality.

Canadian Trade and Revenue.

Foreign trade.—During December, 1910, the total value of imports entered for consumption in the Dominion of Canada, was $35,499,188, compared with $31,687,924 in December, 1909. For the first nine months of the present fiscal year ending December 31, 1910, the total value of imports entered for consumption was $339,817,563, compared with $271,796,355 in the corresponding period of the last fiscal year. The total value of domestic exports during December, 1910, amounted to $28,125,138 compared with

$38,066,086 in December, 1909. The total value of domestic exports during the nine months ending December 31, 1910, was $221,764,869, as against $221,116,813 in the corresponding months of last year. During December, 1910, there were increases in exports of the mine, the fisheries, the forest and manufactures and decreases in exports of animals and their produce and agriculture. The grand total of Canadian trade for December, 1910, was $65,541,876, compared with $72,527,465 in December, 1909, and for the nine months ending December 31, 1910, $577,999,628, as against $512,486,678 in the corresponding months of 1909.

Imperial trade.—According to reports received by commercial agents of the Department of Trade and Commerce of Canada, trade conditions in the various British Dominions were favourable. A growth in Canadian exports of flour to South Africa and openings for Canadian vehicles of various kinds in Australasia.

Domestic trade.—With the advance of winter, trade development has been of an encouraging character. Dry goods orders were fair, with manufacturers of underwear and prints somewhat behind in deliveries. Though January is usually a quiet month in groceries, trade has been fair since the new year. Some large orders for heavy metals were placed.

According to *Dun's Review*, commercial suspensions in the Dominion of Canada during the year 1910 were 1262 in number, with liabilities amounting to $14,514,650, and compare with 1,442 for $12,982,800 the previous year and 1,640 for $14,931,790 in 1908. Analysis will show, however, several encouraging features, the most notable of which is the pronounced decrease in the number of defaults, compared with both 1909 and every year back to 1894, with the exception of 1906, 1904, 1903 and 1902. "It is also to be recognized that with the remarkable increase in mercantile and manufacturing activity throughout the Dominion, the amount of defaulted indebtedness would naturally expand, but the increase during the past year is entirely due to the unusual number of large failures, which abnormally distort the total. The elimination of these, therefore, transforms the statement into one that is exceptionally encouraging."

Further annual statements of Canadian chartered banks show satisfactory returns for 1910. The Bank of Hamilton increased its capital stock to $1,800,000 and the reserve to $500,000. The number of employés of the bank was increased by eighty-seven during the year. The first annual statement of the Bank of Vancouver showed that a favourable beginning had been made by the bank, net profits for four months being $4,943,-000. The Traders' Bank reported an increase of over $6,000,000 in deposits and $65,000 in profits. Eleven new offices were opened by the bank during the past year. The Metropolitan Bank increased its deposits by twenty-one per cent. and its pofits by over $16,000. Earnings of twenty-two per cent. on the paid up capital were reported by the Bank of Nova Scotia, while the Bank of New Brunswick added $25,000 to the reserve fund and opened three new branches. The Bank of Commerce increased its deposits $6,500,000. The Royal Bank acquired thirty-five new branches through the purchase of the Union Bank of Halifax and opened twenty other new offices. The Bank of Hochelaga reported substantial increases in earnings and assets. A growth of business was reported to the shareholders of the Provincial Bank of Canada; four new offices having been opened. Three bank clearing houses were established in 1910, namely at Brandon, Saskatoon and Lethbridge; with two established in January, at Moose Jaw and Brantford, respectively, bringing the total number of clearing houses in Canada to nineteen.

Canadian Revenue.—The month of December added $9,790,387 to the Dominion's revenue and brought the total for three-quarters of the fiscal year 1910–11 up to $85,665,833. Of the month's revenue over $9,000,000 was absorbed in expenditure, $5,355,286 being on current account and $3,680,305 upon capital account. Of this latter amount, the National Transcontinental apparently absorbed just over $3,200,000, while the

balance is accounted for by railway subsidies of $321,978 and bounties of $143,343. The nine-months apparent surplus of revenue over current expenditure reaches the high level of $32,671,750.

Notes.

The third session of the twelfth legislature of Ontario was opened January 24. In the speech from the Throne, provision for technical and industrial education and extension of the system of agricultural instruction was foreshadowed.

It was announced that the Government of Quebec would open free employment bureaus in Montreal and Quebec. Mr. Felix Marois, inspector of industrial establishments and public buildings, was later appointed superintendent of the bureau opened in the city of Quebec, and Mr. Louis Payette, superintendent of the bureau at Montreal. Other bureaus will be opened later, as circumstances may require.

An investigation was being made during January by Mr. Justice Barron into the complaints registered by recent employés of the Grand Trunk Railway System, who have not been taken back to work since the strike of trainmen during the past summer. The inquiry was conducted in western Ontario during the month and will be continued at Toronto and other points in February.

The thirteenth annual report of the Montreal Builders' Exchange stated that the official valuation of building operations in greater Montreal during 1910 was $21,443,861 as compared with $19,643,193 in 1909. The report discussed at some length the question of land valuation and the prevention of fires. The views of the Exchange are also stated with regard to the Eight-Hour Day Bill and the raising of the limit of the indemnity for workingmen's compensation.

A delegation representing the Quebec Executive of the Trades and Labour Congress waited upon the Prime Minister of that Province during January for the purpose of asking certain amendments to the labour laws. The proposed amendments dealt with workmen's compensation, the price of school books, the improvement of sanitary conditions in factories, Sunday labour, the regulation of laundries, the performance of tailoring work at home. A delegation from the Ontario Executive of the Congress also waited upon the Premier of the Province and suggested legislature raising the age limit for factory children to sixteen years; providing better heating for foundries; providing for the inspection of clothing, and other matters.[1]

The Manitoba Technical Commission held its first working session on January 11, the Honourable G. R. Caldwell, Minister of Education, presiding. At the initial session, the Mayor of Winnipeg, the Industrial Commissioner of that city, and others, gave evidence. Subsequently the evidence of the Builders' Exchange and representatives of female workers was taken. The inquiry was prosecuted later at Brandon and other points.

The second session of the twelfth legislature of British Columbia was opened on January 12. It was stated in the speech from the Throne that the questions of jurisdiction between the Province and the Dominion relating to fisheries, have been settled upon and are now before the Supreme Court. Reference was made to the abundant harvest of last year, the improvement in the mining industry and the marked activity in railway construction.

The first western interprovincial convention of Bricklayers and Masons was held in Calgary. Delegates were present from the three provinces of Manitoba, Saskatchewan and Alberta. A general discussion of the financial aspect of the conference and certain provisions of the constitution was held.

A delegation from the British Columbia Executive of the Trades and Labour Congress of Canada waited on the Provincial Government and presented a memorial, containing the following requests:

1. A weekly payment in cash, and where an employé leaves employment or

[1] See also report of Toronto, Ont., correspondent.

is discharged, wages then due to be paid within twenty-four (24) hours.

2. Every laundry open to public patronage to be brought under the working of the Factories' Act.

3. Abolition of property qualifications for holding public office, and of election deposit and revenue tax.

4. Pensioning of all workers permanently disabled in the industries of the province.

5. The careful selection of coroners' jurymen.

6. An eight-hour law on all Government construction work.

7. A legal work day of eight hours for all men employed in and around smelters, stamp mills, concentrators and rock crushers operating in the province.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour during January compared very favourably with that of January, 1910. With the exception of an occasional idle day at a few of the collieries, the larger industries were active. The steel industry was active, and the plants at Sydney and Sydney Mines were operated continuously throughout the month.

The tramways, railways, wood factories, foundries and other workshops were busy, and very optimistic opinions are expressed of the business outlook for 1911.

The output of the Dominion Collieries for January was 300,000 tons. A large part of this output was placed in the coal heaps at the collieries, and at the Sydney Steel works. The banking of coal at the steel plant is the result of the amalgamation of the coal and steel companies, and tends to give steady employment to the employés at the collieries through the larger outputs produced during the winter months. The output of the Dominion Collieries for 1910 was 3,527,000 tons, against 2,735,000 tons in 1909. With the opening of new collieries and the acquisition of the Cumberland Railway & Coal Company's areas, the outputs for 1911 will be large.

The Nova Scotia Steel & Coal Company had a very good year during 1910, but on the third of January a gas explosion occurred in No. 3 colliery, causing the death of eight men. It deranged the ventilation of the colliery, and laid it idle until near the end of the month. The stoppings, which were thrown down by the force of the explosion, were all rebuilt and other necessary repairs made during the three weeks the mine was idle. The Company increased its coal output over 1909 by 100,000 tons, and expect to reach the million mark during the present year.

The steel department at Sydney Mines was active, and fairly large outputs were produced. Since the repairs and the relining of the blast furnace last June, the iron and steel outputs have almost doubled.

The Dominion Steel Works at Sydney were active, and except for the temporary stopping of the Bessemer converter to gain a greater supply of gas for completing the new coke ovens lately put into operation, all departments were well employed. Shortage in the coal supply has been the one drawback during the last few months, but this has been overcome by the addition of thirty coke ovens of an improved type. To this number will be added ninety new ovens, which with the others now in operation, will give a full supply of coke. The other additions and extensions to the plant, such as the turbo-electric power house, the open hearth furnaces, the new blast furnace, while not progressing as rapidly as was expected, are nevertheless assuming large proportions daily, and will in due time add to the product of the plant.

The past year was a very busy one. The outputs were large in every depart-

ment, and no serious accident occurred to hinder the operations or to cause great financial loss. The outlook for the present year is said to be very good.

Shaw & Mason, Limited, manufacturers of Colonial Anti-friction Metals, corrugated steel products, stoves, &c., having doubled their business during 1910, intend enlarging the capacity of the foundry and metal departments, besides erecting two buildings near the Intercolonial Railway for better transportation facilities. They are the second largest employers of labour in Sydney, and before the close of 1911 they expect to have doubled the number of men now employed.

Both the Cape Breton Electric Company and the Sydney & Glace Bay Railway Company had a successful year in 1910. The receipts were in excess of former years. The lighting business, owing to the rapid growth of the districts served, was greater.

Many improvements are contemplated for the present year, one of which is the tramway extension to the New Waterford district.

The building trades are quiet, but the factories are running as usual, and building contractors say that the prospects for 1911 are even better than those of the past year, which was considered a very good year.

The wholesale and retail trades were active during January. Owing to a reduction in wages for the winter season some of the workmen of the North Atlantic Collieries ceased work and remained idle for some time. An application was made to the Labour Department for a Board of Conciliation, after which the men returned to work. There was no other labour unrest.

Fishing and agriculture were quiet. Most branches of the building trades were quiet, but other skilled trades were active, with unskilled labour well employed.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The year 1910 closed with the general condition of labour buoyant. Shipments of coal from the various collieries throughout the district were about 50,000 tons, being an increase of about 12,000 tons over December, 1909. Total shipments for the year ending December, 1910, for this district were 525,605 tons, being a decrease of 1,744 tons. The increase in shipments for the whole province is nearly 950,000 tons over shipments in 1909.

The outlook at present for a continuation of steady employment is bright in the district. The oustide trades at this time of the year are, of course, quiet. The lumbering industry, owing to the meagre amount of snow that has fallen up to the present, has been greatly retarded, diminishing the cut for the season.

By the cessation of outside work for the winter months the demand for unskilled labour on inside industries has been fairly well supplied

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—A number of camps have broken up, owing to the unsatisfactory condition of the weather.

Manufacturing.—The several industries throughout the district are at present briskly employed, some having made good returns for last year's work, with good prospects for the year which is now entered upon.

Mining.—This industry is very well employed in this district, most of the collieries working full time, with average outputs. The coke ovens are fully employed, and the fire-clay mine and brick works are again in operation.

CONDITION OF PARTICULAR TRADES.

The skilled trades were generally well employed, with the supply of unskilled labour in excess of the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was no marked activity in the general condition of the labour market

during the past month; in fact there was a lull, compared with the previous month.

The most important event in the labour market during the past month was a new scale of wages secured by the printers. The new scale is as follows:—

Hand compositors, $14 per week and a contract for two years.
Machine, $16 per day; night, $18.
Overtime, one and one-third for three hours; after three bours, double price.
Piece work, (only one paper affected), 37 cents per thousand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During the month the school inspectors of the province held a session in Halifax, when they were waited upon by a deputation representing the provincial farmers, who urged upon them the imparting of agricultural knowledge in the schools. They also waited upon the Provincial Government with a similar request.

Fishing.—Local fishing has been dull. The feature of the month has been the mporting from Alaska of two car loads of halibut. The fish arrived in good condition, and is said to be of good quality. Parties in Halifax are considering the fitting up of a fleet of some twenty vessels for the fishing industry, with the possible construction of two or three steel-built craft, at New Glasgow or Halifax. They also contemplate the construction of two bait-freezers, one in Newfoundland, the other in Cape Breton. They also intend handling lobsters on a arge scale. The fish will be exported to the best markets, and if the intention of the promoters is realized it will mean much business for Halifax.

Manufacturing was quiet.

CONDITION OF PARTICULAR TRADES.

Bricklayers, painters, masons, carpenters, joiners, plumbers, stonecutters, builders' labourers were dull. Steam fitters and electrical workers were fairly active. Horse shoers were active, as were car builders. Printers, pressmen, bookbinders were fairly active, but tailors were dull, and boot and shoe workers quiet. Bakers were busy, but confectioners were dull. Barbers were fairly active. Delivery employés, hotel, restaurant employés and laundry employés had average employment. Transport employés, railway men, freight handlers and longshoremen were fairly active. Street railway employés were busy. Unskilled labour was dull.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Considering the season of the year, labour has been exceptionally well employed. The many industries have been steadily at work. The car shops have been turning out from ten to twelve cars a day. The Amherst Boot & Shoe Company and the Malleable Iron Company have been increasing their staffs. There have been no new industries started during the month, with the exception of a woodworking and furniture company, known as the Crawshaw Manufacturing Company. For the present it will only employ a limited number of hands. Banks report payments better than for some years, and there has been a marked increase in the freight and custom receipts. Whoelsale and retail men report business better than for the corresponding month last year. There has been no material change in wage schedules. Outside of Springhill, there has been no disturbance or unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The price of farm products continued high with the exception of hay. The crop of the latter was so large that it is hard to find a market. The price is also low.

Fishing.—Large quantities of smelts are being caught and sent to the American market.

Lumbering.—Until the twenty-eighth there was no snow in the section of the province, which seriously hampered the lumbermen in their operations. There are the usual number of men in the woods and the cut will be well up to the average.

Manufacturing has been very active. All the industries have been working steadily and the usual complement of men have been employed. The local market will supply all the help needed until the spring months.

Mines.—The Chignecto mines, which are operated by the Maritime Coal & Railway Company, have resumed work this month, after being shut down since last September. The Company, in the meantime, was able to supply the market from its main mine at the Joggin mines. At Springhill, conditions remain the same. The Kimberley mine reports steady work, with a growing output.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were out of employment. Carpenters and joiners were doing small jobs work. Plumbers were fairly busy; stonecutters out of work. Iron moulders were well employed; iron workers and helpers active; machinists and engineers fairly busy; electrical workers and boilermakers busy. Woodworkers were busy, carriage makers well employed; car workers very busy; pattern makers fairly busy. Printers were well employed. Journeymen tailors report business brisk. Garment makers were well employed. Boot and shoe workers had steady work. Bakers report work steady. Trunk and bag makers were busy. Barbers were well employed. Clerks and stenographers were busy. Laundry workers were very active. Teamsters and expressmen were busy. Unskilled workers were well employed for this season of the year.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour during the month of January differed very little from that of December. As is usual at this season the supply of labour was in excess of the demand. Owing to severe weather prevailing during half of the month, outside building operations were very limited. The remodelling of the Royal Bank of Canada was the principal work under way in this city. The winter steamers kept up regular communication and shipments from the province were taken over as usual. Owing to cold weather, trade in the city for two weeks was quite dull, although several clearance sales tended to enliven the situation somewhat.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Operations on the farm were confined mainly to feeding stock, and in certain sections getting out mussel-mud, which is used as a fertilizer in some parts of the Island. The good ice on the rivers and harbours assisted the work.

Fishing.—Considerable quantities of frozen smelts and eels were shipped to the American market. Preparations were made for the opening up of the lobster season in the spring.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a dull month. Carpenters and joiners were active. Painters, plasterers, paperhangers and decorators were active. Plumbers were busy. Gas and steam fitters and stonecutters were active. Builders' labourers had a dull month. Iron moulders, workers and helpers, machinists and engineers and sheet metal workers were active. Bicycle workers had a dull month. Woodworkers, carriage and wagon makers and car builders were active. Printers, pressmen and bookbinders were active. Journeymen tailors, garment workers and boot and shoe workers were active. Bakers, confectioners, butchers, and tobacco workers were active. Tanners and curriers were active. Barbers, clerks and stenographers were busy. Railway conductors, electrical engineers and firemen, railway telegraphers, trainmen, switchmen, freight handlers were active. Steamboat men and steamboat firemen were laid off for the season except those employed on the winter steamers. The longshoremen in connection with the winter steamers were active. Teamsters and expressmen were active. This was a dull month for unskilled labour.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

January conditions differed but little from those prevailing last month and were somewhat below the standard of January, 1909. The unwonted absence of snow has embarrassed the operations of farmers and lumbermen, and as a result commercial interests have suffered, and the opportunities of employment were lessened. Supply exceeded demand, but as fully four-fifths of the labouring population here have permanent employment in either the railway works or in the various local manufactories there is really but a small percentage of unemployed to be found here. The open weather has been favourable to builders and some half dozen cottages are under construction. The outlook for building during the coming season is good. The Dominion Cotton Factory, the Humphrey Woollen Mills, and the Record Foundry and Machine Company are all operating steadily. The Lea Woodworking Company and the Abram's Machine Shop are also active with much work ahead. The Directors of The New Brunswick Wire Fence Company announce their sales for the year ending November 30, as $90,000, being an increase over 1909 of $10,000, and declared a dividend of eight per cent. for stockholders. The expansion of business has occurred, particularly among the farmers. The Customs' returns for December show imports $55,046, and duty $4,134 as compared with imports $54,143 and duty, $4,219 in December, 1909. The record of business failures in the Province of New Brunswick in 1910 was considerably in excess of that of 1909. In 1909, the number of failures was seventy-two, nominal assets $213,001; liabilities, $451,725, while in 1910 the number of failures was eighty-six, assets, $1,271,665, and liabilities, $1,972,665. Locally the failures have been few.

Wholesale trade is reported active and of good character while retail trade is fair. Real estate is quiet, and rents steady, with a considerable choice offering.

A Board of Conciliation has been named to pass upon the claims of the Intercolonial Railway Telegraphers and Station Agents for an increase of pay and changes in conditions of employment. Upwards of 480 men are affected. The Intercolonial Railway Board of Management has decided to grant engineers and firemen an increase of seven and one-half per cent. to date from January first.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The month has been a very quiet one among farmers, the absence of snow roads limiting the work to caring for stock and cutting firewood. Produce quotations are about the same as last month. The demand for hay, of which there are large quantities in the country, is light. The cheese and butter factory at Havelock, owned and operated a number of years co-operatively by the farmers has recently been purchased by an individual.

Fishing.—Fair catches of smelt are reported from different sections along the shore.

Lumbering.—Lumbering interests have been seriously handicapped by the want of snow, particularly in Albert County, where operators have been forced to reduce crews and limit operations.

Mining.—The Government Factory Inspector investigating into the accident at Hillsboro Quarries, December 16th last, whereby three men were crushed to death finds that no blame was attached to the Company as all the machinery was well guarded and every possible precaution taken for the protection of the lives and limbs of the quarrymen.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, painters and decorators were quiet; plumbers steady; stonecutters quiet and builders' labourers in small demand. Iron moulders, workers and helpers were steady. Machinists and engineers active; stove

mounters, blacksmiths, boilermakers and horseshoers busy. Woodworkers, upholsterers, polishers and car builders were active. Printers, pressmen and bookbinders were busy. Journeymen tailors and garment workers were active and in fair demand. Bakers and butchers were active, and ice cutters busy. Leather workers were busy. Barbers, clerks and stenographers had steady work. Hotel and theatre employés were busy, and laundry workers active. Train crews were active and in good demand, owing to special work occasioned by the healthy state of freight and passenger traffic. Telegraphers were steady, also switchmen and trackmen. Freight handlers, carters, teamsters and expressmen were busy. Unskilled labour reported quiet conditions and little demand. The remarkable dearth of snow thus far has kept closed a very important field of labour which ordinarily at this season furnished much employment for this grade of labour. Very little destitution, however, was reported.

DISTRICT NOTES.

Hillsboro.—The contract for erecting the Baptist Church here to replace the one destroyed by fire June 13, 1910, has been awarded Messrs. Peck & Stuves, for $15,575, work to begin at once.

ST. JOHN, N. B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continues brisk, but the building trades remain inactive, especially in out-of-door work. Many improvements are being made in the St. John Street Railway power house. A large new turbine engine has recently been installed. Several of the older engines are being removed. These improvements are being made to furnish additional power for the intended extension of street railway. The Goodyear Tire & Rubber Company has secured a lease of premises now occupied by Doherty & Foster, merchant tailors, and will occupy the first and second floors after May 1. The Union Bank of Canada opened for business January 16, in new offices.

On January 28, Mr. Justice White appointed Henry F. Puddington provisional liquidator of De Witt Brothers, Limited. The harbour revenues for top and side wharfage, harbour fees and anchorage dues show that 1910 was the best in the city's history, beating 1909 by $8,186.10. The total revenues for 1909 were $84,649.65, and for 1910 $92,835.75. On January 18, the Cushing Box Factory Company's lands, mills, machinery, &c., in the Parish of Lancaster were sold at auction, and were purchased by Albert J. Gregory, solicitor, for $12,000. The building was insured for $1,500. The machinery is owned by W. J. Greedy & Company, of Toronto. The annual report of the building inspector shows that 164 permits were issued during the year for building work of an estimated cost of $524,475. The number of permits issued was twenty-eight in excess of 1909, and the cost of work done exceeded 1909 by $148,275. Much building work is planned for next season, among which may be mentioned the sugar refinery, a paper mill, armory, theatre, new car barns for the Street Railway Company, besides the remodelling of several properties. The annual sale of the harbour fisheries' rights took place January 3. The sale realized $24.65 more than 1910, and the highest price since 1907. The following table may be of interest:

1898	$3,713.05
1899	3,478.05
1900	4,411.30
1901	5,593.20
1902	4,692.85
1903	2,411.60
1904	3,851.05
1905	5,191.05
1906	6,058.95
1907	6,187.00
1908	4,146.10
1909	1,516.35
1910	5,180.30
1911	5,204.95

Up to January 27, there were filed at the Custom House cargoes for forty steamships, which took away Canadian goods valued at $5,368,589, and foreign

goods valued at $2,689,114, making a total of $8,057,693. The wheat shipments by the above steamers total 2,293,693 bushels.

The annual statement of the exports from the port of St. John to United States ports for the year ended December 31, 1910, shows a decrease of more than a million dollars from 1909. The reason for the decline is the poor lumber market last year.

Bank clearings for the four weeks ending January 26, were $5,995,316, and for the corresponding period last year $6,248,082, being $252,766 less in 1911 than in 1910, and $213,530 less than during the four weeks ending December 22, 1910. The St. John bank clearings for the year 1910 show an increase of more than $5,000,000. The following statement will show the increase for the last five years.

1906	$60,024,765
1907	66,150,414
1908	66,435,636
1909	72,606,269
1910	77,843,546
This year's increase over 1909 is	5,237,277
Increase in five years is	17,818,781
Increase in ten years is	44,911,546

The deposits at the Savings Bank during December were $45,034.12, and the withdrawals $64,063.65.

The Inland Revenue Department receipts for the month of December show a decrease of $881.51 as compared with the same month last year, and a decrease of $8,844.03 for the calendar year ending December 31, 1910, as compared with 1909.

The custom receipts for the month of December were the largest of any month in the history of the customs, with the exception of the month of April last. The receipts show an increase of $3,794.49 over the same period of last year.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The lumber shipments from New Brunswick during the year 1909, were: 327,519,421 feet of deals, &c., in 334 vessels of 847,845 tons, as will be seen by the following table:

Year.	No. of Vessels.	Tons.	Deals, Etc. Supt. Ft.
1907	312	722,157	355,053,363
1908	296	720,804	306,445,056
1909	339	822,272	325,213,639
1910	334	847,845	327,519,421

Railway construction.—During the month of December, very little work was done on the New Brunswick division of the National Transcontinental Railway. There was no expenditure at all on Contract No. 1, but on Contract No. 2 some ballasting which was done helped to swell the totals. There are only about six miles of track to be laid on the whole division, and this will be accomplished soon after work is resumed in the spring. The estimates for December were as follows:

Contract No. 2	$12,746.86
Contract No. 3	3,292.54
Contract No. 4	8,722.25
Contract No. 5	5,887.57
Contract No. 6	447.21
Total	$31,096.43

The total expenditure to date in this province is $11,180,063.27.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, dull. Carpenters and joiners, dull. Painters and decorators, active. Plumbers, gas and steam fitters, busy. Stone cutters, dull. Builders' labourers, dull. Iron moulders, active. Iron workers and helpers, active. Machinists and engineers, active. Steam engineers, active. Electrical workers and linemen, busy. Blacksmiths, active. Boiler makers, active. Sheet metal workers, busy. Horseshoers, active. Woodworkers, active. Shingle weavers, very dull. The building trades, shingle weavers and unskilled labourers were dull. Other trades were on the whole active to busy.

DISTRICT NOTES.

Andover.—The grist mill owned by the Perth Milling Company was destroyed by fire on the 22nd of January. The loss was adjusted at $7,000.

Elgin.—Edward R. Beck, trader, has assigned to Sheriff Carter.

Fredericton.—Custom receipts for the year ending December 31, totalled $53,782.70, as against $59,032.05 last year, a decrease of $5,249.35. The duty collected during December was $4,138. The Hartt Boot & Shoe Company has secured increased capital, and will soon enter upon a policy of expansion. It now manufactures 500 pairs of boots a day.

Three timber limits were sold at the Crown Land Office January 18. A 2½ mile limit on Canaan River was bid in by Alfred West for $232 per square mile. A limit between Lepreaux and New River containing three miles was bid in by the Stetson Cutler Company for $30 per square mile. A limit situated on the Monquart and Shikitihauk Rivers was bid in at the upset price of $20 per mile by the Peel Lumber Company.

St. Mary's.—Frank L. Boon has been awarded the contract for building the Pinder Mill bridge, Southampton.

Marysville.—Fire destroyed the Methodist Church, also a dwelling house owned by the Alex. Gibson Manufacturing Company, on January 29. The church cost $65,000, and was insured for $10,000. The dwelling house was valued at $2,000, and was insured.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions have been very quiet. There was no snow up to Christmas. There are no industries here to keep the people employed in the winter months. The pulp and paper mill in Chatham is now closed down for an indefinite time. A number of men are getting out wood. The smelt fishing was a failure in this neighbourhood, but they are doing very well further down the river. Bran is not as plentiful as in some former winters, but the crops were good last season and there is abundance of feed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is not much work here at present, except in getting fire wood for next season and attending the stock. Beef is now very high, and the most of it imported. Cows are also very scarce and high in price.

Lumbering.—Getting out spruce logs is about the only industry. So far the winter has been favourable for the work. It is expected the cut will be somewhat greater than last year.

CONDITION OF PARTICULAR TRADES.

Building is now practically at a standstill and will be for some time.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and *P. J. Jobin, correspondents,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been a very quiet one for labour, although a couple of shoe factories worked overtime to fill orders. Ice harvesting began in the early part of the month with ice 15 inches thick; at the end of the month it was 18 to 20 inches thick. Outside employment in the building trades was very dull. In the iron working trades renewed activity was evidenced after the holidays. On January 1, the new amendment to the Quebec Industrial Establishment Act went into force. By this amendment the working hours of women and children employed in cotton factories is reduced to fifty-eight per week. The cotton mills interested were paying their day hands the same rate as for the sixty-hour week, but there has been no change in prices paid to piece-work hands. The Provincial Legislature opened its annual session on January 10. This will tend to increase activity among hotel employés and carters. On January 20 a numerous deputation of workingmen, representing the Trades and Labour Congress of Canada, presented to the Ministers the requests of that body as adopted at the last annual session of the Congress. The resolutions passed by the

Congress call for amendment of the Workmen's Compensation for Injuries Act, reiterate the position taken by the Congress re the Investigation proceeding in the matter of the Catholic Commission; ask that certain work carried on in pulp factories on Sunday be forbidden; for better inspection of foundries; for greater safety in the running of electric railways by a proper system of brakes and the abolition of side boards; for the regulation of laundries; for the abolition of property qualification in Montreal municipal elections; for the regulation of home work; and that the wages of workmen form a first lien in insolvency cases. The Forestry Association of Canada met in Quebec during the month and was largely attended by representatives from all parts of the Dominion. A much larger number of vessels than usual are in winter quarters at Quebec. In the interior basin of the Louise embankment there were at the end of the month ninety-two vessels of all kinds, and in the outer basin thirty-seven.

Mr. J. A. Latouche, of this city, has been awarded the contract for demolishing the Champlain Market Hall, to make room for the erection of the terminal station for the Transcontinental Railway. The contractor hopes to begin operations early next month. The price has not yet been made public.

The Bishop Construction Company, of Montreal, has been awarded the contract for the construction of the Quebec & Saguenay Railway, which is to run from Cap Tourmente to Murray Bay.

CONDITION OF LOCAL INDUSTRIES.

Lumbering was being actively prosecuted, conditions being favourable.

Manufacturing.—Delegates from the paper mills at Shawinigan Falls were in Quebec during the early portion of the month to consult with the Provincial Premier, and to invoke the Alien Labour Act against a large number of workmen who, they claim, have been shipped from the United States to break the strike which has been going on in these mills since November, 1910.

Railway construction. Two new railways were officially opened for traffic during January. These were, the Ha Ha Bay Railway, from a point near Chicoutimi to St. Alphonse, about 12 miles; the other, the Matane Railway, from Ste. Flavie station on the Intercolonial Railway to St. Jérôme de Matane, passing through Little Métis, Sandy Bay and Rivière Blanche, a distance of about 40 miles. Work on the branch of the Transcontinental Railway from Cap Rouge to Quebec was progressing well.

CONDITION OF PARTICULAR TRADES.

Carpenters and joiners were active. Plumbers and gas and steam fitters were busy. The other building trades were dull. Steam engineers and blacksmiths were dull, but the other metal trades were active. The printing trades were from busy to active. Boot and shoe workers were busy; the other clothing trades were quiet. Ice cutters were busy, bakers, confectioners and butchers were quite, and cigar and tobacco workers dull. The miscellaneous trades had a quiet month. Tanners and curriers were active. Railway employés were busy; street railway employés and carters were quiet. Other transport trades were dull. The supply of unskilled labour was in excess of the demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during the past month was inactive. Work in the building trades has been mostly confined to interior work, except the rebuilding of the City Hall and a few other buildings in course of construction, amongst which is a curling rink. The factories worked full time, except during the first week of the month, when some of them give their employés a week's vacation. Wholesale as well as retail traders report a quiet month. There were no changes in rates of wages or hours of labour, and the supply of labour slightly

exceeded the demand. The best of understanding continued to exist between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy hauling firewood and transporting farm products to city markets.

Fishing.—Fishing was very quiet this month; even the tommy cod catches have been very poor this season.

Lumbering.—Lumber firms are employing about the same number of men as last January.

There was no increase over last year in *railway construction and employment.* They are still rushing the construction of the new pulp and paper mill at the Cap de la Madeleine. Plans are also being prepared for the construction of another pulp and paper mill on Baptist's Island, which mill is to be constructed as early as possible this spring.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, stone cutters and builders' labourers were rather quiet, but carpenters and joiners, lathers and plasterers, painters and decorators, plumbers and gas and steam fitters were fairly busy. Iron moulders, workers and helpers had a fairly busy month; also coremakers, machinists and engineers. Electrical workers, linemen, metal polishers, buffers, platers and brass workers were well employed. Stove mounters, blacksmiths, tool sharpeners and horseshoers were quite busy, but shipbuilders and helpers, bicycle workers and jewellers had a quiet month. Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers and pattern makers were fairly active. Printers, pressmen, electrotypers and bookbinders were busy. Journeymen tailors, garment workers, hat makers, glove makers, and boot and shoe workers report a good month. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers were fairly active. Ice cutters and drivers were more than busy this month, the ice crop being excessively good. Barbers, clerks and stenographers had a quiet month, but furriers, hotel, restaurant and theatre employés and laundry workers were quite busy. All employed in transportation report a rather quiet month, compared with last January. The demand for unskilled labour was rather small, and the supply was in excess.

DISTRICT NOTES.

There was a good demand for paper makers and unskilled labour during this month at *Grand Mere* and *Shawinigan Falls*, and for unskilled labour at the *Cap de la Madeleine.*

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

For this season of the year labour generally has been well employed. All inside industries have been working full time, and the labouring classes have been as well employed as any previous year at this time. The skilled mechanics in the various machine shops have been well employed, and there are orders ahead sufficient to keep the work going until the spring, when new orders may be looked for. There has been no new works started up, but there are a number which will be when the season opens up. The City Council has let a contract for a new dam and power house on the Magog river, to a Peterborough firm. The preliminary work will be carried on during the winter months, so that when the season opens work will be rushed so that employment will be given to a large number of unskilled men. The Sherbrooke Power & Railway Company has finished its power plant, and in addition to supplying power to various concerns in Sherbrooke is also furnishing power to outside concerns. The work of laying this line, in some instances 8 miles in length, has given employment to many. Just as soon as it is expedient work will be continued on the extension of the railway system. Trans-

portation has been somewhat quiet, as is usually the case after the holidays. The wholesale traders reported business good, and retailers found business fully up to the average for this time of the year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—At the annual meetings of the various agricultural societies held during the month, the reports showed that the past year had been above the average, and not one reported a deficit. At several dairy board meetings the question of making butter or shipping cream across the line was discussed. From financial reports it was shown that more money was received by the patrons where cream was shipped than where butter was made. Farmers who have wood lots are doing little in the pulpwood business, as very little is being shipped.

Lumbering.—Lumbering operations were quiet as compared with that of previous years. Practically no pulpwood is being cut by the larger concerns for export, and what pulpwood is being bought is at a less price than for some years back. There are instances where pulpwood has not been taken from a siding for the past two years. Owing to the good roads, however, considerable cordwood is being hauled, and while there is no glut, prices are easier than formerly.

Manufacturing.—The manufacturing industries in and around Sherbrooke were fully employed and running full time.

Mining.—Work has been slack at several of the large asbestos properties, and in some instances they have been closed down altogether. During the latter part of the month, however, work was being resumed in the Central Quebec district. At the copper mines at Eustis work was being carried on to full capacity, and all available men were given employment.

CONDITION OF PARTICULAR TRADES.

With the exception of plumbers, who were busy, the building trades were dull. Iron moulders, machinists and metal workers were busy. The woodworking trades were active. Printers, pressmen and bookbinders were busy. Journeymen tailors were somewhat quiet, but garment workers were busy. Bakers, confectioners and cigar makers were quiet. Miscellaneous trades were active. Those engaged in transportation were fairly active, while teamsters, carters, &c., were quiet. Unskilled labour was in fair demand.

DISTRICT NOTES.

Stanstead.—A new industry has been started at Stanstead under the firm name of the Stanstead Glove Company, to manufacture canvas gloves and mitts.

Thetford Mines.—The King Mine resumed work during the month, and most of the old hands have been taken on.

Graniteville.—Mr. Jas. Brodie's quarry has started up again, and also that of Mr. S. B. Norton. These quarries are generally closed down for the greater part of the winter.

Rock Island.—Mr. Jas. A. Gilmore commenced business in his new and up-to-date factory the second week in January.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during January were quiet. The Government yards and shops were closed from the day before New Year's to January 9, as well as all other shops in Sorel and St. Joseph, leaving more than 1,500 men out of work. They have opened up since, but there will be no great activity until February and March, when repairs on the fleet at present in the harbour, numbering nearly two hundred vessels, will commence, and give employment to men of all trades. There is at present no work in the building line in the city or vicinity. Business was dull after the holidays, and dealers are taking stock and getting ready for the spring trade. Winter has not been hard so far, and there has been no rise in the prices of coal or wood. Hard coal sells for $6.50 to $6.75 per ton, hard wood from $5 to $6 per cord, and soft wood from $4.25 to $4.50.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The local market was well stocked with beef and pork, with prices a little lower. Poultry is scarce and high-priced, turkeys selling at 20–22 cents a pound, and other poultry from 16 to 17 cents; eggs, 35–40 cents per dozen; butter, 27–28 cents a pound.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in January was active in almost all the trades, with the exception of the building sections, which suffered from the weather. Sash and door factories were working steadily with full staffs. The iron industry was fairly active. Tanneries expect a good season. Shoe factories have been doing considerable business. J. A. & M. Côté, during the eleven months ending December 26, 1910, has been employing 175 men, and paid $70,863.89 in wages, while by its contract with the city it was not obliged to pay more than $30,000 a year. All the other factories have been busy. Several departments of the Penman Manufacturing Company have been working day and night shifts, and the Company is building a three-story brick warehouse, 100 x 54 feet. The ice harvest was begun, and there is much activity among ice-house men. Retail trade was rather quiet. Banks reported a good month, with easy payments. There was no change in the rates of wages or hours of labour. Relations between employers and employés were cordial. Work on the new electric plant was progressing rapidly.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural conditions were very good. The price of vegetables is high; potatoes went up from 60 to 80 cents. Dairy products are also higher. Farm hands were in fair demand, but the supply was enough to meet it. The roads being in good condition, there was much work for farmers.

Lumbering.—There was much activity among lumbermen. Many men were engaged hauling cordwood, as well as lumber.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and paperhangers had a quiet month. Plumbers, gas and steam fitters were fairly active. Stonecutters and builders' labourers had a quiet month. Iron moulders, iron workers and helpers, machinists, engineers and electrical workers had a fair month. Blacksmiths, boiler makers and horseshoers were active. Woodworkers, upholsterers, varnishers, polishers, woodcarvers, carriage and wagon makers and pattern makers reported a good month. Printers, pressmen, bookbinders and lithographers were well employed. Journeymen tailors, garment workers, hatters and glove makers were well employed. Boot and shoe workers were active. Bakers and confectioners, butchers and meat cutters and ice cutters had a good month. Tanners, curriers and all leather workers had an active month. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés had a busy month; laundry workers were well employed. Railway conductors, engineers, firemen, telegraphers and trainmen had a good month. Trackmen, switchmen and freight handlers were well employed. Cab drivers, hackmen, carters, draymen, teamsters and expressmen had a good month. Unskilled labour was fairly well employed.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was fairly active considering the season of the year. The

stone cutters' sheds destroyed by fire a few months ago are being rebuilt on the foundations at Norcross Bross, and will soon be in operation. Ice dealers were making their harvest, employing a number of men. All the manufactures were active. Wholesale trade was good and retail excellent. Banks reported business as very good during January.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a ready market for their products, at high prices. Beef sold for $9–$10 a cwt., by the quarter; pork, $10–$11; butter, 30 cents a pound; eggs, 40 to 45 cents per dozen; turkeys, 28 to 30 cents; geese, 25 to 28 cents, chickens, 18 to 22 cents a pound; potatoes, $1.00 per bag, and apples at retail, 40 to 60 cents per quarter bushel.

Railway construction.—The Canadian Pacific Railway bridge between St. Johns and Iberville is almost finished. It was commenced in September, 1909.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet. Carpenters and joiners were active. Lathers and plasterers, painters and decorators, plumbers and steamfitters were quiet. Stone cutters and builders' labourers reported a good month. Iron moulders, iron workers and helpers, core makers, engineers and machinists reported a good month. Electrical workers and line makers were somewhat quiet. Ship carpenters and caulkers reported a good month, as well as tool sharpeners, horse shoers and jewellers. Woodworkers, upholsterers,, varnishers and polishers, wood carvers, and carriage and wagon makers reported a good month. Printers, pressmen, lithographers, book binders and electro engravers reported a good month. Journeymen tailors, garment workers, hatters and glove makers reported a rather quiet month. Bakers and confectioners, butchers and meat cutters, ice handlers and tobacco workers had a busy month. Tanners, curriers and saddlers had a fair month. Barbers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés and laundry workers reported a busy month. Railway conductors, engineers, firemen, telegraph operators, trainmen, switchmen and trackmen reported an active month. Cab drivers, hackmen, carters, draymen, teamsters and expressmen as well as unskilled labourers reported a good month.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was a little slackening in the building trades, but conditions were better than in the corresponding month last year. Conditions in other trades were fairly satisfactory, and were good in some of them. The branch that had to suffer most was unskilled labourers, on account of the fact that most of the men who work on railroads, &c., during the summer months, come back to Montreal and vicinity for the winter, thus adding considerably to the supply. As there has been very little snow so far, there are many unemployed.

The value of building permits issued in the district, according to the reports of the contractors' association, was $5,628,002, of which $4,204,879 were for new buildings, and $1,423,123 for repairs.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The manufacturers in the district were working full time; in contrast to the general rule for the last two years, very few reduced their staffs during the winter, while some had to increase the number of their hands.

CONDITION OF PARTICULAR TRADES.

Bricklayers were fairly active, masons were quiet, lathers were in demand, plasterers, gas and steam fitters, painters, decorators, stone cutters and builders' labourers had a fair month. The metal trades were well employed. Horseshoers and tin roofers were in demand. Linemen were inactive. The woodworking

trades were active, with car builders and carriage and wagon makers very active. The printing and allied trades were active. Journeymen tailors were in demand; the other clothing trades were active. The food preparation trades were well employed. The leather trades had a good month. Barbers were in demand. All the other miscellaneous trades were busy. The transportation trades were active with the exception of ship labourers and longshoremen. Unskilled labour formed the majority of the unemployed in the district.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audette, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As might have been expected, the first part of January was very quiet for business in general, but towards the end the situation seemed to have improved, without being as active as the previous month. Dry goods merchants reported business very quiet. The labour market also was less active than during December. Every thing, however, points out to a busy time, during February, for the building trades. The value of building operations in Montreal and the suburbs for 1909 was $14,972,021. In 1910, for Montreal alone it was $15,815,859.

Real estate transactions in 1910 amounted to $50,000,000, this being the highest figure ever recorded. In 1909, the total was $39,642,000, as against $13,000,000 in 1908.

Bank clearings in Montreal totalled $2,088,558,000 in 1910, as against $1,866,649,000 in 1909 and $1,555,729,000 in 1908. According to the City Treasurer's report, taxable property in Montreal this year is valued at $319,805,149, with $109,361,053 worth of non-taxable property. The Post Office receipts for 1910 were $119,122.03, or an increase of $11,110.60 over the previous year.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, stone cutters and builders' labourers had a fair month; the other building trades were active. The metal and engineering trades were active, with the exception of boilermakers and shipbuilders who were quiet. Woodworkers were fair and the furnishing trades active. The printing trades were active, the clothing trades fairly active, the food and tobacco preparation trades active, miscellaneous active; as were the transportation trades with the exception of steamboat men who were quiet. Teamsters and expressmen and unskilled labour had a fair month.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during the month, being more active than in the corresponding month last year. The mild weather during the first part of the month was favourable to the building trades, which were very active for the season. Indoor workers had plenty of work, while those at odd jobs have found employment shovelling snow and cutting ice.

Local industries are threatened with a decrease in production owing to the lack of water in the Ottawa river.

The E. B. Eddy Company has obtained from the Canadian Government permission to raise its capital stock from one to five million dollars, which means that this concern will treble its output.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The sinking of the Ottawa river to the lowest level recorded in years threw about 150 men idle during the last ten days of January. Most of these were employed in J. R. Booth's pulp, paper and sulphite mills. The managers of the works reported at the end of the month that there

was grave danger of several hundred men being thrown out of employment if the water situation grew worse. The pond above the Chaudiere dam is 3 feet lower than normal. The power users voluntarily closed parts of their plants at times when they could run, in order to help the corporation of Ottawa which was in need of water for fire pressure. The Ottawa Electric Company used a steam auxiliary plant, thus employing some extra men. Otherwise, the opportunities for employment were favourable. Building operations were active for the winter time. The Civic Corporation spent $3,000 handling the snow storms, which is about equal to the amount spent to the corresponding date last year. The ice harvest gave work to about 200 men. The mica factories' owners who had to close certain branches of their work, report that they found employment for all the regular hands at other jobs. Most of the mica prepared here is for export. It is expected orders will become plentiful enough in another couple of months to carry off all surplus stock.

Plans have been made in the city engineer's department for spending $750,000 during the coming year. About half the amount will be expended on drains, an incinerator costing $100,000 will be built, and many pavements will be laid.

The progress of the city during 1910 was shown by several reports presented during the month. Bank clearings increased from $173,000,000 in 1909, to $193,700,000; customs receipts advanced from $1,098,000 to $1,259,000; and market tolls rose ten per cent.

Merchants found January an average month for trade, and factories reported the orders for next summer's supplies as heavier than a year ago. The clothing factories were very busy.

The ward foremen of the city have applied for an unspecified increase on their present wage of $2.25 per day. The Mayor and Chief of the Fire Brigade have recommended a change in firemen's hours of duty, giving a man every eighth day for rest. The present schedule allows the members of the brigade one day in twelve, and an evening of five hours every fourth day. The balance of the time they are on duty day and night. The building trades have formed an organization embracing all the unions involved in construction work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were marketing produce in considerable quantities. Butter sold as low as 22 cents in tubs; fresh eggs were at 40 cents per dozen, a drop of 10 cents in the month; beef was quoted at $6 to $9, and pork at $7 to $9.50. Water was scarce in country places, but otherwise the winter is favourable to the farmer. The Eastern Ontario Live Stock & Poultry Show was attended by 17,000, a gain of 7,000 over last year.

Lumbering.—Lumbermen were cutting more logs than last winter. In most instances the snow is deep in the woods; and operations were helped by the cold weather. Hauling is well advanced. The past season's cut of lumber is estimated at 500 million feet in the Ottawa valley, an average quantity. J. R. Booth and the W. C. Edwards Company, the largest manufacturers, each produced about eighty-five million feet. The demand for high grade lumber is very keen. Ottawa manufacturers are better supplied with low grade stock at present.

Manufacturing was hindered by low water, except where steam could be substituted. The paper industry alone suffered seriously.

Railway construction.—The Ottawa Electric Railway Company ordered eighteen new pay-as-you-enter cars, to be out next summer.

CONDITION OF PARTICULAR TRADES.

Carpenters, plumbers and painters were busy. Iron workers and engineering trades were well employed. Electrical workers and linemen have frequently been in demand for a temporary period. Car builders and woodworkers were busy. Hands employed in sash and door factories were laid off briefly for repair work in the shops during January. Printers and engravers were steadily employed. Sewing machine hands were in demand. Tailors were only fairly busy. Ice cut-

ters were busy. The butcher trade was quiet except in a few large shops. The period was quiet for clerks, collectors, stenographers and similar lines of work. Freight handlers and nearly all branches of transport had a quiet month. Express men were rather busy. Quietness prevailed in the arena of unskilled labour. An almost unprecedented demand for trained nurses began about January 20 and continued. This was due to an epidemic of typhoid fever, which had claimed 322 victims in Ottawa.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Although very cold, January was an active month in Kingston and district. All branches were well employed. The prospects for the year in the building trades, marine, manufacturing, &c., are excellent. During the month a deputation led by his Worship the Mayor, representing the City Council and the Board of Trade, were authorized to proceed to Ottawa to interview the honourable the Minister of Marine, with regard to deepening the lower part of the harbour and erecting a new bridge to replace the old Cataraqui structure. These steps were suggested by the offer of capitalists to start large industrial concerns, if this work was carried out. Shipbuilding is at present very active. One concern is building a large new passenger and freight steamer to ply between Smith's Falls and Kingston. This boat is to be ready for the route by May 18, 1911. The same firm has also under way a sixty-foot tug for Quebec, and an order for a safety water tube boiler, from the Cuban government. Parties in Pittsburg, Pa., Newark, N.J., Guelph, Pembroke, and elsewhere have also placed large orders with this and other concerns.

For the year ending June 30, 1910, the gross earnings of the Kingston and Pembroke Railway Company were $185,922, of which $130,940 was for freight. The net earnings were $25,954. The Bay of Quinte Railway Company's gross earnings for the same year were $167,735, of which $121,792 was for freight. The net earnings were $35,046.

According to the report of the chief of of the fire department, just issued, there were eighty-seven alarms received. Loss on buildings, $6,173; insurance of buildings, $199,400; loss on contents, $4,913.-81; insurance on contents, $105,500; total loss, $11,086.81. Total insurance, $304,900. No fire extended beyond the premises in which it started, and only in ten cases did it extend beyond the room in which it originated.

There were no changes in the rates of wages, and no strikes or lockouts reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very active drawing hay, chopping wood, getting out timber, harvesting ice, and making general preparations for spring work.

Fishing was active during the month.

Lumbering, manufacturing, mining, railway repairs and construction were also active.

CONDITION OF PARTICULAR TRADE.

Printers, journeymen tailors, bakers, butchers, ice cutters, cigar makers, tanners and curriers, barbers, broom makers, delivery employés, hotel, restaurant, laundry and theatre employés, as well as all branches of the transport business and unskilled labour reported a busy month.

DISTRICT NOTES.

Arrangements have been completed for an electric belt line to cover the rural district from Brockville to Ottawa. It is expected work will be commenced in May.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. Arthur J. Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the month of January showed little change from De-

cember. Local manufacturing industries were, as a rule, active. Work in the building trades has been confined to interiors. The prospects for spring look very bright. A new wing will be added to the Nicholls Hospital buildings, to cost in the neighbourhood of $30,000. The Peterborough Industrial Exhibition will build a new grand stand and new buildings, if the city will buy the grounds. The new foundry of Adam Hall & Sons has started, and is employing about fifty hands; they expect to enlarge their plant this year as they cannot keep up with orders. The Collier Electric Company has disposed of its plant and business to Toronto interests, who are removing the plant to Uxbridge, Ont. The by-law to permit the City to make a loan of $12,000 to Messrs. Bonner & Worth, in order to establish a factory here, was defeated; a by-law granting of a franchise to C. E. Dittman, to bore for natural gas, was carried. The local firm of Morrow & Beatty received the contract for the dam and power house on Magog river. The price is $51,250.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were occupied with the care of stock and marketing produce; large markets were the rule during the month. There was a good demand for produce at high prices.

Manufacturing.—Factories as a rule have been very busy, with plenty of orders and prospects of steady work.

CONDITION OF PARTICULAR TRADES.

The building trades were rather quiet, as is usual at this time of the year. The only large work was an addition to the Canadian General Electric Works. Exceptional activity prevailed in the metal trades. Moulders, iron workers, core makers, machinists and electric workers have been active. Woodworkers and upholsterers were busy. Carriage makers and coopers were active. Printing and allied trades had a good month. Journeymen tailors were quiet. Bakers and confectioners were busy. Butchers and meat cutters had steady work. Ice cutters were active. Leather workers had a good month. Broom makers were active. Railway and street railway men were active. Freight handlers, teamsters and expressmen were busy. Unskilled labour was fairly well employed.

DISTRICT NOTES.

Port Hope.—The foundations for the International Tool Steel Company's main building are ready for the building, and the furnaces are under construction; they expect to have the plant in operation by the first of June.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during January were generally satisfactory, with a considerably smaller proportion of men out of work than is usual at this season. The mild weather enabled building and other outdoor occupations to be carried on extensively during a portion of the month. A large number of recent arrivals, however, were unable to obtain employment.

There were 6,204 building permits issued during 1910, representing an approximate value of $21,127,783, as against 5,056 permits, representing a value of $18,139,247, in 1909. The total number of new buildings erected during the year was 8,499, as compared with 7,184 in 1909.

The report of Assessment Commissioner Forman for the year gives the total taxable amount of assessable property in 1911, as $309,147,053, an increase of $39,060,721, as compared with the revised assessment of 1910. The population, as returned by the assessors, is 341,991, as compared with 325,302 last year. There were 73,345 buildings, an increase of 7,534.

The total receipts of the Street Railway Company for December were $383,627, as compared with $348,825 in December, 1909. The percentage received by the City was $39,360, as compared with $34,882.

Toronto

At the monthly meeting of the Board of the House of Industry, held on the seventeenth, it was announced that 510 new families were assisted during the month, making a total of 851 families receiving assistance. There were 183 inmates of the Home.

The following money by-laws were adopted by the ratepayers at the civic election on the second: For new street railway lines, $1,157,293; for the improvement of main roads leading into the city, $102,564; for constructing a system of storm overflow sewers, $824,000; for the reclamation and improvement of Ashbridge's Bay, $205,128; and a grant to the Western Hospital, $51,000.

A new office-building is to be erected for the Canadian Pacific Railway at the corner of King and Yonge streets, 85 x 100 feet, and sixteen stories high. It will be of steel, faced with glazed terra-cotta, and is expected to be finished in eighteen months. The cost will be over $1,000,000.

On the twentieth instant a deputation of the District Labour Council, headed by William Glockling, president of the Dominion Labour Congress, presented to Sir James Whitney and the members of the Provincial Government a number of resolutions adopted by the Cognress with respect to needed labour legislation. These include the prohibition of child labour under sixteen years; the abolition of the system of sending tailoring work to the homes of employés; the removal of running boards on street cars and their equipment with air brakes; the providing of proper heating systems in foundries; the examining and licensing of barbers; amendments making proper scaffolding on buildings compulsory; eight-hour shifts where factories are operated all night; and the placing of Chinese laundries under the Factories Act.

A civic loan for $1,000,000 will shortly be floated to meet the expenses of installing the hydro-electric system in the city. Up to the present ,$700,000 has been spent on the system, within the city limits. Six or seven towers in the lake remain to be completed before the power can be brought to the transformer station.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had little to do except routine work and the marketing of produce, which continued to bring good prices.

Manufacturing.—Some lines of manufacturing were quiet, and others very busy. Textile manufacturers were active. Heavy orders from the West for agricultural implements have been received, and the shops of the Massey-Harris Company, employing 2,000 men, began running night and day, towards the end of the month, taking on a number of additional men. The Canadian General Electric Company were busy. The Siemens Dynamo works has secured a contract for the 500 kilowatt generator sets for the Winnipeg power station, at $16,410.

The Canadian Malleable Iron & Steel Company has begun the manufacture of tool steel by the Henderson process, at 32 Humberside avenue, where two furnaces have been installed with a capacity of nine tons of steel per day.

CONDITION OF PARTICULAR TRADES.

A considerably larger proportion of the men engaged in the building trades were employed during January, than in other seasons. The Federated Building Trades Council is endeavournig to bring about united action by all the unions connected with the building trade to secure an all-'round increase of wages. Machinists, moulders, blacksmiths, boiler makers and structural steel workers were generally quiet. Sheet metal workers and electrical workers were active. Brass workers had a fair month. Silversmiths and jewellers were quiet. Cabinet makers, furniture workers, upholsterers, coopers and carriage and wagon workers had steady work. Piano workers were active. Printers, bookbinders and lithographers were well employed. Customs' tailors found work slack. Other branches of the clothing trade had penty of work. Harness and leather workers were active. The provision trades had steady work. Icecutters were busy. Cigar makers were well employed. Hotel and restaurant employés, barbers and laundry

workers were rather quiet. Railway employés were busy. Teamsters, expressmen and street railway men had continuous work. Unskilled labour was better employed than usual at this season, but a large number, principally recent arrivals, were out of work.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Despite interruptions to the building trades by unfavourable weather, January was a good month. The amount of winter building was greater than for several years past. A small fire-arms factory was established, a new winery will be started and an American company engaged in the manufacture of articles of clothing decided to build a factory here which will employ about seventy-five hands to start with. Business of every sort was good, and the commercial outlook was deemed very satisfactory. The City Council and Water Commissioners increased salaries of several employés.

Position.	Salary 1910.	Salary 1911.
Mayor	$ 500	$ 600
City Clerk	1,000	1,00
Asst.-City Clerk (*F*)	500	600
Tax Collector	900	1,000
Supt. Streets	840	900
Health Inspector	830	900
Market Clerk	720	750
Collector Electric Department	780	840
Trimmer Electric Department	720	750
Foreman Electric Department	840	900
Team Driver	660	720
Supt. Water Works	1,020	1,200
Clerk Water Com. (*F*)	480	600
Foreman Water Works	780	840

(*F*) Female employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Excellent sleighing enabled farmers to market their produce and do necessary heavy hauling. Vineyards were being trimmed.

Manufacturing.—All manufacturing concerns reported business good.

Railway construction and employment.—Railway employment was good, traffic of all sorts being heavy.

CONDITION OF PARTICULAR TRADES.

Men of the building trades engaged in out-of-door work were employed every day that weather permitted. All trades were well supplied with work, except painters, lathers, plasterers, stonecutters and builders' labourers. In iron-working establishments employment was good, and electrical workers were also active. In the hat, shirt, suspender and neckwear factories employment was good. Journeymen tailors were well employed. The shredded wheat factory was busy. Ice cutters and handlers were better employed. Salespeople, office employés and hotel and restaurant workers were but poorly employed. Delivery and laundry employés were active. Full staffs of all classes of steam railway employés were working. On electric lines traffic was quiet. Cabmen were quiet; draymen, teamsters and expressmen active. Unskilled labour was not in demand.

DISTRICT NOTES.

Bridgeburg.—Additional men were employed at the foundry.

Chippawa.—Contract was let for erecting additional buildings for the Norton Emery Works.

Port Colborne.—Many men were engaged in installing machinery in the new mill. Fifty carloads of machinery will be required.

Welland.—At one period in January there were many idle men in town. This condition was partly relieved by the reopening of the rolling mill which had closed in November. The new overall factory and the knitting mill commenced running and many female hands will be steadily employed. By-laws were carried granting certain assistance to a steel tube plant and a planing mill. The Automatic Transportation Company decided to build a factory here. Additional factory construction projected for 1911 includes the establishment of several new and the enlargement of two established industries,

involving an expenditure of several million dollars.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour in January was active, being busy in a few lines. The building trades have considerable work on hand yet, and every favourable day is taken advantage of to complete outside work. Unfavourable weather conditions compelled a cessation of civic improvement work on concrete walks, curbs, pavements and sewers. Contracts have been let for paving of King street and Queenston street to the Warren Brothers Bithulithic Paving Company, next season. A new factory was favourably voted upon January 26. The Steel & Radiation Company, Limited, will secure from the city thirty-five acres for a site, and a fixed assessment for ten years. The Company will erect buildings, in the first three years, costing $50,000, employing not less than 100 hands and paying annually $50,000 in wages; in the next seven years buildings will be erected to cost not less than $150,000, employ not less than 250 hands and pay annually not less than $125,000 in wages. The Company expects within five years to employ 600 to 1,000 hands, and pay out annually not less than $300,000 in wages. The new three-story addition to the McSloy Haircloth Factory is nearing completion, as is also the new chain factory of the McKinnon Company. The ratepayers on January 2 carried the by-law authorizing the construction of a new water main of 24 inches, from the present reservoir to the city, about 3½ miles, and through the city to the north side, at a cost of $180,000, work upon which will be begun at the earliest possible date in the spring. Merchants reported an unusually good Christmas trade, and favourable conditions during January.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Pruning of trees, vines and bushes, and farm winter work engaged the fruit men and farmers' attention for the month.

Manufacturing.—With the exception of the canning factories, which are now through the season's work, all factories and mills were active to busy.

CONDITION OF PARTICULAR TRADES.

The building trades were active with conditions of employment good. All lines of metal and engineering trades were active to busy. Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers and coopers were active. The printing and allied trades were active. Journeymen tailors were in their slack season. Boot and shoe workers were active. Bakers and confectioners, butchers and meat cutters, ice cutters and drivers, cigar makers and tobacco workers were active. The leather trades were active. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés and laundry workers were active. All lines of transportation were active to busy. Unskilled labour was active, supply and demand being about equal.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed. The Maple Leaf Rubber Company's factory was busy turning out 2,900 pairs of rubbers daily.

Merritton.—All the mills and factories were running full time. The fitting up of the new rubber factory is progressing. The new Lybster paper mills will soon be in operation.

Thorold.—The labour market was active to busy, labour being well employed.

Beamsville.—The Beamsville Basket Factory was in full operation, with large orders ahead.

Dunnville.—A large United States steel plant contemplates locating near Dunnville. An option on 1,500 acres has been secured by interested parties. The Dunville, Wellandport & Beamsville Electric Railway Company is applying for an Act to extend its lines through the townships of Pelham and Thorold to the town of Welland. The Niagara District Telephone Company constructed 8¼ miles of lines, and put in sixty-five phones in 1910

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in some lines was not as well employed as during December, owing to a more complete cessation of outside work. The building trades were inactive; contractors, however, are looking forward to a busy season. The Waterous Engine Works Company will build a large addition at an estimated cost of $45,000. The iron trades were particularly busy, and prospects are bright for a large spring trade. Civic sewer construction work continues as the weather permits, which greatly assists many at this season. Merchants had a fair month.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing was very brisk.

Railway construction work is at a standstill, prospects for a busy summer are bright. Preparations are being made for the commencement of the construction of the Brantford to Port Dover electric railway.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, lathers and plasterers found trade dull. House carpenters also were very slack; those employed in factories were not very active. Painters, decorators and paperhangers had little employment. Plumbers, gas and steam fitters were not very active. Iron moulders and coremakers were busy. Machinists in some cases were very busy; there has been a slight demand for men. Steam engineers were busy. Electrical workers were active. Linemen were slack. Metal polishers, buffers and platers, blacksmiths, boilermakers and horseshoers were busy. Stove mounters and sheet metal workers were not very busy. Woodworkers generally were busy. Carriage and wagon makers and coopers were active. Patternmakers were busy. Printing and allied trades were busy. Tailors and tailoresses were not quite so active. Shoe workers were busy. Bakers and confectioners were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were active. Barbers, clerks, delivery employés, hotel and restaurant employés were steadily employed. Laundry workers were busy. Railway trackmen were a little quiet. Freight handlers were active. Street railway employés were fully employed. Draymen were busy. Teamsters were active, as also were cab drivers. Expressmen were not very active. There were a number of unskilled labourers unemployed.

DISTRICT NOTES.

Paris.—Conditions continued much the same as during December. There are not many unemployed. The demand continues for female operatives at the Penman fabric mills.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During January the general condition of the labour market was favourable. Neafly all the factories were running full time, and some were working overtime. As compared with the corresponding month last year there was a notable improvement. The promise is that the coming year will be the busiest in the history of the city, as far as the building industry is concerned. Wholesale and retail merchants report trade rather quiet. The customs revenue for December was $18,344.96, an increase of $2,230.82 over the same month last year. No changes in the rate of wages and no trouble in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers' activities during the month have been largely confined to the care of stock and the marketing

of produce. The roads have generally been in splendid condition for sleighing. The Ontario Experimental Union held its thirty-seventh annual convention at the Ontario Agricultural College here this month, and was attended by about 300 of the most progressive farmers from all over the province. The results of the year's work in the advancement of agriculture which were received are of the greatest practical interest and importance to the province. Many farmers also took advantage of the short term courses at the Ontario Agricultural College.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a dull month. Carpenters, joiners, lathers and plasterers, painters and paperhangers were fairly well employed, while plumbers and gas and steam fitters were busy. Stonecutters and builders' labourers had a dull month. Iron moulders, coremakers and machinists had an active month. Electrical workers and linemen were very busy, also blacksmiths and horseshoers. Piano and organ workers report a fair month, and carriage and wagon makers were busy. Printers and allied trades report an active month. Journeymen tailors were slack. Ice cutters and drivers were very busy, cigar makers, fair. Teamsters were busy. Unskilled labour was fairly well employed, a large force of men being engaged cutting and storing ice.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month of January was considered very favourable. Factories and machine shops were very busy. Bricklayers and masons, lathers and plasterers were not fully employed, but they would compare favourably with the corresponding month of 1910. Unskilled labour was fairly well engaged in cutting and packing ice. The new furniture factory was completed, and started toward the close of the month. The Batz Brothers' furniture factory was completed and the shafting is being put up at present. The addition to the Punder furniture factory was also completed, and a large brick structure added by the Land Tanning Company was also completed. The large addition to the Merchants' Rubber Company was completed and two of the boilers are being moved into the new building. The large addition to the T. Kaufman Planing Mill was completed and the shafting was being extended toward the close of the month. There were three building permits issued during the month of January, for buildings valued at $3,850. Machinists have been exceptionally active in the foundries here. Transportation shipments and bank clearings are reported favourable. Business, both wholesale and retail was good for January. There was no change in rates of wages or hours of labour during the month. There were no strikes or lockouts.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were engaged in usual winter work, teaming, sawing logs, wood and hay. Sleighing is good.

Lumbering.—This industry was very active, the log yards are being filled, and Mr. S. Bruebaker started sawing about the middle of the month.

Manufacturing.—Manufacturers were all working full time, with the Jackson & Cochrane foundry working overtime.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were somewhat inactive. Carpenters and joiners were active, with lathers, plasterers, painters, decorators and paper hangers inactive. Plumbers, gas and steamfitters and stone cutters were active, with builders' labourers inactive. Iron moulders, iron workers and helpers, coremakers, machinists and engineers, steam engineers, electrical workers and linemen were all active; so were metal polishers, buffers, platers and brass workers active. Stove mounters, black-

smiths, boiler makers, sheet metal workers, bicycle workers, tool sharpeners and horseshoers, wood workers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, car builders, pattern makers, coopers, gilders and shingle weavers, were all active. Other skilled trades were well employed, but unskilled labour was quiet.

DISTRICT NOTES.

Waterloo, Ont.—Labour on a whole was well employed during the month, with manufacturing establishments busy. The Globe Furniture Company working overtime, three nights a week.

The Waterloo Tanning Company, manufacturers of glove leather and upholster leather report the demand so great that they are unable to fill orders. They are busy enlarging the plant, requiring about ten more men at an early date.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour situation has not materially changed since last month. Most of the factories report business very good, comparing favourably with the same time a year ago. There is still some demand for skilled labour, especially from the pipe organ and piano making trades. There is, apparently, more than enough unskilled labour, although complaints of unemployment are few. The wagon companies report business first rate, with factories working full time and even overtime. The organ and piano companies report business conditions as satisfactory, and showing improvement on the same conditions a year ago. The Canada Furniture Company is working full time and full handed, and expects these conditions to continue for some time. This is the cleaning-up season with tanners. The local tannery has been closed down for a couple of weeks, but is expected to start again in a few days. The James Stewart Manufacturing Company report that although this is the off season in the stove trade, business is picking up in preparation for the spring trade.

CONDITION OF PARTICULAR TRADES.

Work in the building trades has been very good this winter; the season was one of the best and longest in many years for bricklayers, masons, and others engaged in building work; but just now is a period of slackness. There is little outside work. Iron workers, moulders, stove mounters and machinists were steadily employed, but there was no demand for men. Woodworkers were all busy, and there was some demand for skilled labour from the pipe organ, piano and organ trades. The printing business was reported fair; no demand for men, but not many applications. Tailors and garment workers were steadily employed. Bakers, butchers and cigar makers report business fairly good. Tanners state business is dull, as this is the cleaning-up season. No men are wanted. Unskilled labour is plentiful now; most of the factories report plenty of applications from unskilled men.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during January showed very little change compared with the previous month, except in the building line, which was almost at a standstill. In local industries and on the railways the month was very good; a number of trainmen were added to the working staffs of the railways, and the regular men had a busy month. A large number of men and teams were engaged in ice harvesting, while the weather was frosty. The Niagara Hydro-Electric Power Company men were busy stringing wires. Retail merchants reported doing a good business. Customs returns for the month amounted to $10,329.81, showing an increase of $600 over the same month of

last year. No change in rates of wages or hours of labour, and no trouble in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were less active than the preceding month marketing their products. The prices quoted were:—

Potatoes, 85c. to 90c. a bag.
Eggs, 30c. to 35c., a dozen.
Butter, 23c. to 25c. a lb.
Apples, $1.25 to $1.75, a bag.
Hogs, $7 to $7.15, a cwt.
Wheat, 82c. a bushel.
Oats, 35c., a bushel.

Manufacturing.—All local industries were very busy, with plenty of orders.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons and all outdoor workers in the building trade were quiet. Plumbers and gas fitters were busy. Iron moulders, iron workers and helpers, machinists and engineers were busy. Linemen, electrical workers and blacksmiths were active. Boilermakers were busy. Woodworkers, coopers and stave factory workers were busy. Printers were busy, especially ad. compositors. Journeymen tailors reported work rather quiet. Garment and factory workers were busy. Bakers, confectioners and butchers were doing a good trade. Ice dealers were getting in their supply. Cigar makers were steadily employed. Barbers, clerks and delivery employés were busy. Hotel, restaurant and laundry workers were active. Railway conductors, engineers, firemen, and trainmen were busy. Switchmen and trackmen were active. Freight handlers were busy. Cab drivers, draymen, teamsters and expressmen were busy. Unskilled labour was fairly well employed.

DISTRICT NOTES.

Mitchell.—The Hill Bridge Company had a gang of men building a 110-foot bridge in Fullerton. The Company has bright prospects for a busy season in its line of business. The Whyte Packing Company had a number of men and teams engaged putting in its season's supply of ice.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The early part of January was broken in a number of the factories and foundries, through the employés being laid off a few days while stock-taking and general overhauling of plant took place, but by the middle of the month business was in full progress again, and in most cases to a better start than at the corresponding time last year, with indications of a prosperous year. In the building trades business has been the opposite, and workers in these lines are experiencing less work than for some years, numbers of them having done nothing since November. A comparative statement of the number and value of building operations during past two years shows 882 permits valued at $805,074 in 1910; and 684 permits valued at $850,134 in 1909. At the municipal elections, the ratepayers by large majorities voted for fixed assessments to the following firms: McClary Manufacturing Company, stoves, tinware, &c.; G. White & Sons, traction engines, threshing machines, &c.; McCormick Manufacturing Company, biscuits and candies; Perrin Manufacturing Company, biscuits and candies; London Foundry Company; Wortman & Ward, Manufacturing Company; London Brass Company; and E. Leonrad & Sons, boilers and engines. In the week ending January 19, the Somerville Paper Box Company increased the wages of all its employés by paying them the same money for fifty-five hours as they formerly got for sixty hours. For some time previous to this they were only working fifty-five hours, and Saturday afternoon's wages were deducted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were looking out for farm help for the coming spring and found it hard to get experienced help, and also that the fresh arrivals from the

Old Country prefer to stay in the city and run chances of work, than live on a farm.

CONDITION OF PARTICULAR TRADES.

In every branch of the building trades work was very scarce, and many were idle. Iron moulders were busy, as were also iron workers. Machinists reported trade good. Electrical workers and linemen were very busy, and a large number of residences were being connected up for Niagara power. Metal polishers, brass workers and boiler makers were busy. Carriage and wagon workers reported business fair. Car builders were working short time. Coopers reported work plentiful. Printers were very busy, as were also pressmen. Paper box makers were busy. Journeymen tailors were slack. Garment workers and boot and shoe workers were busy. Bakers and confectioners reported trade fair. Cigar makers were busy. Tanners and curriers were very busy. Broom makers were busy. Furriers were slack. Laundry workers were busy. Railway train crews reported business good. Teamsters were slack. There was practically no work for unskilled labour, especially on outdoor employment, and there was a large number idle.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The building trades were quiet during the month of January, and for the most part those engaged in outside work were idle. Towards the close of the month, the weather moderated slightly, and there was a revival of business among outside workers. The prospects for a busy summer are bright; several large contracts have been let and there is promise of considerable work being done in the erection of residences. In the railway service, traffic and shop employés were well employed. A slight temporary reduction of hours was made in the Michigan Central Railway machine shop about the first of the month, the men therein engaged are now working eight hours per day with Saturday afternoons off. It is altogether likely that the ten-hour schedule will be put in effect in the near future, as there is plenty of work on hand. Unskilled labour was fairly well employed during the month, the supply being in excess of the demand. The net balance of the St. Thomas waterworks department for the year totals $6,842.54. A labour slate was prepared for the municipal election, and one candidate was successful in being elected to the Board of Councillors. The rate to be charged to household consumers of hydro-electric power is $1 per month, with a reduction of ten per cent. for cash. This is a considerable reduction of the present rate. Local markets were well attended. Peaceful conditions prevail in labour circles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Very little work was done on the farms during January, aside from caring for stock and looking after the wood supply.

CONDITION OF PARTICULAR TRADES.

Railway shop employés engaged in the iron trades were busy. Printers report the month quieter than usual. Journeymen tailors were quiet. Those engaged in railway transportation business were well employed. The supply of unskilled labour was in excess of the demand.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was very well employed during January, but as usual at this season of the year building operations have ceased. Inside men, however, were well employed. The International Harvester Company has kept a number of hands busy during the whole of the month making changes to its plant. A very large amount of ice was cut and stored, which

kept a large number of the labouring class busy. All municipal work was practically at a standstill, owing to the severe weather. At the January elections the ratepayers carried a by-law to assist the Western Bridge & Equipment Company by giving it a fixed assessment and ground on which to erect new buildings. In return, the Company is to employ from fifty to one hundred men the year round. Merchants report trade very good, and prospects better than in 1910.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were practically doing nothing, except attending to stock.
Manufacturing.—Manufacturers were in most cases running full time. A few factories were running overtime.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were mostly idle. Carpenters and joiners were well employed. Lathers and plasterers were idle. Painters and paperhangers were very quiet. Plumbers had a very good month. Builders' labourers were idle most of the month. Iron moulders had a very fair month. Machinists, electrical workers and linemen were busy, and metal polishers, buffers and platers and brass workers were very busy. Blacksmiths, boiler makers were fairly well employed. Sheet metal workers were quiet. Horseshoers were very busy the first part of the month. Woodworkers and upholsterers, carriage and wagon makers report the month very good. Printers, pressmen and bookbinders report trade fair. Journeymen tailors and garment workers were somewhat slack after the holidays. Bakers and confectioners, butchers and meat cutters, ice cutters and cigar makers report a good month. Barbers, clerks, delivery employés and laundry workers were busy. Freight handlers were very busy. Street railway employés were well employed. Unskilled labour was not much in demand towards the end of the month, although no complaints were heard of being out of work.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were unusually good for the month. With the exception of a few bricklayers almost every other trade was working, and prospects are good. There were eleven permits issued for the month of December, with a valuation of $22,700, as against two permits for the same month a year ago. The total number of permits issued for the year 1910 was 237, as compared with 178 issued in the year 1909. The total value of permits issued during 1910 was $392,040, as compared with $423,885 in 1909, during which year the Postum Cereal Company, the Seeley Manufacturing Company and the Lufkin Rule Company permits were valued at $120,000. Wholesale and retail merchants report trade twenty per cent. better than the same month last year.

CONDITION OF PARTICULAR TRADES.

With the exception of bricklayers the building trades were busy, and prospects look good. Electrical workers and linemen were busy. Blacksmiths, sheet metal workers and horseshoers were busy. Woodworking and furnishing trades were working full time. Printers and pressmen were very busy. Journeymen tailors were not very busy. Garment workers were very busy. Bakers, butchers, ice cutters, cigar and tobacco workers were fully employed. Leather workers were well employed. Barbers report a fair month. Clerks, hotel and laundry workers were busy. All lines of transport were busy. Unskilled labour was fairly well employed.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As is usual at this season there is an over supply of unskilled labour. The

Algoma Steel Company's rolling mill for merchant bar and structural shapes commenced operations, running at present on day shift only. Trade has been quiet, the usual condition at this season. There were no changes in rates of wages and no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Fishing and mining.—Normal conditions prevailed.

Lumbering was brisk.

Manufacturing.—The various manufacturing plants were working full time on orders well ahead.

CONDITION OF PARTICULAR TRADES.

Normal conditions prevail in the various trades.

In an interview with General Manager Franz, of the Algoma Central Railway Company, it was learned that contracts for the final 42 miles of the Manitoulin and North Shore Railway would probably be awarded when the Board of Directors meet. The construction work will then be proceeded with and the line completed from Sudbury right through to the Manitoulin Island, with all dispatch, giving the Island the first railway in its history, which will be a great boon to the people. Asked concerning the developments on the Algoma Central Railway, Mr. Franz stated that they expected to be booked up with the main line of the Canadian Pacific Railway about the middle of the year, and then the Company's operations would be directed to the north country. They have at the present moment three survey parties operating north of the main line of the Canadian Pacific Railway, and they hoped by June next to have their estimates so far advanced as to be in a position to call for tenders for the construction of the road north from Hobon to the intersection of the Canadian Northern Railway and later on from there to the Grand Trunk Pacific Railway, eventually tapping the great inland sea, Hudson Bay. Do not be surprised if the Algoma Central Railway is the first railway to tap the northern seaboard.

DISTRICT NOTES.

The supply of unskilled labour was slightly in excess of the demand. As is usual at this season, most of the building trades were slack. At the annual municipal elections, by-laws were carried as follows: $30,000 for a new school; $34,000 for new sewers; $30,000 for new sidewalks; and for the appointment of a park commission.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was quiet in all branches, as is usual at this season of the year. There have been no new works opened in the district, but a number of men—nearly three hundred—have been employed on the dry-docks. It was hoped that work would be started on three vessels waiting to be repaired, but before the dock could be put in readiness the ice was too thick to move the vessels. This will mean early work for a number of men in the spring, and as there is a large number of experienced ship carpenters in the two cities much skilled labour will be employed. Business transactions have been normal. There have been no changes in rates of wages, and conditions in labour circles are quiet. Many men have gone into the tie camps in the bush, and there is a steady demand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The Mayor of Port Arthur has taken up the matter of colonization roads with the Provincial Government, which is the great need of this district for the development of agriculture. Many small lots of land have been sold in the vicinity of the cities for market garden purposes. The settled land in the district, is beginning to send in farm products, and at the recent rate of development and with the advent of better roads these cities would receive a great deal of their food supply from settlers.

Mining.—A scheme is on foot to develop the low-grade ores around these shores. It has been successfully demonstrated at the blast furnace at Port Arthur that pig iron second to none can be smelted from these ores, and with this success in blasting, this district should become a manufacturing centre for western trade. With this idea in mind, the Boards of Trade of the two cities and the citizens generally, are awakening to the importance of this industry, and of the immense wealth in low-grade ores at their doors.

CONDITION OF PARTICULAR TRADES.

All the building trades were quiet; most of the buildings were finished at the close of last year, and only a few carpenters and painters have been employed. With the close of navigation and the building trades idle, all other trades are naturally quiet. At Fort William a number of carpenters have been busy on scow building and repairs to tugs, &c. The linemen and electricians on the street railways have been kept steadily employed. The printing trades have had a steady month, not as busy as last month, but as busy as the corresponding period of last year. Teamsters and their teams have gone to the lumber camps for the most part. The rate of pay for teamsters in the city was advanced 10 cents per hour last November. The city contracts for this year have not yet been let.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During January the demand for labour was better than in the same month a year ago. There was a steady demand for labourers for cordwood and lumbering operations. Blockades on the railways also created a demand for men to clear the right of way. Business has been dull both in respect of retail and wholesale branches, but at this season this is usual. Bank clearings showed an advance of nine per cent. over the total for January, 1910. Financial institutions issuing reports have, generally speaking, had an excellent year. The City Council of Winnipeg has arranged for the building of several lengthy conduits for carrying the cables of the new electrical distribution system. At the beginning of the year about thirty employés of the Manitoba Clothing Company returned to work, after being on strike since December 22, 1910. The cause of the strike, as reported last month, was requiring union hands to make uniforms for the Winnipeg Electric Railway Company, whose employés at that time were on strike. When the latter dispute was settled the employés of the Manitoba Clothing Company returned to work on an open shop understanding.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—On account of the bad condition of the rails, as well as the railway tracks through blizzards, deliveries of grain have been very light. The prices of wheat advanced up to a parity with those of Chicago. This is said to be caused by the prospective placing of wheat upon the list for free admission into the United States.

Building.—There still continues to be employed a large number of men upon new buildings. The bulk of the work is interior. Prospects for a large amount of building during the present year appear to be bright. The architects are reported to be very busy preparing plans for many new structures.

Railway construction.—An important announcement was made by Mr. William Whyte, Vice-President of the Canadian Pacific Railway Company, to the effect that alterations to the present repair shops would be started immediately, and that provision would be made for the employment of one-third more men than at present. During the present year also the new shops of the National Transcontinental Railway will be completed, and will have to be manned.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were quiet, although January of the present year will compare very favourably with the corresponding month of previous years. There were a number of idle men, though the stormy weather has created a demand for snow shovellers to keep the railway tracks clear. The severe weather practically closed down outside building operations, but plasterers, carpenters and joiners were busy finishing in the large business blocks erected in the fall.

The Manitoba Royal Commission on Technical Education and Industrial Training held sessions here on the nineteenth and twentieth of the month. Much evidence was secured from mechanics and employers as to the necessity of technical schools in the city.

Building permits were issued during 1910 for the sum of $933,349.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The Hanbury Manufacturing Company, the McDiarmid & Clark Company, the Manitoba Windmill & Pump Company, and the Brandon Implement Manufacturing Company were still working full time.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were very dull. Carpenters and joiners were busy. Plasterers, plumbers and steam fitters were busy. Builders' labourers were dull. Machinists and linemen were busy. The printing trades were busy. Cigar makers were active. Railway transport was busy. Unskilled labour was active.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour throughout the month has been to a great extent idle, especially in the building trades, where, owing to the severe weather, combined with an abundance of snow very little work has been accomplished. The prospects for the coming year are brighter than twelve months ago. The plans for various warehouses, business blocks, &c., were being called for, and judging by the descriptions of them, and combined with the Dominion Exhibition which is to be held this year in Regina, this year should excel all previous years in the history of Regina. There has been a slight falling off in wholesale trade, but this is usual at this time of the year.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The output of the local soap factory continues to be on the increase; evidence of this being noted by the ever-increasing staff to handle the product; and it is anticipated by the Company to again add to its enormous plant this year.

Railway construction and employment.—Preparations are now being made for an early start in the various branch lines about Regina, in fact throughout the province.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have had a quiet month, though there is considerable work for them; the weather, however, is decidedly against them. Carpenters and joiners were quiet, only a small percentage being able to find employment on buildings which are nearing completion, and those that were closed in before winter set in. Lathers and plasterers, painters, plumbers and steam fitters were not in much demand. Builders' labourers were fairly well employed. Blacksmiths and horseshoers were very active. All of the printing and allied trades experienced a fairly active month, as also did the journeymen tailors and garment workers. Bakers and confectioners, butchers and cigar makers were busy. Barbers were fairly well employed, also clerks, stenographers and delivery employés. Hotel and restaurant employés were quiet. Unskilled labour has found much employment in clearing snow.

MOOSE JAW, SASK., AND DISTRICT.

Mr. John Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As is usual at this time of the year the supply of labour exceeds the demand, but the condition of the labour market generally compares quite favourable with any previous year. There is nothing in the way of marked distress in the city. A more than usually large number of men are being employed finishing the many new buildings that were covered in before the hard weather set in. Consequently, finishing carpenters, lathers and plasterers have been fairly well employed.

Retail trade has been fairly brisk during the month, although complaints were heard in some quarters. A bank clearing house was established in the city during the month. The plant of the Times Printing Company was destroyed during the month and damage to the extent of $30,000 resulted. The prospects for the coming year are that there will be great activity in the erection of new buildings.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather has been very severe during the past month, but much needed moisture, in the way of snow, has fallen, and a zero temperature has for the most part prevailed. Grain receipts have been fair in volume, but many bad storms have interfered with the movements of farmers.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been quiet, the weather being too severe to admit of outdoor labour. Carpenters, lathers and plasterers have been fairly active for the time of year. Electricians have been fairly busy. Machinists, engineers, blacksmiths, iron workers have all been well employed. Printers and allied workers have been exceptionally busy. Railway transport has been active. There has been no idleness among store employés. Laundry workers, hotel employés, stenographers, office hands have all found steady work, with the supply, however, fully equal to the demand.

SASKATOON, SASK., AND DISTRICT.

Mr. A. B. Jones, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market for the past month remained much the same as in the previous month, all the building trades being at a standstill. The heavy snow falls have made considerable work for unskilled labourers, and the cutting and packing of ice has also helped out considerably. Not very much improvement is looked for until spring opens. The railway companies are experiencing difficulty in keeping their lines opened, owing to the heavy snow drifts and severe weather, thereby retarding transportation to a very great extent, shippers not caring to send out goods until the lines are opened.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Returns made to the Government show that the thirteen creameries throughout the province manufactured 769,500 pounds of butter during 1910.

Manufacturing.—The sash and door factories have completed their season's work and have closed down for the winter. The Saskatoon Milling Company is still very busy.

CONDITION OF PARTICULAR TRADES.

All buidling trades were slack. Machinists, blacksmiths and electrical workers were active. The printing trades were fairly well employed. Journeymen tailors also were well employed, but ice cutters busy. Cigar makers were very slack. Leather workers and saddlers, barbers, hotel, restaurant and theatre employés were fairly busy, and clerks, stenographers and laundry workers, busy. Railway employés, freight handlers, carters and draymen had fair employment, but unskilled labour was out of work.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the month was quiet, owing to the severity of the weather. The printing trades were very busy, many printers having to work overtime. There are a number of unemployed among the stonecutters and unskilled workers. The City Council is considering the advisability of building street railway cars, and establishing a municipal paving plant, a municipal tailor shop and a labour bureau. The city engineer reported that his department had during the past year laid 24½ miles of sewers, 18 miles of water mains, and 8 miles of concrete sidewalks. There was a very marked increase in the city's revenue for the last year, over the preceding year, *viz.*, for 1910, $1,103,000, as against $673,000 for 1909, an increase of 63·9 per cent. The municipal street railway made a gross profit for the year 1910 of $55,815, out of which the sum of $22,500 was set apart for the relief of taxes. The street railway employés for the month of December, 1910, got for the first time five per cent. of the profits as a bonus, which amounted to a little over $5 per man. Wholesalers and retailers report trade satisfactory; and to be much better as compared with the corresponding period of 1910.

The coming season is expected to be a very busy one for building employés. The John Dure Plough Company will erect a $60,000 warehouse. Contracts for the school board were let to the amount of $150,731. A new incinerator, at a cost of $70,000 will be erected, and it is likely that a new central fire station will be built at a cost of $75,000.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators and building labourers had a quiet month. Iron moulders, iron workers and helpers, coremakers, machinists, engineers, electrical workers and linemen, blacksmiths, boiler makers, sheet metal workers and horseshoers report satisfactory conditions. Woodworkers and upholsterers had a fair month. Printing trades were very busy. Tailors were dull. Butchers, bakers, were fairly well employed. Leather trades were fair. Miscellaneous trades report trade satisfactory for time of year. Transport employés on the whole were fairly well employed. Unskilled labour was very dull.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the latter part of December and January labour conditions were normal. Finishers had a good month, but during the latter part of the month outside men were unable to work, owing to cold weather. However, this has been one of the best seasons for many years for men engaged in the building line. Unskilled labour naturally has been idle during the month, but the month would compare favourably with the same period last year. In the general labour market there were no exceptional activities. Wholesale and retail merchants were busy with preinventory sales. There were no changes in the rates of wages or the hours of labour, neither was there any unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The Poultry and Pet Stock Association's annual show was held in this city. The show was an excellent one and well patronized. Many sales were made of the blooded stock during the show, and large prices were paid for some of the birds.

Lumbering.—Many of the lumbering companies sent large numbers of men to the woods during the past month. This was a favourable feature on account of so many men being thrown out of employment on account of the railways suspend-

ing the grading operations to a certain extent, until the weather opens up.

Railway construction has ceased to a large extent, but will be resumed as soon as the weather permits.

CONDITION OF PARTICULAR TRADES.

Necessarily the building trades have not had steady employment during this month. The inside finishers have had a profitable month. The printing and allied trades have been actively engaged during the past month. The clothing trades were unusually active, and the demand for woollens and furs has been above normal, owing to the continued cold weather.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to the severe winter weather all outdoor works were at a standstill. Last month labour was fairly well employed. The winter weather has stopped, for the present, work on various buildings and new factories. There was no activity in any of the trades, with the exception of coal mining.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The West Lethbridge Farmers' local union sent a delegate to a convention of farmers held lately in Calgary.

Manufacturing.—Planing mills and local iron works were not busy.

Mining.—All of the coal camps were busy. The recent snow storms kept back the shipment of coal, otherwise the mines were busy.

Railway construction.—It is stated that when the spring opens up the Lethbridge-Weyburn railway line will be commenced from the Lethbridge end.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been idle during the month, there being no inside work going on. Painters, plumbers and stonecutters were not busy. Builders' labourers were slack. Printers were very busy. Pressmen were well employed. The two job print shops were well employed. Bakers and confectioners were busy. Butchers were well employed. Ice cutters were busy. Cigar makers were busy. Barbers, clerks, stenographers and laundry workers were very busy. Unskilled labour was very dull.

DISTRICT NOTES.

A traffic bridge across the Belly river, 5 miles north of Lethbridge, is proposed, to connect Diamond City and country north. The City of Lethbridge is considering what portion of the cost it will bear, along with the Alberta Government, and district served. An electric railway will run over the route.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout Kootenay district in January was quiet. The supply of both quartz and coal miners slightly exceeded the demand. Owing to a snow blockade throughout the Crow's Nest Pass district, preventing the railway companies from moving coal trains for about a week in early part of the month, the coal miners lost about ten days employment. This, with slack work in general, gave the coal miners a poor month. The supply of men for the lumber woods also exceeds the demand. The inland revenue returns for 1910 showed an increase of $3,418.30 over those of the previous year. The figures were $31,464.18 for 1909, and $34,882.48 for 1910. The Customs returns for the Port of Nelson give an increase of $9,876.54 over 1909; the total for 1909 was $93,396.32, and for 1910 was $103,272.86.

The Athabasca, a free-gold mine situated near Nelson, reports a strike of ore in which the gold is plainly visible. The

Granite-Pooman group of gold mines, situated on Eagle Creek, near Nelson, has been reorganized under the name of Kootenay Gold Mines, Limited, capitalized at $250,000. It is proposed to increase the capacity of the present stamp mill and install a cyanide plant at an early date to handle the increased tonnage.

During 1910 there was milled at the Queen mines stamp mill between 12,000 and 13,000 tons of ore of an average value of between $12 and $13 per ton, and some 1,300 to 1,400 feet of development work was done. A rich strike of silver-gold ore is reported to have been made at a depth of 50 feet in a shaft which is being sunk on the Bluebird Mine, in the south belt at Rossland, B.C.

The Nelson Trades and Labour Assembly, with ten local unions in affiliation, was organized on December 30 last, when twenty-one delegates met in the Miners' Union Hall. The unions taken into affiliation were Miners, Electrical Workers, Bartenders, Barbers, I.W.W. Brotherhood of Carpenters, Amalgamated Carpenters, Brewery Workers, Machinists and Locomotive Firemen.

The first annual shareholders meeting of the Citizen's Co-operative Association, Limited, held on twentieth instant, in the Miners' Union Hall, at which about eighty shareholders were present, showed grounds for satisfaction; it was decided that a seven per cent. dividend should be declared.

NEW WESTMINSTER, B. C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Outdoor work has been particularly at a standstill owing to the severe weather, which, arriving unexpectedly, found people unprepared and almost completely paralized outdoor industries. The river was frozen over for nearly a week, leaving the greater number of upriver and downriver points, depending upon the river for transportation facilities, cut off. This affected the merchants of the local market not a little and in some instances sent prices soaring. Owing to the frost and snow the sewer and construction work had a decided set back, but in a few days activity in these lines will be resumed. At present there is a considerable number of idle men, principally labourers and carpenters, but in these lines there is promise of great activity in the spring.

The British Cloumbia Electric Railway Company reported that the success of their Chilliwack line has been beyond expectations. They have recently instituted an entirely new and speedier mail service between Chilliwack and the coast and this has proved of great advantage to local commerce. The dredge *King Edward* is about to commence work on the filling up of some thirty-five acres of low lying land on the south side of the Fraser river bridge. This will be used for the yards of the British Columbia Electric Railway.

Recent reports indicate that the Canadian Northern Pacific Company has its construction work well under way on the lower mainland section from Port Kells, eight miles east of Port Maine, to Popcum, a distance of over fifty miles. A provisional contract has been awarded to the Northern Construction Company for grading another twenty miles of line from Popcum to Hope.

Work has already commenced on some of the buildings and the wharf to be built for a firm of Winnipeg capitalists about to start a brick yard on the north shore of Pitt Lake. The Company expects to have everything in perfect running order before the first of May.

At a recent meeting of the City Council it was decided, without a dissentient voice, to adopt the eight-hour day in all civic departments where it is not already in force, as soon as possible.

For the first time in this city's history labour is being directly represented in civic affairs. Mr. Dodd and Mr. Campbell as Aldermen and Mr. R. A. Stoney as school trustee, being elected out of six candidates nominated by the Trades and Labour Council.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers are fairly active. Paperhangers, plumbers and steamfitters active, while builders' labourers were quiet. Iron moulders and helpers are busy, machinists and engineers were quiet. Electrical workers and linemen were active. Blacksmiths were busy, with shipbuilders, shipwrights and caulkers quiet, while sheet metal workers and horseshoers were active. Woodworkers, upholsterers, varnishers were fairly active, while car builders were busy. Printers and pressmen were all working, as were journeymen tailors and boot and shoe workers. Bakers, butchers and meat cutters were fairly active, and cigarmakers busy. Barbers, clerks, stenographers, delivery employés and restaurant employés were busy. Railray employés were active, while steamboatmen were quiet. Street railway employés and expressmen were active.

VANCOUVER, B. C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to adverse weather there were a large number of out-of-doors workers idle. No improvement in the building trades is looked for until spring. The coming season promises to be very active as large operations have already been planned. A continuance of the upward trend in prices for beef and the steadiness of all provision lines were the outstanding features of the local market.

The Trades and Labour Council appointed a committee to interview the Provincial Inspector regarding amendments needed to protect lives of employés engaged in electrical work. This season's halibut catch proved the poorest known on the coast.

Building Inspector Jarrett estimates that during the next twelve months $15,000,000 building permits will be issued. Mr. Dominic Burns has taken out a $400,000 permit to erect a building containing 260 offices. The Canadain Pacific Railway will build fifty residences on Shaughnessy Heights costing $750,000.

The real estate market was more active than last month. Interest seemed to have centred in outlying districts, namely, Delta and Coquitlam.

The City of Vancouver by a plebiscite of the ratepayers (1593 to 108) have accepted the proposal to annex the municipality of South Vancouver. The total assessment of the latter district is $13,500,000; its area is over 14 miles and its population about 30,000. Vancouver will thus have about 155,000 residents.

The following money by-laws were endorsed by the ratepayers on January 12:

The by-law annexing the Hastings townsite and District lot 301 were approved.

The plebiscite to (1) change the form of civic administration to that of a board of paid commissioners, and (2) to limit the height of buildings to 120 feet or 10 stories, were carried. The plebiscite to exempt from taxation the property of churches was defeated.

CONDITION OF PARTICULAR TRADES.

Typographical Union No. 226 entered into a three year agreement with The World Printing & Publishing Company. It provides that night workers will be paid $5.50 and day hands will receive $5.00. It further stipulates that a graduated decrease from a seven and one-half hour day to a seven-hour day will be carried out.

The old rate was six days of seven and one-half hours, $25.00; six nights, seven and one-half hours, $27.00. Thirty workmen were effected. The other newspaper offices decided to arbitrate with the Union. Local Union No. 88, International Stereotypers and Electrotypers' Union, has entered into a three years' agreement with the The World Printing and Publishing Company. It provides for a continuance of the eight-hour day and $1 a day raise all round. Foreman will receive $31; journeymen, $27; apprentices in first year, $9; second year, $12; third year, $15; fourth year, $18; fifth year, $21. Holidays to be charged time

and one-half. One apprentice on each shift. The foreman to be a member of the Union. Cigarmakers report trade exceptionally dull. Teamsters and expressmen report trade quiet on account of the weather.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chrow, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market were similar to those prevailing during December. A fair amount of outdoor work was under way with more than enough help offering. This applies more particularly to unskilled labour and the building trades. It is expected that his year will be a good one for both unskilled labour and the building trades. The bank clearings for 1910 amounted to $91,567,074, an increase of $20,871,192 over 1909, of twenty-nine per cent. For the month of December, 1910, the clearings amounted to $10,184,074, an increase of $2,084,491 over December of the previous year, and $5,244,999 in excess of December, 1908. The total receipts from all branches of the post office in this city for the month of December were largely in excess of those of any previous December. The total receipts at the Victoria customs house during the past year over last year were $1,014,864.67. The total receipts for 1910 were $2,653,039.84, as compared with $1,638,175.17 the previous year. The greatest increase was in Chinese revenue, which showed an increase of nearly twice the total amount collected last year, and four times the amount of the previous year.

A Chinese branch of the Bank of Vancouver, and a branch of the Eastern Townships Bank, have recently been opened in this city. The Western Finance Company, of Victoria, has recently disposed of 200,000 acres of timber land to British capitalists for the sum of $2,000,000. Vital statistics compiled by the city health officer indicate excellent health conditions prevailing in this city during the past year. The death rate per thousand of the population for the twelve months was eight and one-seventh on an estimated population of 42,000.

During the last year the British Columbia Electric Company hauled on its local lines 5,441,754 passengers, compared with 5,093,509 in 1909, an increase of seven per cent. The gross receipts of the British Columbia Electric Railway Company for the year ending June 30, 1910, increased by thirty-one per cent., while the net earnings advanced nineteen per cent. The hotel trade during the last year has been the heaviest in the history of the city. The tourist traffic was exceptionally heavy during the summer and early autumn, and in reality was greater than that of 1909, when the Alaska-Yukon-Pacific Exposition was in progress at Seattle. At the municipal election held January 12, by-laws for the expenditure of $1,675,000 on waterworks and electric lighting were approved by the taxpayers. It was also decided that improvements shall be exempted from taxation; that the police and license commissioners shall be elected by the votes of the city; and that licenses shall be granted to none but hotels complying with the statutory requirements.

CONDITION OF LOCAL INDUSTRIES.

Mining.—The preliminary report of the Provincial Mineralogist has been issued. The estimated mineral production for 1910 is $26,183,505, the highest yet recorded in the history of mining in British Columbia. The best previous year was 1907, when the total was $25,822,568.

Railway construction.—The contract for 40 miles of the island division of the Canadian Northern Pacific Railway has been let. Construction will commence immediately, and the section must be completed within a year. It will require a large force of men to complete the work in the specified time.

CONDITION OF PARTICULAR TRADES.

Only about fifty per cent. of the building trades were steadily employed, plumbers excepted, who reported almost all

members employed. Employment was reported fair in the metal trades. Some men have been temporarily laid off in a few shops. In the ship building yards there is considerable repair work being done. Work was fair, with no idle men, in the printing trades. One of the shops was running day and night force. Work for unskilled labourers was above the average for this season of the year, but still there were many idle men. The prospects for the year are good.

NANAIMO, B. C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district has not shown much change over last month. While outside work has been badly handicapped by weather, work in the coal mines, which is the principal industry in this district, has been pushed to full capacity, there being exceptional activity in the coal trade. Business men, wholesale and retail, report business as very good for the time of year. There have been no changes in rates of wages during the month.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The herring fishing, which is now drawing to a close, has been almost a failure this year, hardly any fish having come into the harbour.

Lumbering.—The saw mills in the district are running, but not on any extensive scale at present. The local saw mill, which has been closed for some months, has started up with a force of forty men, to be gradually increased. The equipment has been thoroughly overhauled and put in first-class condition. There was not much work in the logging camps.

Mining.—The coal mines of the district have been extremely busy during the month. The company in this city has started sinking a new shaft which will be about one thousand feet deep.

Railway construction and land clearing have been retarded by the exceptionally bad weather.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been unable to do much work during the month. The same applies to carpenters and joiners who have a good deal of work on hand. Lathers and plasterers were quiet. Painters and paperhangers have been fairly active on inside work. Plumbers report work as active. Builders' labourers have been quiet during the month. Blacksmiths and carriage makers report work active. Printers were active for the time of year. Teamsters and expressmen were also active. Unskilled labour has not done much out of the mines this month, as the sidewalk and sewerage work has been stopped until the weather moderates. There are a number of idle men in the district.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JANUARY, 1911.

DURING the month of January an application was received in the Department for the establishment of a Board of Concilitaion and Investigation on behalf of the underground miners, machine men, drillers and muckers employed by the Wettlaufer Silver Mining Company, Limited, of South Lorraine, Ont. The number of employés affected was given as thirty-five directly and thirty indirectly.

Report Received.

During the month of January the report of the Board was received in the case of the dispute between the Grand Trunk Pacific Railway Company and its maintenance-of-way employés. The report was unanimous on all points except that of rates of pay, two schedules being submitted, one giving the rates recommended by the Chairman and the representative

of the men, and the other the rates recommended by the representatives of the Company.

Other Proceedings Under the Act.

In the application of the employés of the Wettlaufer Silver Mining Company, Limited, for the estabishment of a Board of Conciliation and Investigation it was stated that the dispute related to a proposed reduction by the Company in the wages of the men directly concerned of 25 cents per day, this reduction to go into effect on January 4, 1911. The number of employés concerned in this dispute was given as thirty-five directly and thirty indirectly.

A Board of Conciliation and Investigation was estabished by the Minister of Labour in this matter on January 26, Mr. Charles H. Lowthian, of Silver Centre, Ont., being appointed a member on the recommendation of the employés, and Mr. John Seward, of Cobalt, Ont., on the recommendation of the Company. At the close of the month the Board had not been completed by the appointment of a third member.

In the December number of the *Labour Gazette* reference has been made to an application of the employés of the Crow's Nest Pass Coal Company, of Fernie, B.C., for the establishment of a Board of Conciliation and Investigation to which were referred for adjustment certain matters in dispute between the parties concerned.

A Board was established by the Minister in this matter, on November 7, being constituted as follows: Messrs. W. S. Lane, of Fernie, B.C., and Clement Stubbs, of Bellevue, Alta., appointed on the recommendation of the Company and of the employés, respectively, and Sheriff I. S. G. Van Wart, of Calgary, Alta., Chairman, appointed by the Minister, in the absence of any joint recommendation from the foregoing members of the Board.

Early in the month of February the Department was informed that proceedings in connection with the investigation of this dispute had been postponed at the request of both parties concerned, but that the Board was expected to assemble on February 7.

I.—REPORT OF BOARD OF CONCILIATION AND INVESTIGATION IN DISPUTE BETWEEN THE GRAND TRUNK PACIFIC RAILWAY COMPANY AND ITS MAINTENANCE-OF-WAY EMPLOYÉS.

ON January 7 the Minister of Labour received the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Grand Trunk Pacific Railway Company and its maintenance-of-way employés.

The dispute in question grew out of a demand on the part of the employés for increased rates of pay and a revision of the rules of the current schedule. The number of employés concerned in this dispute was given as 1,000.

The Board which was appointed to investigate this dispute was composed as follows: Mr. J. W. Dawsey, of Melville, Sask., member appointed on the recommendation of the Company; Mr. W. T. J. Lee, of Toronto, Ont., member appointed on the recommendation of the employés; and His Honour Judge D. McGibbon, of Brampton, Ont., Chairman, appointed on the joint recommendation of the foregoing members of the Board.

The Board met at Winnipeg, on October 3, 1910, and continued to hold sittings until the nineteenth of October, having in the meantime made an inspection of the roads and of the conditions under which the employés were working, by going over the road from Winnipeg to Edmonton. The Board afterwards adjourned and met in Toronto, on December 12, concluding its work of investigation on December 22.

The Board was unanimous in its findings with regard to all points at issue except the question of wages. Two schedules were submitted on this point, one recommended by the Chairman and Mr. W. T. J. Lee, representing the employés, and the other recommended by Mr. J. W. Dawsey, representing the Company.

On January 23, the Department was informed that the report of the Board was acceptable to the employés concerned.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

To
THE HONOURABLE
W. L. MACKENZIE KING, C.M.G.,
Minister of Labour,
Ottawa.

In the matter of a dispute between the Grand Trunk Pacific Railway Company and its permanent maintenance-of-way employés.

The Board of Conciliation appointed under the Act in this matter have the honour to report as follows:—

The Board met at Winnipeg, on the third day of October, 1910, and from the tenth to the ninetenth days of October, 1910, inclusive, having in the meantime made an inspection of the conditions of the road and of the conditions under which the employés were working by, going over the road from Winnipeg to Edmonton.

The Board afterwards adjourned and met in Toronto, on the twelfth of December, and continued in session up to and including the twenty-second day of December, 1910.

The members of the Board have been able to agree upon all the articles of the following schedule except the rates of pay.

The following rules will govern the employés of the Grand Trunk Pacific Railway, as set out further in section one thereof.

When additional positions of a like class are created, compensation will be fixed in conformity with that of similar positions as shown by this schedule.

This schedule will become and be effective as of the first day of December, 1910, and will not be changed unless on sixty days' notice by either party given between the first day of May and the first day of November of any year.

These rules will not take away any privileges that are now in effect with employés.

The schedule of rates marked "A" and attached hereto are the rates offered by the representative of the Company, and which he considers fair.

The schedule of rates marked "B" and attached hereto are the rates which the representative of the employés believes should exist and be paid by the Company, and which he considers fair.

The Chairman concurs in the position and rates as recommended by the representative of the men, feeling that from the evidence adduced before the Board that there should be an increase in the rates recommended by the Company's representative.

SEC. 1.—By permanent maintenance-of-way employés is meant employés who take their orders from the Road Masters and Bridge and Building Masters, and who have been in the maintenance-of-way service continuously for nine months or more, or who have had nine months' cumulative service during the two years immediately preceding, and same will hereinafter be referred to as employés. Labourers in extra gangs, unless those practically engaged all the year round will not be ranked as permanent employés.

SEC. 2—Ten hours shall constitute a day's work, excepting for track and bridge watchmen, signal men (except when employed as telegraph operators), pumpmen and pump repairers. When required to work in excess of these hours, time will be allowed for such excess at the rate of time and a half. Time and a half will be allowed on Sundays, Christmas Day and New Year's Day. Employés called for duty after having been relieved at 6.00 P.M., shall receive a minimum of four hours, and shall not be required to suspend work in schedule working hours to equalize overtime.

(*a*) Twelve hours will constitute a day's work for bridge watchmen, signal men, pump men and pump repairers. When required to work more than twelve hours, straight time will be allowed.

(*b*) In emergencies, employés will not be required to work more than twenty-

four hours continuously without a rest of eight hours.

(*c*) Employés detained when travelling on orders of the Company after regular working hours will be allowed straight time except when provided with boarding and sleeping cars.

(*d*) Foremen will be allowed straight time for wet days, provided they remain on duty.

(*e*) When the Company's interests do not suffer thereby, employés will be allowed, at their request, to quit work on Saturday during the summer months at 12.00 M. If required to work after these hours, overtime will not begin until 6.00 P.M.

(*f*) Employés transferred by the Company to construction work will not lose their seniority standing as employés.

SEC. 3.—Employés will be promoted hereafter on their respective Superintendent's division, in order of seniority, provided they are qualified. All employés shall be advised of vacancies or of any new appointments that may occur in the department in which they are employed, and their applications, if presented within ten days, will be considered. Employés may be transferred from one division to another for extra gang work, or on the opening of new lines, or when the necessary qualified men for maintenance-of-way work are not obtainable on the division.

(*a*) Employés refusing promotion become junior to employés accepting such promotion.

(*b*) An employé who is transferred to another department at his own request, or is transferred from the bridge and building department to the Road Master's department, or vice versa, will lose his seniority standing, but an employé transferred without his consent shall have the right of appeal.

(*c*) Employés leaving the service of the Company when their services are required, in the event of re-employment will rank as new men.

(*d*) A list of all employés will be prepared for each Superintendent's division, and such list will show seniority standing of each employé. The list will be revised from time to time to agree with length of service and promotions made and a copy will be furnished representatives of employés. They will be open for correction on proper representation by the employé to the head of his department.

(*e*) In the event of reduction in the number of men employed, those longest in service shall have preference of employment.

(*f*) The positions of track and bridge watchmen and signal men at crossings not interlocked are not subject to the general rules for promotion, being intended to take care of men who become unfit for other service.

SEC. 4.—No employé shall be suspended (except for investigation), or discharged, until his case has been investigated and he has been proven guilty of the offence charged, the decision in such case to be arrived at within ten days from date of suspension. If an employé be found blameless, he will be reinstated and paid at schedule wages for time lost, and will be reimbursed reasonable expenses, if away from home in such case. If detained more than ten days at Company's instance, awaiting decision, he will be paid schedule wages for all time lost in excess of ten days, regardless of decision reached. An employé may have the assistance of another employé during investigation, should he so desire.

A written statement setting forth the result of investigation and the reasons therefor, will, if requested, be furnished by the Company to the employé or employés affected.

(*a*) Should an employé at any time consider himself unjustly treated for any cause whatsoever, he shall be entitled to a fair and impartial investigation within thirty days from date of complaint by him to his superior officer, and a decision shall be given him in writing within ten days thereafter.

SEC. 5.—Leave of absence and free transportation will be granted to employés who are witnesses and members of duly appointed committees for the adjustment of matters in dispute between the Company and the employés within ten days after request in writing has been made on the proper officer.

SEC. 6.—Employés taken off their

regular sections temporarily to work on snow or tie trains, or other work, will be compensated for the boarding and lodging expenses they necessarily incur.

(*a*) Bridge and building employés taken from their place of residence or boarding outfits will be compensated for the extra expense they necessarily incur, not to exceed $1 per day.

(*b*) Section foremen or any other foremen taken from their gang for any reason for one or more days will be relieved of the duties of foremen during their absence, and the relieving foremen will be paid the rate of the foreman he relieves during the absence of the regular foreman, and be held responsible during the absence of the regular foreman.

(*c*) That a regular section foreman having his gang increased to over twenty men for fourteen days or over shall receive extra gang foreman's rates.

SEC. 7.—Employés required to attend and light semaphore and switch lamps will receive schedule rate of section men. When lamps are located at more than half a mile from the station, they will be attended to in regular working hours. Employés required to walk track or attend lamps on Sunday will be paid at the regular rate and one-quarter for the time so engaged. A suitable place will be provided for tending to all lamps.

SEC. 8.—The Company will keep the section house in good repair; the cost of repairs other than ordinary wear and tear will be charged to occupants. Regular section houses shall be for the use of section foremen and their families only.

(*a*) Where water is transported for use of section gang, good water will be provided. Where water is not supplied by the Company it will be procured on the Company's time.

(*b*) Employés shall not be required to do scavenger work, except such as pertains to their quarters and at such stations as cannot otherwise be taken care of.

(*c*) The Company will provide suitable houses for pumpmen; until such houses are provided pumpmen shall receive $5 extra per month.

SEC. 9.—The employés will be granted leave of absence when consistent with the carrying on of their work and be given transportation in accordance with the current pass regulations.

(*a*) As far as practicable, employés will be afforded the opportunity of visiting their place of residence, and furnished transportation when requested from proper authority, and when it will not interfere with the Company's business.

(*b*) Employés will be granted free transportation and leave of absence to attend their meetings, but such free transportation will not extend over more than 300 miles, and leave of absence will not exceed two days, and will only be granted when it will not interfere with the service and when the Company will not be put to any expense thereby.

SEC. 10.—All bridge and building employés in the service of the Company at the date of this schedule becoming effective shall rank as permanent employés.

SCHEDULE "A".

RATES OF PAY.

Trackmen:	
Sect. Foreman at all points	$75.00 per month.
Asst. Sect. Foreman in yards	2.55 per day
Sect. men in all first and second class yards	1.75 "
Sect. men at all other points	1.70 "
Foreman of extra gangs	$2.55–3.55 "
1st Asst. Foreman, extra gangs	2.65 "
2nd Asst. Foreman, extra gangs	2.55 "
Snow plough foreman and flanger foreman when called for duty	.33 per hour
Employés working in snow plough or flanger when called for duty	.17½ per hour
Signal men at level crossings	1.50 per day.

Bridge and building men:	
Yard and Shop Foreman	$ 3.50–$3.55 per day.
Asst. Yard Foremen	2.75 per day.
Foremen Carpenters	.40 per hour.
Carpenters	.25–.35 per hour.
Bridgemen	2.25–2.90 per day
B. & B. Labourers	1.75 per day
Bridge Watchmen	55.00 per month.
Foremen Painters	3.50–4.00 per day
Painters	2.50–3.00 per day.
Pump Repairers	85.00–100.00 mo.
Pumpmen (1, 2 or 3 pumps)	50.00–65.00 "
Single pumps where two men are employed	50.00 per mo.

NOTE.—Foremen charged no rent, and fuel with stoves for all purposes furnished free when occupying combination stations.

SCHEDULE "B".

RATES OF PAY.

Trackmen:	
Sect. Foremen at Westfort, Transcona, Edmonton & Melville	$3.20 per day.

Sect. Foremen at Rivers, Watrous, Biggar & Wainwright	3.00	"
Sect. Foremen at all other points	2.88	"
Asst. Sect. Foremen in yards	2.88	"
Sect. men in all first and second class yards	2.00	"
Sect. men at all other points	1.90	"
Foremen of extra gangs	3.55–3.95	per day.
1st Asst. Foremen extra gangs	2.85	"
2nd Asst. Foremen, extra gangs	2.75	"
Snow plough foremen and flanger foremen when called for duty	.43	per hr., expenses additional.
Employés working in snow plough or flanger when called for duty	.25	per hour, expenses additional.
Signal men at level crossings	1.65	per day.

Bridge and building men:

Yard and Shop Foremen	$4.15	per day.
Asst. Yard Foremen	3.15	"
Foremen Carpenters	4.00	"
Carpenters	3.00–3.50	per day.
Bridgemen	2.40–3.00	per day
B. & B. Labourers	2.05	per day.
Bridge Watchmen	60.00	per month.
Foremen Painters	4.00	per day
Painters	2.75–3.15	per day.
Pump Repairers	93.00	per month and expenses, while away from headquarters not to exceed $1.00 per day.
Pumpmen (1 pump)	$55.00	per month.
Pumpmen (2 pumps)	65.00	"
Pumpmen (3 pumps)	72.50	"
Single pumps where two men are employed	60.00	"

REVIEW OF PARLIAMENTARY PROCEEDINGS AFFECTING LABOUR DURING JANUARY, 1911.

IN the December number of the *Labour Gazette* reference has been made to the introduction in the House of Commons by Mr. Alphonse Verville (Maisonneuve) of a Bill respecting Hours of Labour on Public Works. This Bill was somewhat similar in its terms to one introduced by Mr. Verville in the House of Commons in the session of 1909-10, and referred during that session to a special Committee which was favoured with the views and suggestions of a number of witnesses, representing employers and employés respectively.

In moving the second reading of the Bill on December 15, Mr. Verville explained that it was his intention to propose in Committee of the Whole certain amendments thereto. Mr. Verville added that he was not so much concerned in the classes of works to which this law should apply at the outset as he was to secure the adoption of the eight-hour principle, which could later be extended to other industries. The Bill was thereupon read a second time and was considered in Committee of the Whole House on the same evening, when Mr. Verville outlined the scope of the amendments which it was his intention to offer.

During the Christmas vacation the Bill was reprinted as proposed to be amended in Committee of the Whole House, and was considered in Committee of the Whole on January 11 and January 15 respectively. The Bill passed Committee stage with certain amendments on January 15, and at the close of January stood for third reading.

Technical Education Commission.

In reply to an inquiry by Mr. George Taylor (Leeds) in the House of Commons on January 16, the Minister of Labour stated that it was expected that the Royal Commission on Industrial Training and Technical Education would present its report before the end of the present year. The Minister further stated that the Commission would first complete its inquiry in Canada and afterwards proceed to Great Britain, Europe, and the United States, where a study would be made of the systems and methods of technical education obtaining in these countries. The Commission would probably hold sessions in a few of the principal centres of Canada before completing its report.

Grand Trunk Railway Trainmen's Dispute.

On January 11 a return was made to the House of Commons on motion of

Mr. Northrup (East Hastings), comprising "copy of the agreement of settlement of the late strike between the Grand Trunk Railway Company and the conductors and brakemen, and all of correspondence, documents and papers relating thereto, or in consequence thereof, between the said parties, or between either and any person or persons authorized or professing to act for either, or between the Government or any Minister or Deputy Minister or other person on its behalf, and said parties, or either of them, or any person authorized or professing to act for them or either of them before, during or since said strike."

On February 2 a further return was made to the House of Commons on motion of Mr. Northrup, comprising copies of all correspondence, documents, etc., in relation to the above mentioned strike since November 29; also all papers relating to the reinstatement of men who had been on strike, and the appointment of His Honour Judge Barron by the Grand Trunk Railway Company to investigate the claims of former employés of this Company to reinstatement.

Springhill Strike.

On January 11 a return was made to the House of Commons on motion of Mr. Rhodes (Cumberland), comprising copies of all correspondence, reports, documents and papers relating to the strike of the employés of the Cumberland Railway and Coal Company, Limited, of Springhill, N. S., subsequent to January 14, 1910.

In the House of Commons, on January 30, inquiry was made by Mr. Blain (Peel) as to the present position of the strike at Springhill, N.S. In reply the Minister of Labour stated that the strike still continued although operations at the mines had been resumed. At the request of the local authorities some thirty members of the permanent corps were stationed in Springhill to assist in maintaining order.

The Explosives Act.

On January 11 the House approved of a resolution of the Minister of Mines declaring that it is expedient to regulate the manufacture, importation, storage, handling, testing and use of explosive material of every description. In a brief statement to the House with respect to this resolution, the Minister of Mines explained that there is in Canada at present no law regulating the manufacture of explosives. The increasing number of accidents from the use of explosives in Canada had, however, shown the need for legislation on this subject.

Continuing, the Minister said:—

"To demonstrate the necessity for a Bill of this kind, I will mention a number of accidents resulting from explosives during the last year, and some of which would in all probability have been, if not altogether obviated, considerably minimized in their results, had legislation such as that now proposed been in force. In British Columbia in March last, an explosion occurred on Bowen Island, resulting in five deaths. The accident occurred from using iron nails in packing dynamite and under strict regulations that practice would have been prohibited.

"On the National Transcontinental railway, in July last, 400 pounds of dynamite exploded near La Tuque, resulting in five deaths, and five or six persons being seriously injured. The statement was made at the time, that the workmen were endeavouring to open a can of powder with an axe, when it exploded and set off a long train of powder and dynamite. By the regulations to be provided under this legislation, the opening of cans of explosives with an axe or other iron implement will be prohibited.

"In May last, at Departure Bay near Nanaimo, an explosion resulted in five deaths, I think every workman in the factory at the time was killed. A quantity of nitro-glycerine and acid was being brought from the main building into the separator when the latter building blew up, killing all the men in the vicinity. The conditions which existed in this factory at the time would not have been permitted, under strict regulations.

"At Sand Point, in July last, there was an explosion in a powder factory, which resulted in three deaths and five being seriously injured. No precaution had

been taken in this factory to allow sufficient space between the factory buildings and under the proposed regulations it would not have been allowed to operate. Under the regulations contemplated, these factories will be licensed and the buildings must be erected with a view to their distance from roads and dwelling houses, as well as to the distance between the buildings. I have here a photograph of the Sand Point factory, and it shows six to eight buildings huddled together, all within two or three feet of each other. Such would not have been permitted in any country where there was a law regulating the manufacture of explosives. Last summer a very serious accident occurred in the Hull factory, by which eight persons were killed and some twenty or thirty seriously injured. Under such regulations as we propose to make, this factory would not have been permitted to operate. We provide in this Bill that applications for factory or magazine licenses shall be made in such form and manner as may be prescribed by regulation, and the application shall be accompanied by:—(a) a plan drawn to scale of the proposed factory or magazine, and of the lands and any buildings adjacent thereto, with the exact distance between the several buildings marked thereon.

"At the inquest held on persons killed by this explosion it was given in evidence that there was only a distance of 42 feet between the storehouse and the house in which the detonators were kept and only 15 feet between the latter and the magazine and the mixing house. Regulations governing distances between dangerous buildings will be issued under the proposed Bill, which will bring into force what is known in Great Britain as the distance tabels. These tables show the distance which must be maintained between danger buildings in all factories. During a period of thirty years, since the introduction of this distance table in Great Britain, no member of the general public has been killed, and no dwelling house has sustained any serious structural damage by an explosion in any factory to which these distances apply. The Bill is a very short one. Under it authority is taken to make regulations.

"The Bill has been prepared upon the recommendations of Captain Desborough, the Chief Inspector of explosives for Great Britain, who was invited by the Department of Mines to come to Canada to investigate the conditions here. He visited all the establishments for the manufacture of explosives in Canada. The Bill is very largely based on the English Act, which has been found to work very satisfactorily during the last thirty years, and we believe that under it the number of fatalities from explosives, where they are manufactured as well as where they are used on public works and in mines, will be very greatly reduced."

A Bill No. 79, based on the foregoing resolution, was introduced by the Minister of Mines on January 11, entitled: *An Act to regulate the manufacture, storage and importation of Explosives.*

In answer to a question in the House of Commons by Mr. Middleboro (North Grey) on January 25, the Minister of Mines stated that there were twenty-three factories in Canada in which explosives are manufactured. The Department was informed that at least twenty-five persons were killed by explosions in four of these plants in 1910.

AN ACT TO PROHIBIT THE IMPROPER USE OF OPIUM AND OTHER DRUGS.

IN the December number of the *Labour Gazette* reference has been made to the introduction by the Minister of Labour in the House of Commons on November 30, of a Bill to prohibit the importation, manufacture, sale or use of opium for other than scientific or medicinal purposes. As a result of further investigation by the Minister, the scope of this legislation was subsequently enlarged so as to comprehend a prohibition of the improper use of opium, morphine and cocaine, and to empower the Governor-in-Council to prohibit any alkaloid,

derivative or preparation of the foregoing. The Bill in this latter form was preceded by the adoption on January 19, in Committee of the Whole of the following resolutions:

Resolved, That it is expedient, in connection with Bill 22 now before this House, to provide for the prohibition of the importation, manufacture, sale and use of Opium for other than scientific and medicinal purposes; to empower magistrates to grant warrants, to search for Opium in any place in which it is suspected that Opium may be found, and to authorize the destruction thereof; to provide penalties for violations of the Act; and to empower the Governor-in-Council to make such regulations as are necessary.

Resolved, That it is expedient to provide for the prohibition of the sale and use of Cocaine and Morphine for other than medicinal or scientific purposes.

A Bill No. 97, entitled: *An Act to prohibit the improper use of Opium and other drugs*, based on the foregoing resolutions, was accordingly introduced by the Minister in the House of Commons on January 19, the purpose of which is to forbid under severe penalties, the importation, manufacture, sale or use of opium, morphine, and cocaine for other than scientific or medicinal purposes.

By section 3, of this Bill, it is provided that every person who imports, manufactures, sells, or has in his possession opium, morphine, or cocaine for other than scientific or medicinal purposes is liable, on summary conviction, to a fine not exceeding five hundred dollars and costs, or to imprisonment for a term not exceeding one year, or to both fine and imprisonment. By section 4, it is declared unlawful to smoke opium or to have in one's possession opium which has been prepared for smoking, and any person who, without lawful and reasonable excuse, is found in any room or house used for opium smoking is also made liable to punishment.

The provisions of this Bill against opium smoking will not come into effect until the first of July next, but the Bill in other respects will become operative from the date of its enactment.

By section 5 of the Bill provision is made for the strict regulation of the sale of opium, morphine and cocaine by both wholesale and retail druggists. It is declared in this section that a record must be kept of all sales, and that in the case of retail druggists the drugs in question shall only be sold upon the authority of a written prescription or order of a physician, veterinary surgeon, or dentist, and that any druggist who fails to keep a proper record of sales or who, without proper authority, uses any prescription on more than one occasion is liable to prescribed penalties. It is also declared that any physician signing a prescription or order for the filling of which opium, morphine, or cocaine is required, unless these drugs are intended for medicinal purposes or for the treatment of the individual for whom they are prescribed, is liable to prescribed penalties. Section 6, forbids the export of opium, morphine, or cocaine to any country which prohibits the entry of these drugs. Sections 7, 8 and 9 authorize the issue of search warrants for the search of any premises on which it is suspected that any of these drugs may be concealed, and for their destruction by order of any magistrate. The Governor-in-Council is empowered to make necessary orders and regulations for the use or sale of opium, morphine, or cocaine for scientific purposes, also for carrying out the intention of the Act. By section 14 power is given to the Governor-in-Council to apply the prohibitions and regulations prescribed in this Act to any alkaloids, derivatives or preparations of opium, morphine, or cocaine as the Governor-in-Council may see fit. Chapter 50 of the Statutes of 1908, known as the Opium Act, is repealed, its purpose being more fully covered by the present Bill.

The Minister of Labour, in presenting the Bill for second reading, pointed out that the subject with which it dealt was one not alone of domestic but of international importance. In this connection reference was made to the resolutions in favour of the suppression of the opium habit and of the opium traffic which were adopted by an International Conference,

at which Canada was represented, in Shanghai in 1909. At this same conference a resolution was also adopted declaring that the unrestricted sale of morphine constituted a grave menace and urging upon all Governments that measures should be taken to control the manufacture, sale and distribution of this drug.

The Minister explained that as a result of the legislation adopted by the Parliament of Canada in 1908, the manufacture of opium in Canada has been completely suppressed. The importation of opium into Canada has, however, continued in spite of police vigilance. One of the objects of the present measure is to make more effective the regulations in this respect.

The prohibition of the importation, manufacture, sale and use of cocaine for other than scientific and medicinal purposes is based on representations which have been made to the Dominion Government from Montreal and elsewhere respecting the prevalence of the cocaine habit in certain centres and the deplorable results which have already attended the growth of this habit.

The Minister of Labour stated that he had received a letter from Mr. Archibald, Dominion Parole Officer, in which it was stated that twelve to fifteen per cent. of all the young persons with whom he came into contact in the penitentiaries of Canada attributed their downfall to drugs. Mr. Archibald added that if a complete census were made of the prisons he would not be greatly surprised if the actual percentage was found to exceed twenty-five per cent. The Minister referred also to a communication which he had received from the Chief of Police of Montreal in which it was stated that during the last six months the police of that city had made over 125 arrests of persons for selling or using cocaine. Recorder Dupuis, of Montreal, was quoted in the *Montreal Witness* as having asserted that the misuse of cocaine had become a social plague which had already spread to such an extent that it was time for society to take marked notice. Alcoholism and morphine were, in his opinion, nothing to cocaine. Judge Leet, of Montreal, was also quoted as of opinion that the improper sale of cocaine should be made a criminal offence. A great deal had appeared in the press of Montreal regarding the prevalence of the cocaine habit in that city, and it had also been stated in the Ottawa *Evening Journal* of July last that the cocaine habit had a grip on Ottawa. The Canadian Pharmaceutical Association, at its last annual meeting in September, had adopted a strong resolution urging upon the Federal Parliament the imperative necessity for legislation to prohibit or control the sale of all habit-forming drugs and narcotics throughout Canada. Mrs. Henderson, Probation Officer of the Children's Aid Society of Montreal, who had made a special study of the cocaine habit and who was entitled to the chief credit for the agitation against cocaine in Montreal, had informed the Minister of Labour that she had herself met as many as fifty or sixty little boys and girls within the same day all of whom had acquired the cocaine habit to some degree. Mrs. Henderson had also said that cocaine was distributed among school children in order to foster the habit among the boys and girls.

Continuing, the Minister observed that since it had become known that it was his intention to introduce a Bill relating to cocaine he had received, unsolicited, a large number of communications from Montreal expressing the hope that this measure would become law. In this connection the Minister alluded to communications which had been received from Mayor Guerin, of Montreal, His Grace the Archbishop of Montreal, the Anglican Bishop of Montreal, the Recorder of Montreal, the Protestant Ministerial Association of Montreal, the Baptist Ministerial Association of Montreal, the Montreal Congregational Council, the Baptist's Young People's Union of the Province of Quebec, the Clerical Association of Montreal, the Montreal Women's Club, the University Settlement of Montreal, Professor Welsh of the Montreal Protestant College, the Young Men's Christian Association of Montreal, the Dominion Alliance for the total suppression of the liquor traffic, the Pharmaceutical Association of the Province of Quebec, the

Royal College of Dental Surgeons of Ontario, and the Local Council of Women of London, Ont.

In moving the second reading the Minister emphasized the fact that in this legislation Canada was not merely helping herself but was also taking part in a world-wide movement which was engaging the attention of the Congress of the United States at the present time. The present Bill belonged to the same class as the Bill for the prohibition of the use of white phosphorus in the manufacture of matches, which he had had the privilege of introducing a few evenings before. The Minister stated that what was sought in legislation of this kind was the conservation of human life and of human well-being. A great deal had been said about the conservation of our natural resources. But natural resources were given to man for the use of man and not for the destruction of human life. The first of our natural resources are the health and welfare of our people, and it is to keep these intact and to help to build up in Canada a strong, a healthy, and a moral people, that the Government brought forward this legislation and believed that it would pass the House without any opposition.

Mr. Doherty (St. Anne's) expressed his hearty sympathy with the object of this legislation, which received second reading with the unanimous consent of the House. The measure was considered, clause by clause, in Committee of the Whole on the same day, several minor amendments being made therein as the result of suggestions offered by various members of the House. The Bill received third reading in the House of Commons on January 31.

AN ACT TO PROHIBIT THE MANUFACTURE AND IMPORTATION OF MATCHES MADE WITH WHITE PHOSPHORUS.

A BILL entitled: *An Act to prohibit the manufacture and importation of Matches made with White Phosphorus*, was introduced by the Minister of Labour in the House of Commons on November 24, to which reference has already been made in the December number of the *Labour Gazette*. It was subsequently decided that under the rules of the House of Commons the introduction of this measure should have been preceded by the adoption of a resolution in Committee of the Whole, respecting the expediency of such legislation. A resolution was accordingly submitted to the House of Commons, and was unanimously approved by that body on January 19. The resolution in question was in the following terms:—

"Resolved, That it is expedient, in connection with the Bill 10 now before this House, to provide for the prohibition of the manufacture and importation of matches made with white phosphorus; to empower the Commissioner of Patents on petition to fix terms for the use of any process patented at the time of the passing of this Act for the manufacture of matches without white phosphorus, other than matches intended to strike only on a surface specially prepared for the purpose; to provide for the inspection of any place where it is suspected that matches made with white phosphorus may be found; to examine any receptacle or place in which it is suspected that such mathces may be; to authorize the Governor in Council to make such orders and regulations as may be necessary; and to fix penalties for infractions of the Act."

In a statement of the House of Commons in support of the foregoing resolution on January 19, the Minister of Labour explained the scope of the proposed legislation for the prohibition of the use of white phosphorus in the manufacture of matches in Canada, also for the prohibition of the importation of matches made with white phosphorus. In doing so, the Minister outlined the reasons which had prompted the introduction of this resolution and the objects which it was hoped that the resulting legislation would accomplish.

The Minister explained at the outset that the proposed legislation was not

intended to embarrass any existing industry in Canada, but was aimed exclusively at the stamping out of a disease known as phosphorus necrosis or phosphorus poisioning, and sometimes referred to as "phossy jaw," which attended the use of white phosphorus in the match-making industry. This disease was one which had existed for a great many years in Europe, and one country after another had found it necessary to adopt legislation for the protection of those employed in the match-making industry.

The following description of this disease, said the Minister, had been given by Dr. Thomas Oliver, physician to the Royal Infirmary, Newcastle-upon-Tyne, in the course of a report to the British Government in 1899 on the use of phosphorus in the manufacture of lucifer matches: "The malady that is dreaded is phosphorus necrosis. The presence of decayed teeth predisposes a match maker to the disease, for the phosphorus fumes penetrate carious teeth and readily induce a periostits or acute inflammation of the covering of the jawbone. The gum becomes swollen, and both it and the jawbone painful. Sooner or later pus forms, and although the tooth, or the teeth, are extracted, the pain continues, but in a less severe form. The inflammation gradually extends to the bone, which undergoes a process of slow destruction. For months pus keeps oozing out into the mouth in minute quantities, some of which is swallowed, and tends to induce chronic toxæmia. By means of the use of antiseptic mouth washes the morbid process gradually ceases by a piece of dead bone being thrown off, or the decayed bone is removed by surgical operation, when the patient recovers with or without facial deformity."

The disease had also been recently made the subject of a very full and complete investigation in the United States by Mr. John J. Andrews, Secretary of the American Association for Labour Legislation.

The Minister explained that as a result of experiment a substance known as sesquisulphide of phosphorus was discovered by two French chemists, which was a safe and serviceable substitute for white phosphorus in the match-making industry. Sesquisulphide of phosphorus was accordingly adopted in France. The use of white phosphorus in match factories had already been discontinued in a number of other European countries, and in 1906 an International Conference was convened in Berne, Switzerland, in connection with which an International Convention was drawn up providing for the prohibition of the importation and manufacture of matches made with white phosphorus. The Convention in question was accepted at the outset by Germany, France, Holland, Switzerland, Denmark, Luxembourg and Italy. The British Government did not see its way clear to become a party to this agreement at the outset and adopted instead strict regulations with the object of preventing, if possible, the occurrence of phosphorus necrosis in the match factories of the United Kingdom. In 1908, however, the British Government, finding these regulations insufficient, gave its adherence to the Convention, and adopted effective legislation to this end. Since that time the following British possessions had also adhered to the Convention:— The Orange River Colony, Cyprus, British East Africa, Gibraltar, Malta, Mauritius, Scychelles, Southern Nigeria, Leeward Islands and Fiji; also the following French possessions: The Somali coast, Reunion, Madagascar, Madagascar and its dependencies, the French settlements in Oceania and New Caledonia, Tunis and the Netherlands Indies.

On December 6 last, the President of the United States sent a message to Congress in which he said: "I invite attention to the very serious injury caused to all those who are engaged in the manufacture of phosphorus matches. The diseases incident to this are frightful, and as matches can be made from other materials entirely innocuous, I believe that the injurious manufacture could be discouraged and ought to be discouraged by the imposition of a heavy federal tax. I recommend the adoption of this method of stamping out a very serious abuse."

Legislation to this end, said the

Minister, has accordingly been introduced in the United States House of Representatives and is now under consideration by that body. Prior to the presentation to Congress of the President's message above referred to an investigation was made into the subject of the use of white phosphorus in the match factories of that country by the Committee on Interstate and Foreign Commerce of the House of Representatives. In connection therewith a letter was written on March 15, 1909, by O. C. Barber, Vice-President of the Diamond Match Company, which controls the patent for the use of sesquisulphide of phosphorus in the United States, stating that that Company was willing to permit the use of sesquisulphide in the manufacture of matches by other manufacturers on equal terms with the Diamond Match Company itself.

On learning of this communication the Minister of Labour addressed a communication to the President of the Diamond Match Company to ascertain whether the latter would be willing to grant the use of sesquisulphide of phosphorus to match manufacturing firms in Canada on as liberal terms as have been offered in the United States, the patent for this substance in Canada being controlled by the Diamond Match Company. In his reply, under date of January 11, 1911, Mr. Edward R. Stettinius, President of the Diamond Match Company, said:—

"The fourth section of the English White Phosphorus Act provides that any person who is manufacturing or proposing to manufacture matches may present a petition to the Board of Trade praying for the grant of a compulsory license, etc. So far as we, as owners of the Canadian patent are concerned, we would be quite satisfied with a similar proivsion in the Canadian law."

Since the receipt of the foregoing, the Minister had also received a letter from the Secretary of the American Association for Labour Legislation containing the information that the Diamond Match Company had assigned its patent for the use of sesquisulphide to three trustees, namely: Prof. E. R. A. Seligman, of Columbia University, Commissioner Chas. P. Neill, of the United States Bureau of Labour, and Attorney Jackson Ralston, attorney for the American Federation of Labour, Washington, D.C., with full power to deal with future applicants for the patented formula on any basis that they think proper.

Continuing, the Minister of Labour explained the circumstances under which the British manufacturers of matches had themselves appealed to the Home Office to adopt legislation for the prohibition of the use of white phosphorus in that industry, and in this connection referred briefly to the debates in the English Parliament on the adoption of the White Phosphorus Matches Prohibition Act, 1908.

When Great Britain became a party to the Berne Convention above referred to a communication was addressed by the Secretary of State for the Colonies to the Governor-General of the Dominion, informing him of that fact and inquiring whether the Canadian Government would desire to join the United Kingdom in this matter. A further despatch from the Colonial Office on the same subject was received in August of last year.

Following the receipt of these communications of the British Colonial Office respecting the adhesion or non-adhesion of Canada to the International Convention letters were addressed by the Deputy Minister of Labour to the various Provinces to ascertain whether any legislation for the protection of workers in match factories existed in this country already; also to ascertain the extent of the match-making industry and the grounds which might exist for the adoption of any legislation on this subject. It was learned in this way that no such legislation exists in Canada, and that there are match factories in operation at Hull, Que., at Hampton, N. B., at Halifax, N. S., and one other in the Province of Quebec, whilst a factory is also beginning business in the Province of Onrtaio. It was also learned that white phosphorous is used in the manufacture of matches in all these factories.

As the result of inquiries by officers

of the Department of Labour it was discovered that a number of cases of white phosphorus poisoning have occurred in this country and that some of these cases are under treatment at the present time. The Minister referred, without mentioning names, to three deaths from phosphorus poisoning which occurred during the past year, and cited also six cases of phosphorus poisoning existing at the present time but which have not proved fatal. In dealing with this phase of the subject, the Minister said:—

"It is not a pleasant task to bring facts of this kind before the House, but I must say that when I came back from attending the conference at which this subject was being discussed these facts were put before me, and I felt that I would certainly be negligent in the duty that I owed to this country if I hesitated to bring into Parliament for the sake of concealing facts of this kind similar legislation to that which has been enacted in Great Britain. We talk a great deal in these days about the conservation of natural resources, but I think that more important than the conservation of natural resources is the conservation of human resources, the conservation of human health and of human life. Resources are well enough; our lumber, timber, ore and minerals were all given to us for a great purpose, but they were given for the preservation and not the destruction of life. So the Department of Labour has taken as one of the objects that is before it, as part of the work which I trust it will be able to carry on through the years to come, this important question of the conservation of human life, the protection of working people and the great mass of the people of this country from occupational or other diseases which help to undermine the strength of the nation. I think that every member of this House believes that if this country is to be what we wish it to be, a country of happy, contented people, we must make of it a country possessed of a strong, a healthy and a powerful people."

The debate on the resolution of the Minister of Labour above referred to was participated in by several members of the House, the resolution itself being adopted without division on January 19. A Bill No. 96, entitled: *An Act to prohibit the manufacture and importation of matches made with White Phosphorus*, was introduced in the House on the same day and read the first time. The Bill in question is similar in its terms to the White Phosphorus Matches Prohibition Act, 1908, of the British Parliament.

ROYAL COMMISSION ON INDUSTRIAL TRAINING AND TECHNICAL EDUCATION. PROCEEDINGS DURING JANUARY, 1911.

THE Royal Commission on Industrial Training and Technical Education spent the early part of January in Ottawa, where the evidence already taken in Canada was digested, so far as time permitted, special sections being allotted to different members of the Commission.

Friday and Saturday, January 20 and 21, were spent in Toronto. On the twentieth some of the public schools and night classes were visited, and also the normal and model schools and Jarvis Street Collegiate Institute, Chairman Robertson and Commissioner Simpson speaking at the latter. On the twenty-first a Session was held, when evidence was given by representative educationists.

On January 23 and 24 at Sault Ste. Marie, Ont., the public and high schools were inspected; a public luncheon was tendered to the Commission; the steel plant and pulp mill were visited; three sessions were held for taking evidence, and a public evening meeting was held, addressed by Chairman Robertson and Commissioner Armstrong.

January 26 to February 4 were spent in Montreal and neighbourhood, the chief industries being visited, as well as the principal educational institutions, including McGill and Laval Universities, the Polytechnic, the Provincial Ecole

Technique, the Commercial and Technical High School, the evening classes of the Council of Arts and Manufactures, the Mount St. Louis Academy, the Royal Victoria College for Women, the Peel Street High School, &c.

Sessions for the taking of evidence in French and English were held, both day and evening during the week beginning January 30. The Commission received the most hearty reception in every quarter, being entertained at luncheon or dinner by the Principal and faculty of McGill University, the President and Board of the Polytechnic, and Ecole Technique, and by the Manufacturers' Association, also having luncheon at the Sherwin-Williams Paint Company, which provides meals for its employés at special rates.

The following is the itinerary for the remainder of February:

Three Rivers, Que.	Feb. 6
Grand Mere and Shawinigan Falls	" 7
Quebec City	" 8–9
Joliette	" 10
Sorel	" 11
St. Hyacinthe	" 13
Victoriaville and Arthabaskaville	" 14
Sherbrooke	" 15
Ottawa and Hull	Feb. 20–22

The Commission will afterwards go to Europe.

FIRST ANNUAL REPORT OF THE DOMINION COAL COMPANY EMPLOYÉS' BENEFIT SOCIETY.

THE first report of the Directors of the Dominion Coal Company Employés' Benefit Society covers the half year ending December 31, 1910, being the period during which the Society has been in active operation.

Origin of the Society.

The report contains the following statement with reference to the origin of the Society:

"In this connection it seems desirable that some mention should be made of the circumstances which led up to the formation of the Society. Benefit Societies have been in operation at the Works of the Company for the past fifteen years. These Societies had an independent existence, and at the first the by-laws were similar, but were changed by the different Societies, and at the end of 1909 there were nine Societies and no two of them had the same by-laws. Early this year it was felt that the time had come when the Societies should be amalgamated and enlarged so as to take in all employés of the Dominion Coal Company, and also that the dues from workmen should be increased and that the Company be asked to contribute a larger amount than heretofore. The workmen agreed to increase their dues to fifty cents per month per man and the Company agreed to give an amount equal to the workmen. This has enabled the Society to adopt a schedule of Benefits which are much more adequate than those formerly paid and bear comparison with any other Colliery Benefit Society in existence."

Operations of the Society.

On July 1, the aggregate of the balances at the credit of the various Benefit Societies previously existing was $46,400-66. A careful computation of the liabilities which the Society had undertaken through the operation of their several constitutions and by-laws, indicated that under normal conditions these aggregate assets would be more than sufficient to liquidate these liabilities, and as the interest of the Society and the Company in any balance that might exist after such liquidation would be in the proportion of two to one; in order to eliminate this disproportion and to place the reserve funds of the Society in the best possible position, the Company paid in the sum of $21,000.00. By this payment the aggregate assets of the Society were raised to $67,400.66, which sum, together with a sufficient amount which will be available from the Government grant for the year, was set aside at a meeting of the

Directors held ont November 14, 1910, as a reserve to insure stipulated payment to widows and children of $50,000, and for old age and disability fund of $25,000.

During the half year ending December 31, 1910, the total number of claims paid	1,490
Number of persons paid weekly indemnity	683
Number of widows paid	48
Number of children paid	194
Number of death claims paid	31

The officers of the Society are as follows:—

M. J. BUTLER, C.M.G., *President.*
ALFRED BOWERS, *First Vice-President.*
F. W. GRAY, *Second Vice-President.*
MICHAEL MCNEIL, *Third Vice-President.*
F. W. ARMSTRONG, *Treasurer.*

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF JANUARY, 1911.

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals, which have received the signatures of both parties, together with the fair wages' schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Railways and Canals.

RAILWAY FROM MIDWAY TO MERRITT, B.C.

For the construction of a line of railway from Midway to a junction near Merritt, with the Nicola, Kamloops and Similkameen Railway; not exceeding 250 miles. Date of subsidy agreement, January 27, 1911; amount of subsidy, $3,200 per mile, not exceeding $6,400 per mile; railway company, The Kettle River Valley Railway Company.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use of hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

Notes.

The Royal Commission appointed to investigate conditions in connection with Chinese immigration into Canada held several sessions at Vancouver, B. C., at which evidence of an important nature was taken. A statement showing the number of Chinamen who have paid the toll since 1904 was put in. The amount of money paid amounted to $1,727,500, which represented 2,455 Chinamen, whose arrivals were spread out as follows: 1904, 4; 1905, 8; 1906, 50; 1907, 745; 1908, 893; 1909, 469; 1910, to date 1,286.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JANUARY, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furinshing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 283 individual work people in anada during the month of January, 911, were reported to the Department of Labour. Of these 82 were fatal and 201 resulted in serious injuries. In addition one fatal accident was reported as having taken place prior to the beginning of the month, information not having been received by the Department before January, 1911.

In the preceding month there were 154 fatal and 197 non-fatal accidents reported, a total of 351, and in January, 1910, there were 87 fatal and 184 non-fatal accidents, a total of 271. The number of fatal accidents reported in January 1911 was, therefore, seventy-two less than in the preceding month, and five

less than in January, 1910. The number of non-fatal accidents reported in January, 1911 were four more than in the preceding month and seventeen more than in January, 1910. Altogether there were sixty-eight less industrial accidents reported in January, 1911, than in the preceding month, and twelve more than in the same month of the preceding year.

STATEMENT OF ACCIDENTS DURING JANUARY, 1911, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture	16	20	36
Fishing and hunting	3	.....	3
Lumbering	3	19	22
Mining	17	8	25
Building trades	4	15	19
Metal trades	6	35	41

Printing and allied trades	.....	2	2
Textile trades	2	3	5
Leather trades	.....	2	2
Food and tobacco preparation	2	8	10
Railway service	20	29	49
Navigation	2	.....	2
General transport	1	14	15
Civic employés	.....	5	5
Miscellaneous	2	8	10
Unskilled labour	4	20	24
Total	82	201	283

Nature of Fatalities and Accidents.

The accidents of the month involving more than one fatality were: The death of two commercial travellers in a rear end collision at Macoun, Sask., on January 21; the death of eight miners by an explosion of gas at Florence, N.S., on January 3; the death of four miners at Mechepecoten by a premature explosion of dynamite; and the death of six construction hands at Prince Rupert B.C., on January 12 by an explosion of dynamite.

Record by Industries and Groups of Trades.

Agriculture.—In this industry there were eighteen fatal and twenty non-fatal accidents reported during January, compared with twenty-seven fatal and fifteen non-fatal in the preceding month and nineteen fatal and twenty-one non-fatal in the corresponding month of 1910. Of the fatal accidents, four were caused by falls; four by live stock; four by exposure; two by falling trees; two by trains; and one each by machinery and a snowslide. Of the non-fatal six were caused by falls; three were received from machinery; four from live stock; three from runaways; two while chopping wood, and one each by a street car and flying material.

Fishing and hunting.—Three fatalities were recorded in January, compared with four in December and two non-fatal accidents in January, 1910.

Lumbering.—During the month there were three fatal and nineteen non-fatal accidents, compared with seven fatal and twelve non-fatal in the preceding month and eleven fatal and seven non-fatal in the corresponding month of 1910. Two of the fatal accidents were caused by falling on revolving saws and one by a falling tree. Of the non-fatal, ten were caused by falling trees; four by revolving saws, and one each by exposure, logging chain, axe, fall of pile of pulpwood and fall of staging.

Mining.—During the month there were seventeen fatal and eight non-fatal accidents, compared with four fatal and fourteen non-fatal in the preceding month and eleven fatal and nine non-fatal in the corresponding month of 1910. Of the fatal accidents, eight were caused by explosion of gases, six by premature explosions, two by blasted rock and one by falling material. Of the non-fatal, three were cuased by premature explosions, and one each by falling rock, fall down shaft, coupling cars, fall of coal and working in mine.

Building trades.—There were four fatal and fifteen non-fatal accidents during January, compared with five fatal and seventeen non-fatal in the preceding month and two fatal and nine non-fatal in the corresponding month of 1910. Three of the fatalities were caused by falls and one to an explosion of a gasoline lamp. Of the non-fatal accidents, eleven were caused by falls, two by falling material, and one each by live wire and an explosion of a gasoline stove.

Metal trades.—During January there were six fatal and thirty-five non-fatal accidents, compared with ten fatal and

STATISTICAL TABLE, SERIES F. No. 89.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF JANUARY, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	Rodney, Ont.	Jan. 7	1	Caught in thresher.
"	Preston, Ont.	" 9	1	By a fall.
"	Stewart, B.C.	" 10	2	Exposure.
"	Arnprior, Ont.	" 13	1	Run over by train at crossing.
"	Lindsay, Ont.	" 10	1	Gored by a cow.
"	Midgic, N.B.	" 16	1	Fell from load of hay.
"	Poplar Lake, Alta.	" 16	1	Kicked by a colt.
"	Maidstone Township, Ont.	" 23	1	Fell from load of tobacco.
"	St. Laurent, Que.	" 23	1	Kicked by a horse.
"	McKay's Crossing, N.S.	" 25	1	Run over by train.
"	St. Anne de Bellevue, Que.	" 26	1	Fell from roof of house.
"	Aldborough, near Glencoe, Ont.	" 31	1	Tree fell on him.
"	Regina, Sask.	" 31	1	Frozen to death.
"	Near Staples, Ont.	" 29	1	Mangled by swine, in fainting fit.
"	L'Avenir, Que.	" 28	1	Tree fell on him.
Farmer's wife	North Portal, Sask.	" 6	1	Frozen to death tending cattle.
Farmer's son	North Portal, Sask.	" 6	1	Frozen to death tending cattle.
Caretaker on farm	Silverton, B.C.	" 11	1	By snowslide.
Fishing and hunting—				
Fishermen	Tangier, N.S.	" 2	2	Drowned.
Trapper	Cobalt, Ont.	" 1	1	Devoured by wolves.
Lumbering—				
Logger	Barrming, Ont.	" 6	1	By falling tree.
Sawyer	Winnipeg, Man.	" 12	1	Fell on revolving saw.
Saw mill hand	Birch River, Man.	" 10	1	Fell on saw.
Mining—				
Miners	Florence, N.S.	" 3	8	By explosion of gas.
"	Craigmont, Ont.	" 2	1	By explosion of dynamite.
"	Porcupine, Ont.	" 21	1	By explosion of dynamite.
"	Mechepecoten	" 24	4	Premature explosion of dynamite.
Smelter	Sydney, N.S.	" 18	1	By falling material.
Quarryman	Renfrew, Ont.	" 2	1	Explosion of blast.
"	Montreal, Que.	" 18	1	Struck by piece of rock.
Building trades—				
Carpenter	Montreal, Que.	" 6	1	Fell eight storys.
"	Ottawa, Ont.	" 4	1	Died from effect of fall.
"	St. John, N.B.	" 17	1	Fell from warehouse.
Pumber	Montreal, Que.	" 10	1	Died from effects of gasoline stove explosion.
Metal, engineering and shipbuilding trades—				
Machinist	Toronto, Ont.	" 16	1	Fell down elevator shaft.
"	Toronto, Ont.	" 9	1	Fell 30 feet.
"	Walkerville, Ont.	" 20	1	By revolving drill.
Electrician	Nanaimo, B.C.	" 16	1	Caught by motor.
Structural iron worker	Florenceville, N.B.	" 17	1	Fell 36 feet from bridge.
Lineman	Westville, N.S.	" 10	1	Crushed by crane.
Textile trades—				
Flax mill hand	Floradale, Ont.	" 9	1	Caught in belting.
Woolen mill hand	Paris, Ont.	" 20	1	Stepped into a vat of boiling dye.
Food and tobacco preparation—				
Flour mill hand	St. Catharines, Ont.	" 18	1	Fell from top of grain car.
Ice cutters	Yarmouth, N.S.	" 26	1	Drowned, while cutting ice.

Car inspector	Moncton, N.B	" 25	1	Run over.
Navigation—				
Longshoreman	St. Catharines, Ont	" 19	1	By a fall.
Captain	Off Nova Scotia coast	" 11	1	Washed overboard.
Transport—				
Hackman	Wiarton, Ont	" 19	1	Drowned.
Miscellaneous—				
Travelling salesmen	Macoun, Sask	" 21	2	In railway wreck.
Unskilled labour—				
Labour	Victoria, B.C	" 16	1	Struck by train.
"	Thorold, Ont	" 10	1	Fell from car.
"	Quebec, Que	" 23	1	Died from injuries received.
"	Hamilton, Ont	" 21	1	Died from injuries received.

forty-one non-fatal in the preceding month and five fatal and thirty-five non-fatal in the corresponding month of 1910. Of the fatal accidents three were due to falls and three by machinery. Of the non-fatal accidents, eighteen were caused by machinery, eight by falling material, six to falls, two by exposure and one by live wire.

Woodworking trades.—There were thirteen injured during January, compared with eight injured during the preceding month and one fatal and six non-fatal accidents in the corresponding month of 1910. Ten of the accidents were caused by machinery, one by glass, one by a fall and one by flying material.

Printing and allied trades.—During January there were two non-fatal accidents compared with one in the preceding month and nine in January, 1910. The two accidents were caused by machinery.

Textile trades.—There were two fatal and three non-fatal accidents during the month, compared with three non-fatal in the preceding month and two non-fatal in the corresponding month of 1910. One of the fatalities was due to machinery and the other to a fall into boiling dye. The three non-fatal accidents were caused by machinery.

Leather trades.—During January there were two non-fatal accidents, compared with nine in the preceding month and four non-fatal accidents in the corresponding month of 1910. One of the accidents was caused by a fall and the other by a cut of knife, while stripping a hide.

Food and tobacco preparation.—There were two fatal and eight non-fatal accidents during the month, compared with two fatal and seven non-fatal in the preceding month and nine in the corresponding month of 1910. Of the fatalities, one was caused by a fall and the other by drowning. Two of the non-fatal accidents were caused by machinery, two by falls, two by explosion of natural gas, one by explosion of steam and one by falling material.

Railway service.—There were twenty fatal and twenty-nine non-fatal accidents during the month, compared with seventeen fatal and twenty-nine non-fatal in the preceding month and twenty-three fatal and twenty-nine non-fatal in the corresponding month of 1910. Of the fatal accidents, seven were caused by premature explosions of dynamite in railway construction work, five were caused by crushing, five by being run over and three from collisions. Of the non-fatal accidents, thirteen were caused by collisions, five by derailments, three by being run over, three to explosions of coal oil, and one each to striking obstacle while passing same, hit by engine, hit with coal from passing tender, fall, and premature explosion of dynamite.

Navigation.—Two met death during the month, compared with twenty-six killed and three injured in the preceding month and one fatality in the corresponding month of 1910. One of the fatalities was caused by a fall and the other by drowning.

General transport.—During the month there were one fatal and fourteen non-fatal accidents, compared with four fatal and nineteen non-fatal in the preceding month and one fatal and nineteen non-fatal in the corresponding month of 1910. The fatality was due to drowning while crossing ice. Four of the non-fatal accidents were caused by falls, three by runaways, three by collisions, two to being trampled by horses, and two to falling material.

Civic employés.—There were five injured during January, compared with two killed and eight injured in the preceding month and four injured in the corresponding month of 1910. Four of the accidents were caused by collisions with street cars and one by falling walls.

Miscellaneous.—There were two fatal and eight non-fatal accidents during the month, compared with five fatal and seven non-fatal in the preceding month and three fatal and seventeen non-fatal accidents in the corresponding month of 1910. The two fatalities were caused by railway rear-end collision, and three of the non-fatal accidents were caused by machinery, two by falls, two by fire, and one to explosion of gasoline.

Unskilled labour.—There were four fatal and twenty non-fatal accidents during the month, compared with six fatal and thirteen non-fatal in the preceding month and eight fatal and seven non-fatal accidents in the corresponding month of 1910. Of the fatalities, two were caused from injuries received, one by fall and one being struck with train. Of the non-fatal accidents, eight were caused by falling material, five by falls, four in blasting operations, two by flying material and one by exposure.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during January, 1911.

ONTARIO REPORTS.

Women's Institutes.

Report of the Women's Institutes of the Province of Ontario, 1910. Part I, Toronto: King's Printer, 1910. Page, 112.

THE Report on the Women's Institutes of Ontario for 1910 shows that these organizations exert a wide influence on the rural homes of the Province. The membership for the year ending May 31, 1910, was 16,104, and institutes were established at about six hundred places. In many places they have stimulated an interest in individual and social improvement, some by giving prizes for the best collections of flowers and improvement in home surroundings, others by improving the sanitary conditions of the schools. Among the papers

and addresses pubished in the Report are the following: Exhibition and Description of certain Labour-Saving Devices, by Miss M. U. Watson; Stumbling Stones in the Road to Dairy Progress, by Miss L. Rose; Bee-keeping for Women, by Mr. Morley Pettit; and Co-operation, by Mr. G. H. Unwin.

BRITISH COLUMBIA REPORT.

Mineral Production in British Columbia.

Preliminary Review and Estimate of Mineral Production for year 1910. By Wm. Fleet Robertson, Provincial Mineralogist, Victoria, B.C.: King's Printer, 1911. Page, 23.

In a preliminary review of the mineral production of British Columbia for 1910, it is estimated that it amounted to a total value of $26,183,505, which would make it the highest production on record, the next highest having been in 1907, when the mineral production amounted to $25,882,560. The total mineral production of British Columbia during the past twenty-five years amounted to about $310,000,000, of which fully forty per cent. represents the production of the last five years, and more than half was produced during the last seven years. Comparing the years 1909 and 1910, there was an increase in the production of gold $5,401,090, to $5,680,505. Silver showed a slight decrease in quantity produced, but at the same time a slight increase in the value. Lead, copper and zinc showed decreases in both quantity and value. The total value of all metalliferous ores produced decreased from $14,668,141 in 1909, to $13,599,505 in 1910. There was an increase in the coal produced from 2,006,476 tons to 2,800,000 tons, representing an increase in value of $2,777,334, and the value of building materials increased from $1,200,000 to $1,500,000, while the production of coke declined from a value of $1,552,218 to $1,284,000.

BRITISH REPORT.

Relief of Unemployed in Scotland.

Report by the Local Government Board for Scotland as to the Proceedings of Distress Committees in Scotland for the year ended 15th May, 1910. Edinburgh: Oliver & Boyd, 1910. Page, 20. Price, 2½d.

The Report of the Distress Committees of Scotland serves to show the condition of the labour market in Scotland, the nature of the residences of the applicants for work, their age and occupations, and the means adopted for providing them with work and caring for them. Out of a population of 1,904,470 in the areas for which distress committees were constituted, there were 19,876 applicants for work during the year ended May 15, 1910, compared with 34,050 in the previous year. Of the 19,876 applicants, only 16,911 were fully investigated. Of these, 13,605, or 80.46 per cent., were considered deserving of assistance. An analysis of the occupations of applicants shows 7,237 in the class of general or casual labour, 3,225 in building trades, 4,624 in engineering and shipbuilding trades, 640 in textile trades, 407 in domestic service, 439 in furnishing and woodworking trades, 111 in printing, bookbinding and other paper trades, sixty-nine in the boot and shoe trade, and 2,452 in other definite occupations. Of those for whom work was provided, 5,739 were admitted to farm or labour colonies established by the distress committees, and 3,024 were provided work through the local authorities. Over half the persons provided with work had been similarly assited during the previous year. There were 1,550 persons summoned to relief works who failed to appear. The total amount of wages paid to the unemployed during the year was £35,319. The nature of the work directly provided consisted of stonebreaking, collecting waste paper, preparing firewood, collecting and sorting waste paper and rags, market gardening, land draining and reclamation, and making clothing in a women's workroom. The work provided for the unemployed by local authorities consisted chiefly in building or improving roads and streets, laying sewers, and making parks and playgrounds.

UNITED STATES REPORTS.

Work of the Bureau of Corporations.

Annual report of the Commissioner of Corporations to the Secretary of Commerce and Labour, for the fiscal year ended June 30, 1910. Washington: Government Printing Office, 1911. Page, 7.

The Report of the United States Commissioner of Corporations for the year

ended June 30, 1910, contains a brief review of the work accomplished by the Bureau of Corporations during the seven years of its existence, with suggestions for the extension of its work. Since its inception, the Bureau has advocated a broad Federal system of corporate publicity, which would give the public the essential facts of the great businesses of the country. In carrying out this policy of publicity the Bureau has collected information and published reports from time to time relating to the Standard Oil Company, Cotton Exchanges, the Tobacco Combination, Water Powers, Waterways, and Taxation of Corporations. Satisfactory results followed the publication of all these Reports. An investigation into the Standard Oil Company revealed a great system of railway discrimination enjoyed by it, and led to the cancellation by the railroads of every rate condemned as illegal, and of many others criticised as unjust. Further reports on the Standard Oil Company were said by independent oil firms to have caused a substantial improvement in the conduct of the petroleum business, and they were largely used in connection with the repeal by Congress of the retaliatory duty on petroleum imported from abroad. The three Reports on cotton exchanges published by the Bureau led to important improvements in the methods of the New Orleans Cotton Exchange. The Report on the Tobacco Combination caused its abandonment of secret subsidiary concerns employed against independents, and the cessation of various objectionable methods of competition. A Report showing the strong tendency toward concentrated control of great water powers led to the appointment of a special committee of the Michigan legislature to investigate water powers in that State. Two reports on the taxation of corporations issued by the Bureau, have been largely used by public officials, and a committee of the Rhode Island Legislature has recommended legislation in accordance therewith. Three Reports on Transportation by Water in the United States have been very generally used, and have brought forcibly to public attention the vital importance of water terminals.

Recommendations are made for the extension of the system of publicity so that (1) all important interstate industrial corporations shall regularly make reports to a Federal office; (2) that office shall have the further right to verify such reports and get additional facts; (3) business transactions shall be made public, safeguarding at the same time all properly private business secrets; (4) there shall be a permanent opportunity for co-operation and adjustment between the Government and business interests; and (5) those corporations that deal fairly and openly shall receive positive recognition of that fact and correspondingly acquire public confidence.

Agriculture in the United States.

Report of the Secretary of Agriculture, for 1910. Washington: Government Printing Office, 1910. Page, 170.

In the fourteenth annual Report of the Secretary of Agriculture of the United States it is stated that the value of the agricultural products of that country for 1910 amounted to $8,926,000,000, higher than the previous year by $305,000,000, and the highest on record.

The cost of living with regard to farm products is discussed in the Report of some length, and the conclusion is reached that while the prices received by the farmer have advanced since 1897 in a greater degree than those received by nearly all other classes of producers, they merely compensate for the extremely low prices received for many years prior to that date, and a large proportion of the increase in cost to the consumer goes to the retailer and other middlemen.

Industrial Conditions of Maine.

Twenty-fourth annual report of the Bureau of Industrial and Labour Statistics for the State of Maine. Augusta: 1910. Page, 465.

The annual Report of the Bureau of Industrial and Labour Statistics of Maine, for 1910, contains chapters on the following subjects: Industrial Directory and Sketches of Leading Industries; Industrial Accidents and Workmen's Compensations; Relief Asosciations among Employés; Accident and Disability Benefits

Paid by Labour Organizations; Industrial Accidents in Maine; The Household Servant Problem in Maine; Requests, Strikes and Agreements; Immigration to Maine in the last Five Years; What Labour Organizations are Doing for their Members; Labour Organizations Affiliated with the American Federation of Labour, that have Local Unions in Maine; Directory of Trade Unions; Report of the Maine Board of Conciliation and Arbitration; Factory Inspector's Report.

Industrial Conditions of New Hampshire.

Eighth biennial report of the Bureau of Labour of the State of New Hampshire. Concord, N.H., 1910. Page, 214.

The Eighth Biennial Report of the Bureau of Labour of New Hampshire, dealing with the two years ending August 31, 1910, contains industrial statistics of the various cities, counties and important towns of the State, statistics by industries, a directory of manufacturing establishment, labour laws of New Hampshire, and labour organizations.

TRADE DISPUTES DURING THE MONTH OF JANUARY, 1911.

APART from a strike of coal miners at Springhill, N.S., which had been in existence since August, 1909, and another strike of coal miners at Port Morien, N.S., which lasted throughout the first three weeks of January, industrial conditions in Canada were only slightly affected by trade disputes during the month.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during January was seven, being three less than in December, and two more than in January, 1910. About eleven firms and 1,509 employés were involved in these disputes, eight firms and 471 employés having been involved in new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during January was approximately 29,100 working days, compared with a loss of about 41,270 days in December, and 44,650 days in January, 1910.

Trades affected by new disputes.—The following table shows the trades affected by the new disputes, and the number of employés in each group of trades.

Trades.	No. of disputes.	No. of employés.
Mining	2	189
Metal trades	1	250
Clothing trades	1	32
Total	4	471

Localities affected by new disputes.—One of the new disputes of the month occurred in the Province of Nova Scotia and the remaining three in the Province of Ontario.

Causes of disputes.—The following were the causes of the new disputes of the month:—

Cause.	No. of disputes.
For increase in wages	1
Against reduction in wages	2
Against employment of a foreman and for changes in shop conditions	1
Total	4

Methods of settlement.—Out of seven disputes in existence during January, settlements were affected in four, leaving three still in existence at the end of the month. One dispute was settled by conciliation, and the remaining ones by resumption of work without negotiations.

Results of disputes.—The employers were successful in three of the disputes that were terminated, and the remaining one ended in a compromise.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes in existence during January, which began in previous months comprised a strike of coal miners at Springhill, N.S., and lockouts of garment workers and cap workers at Winnipeg, Man.

Strike of Coal Miners at Springhill, N.S.

No change in the situation was reported with regard to a strike of coal miners at Springhill, N.S., which had been in continuance since August 11, 1909, and in which about 1,000 members of the United Mine Workers of America were involved. The cause of the dispute was their failure to secure recognition of the Union, an increase in wages and certain changes in conditions of employment. The mines continued to be operated to a limited extent.

Lockout of Garment Workers and Cap Workers at Winnipeg, Man.

On December 22, a lockout of twenty-three garment workers took place at Winnipeg, Man., on account of the refusal of the employés to make suits for the Winnipeg Street Railway Company during the progress of a strike. The street railway strike having been terminated on December 31, the garment workers were taken back three days later, but the establishment was conducted as an "open shop."

About the same time, a lockout of fifteen cap workers which took place on December 30, for a similar cause, was terminated. The resuls of this dispute, however, was not reported.

New Disputes.

The new disputes of the month comprised strikes of coal miners at Port Morien, N.S., silver miners at Silver Centre, Ont., iron moulders at St. Catharines, Ont., and fur workers at Sandwich, Ont.

Dispute of Coal Miners at Port Morien, N.S.

On January 1, the coal miners employed by the North Atlantic Collieries, Limited, ceased work at Port Morien, N.S. About 110 men were reported to have been directly involved in this dispute, and forty-five indirectly. It was stated by the Company that the cause of the dispute was the refusal of some of the employés to accept winter rates of pay exactly similar to those conceded by them two years ago. These rates involved a reduction of 5 cents per ton until May 1 for hand-pick men and machine men, of whom there were employed forty-five of the former and

DEPARTMENT OF LABOUR, CANADA,

Silver miners	Silver Centre, Ont.	Against reduction in wages	1	.....	35	.....	.....	.....	" 15	.....	No settlement reported at end of month.

Metal Trades—											
Iron moulders	St. Catharines, Ont	Against employment of a foreman and for changes in shop conditions	1	.....	250	.....	.....	"	3	"	6 Settled by conciliation, foreman not discharged, but other demands of men were granted.
Clothing Trades—											
Fur workers	Sandwich, Ont	For an increase of 10 per cent. in wages	1	.....	7	.....	25	.....	"	14	..... No settlement reported at end of month.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

four of the latter. It was stated that the men gradually returned to work, accepting the winter rates offered, and normal conditions were resumed on January 25.

Strike of Silver Miners at Silver Centre, Ont.

On January 16, about thirty-five miners employed by the Keeley Mine, Limited, at Silver Centre, Ont., declared a strike on account of a reduction in wages. No settlement of the dispute was reported during the month.

Strike of Iron Moulders at St. Catharines, Ont.

On January 3, a strike of moulders employed by the McKinnon Dash & Metal Company took place at St. Catharines, Ont. It was stated by the Company that the strike arose because a majority of the moulders refused to work unless the Company discharged the foundry foreman. The men also lodged a number of complaints with regard to shop conditions, alleging that (1) Work was not priced when given to the men; (2) They had to wait for forms; (3) There was poor ventilation; (4) The runways were not safe. They also demanded that the men should be present when prices were fixed for work, and that the firm receive a committee from the men whenever a grievance arises.

On January 4, the men requested the good offices of Mayor J. M. McBride, of St. Catharines, and Ald. Jas. A. Wiley, of the District Trades and Labour Council, to arrange a settlement. The Company being willing that these two should act as conciliators, a conference was held on January 5, and a settlement was quickly reached. The Company agreed to have price tags placed on the work when given out, to do away with the waiting for forms, to improve the ventilation and to make the runways safe, to receive a committee of the men if the foreman could not adjust any grievance that may arise, and to take all the men back, giving them their own benches. The demands that the men be present when the prices are fixed and that the foreman be discharged were refused.

Strike of Fur Workers at Sandwich, Ont.

On January 14, a strike of seven fur workers, involving twenty-five other men, took place at Sandwich, Ont., on account of the refusal of the employers to grant an increase of ten per cent. in wages. The men had been receiving from 18½ to 25 cents an hour. No settlement of the dispute was reported during the month.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of January, and which have been reported to the Department.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

ONTARIO CASES.

$1,000 for Loss of Arm.

IN the case of Lloyd Brown vs. Canadian Pacific Railway Company, tried before Judge Teetzel and a jury at Brantford, the jury awarded $1,000 to plaintiff, who lost his arm on the railway track three years ago.

The judge said: "Upon the answers of the jury to the questions submitted I direct judgement to be entered in favor of the plaintiff for $1,000 and costs, including costs of last trial, and I grant to plaintiff leave to appeal against my ruling as to costs of last trial."

The following are the questions submitted to the jury and their answers:—

Did the plaintiff get off the train voluntarily or under compulsion of the conductor's orders? Ans.—Under compulsion of the conductor's orders. If under compulsion of the conductor's orders, did the plaintiff have reasonable grounds for believing that if he did not obey the order he would be put off by physical force? Ans.—Yes. Did the conductor order the plaintiff off the train? Ans.—Yes. If you answer this question "Yes," state in what manner he did so? Ans.—By wave of the hand and by word of mouth. At the time the conductor ordered the plaintiff off the train—if he did order him off—was the train under such speed as rendered it dangerous for the plaintiff to get off, or was it reasonably safe for him to make the attempt? Ans.—We think that the speed of the train was such as to make it dangerous to get off? If you find it was dangerous, ought the conductor to have known it? Ans.—Yes. Was the order reasonable? Ans.—No. Was the plaintiff guilty of any negligence in attempting to get off the train when he did or in the manner of his attempt.? Ans.—No. To what do you find the plaintiff's injury attributable? Ans.—The negligence of the conductor in not stopping the train. If the plaintiff is entitled to any damages, how much do you award? Ans.—$1,000.

Heavy Damages for Negligent Electric Light.

On March 8, 1910, the plaintiff, John Young, a lad of 11 years, lying in bed about seven o'clock in the morning, was terribly burned by a current of electricity from the town supply of Gravenhurst. His left hand was so injured that it had to be amputated and his skull was literally burned through to the brain in two places. Judgement by Mr. Justice Riddell. "During the evening of March 7, 1910, Wright, who was on duty at the power-house, saw between 9.30 and 11 p.m. that there was a serious leakage and at once communicated the facts to Biddick, the manager. Biddick denies this. At the trial too, he said that if it had been examined for the leak the accident would not have happened. The plaintiff, John Young, lying in his bed about 7 in the morning of March 8, with the light which hung over his bed for reading purposes turned on, noticed a sparkling, which indicated, as he thought, that the lamp was going out; he then took hold of the oscillating lamp with his left

hand, and knew no more till some time after. His mother came into the room and saw his hand blazing, and also his head, where it came in contact with the iron bedstead; then his hand dropped from the lamp and the blazing ceased. I do not believe that the accident was caused by a low tension. The facts of this case show that defendants did not take the high degree of care that the law demands from a corporation trading in so dangerous an element as eletcricity, and that is sufficient to saddle them with responsibility for the disastrous consequences. Looking at all the expense, etc., Mrs. Young has been put to, she will have a verdict for $2250. In view of the serious extent of the injuries, etc., I think the sum of $7500 a reasonable sum to allow him. The very alarming state of the plant, etc., of the defendants is said to be not at all unusual. If that be the case, thousands are in daily peril of death or maiming—a state of affairs which loudly calls for legislative interference. The most ordinary regard for human life and limb would seem to necessitate some measure of governmental supervision and the most strict and searching of official inspection."

Milkmen Fined.

Milkmen who have been making a practice of using other men's milk bottles in their business have received an admonition in the Toronto Police Court.

Three were fined $20 and costs. The matter was first taken up by the Retail Merchants' Association. They wrote letters to all the milk dealers on the subject.

The Code says: "Everyone is guilty of an indictable offence who, being a bottler, trades or traffics in any bottle or syphon which has on it a trade mark duly registered or the name of another person without the written consent of such person, or who without such consent fills such syphon or bottle with any beverage for the purpose of sale or traffic."

In their letter to the milkmen the Retail Merchants' Association said:

"In the past the violation of this law has been winked at, but in the interests of honest dealing in must be lived up to. It is the purpose of the Retail Merchants' Association to enforce the regulation." Orders have gone forth from the police department for the return of all bottles, and any further use of them will constitute another offence. The penalty is a fine not exceeding $100 or four months in jail.

Farmers' Ownership of Minerals.

The farmers of Kent and Essex own the minerals under their land, and the Canada Company, from whom they purchased their property, must account to the owners for any royalties it has received for gas taken therefrom. Moreover, persons purporting to buy gas or other minerals from the Canada Company must account for the profits to the owners. This is the result of the long-drawn-out and acrimonious struggle, which involved scores of farmers in the southwestern peninsula, and which has been decided in a test case submitted to the courts.

The case has a somewhat dramatic history, involving several pitched battles between farmers and agents of the Company, pitchforks being on more than one occasion the weapons of warfare, and two debates in the provincial legislature. The disputes which gave rise to the litigation followed the discovery of rich beds of oil and natural gas in Kent county. Operators crowded into the district and property values were greatly increased. It was then the Canada Company, a corporation from which many of the owners originally secured their land, stepped in and claimed under an old Crown patent that all mineral rights were vested in it. The Company disposed of royalties and rights to operators, whose endeavours to locate their wells were met with open hostility by the landowners.

Conductor Fined for Assault.

"Conductors have a certain amount of provocation and have to put up with some unpleasantness, but it's part

of their job. They are not paid to strike passengers," said Magistrate Kingsford in the police court at Toronto when Conductor Fred T. Macklem was fined $1 and costs for striking Roy Bellyea on an Avenue road car. Bellyea boarded the car with his transfer ready to give the conductor, who was stationed at the rear door, a la P. A. Y. E., but was carried to the front of the car with the inrush of passengers. The conductor came up to him where he was sitting with his brother, took the transfer and proceeded to tell him in a very loud voice, that he should have paid at the rear door. Bellyea listened for a while and then told the conductor to go on with his collection of fares and mind his own business, whereupon the conductor struck him in the face.

Seizure of Furs at Cobalt.

Provincial Constable McRae and Game Warden Parks, of North Bay, made a seizure of furs at the latter place recently, some of the goods being taken off a Temiskaming and Northern Ontario railway express car, while the balance was found in an express office at North Bay. Two Cobalt men, Joseph Bertiz and Albert Freed, and James Campbell, of Latchford, were fined before Magistrate Atkinson for shipping illegal goods. Freed shipped ten beaver skins to North Bay and for each skin he was fined $5. When the police went to the store where Bertiz does business to summon him to appear in court they searched his premises and found hidden the skins of fifty rats, which he had purchased two weeks ago. He had shipped the skins of six mink, two foxes and one bear. For this he was fined $200. Campbell shipped one deer skin and six rats, for which he was fined $35 and costs.

QUEBEC CASES.

Damages to Injured Workman.

For the second time a Montreal jury brought in a verdict for $1,600 damages in the action of Thos. Cullen against Archibald et al. as representing the firm of Frothingham & Workman.

The action was originally entered by the plaintiff against the firm of Frothingham & Workman. He claimed $3,000, alleging that while he was working for the defendant firm assorting iron he received instructions to mount a ladder and fix some iron pins clamped in a wall in the yard, these pins being used as racks on which to place irons of similar size. Although he was employed as a checker, plaintiff alleged that he mounted a ladder and at a height of about ten feet started to bore a hole to put in a new pin. While doing so he tried to steady himself with an old pin in the wall, which gave way, and he with the ladder was precipitated to the iron lying below, with the result that he sustained a fractured hip bone and bruises on the back, as well as injuries to his head, which so incapacitated him that since then he has not been able to do any heavy work.

It was contended on behalf of the defendant Company that Cullen had no necessity to rest his weight on the other pin and that in mounting the ladder he had not used reasonable care, so that the accident was really due to his own negligence. A number of witnesses were heard not only as to the facts of the case, but as to the age and condition of health of the plaintiff, it being alleged on his behalf tha tthe company had no right to send a man of his age and condition up a ladder on such work.

The jury found the Company in fault on several counts. First they found that the pin which had given away to the plaintiff's undoing should have been securely fastened, and that defendants ought to have seen that it was solid. They further found that the Company shuold not have asked a man of 65 to do such work. On the other hand the jury found that the plaintiff had been guilty of negligence, and for this they deducted $1,400 from his claim of $3,000, leaving him damages of $1,600 net to be recovered with the costs of both actions, from the defendant company.

Damages for Death of Russian Workman.

Mr. Justice Laurendeau has condemned Messrs. D. G. Loomis & Co., contractors to pay to Dame Z, Krasno $500 in set-

tlement of a claim for $2,000 for the death of her husband, a Russian named Zadbalofsky, who was killed by falling from a ladder when painting Jacobs' building in Montreal. It was established that Zadbalofsky earned $57 in the twenty-one days preceding his death, but in the December previous he was sent to jail for vagrancy, having for the six months previous been unable to support his wife, who was in Odessa. But when he came out of jail he seems to have reformed, and was earning, according to the declaration, $15 to $20 a week, though he and his wife lived in one room. The defendants submitted that they were not liable for the accident, as although the Russian was in their employ when he was killed, he was not engaged in construction, but in working on a finished building.

Sale of Cigars on Sunday.

Whether a cigar could be legally sold on Sunday or not was the subject of two judgements three months ago. Judge Leet said no and Judge Bazin said yes. The latter's judgement was appealed by the Lord's Day Alliance and the higher court has confirmed it with costs against the Lord's Day Alliance in the King's Bench, Appeal side, thus making legal the sale of cigars on Sunday.

There is a by-law that permits the sale of a cigar on Sunday, according to Judge Archambault's judgement. The Lord's Day Alliance lawyers contended that the city had no right to have such a by-law, because selling a cigar, if it was illegal would be a crime, and therefore something for the Federal Parliament to adjudicate upon, and not merely an offence that could be determined by the Legislature, who gave the city the power to pass the by-law. Judge Archambault held the Legislature had the right to give the city power to pass what was merely a police regulation and not a crime.

MANITOBA CASES.

Prosecution of Elevator Company.

The case of Warehouse Commissioner Castle against the Thunder Bay Elevator Company, in which he charged that Company with making incorrect returns of wheat in store in their elevator at Fort William, on a specified date in December, was dismissed by the Police Magistrate at Winnipeg. The magistrate upheld the objection of the Elevator Company that he had no jurisdiction, because the action had not been commenced within six months of the date of the alleged offence, as plainly provided in the Criminal Code with respect to all cases under the summary convictions section of the Code.

There were other grounds of objection specified. The first is of interest to grain men as it alleged that the Act calls for statements to be made up to and including Saturday of each week, whereas the actual practice has been to prepare statements of stocks on Friday at noon, so that they might be mailed to Winnipeg and be available on the grain exchange Monday mornings for the figures as to "visible supply." On this ground it was argued that the statement which formed the basis of the charge was in reality no statement at all in the strict meaning of the Act.

A second objection was on the ground that the information charged guilty intent in the making of the alleged false statement, and to this was urged the old argument that, in criminal cases, a corporation cannot be held to have any intent, although the responsible official or the official signing the statement might be charged with intent. It was pointed out that the information was laid against the Thunder Bay Elevator Company as a corporation, and not against any one official personally.

Action Against Canadian Northern Railway Company Dismissed.

The plaintiffs were the wife and child of Wasyl Skulak. It appeared that on November 5, 1909, the deceased and another Galician were walking along the tracks of the Canadian Northern Railway Company just east of the Pembina crossing in Winnipeg, about half-past seven in the morning, and they were first on the main line, working in connection with keeping the tracks and grade in repair.

Hearing an approaching train, which turned out to be the Great Northern Flyer from St. Paul, they stepped off on to a side line, or switch, to get out of its way, but evidently did not notice a yard engine which was at that moment coming along in the same direction as the flyer, and they were run into by it, Skulak dying of his injuries. Mader, the man who was with him, although somewhat badly injured, escaped death in some miraculous manner. The widow and child of the deceased claimed damages from the defendant Company under the Workmen's Compensation for Injuries Act, alleging that the accident which befell Skulak, who was an employé of the defendant Company, was due to the negligence of the men who were operating the switch engine. On behalf of the Company it was contended that the unfontunate occurrence was the result of the negligence of the deceased, and that they could not in any way be held to blame in the matter.

Mr. Justice Macdonald, the trial judge, dismissed the action, holding that had Skulak kept to the walk by the side of the track no injury would have happened, but he chose to leave that and run into the danger which caused his death. Owing to absence of negligence on the part of the Compnay, and the negligence of the deceased contributing to the injury, the action must be dismissed.

Railway Watchman Convicted of Manslaughter.

Frank Leland, formerly watchman in a signal tower at Woods Siding, near Winnipeg, on the Canadian Pacific Railway, was convicted of manslaughter at the recent Winnipeg fall assizes. Leland was very drunk on duty on September 10, when the local train from Winnipeg approached the crossing of the Canadian Northern Railway at a siding. He threw the switch as the train approached and derailed it. Fireman Samson Pattison jumped out, but was crushed to death under the locomotive.

Leland was arrested at once and the Crown had no difficulty in proving that the fatality was due to his negligence. His only excuse was that he was drunk. The evidence went to show that he was not only intoxicated, but was quarrelsome and disobedient. He was sentenced to four years in the Stony Mountian penitentiary.

SASKATCHEWAN CASES.

Frauds by Homesteaders.

Severe sentences were handed out recently to three homesteaders who had been found guilty of making entries for homesteads to which they were not entitled, each being given a year in jail. The three were well-known farmers. Jacob Cathors is a pioneer settler of Neepawa district, having homesteaded about two miles north of that town in the early days. He afterwards went to Dauphin, when the movement towards that district first began, and engaged in farming. He entered for three homesteads. John Boyd had entered for four, and S. Boyd, juinor, for two homesteads; all their last applications being entered at Tisdale, Sask.

BRITISH COLUMBIA CASES.

Compensation to Laundry Employé.

In the case of Van vs. McNeill and others in the Supreme Court, at Vancouver, B. C., before Mr. Justice Morrison, a basis of settlement was agreed upon by counsel, in claim for damages by a laundry employé.

The plaintiff, a young woman, was employed at the Standard Steam Laundry, in Vancouver, B.C., and her hand was caught in a mangle. The member was dragged in over the rollers and burned on the heated metal, necessitating the amputation of three fingers. It was alleged by the plaintiff that the machine was not properly guarded. When the action was launched there was some difficulty in determining who owned the laundry, which had changed hands several times. It had been owned by Okada & Company, a Japanese firm, who had transferred to a Mr. McNeill, who in turn had transferred it to Messrs. Grant & Graham. All these were joined as

defendants. The settlement was as follows: The plaintiff to receive $750 from McNeill, $400 from Messrs. Grant & Graham, and $250 from the Japanese defendants, without costs.

$1,000 Damages for Loss of Big Toe.

Before Mr. Justice Gregory and a jury in the Supreme Court at Victoria an action was recently tried in which John Boon, longshoremen and miner, was awarded $1,000 damages against the stevedoring Company of Brown & McCabe for loss of his big toe and injuries received about the body, in July last, which kept him in hospital for a month, and owing to which he was, up to the trial, unable to earn his livelihood. The injuries were received while the plaintiff was working on the ship *Elginshire* at the Michigan-Puget Sound wharf, loading lumber. Boon was stationed in the lower hold when a sling of heavy lumber was sent down, and because it was not properly slung together, as alleged by the plaintiff, he was struck on the foot, his big toe crushed, his side, from chest to waist, was skinned, his knee injured and his ankle sprained. The plaintiff alleged negligence on the part of his employers, and claimed damages under the Employers' Liability Act. In his evidence he said the sling of lumber was not properly slung and bound with battens or packing to prevent slipping; that the sling was loaded by the foreman on the job; that one man instead of two was stationed at the top of the hatch and also that no warning was given him. He was working in the lower hold and receiving $4 per day of ten hours. After the accident he was taken to the hospital, where the big toe of his right foot was amputated. From the hospital he went to his home and remained there a month and was then two weeks on crutches.

Fisheries' Dispute before Courts.

The dispute between the Dominion Government and the British Columbia government over the power of the province to license fishermen, has taken concrete legal shape in the appeal of Antinio, a Steveston fisherman, against the fine imposed upon him by the Steveston magistrate for fishing without a provincial license. For two years both the Dominion and provincial governments have exacted license fees from the fishermen of the province and the dispute at one time took exciting turn through the refusal of fishermen on the Fraser to take out a provincial license. In this case Antinio had taken out a Dominion license and he has appealed against the fine for not taking out a provincial license on the ground that it was beyond the power of the province to demand or compel a license. This constitutional question has been argued before Judge McInnes, and judgement has been reserved upon it.

On behalf of the provincial government, it was contended that taxation by the British North American Act is exclusively within the power of the provinces, and that in imposing a license on fishermen the Province of British Columbia is simply exercising that right.

On behalf of the Dominion Government it was claimed that section 91 of the British North American Act gave the exclusive right of legislation in regard to fisheries to the Dominion, and that the prohibitory character of the provincial license made it an infringement of the rights of the Dominion. Another point urged was that the penalty clause of the Fisheries' Act of the province dealt with a man fishing without a license, but had nothing to say in the interpretation clause as to who could grant the license.

The legal question involved will in due course reach the higher courts.

Foreign Dependents' Rights under Workmen's Act.

The Workmen's Compensation Act extends its benefits to foreign dependents. This was the judgement delivered a short time ago by Mr. Justice Clement in the test case of Kraus, the Crow's Nest Pass Coal Company, and it will likely be carried to the appeal court. The question was whether the foreign dependents of workmen killed in the province could recover compensation under the Workmen's Compensation Act.

The argument against liability in such accident cases was that there were certain sections in the Act which showed the intention of the legislature to be that the benefits of the Act were confined to people living in the province. The principal section relied upon was section 8 of the second schedule, which provides that in order to enforce payment of the award it may be filed in the office of the county court for the district in which the applicant resides, and it then has the force of a county court judgement. As the applicant in this case did not reside in any district of the province, there was no place to file the award and therefore no means of enforcing it. As it could not be enforced, the legislature must have intended to restrict the benefits of the Act to people living within the jurisdiction.

The answer to this argument was that the Act only provided a short means of enforcing the payment of an award, leaving the other common law remedies of enforcing it open to the applicant, and that therefore an action could be brought on the award, even although the person entitled to its benefits did not reside within the jurisdiction.

The Western Federation of Miners and the Mine Workers of America, as well as the relatives of the workman, were strongly urging this view. Awards under this Act have frequently been paid to relatives living in a foreign country, the point never having before been raised.

Damages Against British Columbia Electric Railway.

The widow and children of William Johnstone, one of the victims of the Lakeview accident on the British Columbia Electric Railway were at a recent assizes awarded damages amounting to $7,500. The Company's defence was that the plaintiff being an employé of the Company was killed by the negligence of other employés and therefore the Company was not liable. Evidence was also produced to show that the Company's rules were changed to allow of an employé in uniform travelling free even without a pass, and even if the deceased had not a pass upon him the Company was exempt from liability. The plaintiffs proved that the deceased was in plain clothes at the time of the accident, except that he wore a uniform vest and he was not on duty, so that he was in the same position as the other passengers. The jury conferred for two hours and their verdict awarded $4,000 to the widow, $500 to the older boy and $3000 to the small child.

Damages Reduced.

The Court of Appeal has reduced the damages in the case of Mackenzie vs. Burns, from $750 to $250. A year ago last summer Mr. Mackenzie's four-year-old child was run over and injured by one of a herd of twenty cattle belonging to Burns & Company, which were being driven along the street by four mounted herdsmen. The court of appeal agreed with the lower court that four men were not sufficient to control the herd. At the same time they considered the damages excessive, and with the consent of counsel and in order to save a new trial they reduced them.

THE

LABOUR GAZETTE

MARCH, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF FEBRUARY, 1911.

I.—GENERAL SUMMARY.

GENERAL employment was active, considering the season, throughout February. The heavy snowfalls afforded work at removal for unskilled labour, though railway traffic was not deranged to any material extent. Exceptionally favourable conditions for the gathering of the ice supply gave further activity to labour. Conditions in the leading industries and trades showed little change from those of January. Agriculturists were engaged for the most part in feeding stock and marketing produce, for which prices remained favourable. Fishing and mining were characterized by seasonal dullness, though activity was re-commencing in some of the asbestos properties of Quebec. Lumbermen in eastern Canada were somewhat impeded by the depth of snow, but favourable conditions otherwise prevailed. Railway construction continued unusually active. Manufacturers were mostly running full time, with full staffs. The outlook is for an active resumption of outdoor work on the opening of spring, in view of the many large contracts under way or contemplated in railway construction, building and civic improvements. The immigration movement is opening with pronounced activity and gives promise of a heavy year.

Changes in Wages and Hours of Living.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during February, 1911.

Building trades.—Negotiations with regard to the scales of wages to prevail during 1911 were in progress at several points. Bricklayers received an advance at Brandon, Man.

Metal.—Sheet metal workers at Ottawa had their wages advanced from 30 to 35 cents per hour.

Printing and allied trades.—Printers and stereotypers (thirty-six) at Vancouver, B.C., received a substantial advance in wages from February 1. The increases averaged from $5 to $7 a week.

Civic employés.—Increases were granted to certain employés of the municipality of South Vancouver, B.C., and to firemen and policemen at Chatham, Ont.

Railway service.—From January 1, 1911, locomotive engineers and firemen, to the number of 700, on the Intercolonial Railway system, had their wages increased seven and one-half per cent. Hostlers on the same system, to the number of twenty, had their wages increased from 22 to 24 cents per hour.

Interruptions to Industry.

Among industrial establishments, &c., destroyed by fire or through other causes, during February, as reported in the press of the Dominion, the following may be mentioned:—

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

Nova Scotia.—Warehouse and 60,000 bushels of potatoes at Andover, loss, $100,000; outbuildings and residence at Digby, loss, $2,000; boarding house and contents at Kingston, loss, $5,700 and a newspaper office at Truro, loss, $15,000.

New Brunswick.—Outbuildings and residence at Ford's Mill, loss, $1,000; hotel at Edmunston, loss, $10,000; light-house at Grindstone Island; church at Marysville, loss, $65,000.

Quebec.—Powder factory at Beloeil, loss, $15,000; hotel and residence at Buckingham; outbuildings and thirty tons of hay at Island Brook; business block at Farnham, loss, $40,000; outbuildings at D'Israeli, loss, $3,000. At Montreal, drygoods store, loss, $50,000; garment factory ; convent, loss, $100,000; boarding house, loss, $2,000; shoe store, loss, $2,000; Grand Trunk Railway storehouse, loss, $5,000; wholesale grocery, loss, $75,000; twelve tenements, loss, $25,000; canned foods factory; carriage factory and garage, loss, $60,000; wood and coal office, loss, $3,000; iron bedstead factory, loss, $150,000. Store at Notre Dame de la Paix, loss, $6,000; factory at Quebec, loss, $5,000; business block at Sherbrooke, loss, $8,000; store at Shawinigan Falls, loss, $10,000; hotel at Villeray, loss, $20,000; two stores at Westmount, loss, $5,000 and a carriage shop at Rivière du Loup, loss, $5,000.

Ontario.—Aguanico mine plant, loss, $10,000; tenement at Carleton Place, loss, $1,000; opera house at Cobalt, loss, $10,000; railway freight shed at Glencoe, loss, $5,000; plaster works at Hamilton, loss, $3,000; business block at Hensall, loss, $60,000; general store at New Dublin, loss, $12,000; car shops (partial) at North Bay, loss, $1,000; flour mill at Millbrook, loss, $20,000; stable and five horses at St. Catharines; business block at Stayner; livery stable at Thamesville, loss, $2,800. At Toronto, laundry, loss, $1,400 and two stores, loss, $1,500.

Manitoba.—Fire hall and engine at Waskada.

Saskatchewan.—General store at Broadview, loss, $3,000.

Alberta.—Three stores at Strathcona, loss, $40,000.

British Columbia.—Saw mill at Ladner, loss, $20,000 and church at South Vancouver, loss, $17,000.

Heavy snowstorms in Western Canada at the beginning of the month affected railway traffic.

Conditions in the Industries and Trades.

Conditions of employment during February, in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Seasonal quietness prevailed throughout Canada, the work of agriculturists being chiefly confined to stock feeding, wood cutting and the marketing of produce. Prices have been on the whole well maintained. Ploughing had been begun in a few localities in the Northwestern Provinces. The winter wheat outlook in Ontario and Alberta was pronounced satisfactory.

The report of the general grain agent of the Canadian Pacific Railway on winter wheat conditions in Alberta forms the first report to hand on the coming crop. It shows the conditions of the winter wheat to be so far satisfactory. It estimates a total acreage for the province of 230,000 acres, which is considerably larger than the estimate made by the Deputy Minister of Agriculture in October. The report states that plenty of rain came after the wheat had been sown, giving the crop an excellent start. With sufficient rain in April and May, and no heavy frosts after the ground thaws, a good crop is predicted for 1911.

Several important meetings of agriculturists were held during February, among these being: The Eleventh annual convention of the Ontario Association of Fairs and Exhibitions; the tenth annual meeting of the Saskatchewan Grain Growers' Association; the annual conventions of the Agricultural Society, Dairymen's Society and Women's Clubs of Saskatchewan; the seventh annual convention of the United Farmers of Manitoba; the annual meeting of the Provincial Dairymen's Association of Prince Edward Island; and several important meetings of associations of stock-raisers, fruit and vegetable growers, &c.

The Census and Statistics Monthly issued during February contains a valuable review of agricultural conditions during 1910. Values and wages, it is stated, made a good record. The total value of live stock on the farms is $593,768,000, which is $34,979,000 more than in 1909. The price per head of horses is $132.50, as against $130.72 in 1909; of milch cows, $42.60, against $36.36; of other cattle, $30.90, against $28.81; and of sheep, $6, against $5.89. Swine, alone, show a drop in average price, being $11.30 per head, against $11.80. The total value of horses is $293,398,000 for last year, against $278,789,000 for 1909, of milch cows, $121,613,000, against $103,601,000; of other cattle, $131,781,000, against $126,326,000; and of sheep, $15,919,000, against $15,735,000. The value of swine, however, fell from $34,368,000 in 1909, to $31,157,000 in 1910. The highest aver ag

price of horses was in Saskatchewan; of milch cows, other horned cattle and sheep, in Ontario; and of swine, in Quebec. Horses three years old and over reached the highest price in British Columbia, where the average was $225. Swine per 100 lb. live weight, ranged from $6.50 in Manitoba, to $9.62 in Quebec. The price of unwashed wool was 18 cents in 1910, and 17 cents in 1909; and of washed wool, 24 cents for each year. The average value of occupied farm lands in the Dominion was $38.45 per acre, or 15 cents less than for the previous year. It was highest in British Columbia, where the cost of clearing is heavy and the land is largely occupied for fruit-growing; the average being $74 per acre, or 56 cents per acre more than in the previous year. Ontario comes next with $48 per acre, which is $2.22 less than in 1909. Farm help for the summer season shows an average of $35.15 per month for males, and $20.70 for females, counting board, as compared with $33.69 and $19.08 respectively in the previous year. Males have an average of $347.10, and females, $209.69 per year, counting board, as against $336.29 and $206.08 respectively for 1909. The highest prices per month in summer are paid in Saskatchewan, Alberta and British Columbia, where they are $40 and over for males, and $25 and over for females, counting board. The average rate of board per month ranges from $8 for males and $6 for females in Prince Edward Island, to $20 and 17 respectively per month in British Columbia. The rates of wages and board are quoted for the farm, where males are employed on the land and females in the house. They are averages computed from a large number of returns by farmers to the Census Office.

A bulletin issued by the Dairy and Cold Storage Commissioner of Canada as to the outlook for Canadian tomatoes in Great Britain concludes that though it is now possible to land tomatoes in Great Britain in good condition, the process is expensive, and that under present conditions the export of tomatoes to Great Britain would yield no profit to the shipper.

Fishing.

Fishing has been quiet throughout Canada. In the Maritime Provinces fair catches of smelts and other winter fish were made, and preparations were actively under way for the opening of the lobster season. Other catches, however, were light, and prices were correspondingly high. Some good herring and halibut catches were reported in British Columbia.

Lumbering.

Unusually deep snow hampered operations in the woods in some localities, and caused some reduction of staffs in the winter camps. Otherwise, conditions were favourable, The cut will probably compare well with that of the preceding year. Water in the streams was unusually low causing some loss of time to mills dependent on water power. Lumber prices continued firm.

A Bill was introduced in the Quebec Legislature proposing to create township forestry reserves, for the purpose of providing a supply of firewood for farmers, in parishes which had been denuded of their forests.

The third annual meeting of the Canadian Lumbermen's Association was held at Ottawa, February 7.

The annual report of the Department of the Interior, Canada, shows that for the fiscal year ending March 31, 1910, there has been a marked increase in the amount of timber cut on Dominion lands, the amount derived from royalty alone being $57,585.52 in excess of that received during the preceding fiscal year. The average ruling price of lumber during the year, in the different agencies, was as follows: Calgary, $14.81; Edmonton, $16; Prince Albert, $18.47; Winnipeg, $14.63; New Westminster, $14.15. The area of timbered lands held under license and permit in the Provinces of Manitoba, Saskatchewan and Alberta and the Northwest Territories and the railway belt in British Columbia, totaled 7,905 98 square miles under license, and 827 under permit. This showed a decrease in land under

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, active, very active; (2) quiet and very quiet.

City and District of Correspondent.	Agricultural operations.	Fishing.	Lumbering (including sawmilling.)	Mining.	Manufacturing.	Railway construction.	Building trades.

license of 384 square miles, and in land under permit of 686 square miles. The output of lumber at the mills operating in timber cut upon Dominion lands, during the year under review, amounted to 240,408,390 feet, board measure, which amount exceeds that of the previous year by 58,598,930 feet. The total amount of lumber marketed in the Provinces of Manitoba, Saskatchewan and Alberta, during the year, was 943,843,098 feet, of which amount about 500,000,000 was brought in from British Columbia. The total shipments from the mountain mills during the year were 324,829,326 feet. The estimated quantity of logs on hand at these mills at commencement of 1910 sawing season was 350,000,000 pieces. The selling price of lumber of the different kinds was higher than in the previous year by from $2 to $4 per thousand feet.

The total number of poles reported as purchased in Canada during 1909 by telegraph, telephone, electric light and power companies, and electric and steam railways operating in Canada, was 358,-255. The total value at the point of purchase was $497,052. The purchases in 1909 were 92.9 per cent greater than in 1908. The large increase of 172,448 poles was entirely due to an increase in the purchase of short cedar poles by the telephone and telegraph companies. It is for this reason, the large increase in the proportion of short cedar poles used, that the average price of all poles used fell from $1.53 in 1908, to $1.39 in 1909. Telephone and telegraph companies are the greatest users of poles. They bought eighty-three per cent. of the poles used in 1909. The use of poles by these companies was 141.8 per cent. greater in 1909 than in 1908. The increase was all in cedar. The prices paid for poles ranged from 79 cents each, for spruce poles, 20 to 25 feet long, to $6.71 each, for poles of unspecified species, 41 feet long and over.

The lumber trade of the Province of Quebec, during 1910, was on the whole satisfactory. So far as the trade with Great Britain was concerned, the actual results of the year's business were as good as those of the year before. The quantity of lumber shipped showed an increase. Trade with the United States was good, the exports for the year to that country from the consular district of Quebec alone showing an increase in value over those of the preceding year of almost $280,000. During the year a large amount of English and American capital was invested in Quebec and Eastern Canada pulp and lumber areas, and the pulp and paper business was conducted on an extensive scale.

The lumber production of the Georgian Bay and Northern Ontario district was 860,698,000 feet in 1910, as against 843,545,000 feet in 1909. The production of shingles for the said years in that district was, 1910, 222,681,000 pieces; 1909, 216,668,000 pieces. The lumber production of the Ottawa Valley in 1910 amounted to 542,800,000 feet, as compared with 532,300,000 feet in 1909. The lath production was 66,050,000 and 61,500,000 pieces respectively, and the shingle production 61,600,000 pieces in 1910, compared with 69,000,000 pieces in 1909.

In New Brunswick there was a slight increase in lumber shipments to Great Britain, but a reduction in exports to the United States. In Nova Scotia an average year was reported, production being about three-quarters of the average and prices showing little change. The exports of lumber from Nova Scotia ports was estimated at 290,000,000 feet. To these figures must be added an equal or considerably greater quantity for home consumption, which places the quantity of lumber manufactured at about 600,-000,000 feet.

The outlook in the lumber trade of British Columbia was reported encouraging for 1911.

Mining.

Activity has been well maintained in the collieries throughout Canada, including those of Nova Scotia, Alberta and British Columbia. Conditions showed little change from last month in the asbestos, mica, silver, copper and other industries of Ontario and Quebec. Production at Cobalt, Ont., has been somewhat low, owing to lack of power. In British Columbia development and production were continued with a fair degre

of activity. It is stated that the production of the Rossland camps was considerably higher than in 1909.

A report tabled in the Legislature of Quebec by the Superintendent of Mines shows the total production of the mines of that Province during the past ten years to have been of the following values:—

Year.	Value.
1901	$2,997,731
1902	2,985,463
1903	2,772,762
1904	3,023,568
1905	3,750,300
1906	5,019,932
1907	5,391,368
1908	5,548,998
1909	5,542,062
1910	7,072,244

The total value of the mineral production of Ontario last year was $39,232,814, or nineteen per cent. over 1909, when the output had a value of $32,981,375, or an advance of fifteen per cent. over the production of 1908, which was $25,637,617. The chief contributors to this increase were the silver mines of Cobalt and the nickel-copper mines of Sudbury, the production of the former being $2,972,272, and the latter, $1,462,251 in excess of that of 1909. The year's production of gold was $60,918, which though small, is nearly double that of 1909. More than half the yield came from the new camp at Porcupine.

According to a statement received from th Consolidated Mining & Smelting Company of Canada, the Company produced during the six months ending December 31, through the smelter at Trail, $2,294,000 gross value of metals. Though this total is less than half that for the twelve months preceding, it is a considerable advance over the showing for the corresponding six months of 1909.

Although complete statistics are not yet available, sufficient information is at hand to indicate that the total value of the mineral production of Canada during the past year exceeded $105,000,000.

Manufacturing.

Industrial establishments continued very active, the amount of employment available comparing favourably with that offering during February, 1910.

It has been estimated that since 1887, $58,948,503 has been expended on the steel industry in Canada. Of this amount, $35,146,399 was for construction and extension, $5,301,930 for acquisition and development of mines, and $18,500,173 for acquisition and development of coal properties connected with steel plants.

Railway Construction.

Conditions showed little change from the preceding month. On all parts of the National Transcontinental Railway rapid progress for the season was reported.

According to an estimate made by the *Railway and Marine World*, 1,869 miles of track were laid by twenty-two railway companies during 1910 in Canada, compared with 1,588 miles in 1909. Of this total, 286 miles were laid by the Canadian Pacific Railway Company, 521 by the Canadian Northern Railway Company, 336 by the Grand Trunk Pacific Railway Company, and 437 by the National Transcontinental Railway Commissioners. Divided by provinces the track laid during the year compares with that laid in 1909 as follows:—

	1910 Miles.	1909 Miles.
Saskatchewan	518.84	487.80
Alberta	365.63	373.17
Ontario	308.98	288.63
Quebec	232.10	171.24
New Brunswick	180.40	87.00
Manitoba	141.49	136.23
British Columbia	117.80	74.40
Nova Scotia	4.00	.....
	1,869.24	1,588.47

During the year ended June 30, 1910, the additions to the rolling stock of the various Canadian railways included 110 locomotives, 138 passenger cars, 1,934 freight cars, and 789 cars for the company's own service. On that date there were in service 4,079 locomotives, 4,320 passenger cars, 119,713 freight cars, and 8,648 company cars. In addition, there are seventy-one locomotives and 1,729 cars under lease. The returns show 1,090 passenger, 2,601 freight, and 388 switching locomotives, a total of 3,989, or ninety less than the number of locomotives stated

General Transport.

Railway earnings have been well maintained, reflecting active conditions of employment. Street railway employés also had an active month.

For the year ending June 30, 1910, according to statistics recently issued, Canadian railways paid in taxes the sum of $1,792,648, an increase of $212,312 over the amount paid during the previous year.

On January 5, 1910, the net surplus of freight cars in Canada and the United States was estimated at 38,416, while on January 4, 1911, the surplus was 106,924 cars, showing an increase of 68,508, or 178 per cent. This total was much smaller than at the end of 1908, and since that time very large additions have beeen made to rolling stock.

The Trades.

Building.—Building operations were mostly confined to inside work, and the month was active. The outlook is for an active resumption of outside work on the opening of spring.

Metal and woodworking.—These trades were well employed, industrial establishments as a rule working full time with full staffs.

Printing and allied trades.—Business continued very active for printing and allied tradesmen.

Clothing.—Custom tailors were becoming active. Garment workers had a good month. Boot and shoe workers were becoming very active.

Textile.—Employés in cotton and woollen mills were very busy. Large orders on hand at remunerative prices were announced by leading manufacturers.

Leather.—Continued and progressive activity was reported in the leather trade.

Unskilled labour.—The heavy snowfalls of the month gave considerable amount of employment to this class, expenditures for snow removal by transportation companies and municipalities being exceptionally heavy. Ice-cutting gave employment to large numbers of men, the ice being of exceptionally good quality. The outlook for this class on the opening of spring is favourable, in view of the large contracts, let or contemplated, for railway construction, building, and civic improvements, &c. It is estimated that 35,000 men will be required in western Canada by farmers and railways companies during the summer of 1911.

Canadian Trade and Revenue.

Foreign trade.—During January, 1911, the total value of imports entered for consumption in the Dominion of Canada, was $36,663,957, compared with $30,253,852 in January, 1910. For the first ten months of the present fiscal year ending January 31, 1911, the total value of imports entered for consumption was $376,481,520, compared with $302,050,-207 in the corresponding months of the last fiscal year. The total value of domestic exports during January, 1911, was $17,142,416, compared with $20,558,406 in January, 1910. The total volue of domestic exports during the ten months ending January, 31 1911, was $238,907,-285, as against $241,675,219 in the corresponding months of last year. During January, 1911, there were increases in exports of the mine and manufactures, and decreases in exports of the fisheries, the forest, animals and their produce and agriculture. The grand total of Canadian trade for January, 1911, was $56,431,447, compared with $51,800,102 in January, 1910, and for the ten months ending January 31, 1911, $634,431,075, as against $564,286,780 in the corresponding months of 1909.

Good openings for Canadian trimmed mica in Japan, and Canadian timber and lumber in Holland were reported. The establishment of representative Canadian commercial houses in Havana is recommended, the island of Cuba being a natural market for many Canadian products.

Imperial trade.—According to reports Canadian Trade Commissioners received at the Department of Trade and Commerce, Canada, there are openings in Great Britain for the products of Canadian mineral phosphates and wooden shoe last blocks. An increase in the trade in motor and other Canadian vehicles and parts thereof is also reported. The

establishment of a branch of the Royal Bank of Canada at Port of Spain, Trinidad, has been the cause of satisfaction The personal representation of Canadian firms, manufacturers of vehicles and motors, in this island is urged. In Jamaica the importation of Canadian motor cars and parts thereof increased in value from £5,350 in 1908, to £8,708 in 1909. The importation of Canadian flour into Barbados has largely increased. There has been a satisfactory increase in the trade between Canada and British Guiana. In New Zealand the decision of the Canadian Government to include New Zealand as a port of call in the new contract for the Vancouver mail service has been received with satisfaction by the business community of that Dominion, the practical effect being to save a delay of nine days in delivery of the mails and to obviate the transhipment of freight from Vancouver to New Zealand. There is a large demand in that country for cement, and a good opportunity for Canadian manufacturers of this product is stated to exist. The official returns issued by the Customs Statistical Bureau of British South Africa for the fiscal year 1909 indicate a gratifying advance in the value of the wheeled vehicles and parts thereof imported from Canada, during the year. The figures show a substantial increase of seventy-seven per cent. for this period.

Domestic trade. — Domestic trade throughout Canada during February was on the whole active, although heavy snowfalls in the month somewhat hampered country trade. All things considered, however, a fair seasonable movement of merchandize occurred. Good orders from dry-goods travellers were received. The millinery openings at the end of the month were fairly well attended, but owing to the lateness of Easter buying fell off slightly, some having deferred a portion of their purchases until the second openings some weeks later. Groceries were quiet and provisions were irregular in price; other commodities, however, ruled firm. Trade in paints and oils was brisk, the high prices lately prevailing for linseed oil and turpentine continuing. General collections were fair. Bank clearings in eighteen of the largest commercial centres of the Doiminion showed very considerable increases over the corresponding month in 1910.

The January bank statement showed increases in deposits and in current loans in Canada. Banking facilities were increased during the month by about $5,500,000. Call loans showed notable decreases, those elsewhere, chiefly in the United States, having declined during January by $7,000,000, or about 7.6 per cent. The money loaned by Canadian banks is $44,000,000, or 34.5 per cent, less than a year ago. During January, domestic loans decreased by $3,700,000, or 5.6 per cent. In the last four years the total deposits in Canadian banks have increased from $575,000,000 to $820,000,000, a gain of $245,000,000, or 42.6 per cent.

The Weyburn Securities Company of Saskatchewan has been granted a bank charter and its branches have become branch banks. This accounts for an increase of thirty-seven in the number of branch banks in January. There were three branches closed. Canadian bank branches are now distributed as follows:—

In Canada		2,402
Ontario	990	
Quebec	370	
Nova Scotia	112	
New Brunswick	73	
Prince Edward Island	15	
Manitoba	187	
Alberta	193	
Saskatchewan	283	
British Columbia	175	
Yukon	3	
North West Territory	1	
In Newfoundland		10
Elsewhere		47
Total		2,459

Canadian revenue.—Canadian revenue for the month of February, 1911, amounted to $9,491,997.97, compared with $8,173,937.94 in February, 1910. The total revenue to February 28, 1911, was $104,302,705.15, compared with the sum of $89,684,460.46. The total expenditure on capital account during February, 1911, was $2,695,480.09, as against $2,730 320.39 in February, 1910. The total expenditure on capital account to February 28, 1911, amounted to $28,604,934.12, compared with $29,989,535.68 to February 28, 1910. The items of expenditure during February, 1911, were confined to

Public Works, railways and canals, $2,695,480.09. and bounties, $32,025.12.

Notes.

A co-operative poultry association was organized at Peterborough, Ont.

Some scarcity of fuel and cattle feed was experienced locally in Saskatchewan.

The Ontario Retail Hardware and Stove Dealers' Association held its annual convention at Peterborough, Ont.

The Royal Commission on Chinese immigration finished the taking of evidence, after sittings which have lasted since December 15, 1910.

On the question as to whether the Board of Utilities Commissioners of New Brunswick have power to deal with the New Brunswick Telephone Company, judgement was recently established overruling the objections raised.

A deputation representing architects, contractors, workmen and civic authorities waited upon the Select Committee of the Ontario Legislature which is dealing with the Bill to provide better protection for workmen in the construction of buildings.

On January 4, a fine of $500 was imposed on the Johnson & Johnson Company, Limited, railway contractors, by His Honour Judge Fitch, at Fort Francis, Ont., for a breach of the Alien Labour Act. Subsequently, an appeal was carried to the Division Court of the High Court of Justice of Ontario.

The Associated Boards of Trade of the Province of Ontario held a convention at Toronto, at which there were approved the appointment of a royal commission for the improvement of agriculture, a publicity campaign in Great Britain, the establishment of technical education in the public schools, and the adoption of the county system of good roads.

A convention of District 18 of the United Mine Workers of America was held at Lethbridge, Alta., with forty delegates attending. The officers' reports showed the union to be in a flourishing condition, with an increase of nearly two thousand members during the year.

The twelve months of 1910 were unusually active in company promotion in Canada. No less than 2,859 companies obtained either Dominion or Provincial charters. These concerns had an aggregate authorized capitalization of $741,938,874, or an average capital per company of $259,509. Two hundred and thirty-three companies had an authorized capital of $1,000,000 and over.

The Guelph Co-Operative Association reports that its trade during the past six months shows an increase over the corresponding period of the previous year of $3,090. The total sales for 1910 were $81,698.77, as against a total of $71,543.56 for the previous year, or a total increase in trade over 1909 of $10,155.21.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

LABOUR conditions continued active during February. Industrial conditions were favourable and were but little affected by the severe weather and the snowstorms. Sleighing was excellent, and its continuance since January greatly added to the activity of farmers and of business. The leading industries, such as coal mining and steel manufacturing, had a fairly good month, while the allied trades and lesser works were brisk. In the mining districts of Glace Bay and Sydney Mines there was some broken time. The newer collieries in the Sydney Mines district suffered most from the idleness. Upwards of two hundred thousand tons of coal were placed in the heaps at the Dominion Collieries. A large quantity was also banked by the Nova Scotia Steel & Coal Company. Great activity prevails in the New Waterford district ,and work was commenced on Dominion No.

16 Colliery. Preliminary work for Collieries Numbers 17 and 18 is being done. When these collieries get under way, there will be six new producing mines adding to the output of the Dominion Coal Company. The January output of this Company was about three hundred thousand tons. Thirty new coke ovens were added to the number in operation at the Sydney Steel Works. These were very much needed as the steel output during the last year was limited by the insufficient supply of coke. Other ovens are now being tested, and when complete their product will further increase the output. Most of the departments of the Sydney Steel plant were active throughout the month. Construction work was carried on as rapidly as weather conditions permitted. The steel plant at Sydney Mines was active during the month, and fairly large outputs were obtained. Prospects for a busy year in this district are bright. Transportation by rail was fairly heavy. The frosty weather with heavy drift ice blocked up the Sydney Harbor, but Louisburg Harbor remained open. Large quantities of coal were shipped from Louisburg, and the steamer *Bruce*, plying between Newfoundland and North Sydney, was forced to land its passengers and cargo at this port. The building trades were quiet. The woodworking and other factories were fairly active. The wholesale and retail trades had a very good month. Construction work around the collieries was rather dull, several of the construction men having been laid off in January.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a very favourable season to get out fencing and to haul fire-wood, the snow having fallen level and not too heavy.

Fishing was dull.

Railway construction and employment—There was no work on the new branch of the Intercolonial Railway, but as soon as the cold weather is over, active operations will be resumed, and an effort made to complete the branch before the end of the year.

CONDITION OF PARTICULAR TRADES.

The building trades were dull, with the exception of plumbers, who were active. The metal and engineering, woodworking and furnishing, printing, clothing, food and tobacco preparation, leather, miscellaneous and transport trades were active. Unskilled labour was well employed.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity prevailed in the collieries of Pictou county, and the outlook is for a continuance of the same conditions. The shipments for January were about 53,000 tons, being an increase of approximately 9,000 tons over the corresponding month of 1910. The outdoor winter occupations were generally active. The lumbering industry was active, the heavy frost and a moderate snowfall facilitating operations. Wholesale and retail trade was fair. There is some discontent among dry-goods and other merchants with the amount of dealings carried on by mail-order houses outside of the district. A co-operative store has been started in Westville, the shares being chiefly held by workingmen. As far as can be learned, a good business is now being done and the store is in a flourishing condition. No changes have occurred in rates of wages during February.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Quiet conditions prevailed. Farm products brought good prices. Potatoes in particular were scarce and have advanced in price.

Lumbering.—This industry after a slackening in operations in the early part of the season has with favourable weather conditions been very active.

Manufacturing.—Indoor work was active.

Mining.—Active conditions were reported throughout the district, and outputs were fair. The Drummond Company has commenced mining bottom coal. In mining operations during the past thirty years this coal was left undisturbed, the top seam, 17 feet in thickness, was worked to a depth of about 10 feet, leaving about 6 feet unmined. If the operations prove successful, it wil, greatly benefit this district, and add hundreds of thousands of tons of coal to the Company's already extensive areas.

CONDITION OF PARTICULAR TRADES.

Gas and steam fitters and plumbers were active; the other building trades were quiet. Jewellers had a fair month, the other branches of the metal trades being active. The printing trades had an active month. Boot and shoe workers were active, and tailors had a fair month. Food and tobacco workers were active. Delivery employés, hotel, restaurant and laundry employés were active. Street railway employés, carters, draymen, teamsters and expressmen reported an active month. Unskilled labour was quiet.

HALIFAX, N. S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month has been dull, and to a greater extent than during the same period for some years. The building trades, while generally quiet in February, on account of the weather and of the fact that employers contend that it costs fifty per cent. more to carry on operations in the winter months, have been exceptionally dull. The result was that many skilled mechanics were idle and compelled to seek other work to sustain themselves. While there have been some snowfalls, there were but few of sufficient depth to give the rather large field of unskilled labourers much work. But while the stagnation in the building trades has been severe, prospects for the season of 1911–12 indicate a more active period than has been experienced for the past eighteen months. The Canadian Pacific Railway Company, it is reported, is seeking to secure a location for a big hotel and possibly a ticket agency. There were also rumors of some big contracts by which some of our business structures may be converted into modern banking houses.

Work along the waterfront, while dull during the early part of the month, became much brisker towards the end, and indications point to March and April being busier than for some years. Aggregating the arrivals in Halifax of the steamers of the Allan, Furness-Withy, Royal, White Star, Dominion and Uranian lines, there should be an average steamer a day arriving at Halifax, from March until the season ends about the middle of April. Last year the arrival of immigrants was the largest on record, but this year promises to eclipse 1910, as far as immigration goes, to say nothing of the increase of freight arriving for shipment over the Intercolonial Railway. But even with this increased volume of business, the labour market is quite adequate to cope with it all. Among shipments of apples for the month, was one of 6,000 barrels for London and Antwerp.

The fifteenth annual meeting of the Halifax Electric Tramway Company was held February 13. The report of the directors showed an increase of business. In view of the general condition of the Company, a reduction in the rates for electric light to the extent of ten per cent. would be allowed general consumers, being equivalent to something over one per cent. on the capital stock of the Company. The proportion of operating expenses to income was reduced to 51.94 per cent., as against 53.54 per cent. The assets are $2,588, 191.85; surplus account $518,048.30. The net earnings last year were $200,474.61, an increase of $22,500.-82, the year's surplus being $102,474.61. The total earnings were $477,109.06, being an increase of $30,539.22 over 1909.

The Bank of Nova Scotia has declared a dividend at the rate of thirteen per cent. per annum on the paid-up stock of the Bank for the quarter ending March 31.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Prices of meats have remained about stationary; eggs have fallen 10 cents per dozen; butter has increased slightly.

Fishing.—Local fishermen did poorly, mainly through scarcity of the product and the cold weather. Fish is decidedly scarce throughout the province, and the prices high, one cargo of cod rencently selling at Lunenburg, at $6.50 per quintal, said to be highest yet recorded. Dealers expect much difficulty in supplying the market until the arrival of spring catches. Some late wholesale quotations follow:—

Dry cod, large, hard shore, choice	$ 7.75–$8.00
" medium, hard shore	7.00– 7.25
" small, hard, shore	6.75– 7.00
" large, bank	7.00
" bay	6.50
Haddock, hard shore	5.25– 5.50
" western	5.00
Hake	4.75–5.00
Pollock	5.00
Ex vessel, per bbl.:	
C. B., No. 1, July herring	4.75– 5.00
Newfoundland, fat, herring	4.00
Bay of Islands, spring	3.30
Shore, No. 1, large, split	4.50
Alewives, No. 1, large	5.75
Mackerel, No. 3	15.00
" No. 2	18.00
" No. 1	20.00

Lumbering was quiet.

Manufacturing was fair.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, plasterers, painters, stone-cutters and builders' labourers were dull. Gas and steam fitters and electrical workers were fair. Blacksmiths were quiet. Boilermakers were dull. Other lines normal, season considered. Printers, pressmen and bookbinders were busy. Tailors were dull. Boot and shoe workers had a fair month. Bakers, butchers and ice cutters and drivers were well emyloyed. Barbers had a fair month. Railway men generally were well employed. Longshoremen were dull early in the month, but towards the end, with the arrival of many ocean liners, work became brisker. Unskilled labour was dull.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

February was an exceptionally busy month. The lumber industry was very brisk, the weather was fine, the hauling good and she demand for men was far beyond the usual average. More lumber was cut and yarded during February than for any corresponding month for the past three years. The Amherst Boot & Shoe Company held its annual meeting during the month. The reports showed that the output for the year was very large. The usual six per cent. dividend was declared. The sales last year were $100,000 in advance of the previous year.

The Eastern Coal Company has practically ceased operations. Large sums of money have been spent in mine equipment and general surface work, but the trouble has arisen over locating the seam of coal.

Car-building, which is the main industry here, has been very active, and the pay-roll for February has averaged over 1,200 hands. The strike at Springhill seems as far from settlement as ever. The coal output of the Company has shrunk very materially during the past two months, and notwithstanding the fact that a large number of men were at work it appears that little progress is being made, probably owing to the fact that experienced coal miners are hard to obtain.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Everything was quiet in agricultural lines. Farmers were complaining that they cannot find a market for their hay crop of last year. Other lines of products continued high, with a good local market.

Fishing.—The smelt and other winter fish catch has been fairly good, and the prices high.

Lumbering.—The weather throughout

February was exceptionaly good for all branches of lumbering and cutting, yarding and sawing was very brisk. More men have been employed in February steadily than for some time.

Manufacturing.—Work has been steady in all of our industries. There has been no slack time, except in the Robb Engineering Company. The pay-rolls have been exceptionally large for the time of year.

Mining. — Except at Springhill, the work in the different mines has progressed steadily. The mines at Chignecto, after some weeks' idleness, have resumed operations.

CONDITION OF PARTICULAR TRADES.

Work has been dull in the building trades, but the prospects are good for the approaching season. This applies to bricklayers, masons, carpenters and joiners, and all the other building trades. Iron moulders, iron workers and helpers have been exceedingly busy. Machinists and engineers have been busy. Electrical workers were busy, boilermakers steadily employed, and horseshoers reported work dull. Woodworkers have been well employed. Wood carvers have had steady work. Car builders were very active, and pattern workers fairly active. Printers were busy and pressmen well employed. Garment workers were active. Boot and shoe men were working steadily, with some demand for additional help. Bakers and confectioners had a good month. Butchers and meat cutters were well employed. Trunk and bag workers were actively employed during the month. Clerks and stenographers were steadily at work. Unskilled labour had a good month, for this season ofthe year.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during February developed little change from that of January. The supply was in excess of the demand. In Charlottetown, the principal building operation was the remodelling of the new building of the Royal Bank of Canada. The severe weather precluded outdoor building work being carried on to any great extent. The manufacture of gasoline engines, a new industry here, was carried on extensively by Bruce Stewart and Company. In other lines of activity conditions were normal. Communication with the mainland was somewhat irregular, owing to the unusual quantity of ice in the Straits, but the new Steamer the *Earl Grey* did excellent work, justifying the expectations entertained concerning her.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The usual farming operations common to this time of year, such as feeding stock, hauling mussel mud, getting out rails, &c., were carried on. The annual meeting of the Dairy Association was held in the latter part of the month. The value of the cheese and butter produced by the factories was $514,000 an increase of $12,000 over last year. The industry has been steadily advancing during the past five years.

Fishing.—Smelt fishing closed the middle of the month. Since then, the lobster fishermen have been busy getting out material for traps and preparing for the opening of the season.

Manufacturing.—The few factories in this almost exclusively agricultural province were carried on under the normal conditions of supply and demand being well balanced.

Railroad construction and employment.—Some work was done during the month on the Elmira Branch. The situation in the regular routine on the road and in the works was practically unchanged from January. Owing to the two winter steamers running to Georgetown there was an increased activity at that port.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, lathers and plasterers, painters, decorators, and paper

hangers, stone cutters and builder's labourers had a dull month. Carpenters and joiners, plumbers, gas and steam fitters were active. Iron moulders, workers and helpers, machinists and engineers, steam engineers, electrical workers and sheet metal workers were active. Wood workers, carriage and wagon makers, and car builders were active. Printers and book binders, journeymen tailors, garment workers and boot and shoe workers, bakers and confectioners and tobacco workers, tanners and curriers and saddlers, clerks, stenographers and delivery employés were active. Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen, freight handlers were active. Longshoremen (except those at Georgetown, in connection with the winter boats), had a dull month. Teamsters and expressmen had a dull month. There was a fair demand for unskilled labour.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Quiet but steady conditions prevailed in the labour market during February, the various trades showing no expansion over those of the preceding month while no new sources of employment presented themselves. Supply and demand remained in about the same relation to each other as heretofore, the former, as is usual at this season being in excess of the latter. Owing to the fact that fully seventy-five per cent of the labouring population have virtually permanent employment the number of persons affected by the fluctuations of the market is small and largely confined to the unskilled class. The building trades were quiet, but the outlook is good. Considerable building operations are projected here while at Campbellton with the advent of spring active construction upon a large scale will begin and an extensive field of labour will be open for all connected with the building trades. Civic estimates also foreshadow the employment of much labour in proposed water extensions and permanent sidewalks and street work. The Moncton Tramways, Electricity and Gas Company will take over the City Electric Light and Gas Plant on or before March 26, and the work of installing the natural gas will have begun. Ten miles of gas mains will be laid from the wells to the bridge and about 35 miles of piping will be required in the city. Five and one-half miles of street railway within the city and 1½ miles outside are to be constructed and it is expected to have the cars running by autumn. A large force of men will be required for this work. In the Intercolonial Railway shops fifteen vans and one stores car were being constructed. Customs' returns for January showed imports to be $55,137 and duty $5,135,as against imports $45,418 and duty $4,483, being a marked increase. The Intercolonial Railway trackmen have had their wages increased 10 cents per diem by the Board of Management. The maximum will now be $1.70 and the minimum $1.60 per day. Foremen are increased from $2.00 to $2.10. The Board of School Trustees have granted an increase of $50 each to the principal of Wesley Street school and two members of the High School staff and an increase of $25 per year to all female teachers upon the staff, commencing with next term. About twenty-eight persons are affected. No other changes of rates in wages were noticed and there was no unrest upon the part of employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were quiet work being limited to the care of stock, the getting out of wood and the movement of hay.

Fishing.—The smelt season closed, February 15. Catches and shipments were reported somewhat in excess of last season, but hardly up to the mark of other years.

Lumbering.—Favourable conditions of weather and roads the entire month greatly facilitated the getting out of logs. Upon the Miramichi waters the

output will exceed that of last winter. Local operators were also getting out large cuts.

Manufacturing.—In the cotton factory, woollen mill and foundry steady conditions prevailed.

Mining was quiet.

Railroad construction and employment.—Throughout New Brunswick the month of February has been exceptionally favourable for the operation of trains, the snowfall being very light. A safety gate has been placed at the Main Street crossing by the Intercolonial Railway and a second track is being laid from the station to the new shops.

CONDITION OF PARTICULAR TRADES.

The various craftsmen in the building trades reported quiet conditions. Iron moulders and iron workers and helpers, machinists, stove mounters, electrical workers, boiler makers, blacksmiths and horse shoers were busy, as were woodworkers, upholsterers and carmen. Printers, pressmen and bookbinders were busy. Journeymen tailors and garment workers were steady. Bakers were active and butchers busy. Tanners and curriers were quiet and leather workers busy. Barbers were busy. Clerks and stenographers were steady with demand limited. Laundry workers were busy. Railroad conductors, engineers, firemen, telegraphers, trainmen, switchmen, and trackmen were busy. Freight handlers, carters and expressmen were fairly active. Unskilled labour was quiet, the demand being limited.

ST. JOHN, N. B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during February was brisk in some branches of industry, and dull in others, notably bricklayers and masons; but as the spring approaches it is estimated a revival will take place. Arrangements were completed on February 25 for the Whites, Limited, to take over the business of the White Candy Company. The business will be continued here, and the plant will be operated to its fullest capacity. Up to February 25, there had been filed at the Custom House cargoes for fifty-four steamships, which took away Canadian goods valued at $7,856,718, and foreign goods valued at $4,301,169, making a total valuation of $12,157,887. Bank clearings for the five weeks ending February 23 were $11,896,550, and for the corresponding period last year $11,964,043, being $67,493 less in 1911 than in 1910, and $5,941,234 greater than during the four weeks ending January 26 of the current year. The Savings Bank deposits for the month of January were $60,698.37, and the withdrawals $71,198.20. For the four weeks ending February 20, the city cashier paid out in wages to civic employés the sum of $10,235.14. Inland revenue receipts for January show an increase of $1,179.03 compared with January last, being $16,192.47, as against $15,013.44 in January. 1910. The customs' receipts for the month of January show a decrease of $15,027.58 as compared with the same month last year. The anual meeting of the shareholders of the St. John Railway Company was held on February 27. The date of the fiscal year has been changed to make it conform to the calendar year, so the report is for eight months only, and shows the net profits for that period to be $34,840.27 out of which a half yearly dividend of three per cent., was declared, amounting to $24,000, leaving a balance of $10,840.27 which was transferred to profit and loss account.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Hay sold in the Fredericton market, on February 25, at $6 and $7 a ton.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull. Carpenters and joiners, painters and decorators were quiet. Plumbers, gas and steam fitters were active. Stone cutters were quiet. Builders' labourers were dull. Iron moulders, iron workers

and helpers were active. Machinists and engineers were busy. Steam engineers were active. Electrical workers and linemen were busy. Blacksmiths and boiler makers were active. Sheet metal workers were busy. Horseshoers were active. Wood workers were busy. Shingle weavers very dull. Printers were busy in some shops and dull in others. Pressmen were busy. Bookbinders were active. Journeymen tailors were busy. Bakers and confectioners were active. Ice cutters and drivers were busy. Cigar makers were active. Brush and broom makers were busy. Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen, and freight handlers, were busy. Steamboat men and firemen were active. Ship labourers were active. Street railway employés were busy. Teamsters and expressmen were active. Unskilled labour was dull.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during January were very quiet, much more so, in fact, than for several years. There were, of course, the usual number of men employed in the lumber camps. The price of fish was 6 cents per pound, dropped to 2 cents about the end of the season, and the number of men employed at the trade never was so great, there being as many as 2,000. The catch was good, and one firm shipped as many as four carloads a day. Until the mills start sawing, there will not be much to do, that is until the first of May. There is no new industry in sight at the present time, although the Broad of Trade has appointed a committee to advertise the town.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is not much work, except in caring for stock and getting in firewood. The weather has been very cold since the first of January, and there was an abundant fall of snow, which was much wanted by the lumber interests. The snow in places was so deep as to interfere with work in the woods, but it will ensure getting the logs out in the spring.

Manufacturing.—The small factories, such as planing and sash and door mills, and other light work shops, were busy.

CONDITION OF PARTICULAR TRADES.

Plumbers were kept very busy on account of the many frozen pipes, caused by the severe weather.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and *E. Little, correspondents,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of February has been a quiet one, and had it not been for the frequent snowstorms, especially in the early part of the month, there would have been little work for outdoor labour. In the latter portion of the month the very cold weather had the effect of diminishing the flow in nearly all the rivers in this district, causing short-time to be worked in mills and factories dependent on water power. The demolition of the Champlain market was almost completed. Some unrest was noticed among the shoeworkers.

The practicability of winter navigation to and from Quebec was demonstrated by the Dominion Government steamer *Montcalm,* which left here on February 5 for Seven Islands and Anticosti, with passengers, mails and cargo. The steamer arrived at Ellis Bay, Anticosti, after a forty-eight hour run from Quebec, besides stopping on the way down at Pentecost and Clark City, Seven Islands. She returned to Quebec on February 24. The *Montcalm* has in previous years made voyages during the winter to Seven Islands and the North Shore ports and return, but this is the first winter trip she has made to Anticosti.

The Provincial Government free night schools for the working classes were closed

on the twenty-fourth instant, until next fall.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very quiet, devoting most of their spare time to visiting seed and poultry exhibitions, which were held in Quebec during the month.

Lumbering.—Heavy snow falls somewhat impeded lumbering operations.

Manufacturing.—Among the resolutions of the Trades and Labour Congress of Canada presented to the Government was one concerning the conditions in foundries. This matter has been considered by the Government, and Regulations dealing with the matter have been passed by the Lieutenant-Governor-in-Council, under date of January 30.

CONDITION OF PARTICULAR TRADES.

Carpenters and joiners, lathers and plasterers were active, gas and steam fitters were busy. The other building trades were dull. Ship builders, blacksmiths and iron ship builders were dull, but activity was reported in the other metal trades. Woodworkers were active. Bookbinders were active, while printers and pressmen were busy. Journeymen tailors, garment workers, hat and glove makers were quiet, but boot and shoe workers were busy. Tanners and curriers reported active conditions. Hotel, restaurant and theatre employés were quiet, but laundry workers were active. Steamboat men, ship labourers and longshoremen were dull. Owing to lack of water power, some forty street railway employés were laid off. The other t ansport trades were active. The supply of unskilled labour was in excess of the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally has been well employed during the month, when it is taken into account that there was not much outside work being done. All the factories and machine-shops have been fully employed, and the surplus unskilled labour has been absorbed so that very few idle men could be seen on the streets. The contractors for the new dam on the Magog river, for the City of Sherbrooke, have already placed a portion of their plant on the grounds, and several men are engaged making preparations for a start just as soon as the weather breaks up. This contract calls for an expenditure of about $60,000, and it is the intention of the City to install an auxiliary plant at this point later on. The Sherbrooke Power and Railway Company has kept quite a number of men employed during the winter, so that it may be in a position to start its further extensions in the spring. This Company has made great improvement on the service, to the benefit of the public, and has also placed in service pay-as-you-enter cars of the modern type. The power plant is now running, and is supplying several large concerns with power, and some outside concerns are negotiating for power. Wholesale and retail merchants stated that business has been above the ordinary for the month of February. The City Council decided to give a grant of at least $3,000 annually towards the exhibition. The worst fire experienced here in years occurred in February, when the Bourque Block was gutted, and damage to the extent of about $15,000 was done. As soon as an adjustment was made, work was begun to repair the damage, and as a consequence employment was given to a number of workmen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural work was quiet, but there was a good demand for dairy produce.

Lumbering. — Lumbering operations were about closed for the season in the woods. There has not been such a large cut as in former years, owing to the slow market for pulpwood. There has, however, been more heavy timber cut in some sections than in the past five years.

Manufacturing. — All manufacturing

industries have been busy, and running full time.

Mining.—Business in the asbestos district was beginning to pick up again. Several properties at Black Lake and Thetford will open up on the first of March, after being closed down for a portion of the winter, and by the middle of the month it is expected that all the properties will be running to their full capacity. The Eustis copper mines have been ruuning night and day, and all applying for work were given employment.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were quiet, but as soon as the season opens there will be plenty of work for all, as several contracts have been let for additions to industrial concerns, as well as for private individuals. Metal and engineering trades were busy, with a sufficiency of orders ahead to insure full time for some time to come. Woodworking trades were busy. Printers and allied trades were busy. Journeymen tailors had an active month, while garment workers were busy. Bakers, confectioners and cigar makers were active. Ice cutters were busy. Miscellaneous trades were active. All branches of transport business were active. Unskilled labour was fairly well employed, considering the season of the year.

DISTRICT NOTES.

East Angus.—The new pulp mills of the Brompton Pulp & Paper Company at the dam are now in full operation.

North Hatley.—The North Hatley Manufacturing Company has been incorporated with a total stock of $20,000.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market showed little change compared with January, although a heavy fall of snow gave employment to a large number for a week or so clearing the streets and sidewalks. Preparations were being made by the Wyagamack Company for the erection of its new pulp and paper mill. There has been much talk of the formation of a Company to build an electric railway in the city and vicinity, but so far nothing has been done. The improvement in business activity has been more noticeable in the wholesale branch than in the retail. Rates of wages and hours of labour remained the same. As usual there has been no strikes or lockouts during February.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The month has been one of the best in the season for the sale of farm products. The prices obtained have been the highest that have been paid in the past for the same products. Work on the farm has been plentiful, but there was no demand for additional hands.

Fishing.—Conditions were very quiet.

Lumbering.—There was about the same number of men employed for the lumber firms this season as last.

Manufacturing.—All factories were running full time during February, a few of them being short of hands.

Railroad construction was quiet, but regular employment was good and steady.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were employed when the weather was favourable. Carpenters and joiners, lathers and plasterers, painters, decorators and paperhangers, plumbers and gas and steam fitters were employed most of the time, but stone cutters and builders' labourers were employed only part of the month. Iron moulders, iron workers and helpers, coremakers, machinists and engineers, electrical workers and nearly all employed in the metal trades had a good month. Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers, car builders and pattern makers all reported a fair month. The printing and allied trades were well employed. Journeymen tailors, garment workers, hat and

glove makers, boot and shoe makers, both male and female, were very well employed. Bakers and confectioners, butchers and meat cutters had a fair month, but ice cutters and drivers, and cigar makers and tobacco workers were very active. Tanners and curriers were quiet, but leather workers were active. Barbers were busy. Clerks and stenographers were quiet, Delivery employés, furriers, hotel, restaurant and theatre employés and laundry workers were active. All employed for the transportation companies were fairly well employed. Draymen and carters were active. Hackmen were fairly well employed. Unskilled labourers had a fair month.

DISTRICT NOTES.

It was rather quiet this month in the district, except at Shawinigan Falls, where the Shawinigan Water & Power Company is making extensive work to double its power plant.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour remained fairly active, although the cold weather caused the closing down of several plants. Activity in the building trades almost ceased during the month. Sash and door factories were busy enough to employ their full staffs. The month was a quiet one for shoe factories, as they were getting ready for stock-taking. The iron industry and manufacturers of farming implements had a good month. In the woollen industry, the month was a good one. The Penman Manufacturing Company was working actively with a large staff. Both organ and musical instrument factories were very busy. The leather industry was active during the month, but there was some slackening on account of stock-taking in the shoe factories. The biscuit, candy and pastry factory was very well employed. The clothing, underwear, blouse, corset, as well as the shirt and overall industry was very active during February. Work on the cathedral was pushed actively, a number of men being employed. Work on the large addition which the St. Hyacinthe Seminary is building was almost completed, but a number of men are still at work. The large storehouse built by the Penman Company also employed a number of men of all trades. The addition built by the Ames-Holden Company was completed, and operations will probably be commenced soon. Large shipments of hay and grain were made from St. Hyacinthe and vicinity to the United States. A large quantity of leather was also shipped to England. Retail business, as well as wholesale, was quiet in all branches, but travellers claim they will do better the following months. Banks reported a fair month, with collections fairly regular. Relations between employers and employés were cordial. There was no change in the hours of labour or rates of wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The general condition of agriculture was very good. Farm products sold well, at very high prices. Meat continued very high. Dairy products were in good demand, at very good prices. Eggs came down from 40 to 30 cents, and they were plentiful. Men working on the farm were fairly well employed, but there is no demand yet.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and paperhangers, had a quiet month. Plumbers and gas and steam fitters were fairly well employed. Stone-cutters and builders' labourers had a very dull month. Iron moulders, iron workers and helpers, machinists, engineers, electrical workers, blacksmiths, boilermakers and horseshoers were very busy. Woodworkers, upholsterers, varnishers and polishers, wood carvers and pattern makers had a quiet month. Printers, pressmen, bookbinders and allied trades had a good

month. Journeymen tailors and garment workers were active. Boot and shoe workers had a quiet month. Tanners and curriers and other leather trades had an active month. Bakers and confectioners, butchers and ice cutters were very well employed. Barbers, clerks, delivery employés, hotel, restaurant and theatre employés were active, as were laundry workers. Railway employés were active. Trackmen, freight handlers, cab drivers, hackmen, carters, draymen, teamsters and expressmen were well employed. Unskilled labour was very busy.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour during February continued more active than last year during the corresponding month. There was not as much unemployment as in preceding years. Factories continued active, and the prospect is they will remain so for the balance of the winter. Building operations seemed to slacken at first, but this was only temporary. Norcross Brothers' stone-cutting sheds have been rebuilt, and have resumed their usual work. Work was progressing on the Cluett-Peabody building, and there are several additions and repairs under way, and next summer is expected to be more active than the corresponding season last year. Wholesale trade, which had somewhat slackened during January, has become more active in February, as well as the retail trade. Banks reported a quieter month than the preceding one. There was no change in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers experienced a little slackness in the marketing of hay, prices having come down. They were busy, however, hauling grain and produce and caring for stock. It is stated farm labour will be in good demand in the spring. Farmers were also fairly busy cutting and hauling firewood.

Railway construction.—The Canadian Pacific Railway bridge between St. Johns and Iberville was completed and is ready for traffic.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were somewhat dull. Carpenters and joiners, lathers and plasterers, painters and decorators, plumbers and gas and steam fitters reported a fair month. Stone-cutters, after nearly two months of idleness, have actively resumed work, as have builders' labourers. Iron moulders, iron workers and helpers, coremakers, machinists and engineers reported a good month. Ship builders and ship carpenters and caulkers were very busy repairing the dredging fleet used in deepening the Richelieu river. Tool sharpeners, horseshoers and jewellers reported a busy month. Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, pattern makers, coopers and gilders reported a busy month. Printers, pressmen, bookbinders, electrotypers and photoengravers reported a good month. Journeymen tailors, garment workers, hatters and glove makers had a rather quiet month. Bakers and confectioners, butchers and meat cutters and tobacco workers reported a fair month. Tanners and curriers, leather workers, and saddlers reported a rather quiet month. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés and laundry workers reported a busy month. Railway conductors, engineers, firemen, telegraph operators, trainmen, switchmen, trackmen, freight handlers were busy. Cab drivers, hackmen, carters and draymen, teamsters and expressmen, as well as unskilled labour, were also busy.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour and business were active during February. All the factories and shops

were in active operation. In the shipyards, there were several boats being completed for the opening of navigation. The fleet (163 boats) belonging to the Department of Marine and to the Richelieu and Sincennes-McNaughton navigation companies were under repairs, employing several hundred joiners, carpenters, caulkers, machinists, painters, plumbers, &c. Several lighters, barges, &c., privately owned, were under repairs, so that all those wishing to work easily found employment at wages ranging from $1.50 to $3 per day. There is some talk of a company being organized to manufacture ladies' underwear and men's overalls, employing between 100 and 125 young girls at salaries ranging from $2 to $6 per week.

The dry-goods business revived towards the end of the month, and tailors took back some of the hands, men and women, they had to discharge after the holidays. Business was good in the grocery and provision trade.

Several contracts have already been awarded for new tenement houses. Contractors have started getting their building material in readiness. Cement will be extensively used next season, in house building, as well as for sidewalks, &c.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy marketing their produce. They have hauled large quantities of hay to the market. Prices ranged from $6 to $8. Fresh eggs sold from 30 to 35 cents per dozen; turkeys, from 18 to 20 cents per pound; other poultry, from $1.25 to $1.50 per couple; fresh butter, 26 cents per pound; and potatoes, 70 cents a bushel.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

On account of the cold weather, several classes of labour in the building trades were quiet during February, but the month was better than February of last year. The winter, on the whole, was more satisfactory than the three preceding ones. There was no sign of any disturbance in any industry. Five hundred and twenty-five permits were issued, in Maisonneuve, for buildings valued at $1,386,693, being for 500 dwellings and twenty-five stores.

CONDITION OF PARTICULAR TRADES.

Bricklayers were a little more quiet on account of the cold weather. Masons were quiet, lathers and plasterers very active, painters and decorators fairly active, and plumbers and gas and steam fitters active. Stone-cutters were fairly well employed, but builders' labourers were quiet. Metal workers and tinsmiths were well employed. Electrical workers and horseshoers were in demand. Carriage and wagon makers and car builders were active. All the other wood-working trades had a fair month. Pressmen and bookbinders were in demand, the other printing trades being very active. The clothing trades had a good month. The food preparation trades were fairly active. Leather workers were well employed and curriers were in demand. Barbers, clerks and stenographers were in demand, the other miscellaneous trades being active. All the transportation trades were fairly well employed, except longshoremen. Unskilled labour had a better month than in January, several hundred men being employed at snow clearing most of the month.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The report of the building inspector's office for January showed a light increase in the number of permits issued, and a very large increase in the value of buildings, over the corresponding month of last year, as follows:—

	1910		1911	
	Permits.	Value.	Permits	Value
Buildings	57	$136,500	58	$331,365
Repairs	16	22,900	18	34,375
Total	73	$159,400	76	$375,840
Increase			3	$206,330

The following, from the annual report of the building inspector for 1910, shows how the sum of $15,000,000, representing the value of permits issued during the year, is divided between the various wards of the city, the new wards included:—

Sainte-Marie	$ 424,238
East	214,648
Delorimier	492,035
West	601,000
Hochelaga	661,301
Centre	1,101,393
Laurier	1,840,213
St. Lawrence	1,188,933
St. Denis	1,507,938
St. Louis	337,109
Côte des Neiges	7,393
Lafontaine	159,709
Rosemont	20,520
St. Jacques	232,025
Bordeaux	26,293
St. George	2,079,418
Ahuntsic	16,343
St. André	1,229,968
Emard	40,521
Papineau	640,132
St. Paul	228,221
Ste. Anne	174,018
Mont Royal	40,565
St. Jean Baptiste	243,726
St. Joseph	174,878
St. Henri	394,938
Ste. Cunégonde	70,693
Notre Dame de Grâce	244,653
St. Gabriel	21,493
Duvernay	122,855
Total	$14,535,180
Repairs	1,180,679
Grand total	$15,715,859

In 1909 the total value of permits was $7,783,621.

Bank clearings in Montreal were as follows:—

$176,630,018	in January	1911
176,154,089	in "	1910
134,930,521	in "	1909

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Marketing was fairly good during the month, and the price of certain cereals has gone up.

Manufacturing.—Sash and door factories were running full time; other industrial establishments were generally active.

Railway construction was very quiet.

CONDITION OF PARTICULAR TRADES.

Building trades were active, with the exception of bricklayers and masons and stone-cutters, who were idle on account of the cold weather. All the other trades, with the exception of those engaged in the steamboat service or building, were active Unskilled labour was quiet.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been little change in the condition of the labour market since January. Conditions are somewhat quieter, on account of the paper and pulp industries being dull. Orders are plentiful, but the mills cannot be run to their full capacity, owing to the water being low at Chaudiere Falls. The usual staff of men and girls is employed, but there is no overtime made, either at Booth's or Eddy's. The Ottawa Forwarding Company is employing some fifty hands at its shipyard in Hull. They are preparing for navigation, repairing and overhauling canal barges and tow boats. The Matthews pork-packing establishment is turning out more stuff this winter than any time previously. The Walters axe factory and the Hanson woollen mills were very busy. Ice cutting and snow-shovelling were two abundant sources of employment during February. The City Council having decided to submit by-laws for the borrowing of $93,500 to the taxpayers, on March 13, it is likely all or part of this money will be spent during next summer to continue the civic works, such as the Flora lake sewers and the waterworks. This should make employment good, as the mills also expect to run at their full capacity.

OTTAWA, ONT., AND DISTRICT

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Lack of employment among the skilled

trades was more noticeable during February than it was a year ago. Fewer large buildings were in course of erection. Toward the end of the month hiring became more active among contractors on small jobs. The building trades look for improvement in conditions during March. Some of the planing mills and fine lumber factories laid off hands temporarily pending an increase in orders for building material. Abnormally low water in the Ottawa river hindered pulp and paper manufacturing at the Chaudiere to such an extent that several hands were thrown idle although for the most part the mill owners found special work for a large number. The heaviest snow storm in many years gave employment for the first half of the month to all men in search of work. The Ottawa Electric Railway Company required 450 men of whom 100 were teamsters. The Canadian Pacific Railway hired 300 men the civic corporation 200 men and the Grand Trunk Railway 100 men. The expenditure of the city and street railway for snow removal during the winter to date is $26,000 or double the amount for the whole of last winter. The outlay of this sum helped to relieve a money stringency in many poor homes of the city. The chief employers, however, stated there was not the usual rush for work when the snow shovellers were needed. Logging operations in the upper Ottawa camps were hindered by the snow which in some parts measured four feet deep. A few gangs were released where lumber firms had ample supplies of logs taken out. Where the storm did not affect lumbering the cut will go on as usual. The usual quantity of logs is being hauled by train from Madawaska to J. R. Booth's mill.

Wholesale and retail trade was normal. The financial market was characterized by numerous real estate transactions. Business sites in Ottawa showed remarkable appreciation in value.

The annual report of the Ottawa Electric Railway Company gave the net earnings for the year 1910 at $277,292, an increase of $79,374. The gross earnings were $748,708. The number of passengers carried in 1910 was 16,987,334, a gain of 2,000,000 over the previous year.

The Municipal Electric Commission decided to reduce its rates for electric lighting by nineteen per cent. on an average. Meter rental will be abolished. The present rate of 8 cents per 1,000 Watt hours will be changed to 3½ cents with an additional flat charge of 4 cents per 100 square feet of lighted space.

Typhoid fever which broke out in Ottawa in January had over 700 victims by the end of February. The city authorities are now considering a new source of water supply.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm work was made difficult by heavy snow. Water was scarce. Pork prices on the Ottawa market weakened, selling at $8.50 to $9 per cwt. Beef continued firm. Vegetables were offered plentifully by farmers and were at normal winter prices.

Lumbering.—Lumbering was active in the woods except in a few districts where deep snow interfered. The spring drive promises to be satisfactory owing to prospective high water. Sales of low grade lumber were slow, but all prices were firm.

Railroad construction and employment.—The Grand Trunk Railway Company proposes to erect larger shops in Ottawa the coming season.

CONDITION OF PARTICULAR TRADES.

February was quiet among the building trades. Several bricklayers, carpenters, plasterers and plumbers were partially idle. Electrical workers and linemen had a quiet month. The iron trades were fairly busy. Car builders and carriage and wagon makers were busy, also furniture hands, but employment was not brisk in the woodworking trades in house lumber factories. The printing trades were busy. An average state of activity prevailed in garment factories. Ice cutters and teams for hauling ice were much in demand. The leather trades were fairly well occupied. Delivery employés were not busy and some were out of work. It was a quiet month

for employment of clerks and stenographers. Laundry workers and barbers were busy. Transport employés had extra work on account of the snow storms which interfered with train schedules for two weeks. The usual freight and passenger movement for the season was observed. Unskilled labour was poorly employed except for snow shovelling.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active during the month of February in nearly all branches. Some branches of the transportation business were interfered with as the result of very heavy snow falls. On the other hand much extra employment was given clearing away the snow from the various lines, streets, yards, &c., Considerable activity was evinced in the building trades, indoor work of various kinds being carried on largely for this season of the year. As a result of the various conferences held between representatives of the Wilbur Iron Company, members of the city council, the board of trade, and several Ministers of the Government at Ottawa the work of constructing a large pier to be used by the Company was commenced on the twenty-third of the month. The North American Smelting Company on the seventeenth signed the agreement made with the City Council sometime ago. A check for $2,700 was handed to the City Clerk, and the Company is now going ahead with its lead smelting proposition here. The plans have been passed by the Dominion Government, and tenders are being called for the erection of a new wing to the Kingston Post Office. At a meeting held during the month the Thousand Island and St. Lawrence Steamboat Companies were re-organized.

The United States Consul has completed a comparative statement of the exports from this district to the United States during the years 1909 and 1910. Last year the exports were about $197,000 less than in 1909, but in the latter were included shipments of Cobalt silver, which came by this route, but which did not properly belong to this district. The amount of the silver exported in 1909 through this port was $132,437. None came down this way last year. In 1909 there was exported $83,000 more hides and skins than in 1910. The city engineer is preparing an estimate of the cost of the erection of a public bathing house. The profit on the light, heat, and power plant owned and operated by the city for the year 1910, was $18,000. It has been decided that the Kingston Shipbuilding Company who lately acquired a lease of the Government drydock, will have to pay a school tax on $160,000. Engineers representing the Dominion Government are here in connection with proposed work in the harbour. A meeting of the Trades and Labour Council was held on the sixteenth. New offices and committees were elected. On Monday night, February 13, an address was given here by Dr. Sampson, lecturer-in-chief, on Government annuities. There was no change in the rates of wages, hours of labour, nor any strike or lockout reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a busy month, cutting ice, drawing wood, timber, hay, straw, produce of nearly every description, and getting ready for spring work.

Fishing, lumbering, manufacturing, mining, railroad work, and other industries were active.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering, shipbuilding and repairing, wood working, furnishing and allied trades reported a active month for this season of the year. Printers, clothiers, bakers, butchers, ice cutters, cigar makers, tanners, barbers, broom makers, furriers, hotel, restaurant, laundry and theatre workers and un-

skilled labour reported a busy month. All branches of the transport business were active, except a few hours on account of heavy storms.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general conditions of the labour market remained unchanged from last month, all the large manufacturing industries being steadily employed. The outdoor trades, owing to weather conditions, have been quiet and the supply of labour equal to the demand. The Canadian General Electric Company will construct a new building for the lamp department. Work will be started as soon as weather conditions will permit. The building will be 60 x 250 feet. The cost will be $250,000. The building will be five stories high counting the basement. The Company will also put up a new office building. The Murry Street Baptist Congregation is advertising for tenders for a new church to be built this year; the estimated cost of church, including site, is $55,900. The annual financial statement of the Water Commissioners showed a surplus of $2,030.13. They expended $12,565.36 on ordinary construction work, and on the construction of the new dam, pumping station and pumping machinery, $42,827.51. The water works are owned by the city. The city firemen asked for an advance of 10 cents per day and it was refused by the council. This present scale is $1.37 per day. The tax rate will be the same as last year, 22 mills for Protestant and 24 for Roman Catholic supporters.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were generally busy marketing produce, the prices for which remained high. Some inquiries were being made for farm help for the coming season. Peterborough is to be a dairy record centre. The work will be started as soon as the details can be arranged.

Manufacturing.—Activity prevailed at all the manufacturing plants, with plenty of orders ahead.

Railroad construction.—Work on the Canadian Northern Railway is being pushed as rapidly as the weather will permit.

CONDITION OF PARTICULAR TRADES.

The building trades had a quiet month. The metal and engineering trades were active. Wood workers, upholsterers and varnishers were busy. All branches of the printing trades were active. Journeymen tailors and garment workers were quiet. Bakers and confectioners were busy. Butchers and meat cutters were active. Leather workers were busy. Textile workers and carpet factory workers were quiet. Broom makers were busy Railroad and street railway employés had an active month. Freight handlers, teamsters and expressmen had a busy month. Unskilled labour was quiet.

DISTRICT NOTES.

Lindsay.—The outlook for the new Sylvester Manufacturing Company is of a very promising character; the industry is at present experiencing busy conditions, about ninety men being employed. The foundry is running until nine o'clock at night.

Lakefield.—The contract for the building of the new factory of the Lakefield Canoe Building and Manufacturing Company, lately destroyed by fire, has been let to Messrs. Baptie Brothers, who have already commenced operations.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during February were hardly as favourable as earlier in the winter, a large number of skilled and unskilled workers being out of employment.

The building trades continued unusually active for the season, the mild weather during a large portion of the month enabling outdoor work to be carried on, but the great influx of men from outside places looking for work has more than counterbalanced this favourable circumstance. Many factory workers were also unemployed. The dullness among those out of work has been increased by the lack of any provision for giving relief work by the city, such as obtained in former years, and owing to light snowfalls during the month there has been but little temporary work in snow-clearing to be had.

Permits were issued in January for 137 buildings, representing an approximate value of $458,580, as against permits for 142 buildings of the value of $682,088 for January, 1910. The receipts of the Toronto street railway for January were $362,380, of which the City's percentage was $43,485, as compared with total receipts of $331,346, of which the City took $37,704, in January of last year. At the monthly meeting of the House of Industry, on the twenty-first, the reports showed that 330 new families received assistance during the month, making a total of 1,181 families receiving relief. Casuals to the number of 431 were sheltered, and there were 182 inmates of the home. The annual meeting of shareholders in the Labour Temple was held on the eleventh. The report showed that the mortgage had been reduced from $11,500 to $10,500, and that the cash in hand amounted to $2,791. The assets were valued at $47,724, and liabilities to the public were $10,729. The City Council has adopted a scheme for the extension of Queen street west from Sunnyside into High Park, north of the railway tracks, in place of the proposed construction of a 66-foot subway for traffic under the railway at Sunnyside. Work will be started early in April on an addition to the Sherbourne street Methodist Church, to cost $50,000. A difficulty has arisen between the Great Western Telegraph Company and its operators about the discharge of employés who asked for a new schedule of wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm work was slack, as usual at this season. Market conditions for produce continued favourable.

Manufacturing.—Most lines were fairly active, though in some departments men have been laid off. The iron trades were generally quieter than last month. The textile and woodworking industries were generally steady. The prospects are favourable for an active season, as soon as the spring opens. The Lake of the Woods Milling Company will build a mill, 100 x 120 feet, on Dupont street. The Canadian General Electric Company has obtained the contract for the plant of the new power station of the Winnipeg Electric Railway, which is to be installed in four units of 3,000 kilowatts each.

CONDITION OF PARTICULAR TRADES.

The building trades have been fairly employed, so far as the weather permitted but a large proportion of carpenters, painters, and labourers were out of work. Blacksmiths, boilermakers, moulders, machinists and structural steel workers were quiet. Electrical workers were fairly well employed. Brass workers had steady work. Jewellers and silversmiths were fair. Woodworkers and pianoworkers had a good month. Printers, bookbinders, pressmen, stereotypers and lithographers were active. Custom tailors had a fair amount of work. Garment workers,boot and shoe workers, and hat and cap workers had steady employment. The provision and tobacco trades had an average month. Leather workers were active. Hotel and restaurant employés, barbers and laundry workers were fair. Railway and street railway employés, expressmen and others engaged in transportation were active. A large proportion of unskilled labourers, especially recent arrivals, were out of work.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Continued cold and stormy weather

rendered impossible the carrying on of many lines of outdoor work, and materially affected the general condition of industry during February. But for this feature, the month would have been a very satisfactory one. There will be a general renewal of activity as soon as weather conditions permit. Transportation returns show heavy traffic by rail. Commercial and financial conditions were steady, and satisfactory. Retail trade was very good. The cash system is steadily taking the place of the extensive credit system which has always been a feature of retail business in this city. The Ontario Power Company has been paying out about $35,000 per month in wages. A hundred unskilled labourers of the night shift were laid off for a time. The annual report of the chief of the fire department for 1910 shows a loss by fires, within the city limits, of a little over $5,000. Extensive improvements to city schools are contemplated.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Very little was done in the agricultural line. Deep snow and storms prevented outdoor work.

Fishing.—Fishing through the ice on Lake Erie gave employment to several hundred men at times.

Lumbering.—Small saw-mills were in operation in several parts of the district, each employing a few men.

Manufacturing concerns were all busy. Factories reporting this condition included the cyanamid, railway switch, corset, cutlery, hat and haberdashery; while the shredded wheat works were running overtime. The sanitary can factory was employing a reduced staff, but preparing for a busy spring.

CONDITION OF PARTICULAR TRADES.

Unfavourable weather affected the building trades most seriously. Bricklayers and masons, carpenters employed in outdoor work, lathers, plasterers and painters were all quiet. Plumbers were better employed. Stone-cutters and builders' labourers were practically all idle. Carpenters employed in house-finishing and shop work were active. All metal working concerns were employing full staffs. Electrical workers and linemen were active. Journeymen tailors were quiet. Employés of hat and haberdashery factories were busy. Bakers, butchers and icemen were quiet. Barbers, clerks and hotel workers were dull; laundry workers busy. Heavy traffic both freight and passenger, kept railway employment good on both steam and electric lines. Many men were employed in snow-removal work. Teamsters were quiet. Unskilled labour was largely idle.

DISTRICT NOTES.

Ridgeway.—About sixty men were employed in fishing through the ice. Some of the men were making profitable work of it.

Port Colborne.—The new cork factory was running night and day and employing twenty-five men. An additional number of millwrights were engaged in the new flour mill. The extension of the Niagara, St. Catharines & Toronto Railway from Welland to this place was opened.

Port Burwell.—Contract was let for a $240,000 breakwater.

Welland.—The absorption of the Ontario Iron & Steel Company and the Page-Hersey Tube Company by the Montreal Steel Company was followed by announcement of further developments here. A blast furnace will be built at a cost of a million dollars, and the tube mills will be doubled in size and will employ 250 more men. The contract for a new $8,000 office building was let. The Robertson Machinery Company has assigned. The new overall and knitting factories report a good supply of female labour. Three hundred men, in day and night shifts, were employed on the new Michigan Central Railway bridge across the Welland canal. A return of employés and wages paid per week in local industries is as follows:—

	Employés.	Wages per week.
Steel works and tube mill	600	$10,000
Beatty machine shops	180	2,750
Electro metals	125	2,370
Cordage works	325	
Canada Forge Company	30	
Quality Beds Company	30	

Quality Beds Company	45	
Supreme Heating Company	40	7,175
Knitting mill	50	
Overall factory	30	
Billings-Spencer Company	75	
Dain Implement Company	100	
Totals	1,600	$22,295

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The conditions of the labour market for the month of February were active, and compared favourably with last month and the corresponding month of last year. Labour was generally well employed in the building trades. Every available day, when weather conditions permitted, was utilized, and conditions are favourable for a good season's work. The Public School Board called for tenders for a new school building for St. James ward, to cost approximately $30,000. The $180,000 new water main which was carried by the people at the municipal elections is now before the Provincial Legislature for ratification, and when approved the work of construction will be begun at once. The Niagara, St. Catharines & Toronto Railway extension line to Port Colborne, from its terminal near Welland, was completed, and service began on February 18. Business generally was good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Preparations for the coming season's work were under way, farmers trimming trees and vines, preparatory to spraying; sowing tomato seed indoors, for early plants, &c.

Manufacturing.—All the mills, factories and works were running full time.

CONDITION OF PARTICULAR TRADES.

All the building trades were as active as weather conditions permitted. The metal and engineering trades were active with conditions of employment favourable. Woodworking and furnishing trades had a good month's employment, conditions active. Printing and allied trades were active and well employed for the month. Journeymen tailors were active. Boot and shoe workers were busy. Bakers and confectioners, butchers and meat cutters, ice cutters and drivers, cigar makers and tobacco workers were active. The leather trades had a good month's work. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés and laundry workers were active and well employed. All lines of transportation were from active to busy. Unskilled labour was active, with supply and demand fairly well balanced.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed.

Merritton.—All the mills and factories were running full time. The new Lybster paper mills are ready for operation.

Thorold.—Labour was active.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed for this season of the year, and the month compared favourably with January and the corresponding month of last year. The iron trades were especially busy, considerable overtime was worked during the month. The building trades showed considerable activity; this applied more particularly to lathers, plasterers and carpenters, many of whom were pretty steadily employed during the month. Architects are very busy on plans for new buildings, contractors expect a very busy season in the building trades. A large tract of land, comprising sixty-five acres, has been sub-divided into building lots and are selling rapidly. As part of this tract is in the city, and in the factory district, a considerable number of dwellings will be erected as soon as weather conditions

permit. A large force of men was employed by the city on sewer construction.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturers were busy, and in several cases very busy, overtime being worked.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were unemployed. Carpenters were working short time. Lathers and plasterers were busy for this season of the year. Painters were not very active. Plumbers and gas and steam fitters were active. Iron moulders, coremakers, machinists, engineers, blacksmiths and boilermakers were busy. Metal polishers, buffers and platers were from active to busy. Stove mounters, sheet metal and electrical workers and horseshoers were active. Linemen were quiet. Woodworkers, carriage and wagon makers and patternmakers were busy. Coopers were active. Printing and allied trades were from active to busy. Tailors and tailoresses were active. Shoe workers, bakers and confectioners were busy. Cigar makers and tobacco workers,leather workers and saddlers were active. Barbers, clerks, delivery employés, hotel and restaurant employés were steadily employed. Laundry workers were busy. Railway trackmen were not very active. Freight handlers were busy. Street railway employés were steadily employed. Teamsters were active. Draymen were busy. There were a few unskilled labouers unemployed.

DISTRICT NOTES.

Paris.—Labour generally was well employed. The mills and factories ran steadily.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during February continued active, though building operations were at a standstill, except for some alterations which gave work to a number of carpenters and painters. Activity prevailed at nearly all manufacturing plants, with plenty of orders ahead in most lines. The Taylor-Forbes Company report that trade was exceptionally good, with large orders ahead. The extension to the Gilson gasoline engine works has been completed and fully equipped, yet they are still running overtime and find it necessary to place a further extension to their factory. The new planing mill erected by Geo. H. Green is in full running order. The City Council have made arrangements with the Canadian Steel Gate Company whereby that Company will locate its factory in Guelph. The Guelph Carpet Mills Company, Limited, has been given permission to increase its capital stock from $200,000 to $500,000. The Guelph Co-Operative Association held its annual meeting and presented its half-yearly balance sheet, which showed business done in all branches to the amount of $44,839.12, or an increase of $3,090 over the corresponding six months of last year. A dividend of five per cent. to shareholders was declared. The annual statement of the water commissioners was presented to the City Council, and showed a surplus of $20,762.58 for the year. The report of the Guelph Junction Railway Board showed that the City's share of the earnings of that road was $31,943.19.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported a dull month. Carpenters, painters and decorators were fairly busy. Plumbers and steam fitters were well employed. Iron moulders, coremakers and helpers had a fair month, while tube mill workers were very busy. Eleectrical workers and linemen were active. Stove mounters and blacksmiths were fair. Carriage makers reported a good month. Printers and allied trades were well employed. Journeymen tailors and garment workers were fair. Boot and shoe workers and textile workers were active. Hotel and restaurant employés were in demand. Unskilled labour had a fair month, with the supply in excess of the demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of February was a busy one, especially among factory employés, some of whom had to work overtime. The activity of industrial establishments exceeded that of the corresponding month of last year. Other labour was well employed for this season of the year. Good progress was made with construction work. Three building permits were issued for residences valued at $8,500. The architects claim this season will be a record one in the building trades. Wholesale and retail trade was very active. There were no changes in wages or hours of employment except among outdoor workers who have returned to full time in consequence of the lengthening of the days. There were no labour disturbances during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy teaming saw-logs, dimension timber, hay, cordwood, &c. Some inquiries were made during February for farm labour.

Lumbering.—Very busy conditions prevailed. The Kaufman and Brutaker saw mills were both running with full staffs, having on hand a large number of saw-logs.

Manufacturing.—All branches have been very busy, some of them working overtime.

CONDITION OF PARTICULAR TRADES.

Plumbers, gas and steam fitters were active. The other building trades were reported busy for the season, although there was some unemployment. Activity was reported in the metal, woodworking, printing, clothing, food and tobacco preparation, leather, miscellaneous and transport trades. Unskilled labour was somewhat inactive.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Generally speaking, the reports from industrial establishments were satisfactory this month. The existing conditions were good, and the prospects excellent. Some of the reports were especially good. The Karn-Morris Company reported a marked improvement in business during the past two weeks. The British trade was especially good. The Thomas Organ Company reported business well up to the average. The Bain Wagon Company was working overtime, with a full staff. The Woodstock Wagon Company report business above the average. February is a slack month in the stove business, but the James Stewart Manufacturing Company reported conditions very favourable. The Company expects to be running full time in a short time. The Canada Furniture Manufacturers were running full time and full-handed. Business was reported to be quite as good as it was in January. Similar reports came from most of the other manulacturing concerns. There was some demand for skilled mechanics—machinists and pipe-organ workers—but the supply of unskilled labour was more than sufficient, although there was no evidence of actual distress for want of employment. The new Linderman Machine Company was in need of skilled mechanics. The factory has begun operations with about thirty men, twenty of whom were skilled. Ten more skilled men could find employment at once; practically any kind of a competent skilled mechanic would be acceptable. The Maximillian Tool Company, another new concern, is employing about a dozen men, mostly skilled. It is expected that more men will be required shortly. The Woodstock Textile Company will soon start with about a dozen hands, mostly skilled men weavers. There is still a scarcity of

girl labour, and of boys for apprenticeship.

CONDITION OF PARTICULAR TRADES.

This is the slack season in the building trades. Painters, decorators, plumbers, &c., however, seemed to be busily employed, though some of these were not on full time. Most of the machinists, iron workers and blacksmiths were busy, and several capable mechanics could find employment in different factories. Woodworkers, upholsterers, varnishers and polishers were busy, but there was no demand for men. Printers and pressmen were steadily employed, but there was no demand for men. Garment makers, bakers, butchers and cigar makers were steadily employed. There was no demand for unskilled labour.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has shown very little change from last month. Builders and outdoor workers had a quiet month. A number of men were employed shovelling snow. Other labour was well employed. Manufacturers were busy with plenty of orders and prospects were bright for the spring trade. Several carloads of stone from St. Mary's have arrived in the city, to be used for the building of the new street car line, operations to commence in the early spring. Wholesale and retail trade was very good. The excise returns for the port of Stratford amounted to $3,832.38 for January. Customs returns were $10,654.81, an increase of $1,262.90 over January, 1910. No changes in the rates of wages or hours of labour, and no trouble in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were fully employed during the month in the hauling of hay, wood, saw-logs, and marketing produce. The prices were the same as in the previous month, excepting eggs which dropped 10 cents in the dozen.

Manufacturing.—All factories were busy, and further factory additions were talked of.

CONDITION OF PARTICULAR TRADES.

The building trades as usual were dull this month. Painters, paperhangers and plumbers found some work at their trades. Iron moulders and iron workers and helpers were busy. Machinists, engineers, electrical workers and linemen were active. Blacksmiths, boilermakers and horseshoers were busy. Woodworkers, upholsterers and all factory workers were active. Coopers were getting in a big supply of logs for their trade. Printers were busy. Journeymen tailors and factory workers were very busy. Bakers, confectioners and butchers did a good trade. Ice cutters were busy, and all the dealers put in a good supply for the season. Cigar makers were active. Harnessmakers did a good trade. Barbers, clerks and delivery employés were active. Hotel, restaurant and laundry workers were busy. Hotels were in need of girl help. Railway conductors, engineers and firemen were very busy. All railway workers were active. Cab drivers, draymen and teamsters had a good month. Unskilled labour had a fair month, with the supply in excess of the demand.

DISTRICT NOTES.

Mitchell.—Labour was well employed, all the factories being busy. Wettlaufer foundry employs fifteen hands. They intend to double the staff shortly, as the orders for cement mixers are coming in fast. The firm intends building an addition to its factory.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of February was very similar to the preceding one. At indoor

work there was plenty of employment, but at outdoor work there was scarcely any. A number of workers in the building trades were idle. Indications for better conditions as soon as spring opens are numerous, and building operations are expected to be carried on more extensively than for some years past. The wholesale travellers reported sales much better than a year ago. The Grand Trunk Railway Company handled 1,500 more cars in January than in the same month a year ago. The Canadian Pacific Railway Company has announced its intention of spending $250,000 on improvements in London, which will include increased yards, a new station and round-house. Early in March, gum will be again manufactured in this city, in the premises of the Somerville Paper Box Company, by the O-Pee-Chee Gum Company. The water commissioners are finding a good market for hydro-electric power here, and contracts have beeen signed for 1,000 horse power. At the Grand Trunk Railway car shops the 450 employés will commence the summer hours on March 1, and will then work fifty-five hours per weeek.

CONDITION OF PARTICULAR TRADES.

In the building trades there was very little doing in February, and a lot of men were idle. Iron moulders and workers were busy, as were also electrical workers, Linemen were exceptionally busy, and in demand. Metal polishers and stove mounters were busy. Carriage and wagon workers were busy. Car builders reported considerable repair work on hand. Coopers were busy. Printers of all kinds were busy, and good job printers were scarce in this locality. Pressmen were also busy. Paper box makers were very busy, and considerable new machinery has been added in this line. This has been the off season with journeymen tailors, and business has been slack. Garment workers and shoe workers were very busy. Cigar makers were busy. Bakers and confectioners reported trade good. Broom makers were busy. Furriers reported trade only fair. Railway train crews were very busy, and all reported a heavy month's work. Teamsters have asked the City Council for $5 for man, wagon and team, for a nine-hour day. There is a large number of unskilled labourers idle at present, but indications point to plenty of work soon.

DISTRICT NOTES.

Goderich.—The salt wells in this locality are being again put into shape, after many years of idleness. Connolly Brothers, contractors of Montreal, have arrived with eight carloads of machinery to build the breakwater in Goderich harbour, for which they have a $140,000 contract.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Work continued in the building trades throughout the month of February, the weather being sufficiently mild to permit of considerable outside work. However, the uncertainty of favourable weather prevented a general resumption of work. Prospects for a busy summer are bright, and no doubt considerable building will be done during the season of 1911. The present Roman Catholic church will be torn down, work on same commencing at once, and in its place a very handsome stone edifice will be erected. Remarkable progress has been made on the new factory of the Monarch Knitting Company, the outside construction being about completed. The interior work is going along splendidly, and no doubt the Company will commence operations at an early date. The hydro-electric plant has been completed and successful tests have been made of the machinery. Power was being distributed to the street railway, but was not yet being generally distributed, the voltage being somewhat higher than is required. It is stated that a satisfactory conclusion has been reached between the Wabash Railway trainmen in the locomotive and traffic departments and the officials, in regard to the wage schedule. A conference between the

officials and the representatives of the railway unions has just been concluded at St. Louis, and as a result the Canadian trainmen employed on the Buffalo division of the Wabash Railway will, when the new schedule takes effect, be paid the same rate as is being granted to the American trainmen. The new schedule, which it is stated will take effect in a few months, will give the Canadian trainmen a very substantial increase in pay. An American labour organizer has been working in this city for some weeks past, and as a result of his vitis, a number of trades have been induced to organize, and have asked for charters. Friendly relationship existed between the employés and employers in this city and district.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The local markets have been well attended, good prices prevailing.

Manufacturing.—Local industries report the month of February as being a good average.

CONDITION OF PARTICULAR TRADES.

Mechanics employed in the building trades were busier during February than anticipated, on account of the favourable weather conditions, especially for outside work. A number of contracts which were let towards the close of the building season have been about completed as a result of the favourable weather conditions which enabled work to be carried on throughout the winter months. Iron workers, machinists, boilermakers and blacksmiths employed in the local railway shops reported the month a good average. Tailors were quiet. Printers were well employed. Railway employés were well employed during February. Not as many crews were in service as would have been necessary had the weather been more severe. The open weather permitted the handling of long trains, and as a result fewer crews were required to do the work. The good weather enabled the railways to handle their freight with dispatch, and thus give employment to about the usual number of crews.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was fairly well employed, with the exception of bricklayers and plasterers, who were idle during the month. Factories of all kinds, with the exception of two or three, continued to run full time. Exceptional activity prevailed with the carriage factories and the International Harvester works. The Walker Shirt Company continued to employ a large number of hands and has a large number of orders ahead. The building trades were a little slack, and only a few permits have so far been issued. The police commission, at the February meeting granted the police force an increase of $5 per month, making an advance from $800 to $860 for the chief, and from $600 to $660 for the men; and the City Council granted the city firemen an advance from $630 to $650 for firemen, and from $800 to $825 for the chief. Retail and wholesale trade remained firm. There was no evidence of unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Little was done in this line, but many farmers were preparing to build during the coming season. During the month a large amount of material was drawn, while the roads were in condition to do so. The Corn Show held in the Armoury was largely attended by agriculturists from the entire province, and farmers are satisfied that a great amount of good will be the result.

CONDITION OF PARTICULAR TRADES.

Bricklayers and plasterers had a very quiet month. Carpenters and joiners were fairly busy, painters quiet. Plumbers were busy. Builders' labourers were idle. Machinists and engineers had steady employment. Electrical workers, linemen, metal polishers, buffers, platers

and brass workers were very busy. Blacksmiths, boilermakers and sheet metal workers were not so well employed as the previous month. Horseshoers were slack. Woodworkers, upholsterers, carriage and wagon makers were very active. Printers, pressmen and bookbinders were quite busy. Journeymen tailors, garment workers and boot and shoe workers were quiet. Bakers and confectioners, butchers and cigar and tobacco workers reported a fair month. Barbers, clerks, stenographers, delivery employés and laundry workers reported the month an average one. Cab drivers reported trade normal. Carters, draymen, teamsters and expressmen were very quiet. There was no demand for unskilled labour, but few men were found idle.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions showed very little change from last month, as employment was good in practically every branch of industry, and there seemed to be very few idle men in the city. Ten building permits were issued during the month of January, which was very good for this time of the year. On January 16 the city carried two by-laws granting the Moloney Company, manufacturers of electrical machinery, and the Winkley Brothers Company exemption of taxes and free water for ten years. The Moloney Company has broken ground for a factory to cost about $10,000, and will give employment to twenty-five hands to start with.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—With the exception of one or two, all the manufacturers were busy. The four planing mills were running full time, with a full force, which is unusual for this time of the year.

CONDITION OF PARTICULAR TRADES.

The building trades had a very good month, considering the weather, and with the exception of bricklayers, the building trades were fairly well employed. Plumbers were very busy. Iron moulders and helpers were working full time. Electrical workers were busy. Linemen were busy shifting all the lines off the streets and putting them up the alleys. Brass workers were working full time. Blacksmiths and horseshoers were busy. Woodworkers and furnishing trades were fully employed. Printers and pressmen were busy. Journeymen tailors were working short time. Garment workers were very busy. Bakers, butchers, cigar makers and tobacco workers were fully employed. Leather workers were busy on repair work. Barbers reported trade fairly good for this time of the year. Clerks, delivery employés, hotel and laundry workers were busy. Transportation employés had plenty of work. Unskilled labour was fairly well employed.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The supply of labour in most branches was in excess of the demand, principally in the building and unskilled lines. This is usual at this season of the year. The completion of the season's cut of lumber liberated a large number of men. Business was fair, though rather quiet in some cases, but a decided improvement of last year's operations was reported. The outlook for building operations during the coming season is very bright.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The lumber cut in the woods this season will be about the same as last year. About 1,000 men were employed. Deep snow hampered operations somewhat.

Manufacturing.—Busy conditions were reported. A new company has been incorporated under the name of the Lake Superior Paper Company, with a capital of $8,000,000, to operate pulp and paper mills at Sault Ste. Marie. It was stated that this Company will take over the existing pulp mills of the Lake Superior Corporation.

Railway construction.—Work on extensions to the Algoma Central and Manitoulin & North Shore Railways is being vigorously prosecuted.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet, and normal conditions were reported in the other skilled trades.

PORT ARTHUR, FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There were many men idle and on short time. This is the quiet season for these ports, and all building operations were at a standstill. Many of the building operatives were in the bush at the various lumber and tie camps in the vicinity. Business was normal for this season of the year. There was no change in wages announced. The Public Works' Committee of Fort William has intimated that in all probability the wage-rate for labourers on city work will be from 17½ cents to 22½ cents per hour for the coming season. The fair wage clause for city labourers in Port Arthur is from 20 cents to 27½ cents with work specified for the various rates. The carpenters of Port Arthur and Fort William held a mass meeting in the last named city on Thursday, February 23rd, when it was unanimously decided to work to the schedule signed by the contractors, last June, whereby the minimum rate of 40 cents an hour, a 10-hour day, time and a half for overtime, and double time for Sundays and Labor Day was agreed upon. The Port Arthur carpenters had received notice from the contractors of that city that the rate would be from 35 to 40 cents an hour and fifty-five hours to count a week's work, with the Saturday afternoon holiday. Bush work and railway construction is the only work for the general labourer at this season of the year. A good number of men have been shipped from these cities to the various camps.

CONDITION OF PARTICULAR TRADES.

The building trades were all quiet, as were also the metal, engineering and shipbuilding trades. The heavy snow storms during the month have found city work for many men in clearing the streets and all the teams available in the cities were employed. The printing trades have been doing their usual business for this season of the year. The clothing trades were quiet. Barbers, clerks, stestenographers, delivery employés, laundry workers, &c., have all been fairly well employed.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions during February have been normal. The demand for labour has been, if anything, better than during the corresponding month of last year. Plans are being prepared for operations during the coming summer and the outlook is that more men than usual will be required, and at present the outlook for getting an adequate supply of labour for railroad betterments and construction is not promising. General manager Bury of the Canadian Pacific Railway Company at Winnipeg says that that Company will require this year 5,000 additional labourers. It is estimated that other railways, the Canadian Northern Railway Company, and Grand Trunk Pacific Railway Company will each require 5,000. Discussing the situation Mr. Walker, the Commissioner of Immigration says:

"In no previous year in the history of western Canada was the demand for labour so great, and this condition of affairs bids fair to continue through the season. During 1910 the immigration to western Canada was the largest on record. Many thousands of labourers were carried to the west, but this supply was completely absorbed. The demand is now as insistent as ever. The area of land under cultivation is steadily increasing and as a result thousands more men are required for farm operations. During the next two months in Manitoba and Saskatchewan alone there will be need for 10,000 farm labourers. Applications for help pour into this office, and there are hundreds of requests in excess of the supply. The reports from the railway companies show that many thousands of new men will be needed on construction work. I should say that 15,000 to 20,000 was not an excessive estimate of the requirements of these companies. The officials of the railways do not know what they are going to do to obtain sufficient labour. The department of immigration, through its organization will take steps to bring thousands of labourers to these provinces, but we cannot hope to secure as large a body of workmen as this.

"Thousands of inexperienced hands are asked for by the farmers of the west, but there is no possibility of meeting the need. We are hopelessly behind, and in spite of desperate efforts, the problem remains unsolved."

Bank clearings in Winnipeg during February show an increase over the figures for the corresponding month of last year of twenty-one per cent.; the increase of the year to date is 14·76 per cent.

Business generally is more active than during January.

According to the report of the telephone commission for the Province of Manitoba covering the year 1910, the government system now includes 29,748 telephones of which 11,181 are business and 11,537 residence, and 7,030 rural. The connecting systems have 2,799 rural subscribers and 899 exchange, a total of 3,698, giving a total number of subscribers served by the telephone of 33,446. The increase during the year was 8,338 or thirty-nine per cent. The increase in the rental revenue is from $563,125 to $751,651 or an increase of 33·48 per cent. The increase in Winnipeg was 3,472 subscribers or twenty-seven per cent.

CONDITION OF LOCAL INDUSTRIES.

Building.—During February, ninety-three permits for buildings were issued involving an estimated expenditure of $430,500 as compared with $335,900 a year ago. The total permits for the current year show an estimated expenditure of $632,200 as compared with $523,900 for the corresponding two months of last year.

Agriculture.—Farmers are already making demands upon the employment agencies for help.

The report of the Manitoba Government Elevator Commissioners says that after exhaustive investigation 163 elevators were purchased since the appointment of the Commission in May last. Out of forty-five points that petitioned for new elevators ten were selected at which new elevators were either completed during the year or are at present in course of erection. During the year 107 were put into operation and up to the end of the year handled 3,354,100 bushels of grain. The net cost of handling was $65,144. The total revenue amounted to $60,494. The cost of construction of the ten new elevators was $95,326. The purchased elevators and the cost of fitting them up involved an expenditure of $814,710.

The price of wheat during the month has declined considerably. Flour has declined 10 cents per sack. Some mills have advanced the price of bran and shorts $1.00 per ton.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the past month has been fairly

active for the time of the year. The mild weather has permitted considerable outdoor work to be done. Brickwork was continued on the Canadian Northern Railway Station. It is expected that opportunities of employment during the summer months will be more numerous than last year. The building trades will be exceptionally busy, many large buildings having already been announced. The Provincial Government will soon be calling for tenders for the reinforced concrete building to take the place of the Asylum burned last fall. A normal school to cost $50,000, and a new school for the east ward to cost $35,000 will be built during the summer. A deputation from the City Council and the Board of Trade, waited on the Dominion Government; to urge the immediate building of a spur line, from the Grand Trunk main line, to the city. The Government promised its support and it is expected that the spur will be completed by the fall. The bricklayers and masons got an increase to 65 cents per hour to take effect June 1.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The Hanbury Manufacturing Company worked full time. The McDiarmid & Clark Company worked only partial time. The Manitoba Windmill and Pump Company worked three-quarter time.

CONDITION OF PARTICULAR TRADES.

Bricklayers were active; masons dull; carpenters active; lathers and plasterers dull; painters active; plumbers and steamfitters active, and builders' labourers dull. Iron moulders and machinists were active. The printing and allied trades, cigar makers and railway transport employés were active. Unskilled labour was dull.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The weather during the past month has been much more favourable to the building trades than the previous month, thus enabling the commencement of a few buildings. Labour in general, was employed to a little advantage, conditions having slightly improved over the preceding month, also the corresponding period of last year. It is evident that building operations, weather permitting, will commence early this spring, judging by the permits applied for and those granted: for the first six weeks of 1911, building permits to the value of $59,000 were issued. A large number of men are already employed on the Fair building, preparing for the forthcoming Dominion Exhibition. In reference to this work, there was considerable ill-feeling existing between the Regina Trades and Labour Council and the Regina City Council and the Dominion Fair Board, on account of carpenters only being able to obtain 30 cents per hour, instead of 40, but after continued protestations from the Trades Council, the Fair Board have yielded to the men's demand for 40 cents per hour.

CONDITION OF PARTICULAR TRADES.

Though there have been a few jobs going on connected with bricklaying or masonry, the general aspect was dull. Carpenters and joiners, while being far from active, had a fair month for this period of the year. Lathers and plasterers were very active, the new Parliament Buildings accounting for the demand made upon them. Painters and paperhangers were very quiet, as also were plumbers, stone-cutters and builders' labourers. Electrical workers were quiet. The various branches of the printing trades report a fairly active month, though there was no prominent demand for help. Tailors and garment workers were busy. Bakers and confectioners were well employed, also butchers, but there was no apparent demand for cigar workers. Barbers, clerks, stenographers, delivery employés, hotel, restaurant and laundry workers were well employed. Freight handlers were active, also hackmen, draymen and teamsters. There was no demand for unskilled labour.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During February, labour conditions began to improve, owing to the moderating of the weather. The printing trades were well employed. There are still a considerable number of stone-cutters and unskilled labourers unemployed.

Seven by-laws, aggregating close upon a million dollars, will be placed for approval before the ratepayers. These by-laws are mostly for public improvements in the city. They are for the following: Incinerators, $120,000; asphalt plant, $20,000; conduit system, $60,000; waterworks exensions, $245,000; service connections, $40,000; electric light, $380,000; fire station, $75,000. Parks board asks for $91,445 to be used, viz., for upkeep of existing parks and boulevards, $25,445; for permanent improvements to parks andmboulevards, $66,000.

It is estimated the Canadian Pacific Railway Company will spend $5,000,000 in improvements and extensions in this city and its environs during 1911. Their new hotel is expected to cost close to a million dollars. This year is expected to be a record breaker in the building industry. Building permits for February total 110, with a value of $303,000. This makes a total for January and February of $629,700. Wholesalers and retailers report trade considerably better than at the corresponding period of 1910. Bank clearings were for February $11,265,813, as against $9,620,529 last year.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, painters and building labourers had a quiet month. Moulders, iron workers and helpers, coremakers, machinists, engineers' electrical workers and linemen, blacksmiths, boilermakers, sheet metal workers and horseshoers report trade fairly good. Woodworkers and upholsterers had a fair month. The printing trades had a busy month. Tailors report a good month. Butchers and bakers were well employed. The leather trades were fairly well employed. Miscellaneous trades report trade satisfactory. Transport employés on the whole were fairly well employed. Unskilled labour was dull.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to cold weather very little outside work was carried on during the latter part of January and the first part of February. Since the tenth of the month the weather has been favourable for outside work, and a number of frame residences are under construction at the present time. Work was progressing favourably on the high school, also the Oliver school in the west end. With the exception of two bank buildings, work was practically completed in the business section. Conditions of the labour market would compare favourably with the previous month, also the same period last year. The Edmonton Iron Works has entered into a contract with the Rountree Plow Company to manufacture 1,000 plows a year for five years. Special machinery for the manufacture of the plows is being installed, and the additional employment of thirty-five men has been necessitated, and a still further number will be required as the capacity of the plant for producing the plows is increased. The following figures show the percentage of increase in business during the past three years:—

	1908	1909	1910	Increase 1910 over 1909
Customs Returns	$228,252	$269,568	$363,736	35%
Bldg. Permits *	2,291,967	2,128,161	2,161,356	2%
Bnk. Clearings	38,486,496	51,561,018	71,633,115	39%
P.O. (stamps only)	57,870	70,063	83,411	19%
Street Railway—				
Passengers Carried	2,148,893		3,688,859	72%
Revenue	92,211		157,511	71%

*Includes Provincial Government Buildings still under construction.

An exhaustive investigation as to conditions of business in wholesale and industrial circles, made by the Board of Trade, showed that the aggregate volume of Edmonton's distributing business for 1910 has exceeded that of 1909 by almost fifty per cent. It was further ascertained that shippers see indications of further expansion in 1911.

On Jauuary 26 the ratepayers endorsed money by-laws for the expenditure of $456,200 for permanent improvements, which includes $164,000 for a bridge across the North Saskatchewan, in the east end; $175,000 for improving the exhibition grounds and putting up new buildings; and $91,250 for the purchase of industrial sites. The *Alberta Gazette* of the fifteenth instant gives the names of twenty new business concerns with an aggregate capital of $1,196,000, which were granted certificates of incorporation in the two weeks January 21 to February 4. Ten of these companies have their head office in this city.

A local union of the International Alliance of Theatrical Stage Employés has been organized, also a local union of the Hotel and Restaurant Employés International Alliance and Bartenders' International League.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very active during the month bringing their produce to market. Notwithstanding the good supply of meat, the prices still kept up. Wheat was selling a little higher, but the local dealers say that the supply was somewhat better than some time ago. There is a large number of land-seekers going into the Grande Prairie and Peace River countries, and implement dealers reported business very active.

Lumbering was very active especially tie camps along the grade of the Canadian Northern Railway.

Mining.—A large amount of coal was mined, and the price dropped 50 cents per ton during the latter part of the month.

CONDITION OF PARTICULAR TRADES.

During this season of the year a large number of mechanics are on homesteads, which lessens the supply of labour somewhat. However, there has been a surplus of labour in the building trades during the month. The metal and engineering trades reported a fair month, with good prospects for the coming season. Printing and allied trades were active. Journeymen tailors and garment workers had a quiet month. Employés engaged in the preparation of food and tobacco had a good month. The miscellaneous trades were active. The supply of unskilled labour was greater than the demand.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of February has been very dull for labour. There has been, however, a slight improvement over last month. Taking the two months together, they have been the dullest for a long time back. This winter is considered to be the worst in twenty years. There has been quite a number of men employed clearing the snow blockade on the railways and on the streets of the city. The City has kept about 150 men employed on sewer work. This work is being tunnelled, a number of carpenters finding work making centres for concrete. This work was carried on through the hard weather. City teamsters moved out to the small coal camps to haul coal where there was no railway connection. Others were employed hauling ice into the city. Since the weather got milder, there has been considerable building started at two new lumber yards. These yards are on a more extensive scale than any in Lethbridge, up to this time. In this month the commercal activity was noticed with regard to last month. There was no unrest in labour circles. Agreements run out at the end of March, both in mining and in the building trades, but at present all is quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Cattlemen have suffered some heavy losses this winter. A large

number of cattle have died on the ranges. It is difficult to feed the cattle, as hay is very scarce. It will be a problem from now on to supply the demand for hay. An early spring is expected. There are numbers of new settlers coming in to settle in the south part of the province.

Lumbering.—There are seven retail lumber yards in Lethbridge, some of them with branches in neighbouring centres. They were all busy putting in stock for the coming season.

Mining.—Coal mining was very active, and the supply of qualified miners was not equal to the demand. The regular coal miner complains about the inexperienced man, claiming that their employment constitutes a great danger. The miners' convention passed a motion that all men employed be made to learn and use the English language. There is no doubt but more miners would go into the mines if this were overcome. The two coal shafts at the Lethbridge Collieries were completed, and the tipple was being built over the lifting shaft. The shaft at the Chinook Mine near Diamond City, is not completed yet.

CONDITION OF PARTICULAR TRADES.

Bricklayers have not been well employed during this month or last. A break in the hard weather allowed the brickwork to be finished on a large building, (the Hull block) but with that exception there has been no work in that line. Masons and carpenters were very dull, except on some small dwellings and some houses going up at two lumber yards. Joiners, lathers and plasterers were very dull, as well as all the other branches in the building trades. The printing and allied trades were very busy; all the men who could be employed were working full time, and in some cases overtime. Newspapers and job printing are the only branches that are handled in Lethbridge. Bakers, butchers and meat cutters were very busy. Barbers were very busy. Hotel and restaurant employés were busy. Laundry workers were very busy. Teamsters were very dull. Unskilled labour was very dull, and there was a great number unemployed.

NELSON, B. C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month of February, throughout the Kootenay district, was quiet, the supply exceeding the demand as to coal miners, quartz miners and lumbermen. The City of Nelson had a small force of men engaged excavating for the new sewer extension on Gore and Innis streets. The pipe for this work has an inside diameter of eight inches. A strike of rich ore was reported on the Eureka mine at Sheep Creek, B.C. The Athabasca Mine produced a gold brick recently, valued at a little over $10,000, being the result of less than one month's run of the stamp mill, and is from ore taken from the strike recently reported. Extensive bodies of clean ore are in sight in the workings of the Rambler-Cariboo Mine, in Slocum district, and the management proposes to erect a tramway from the main tunnel to the proposed Canadian Pacific Railway spur, thus materially reducing the cost of transportation of the ore to the smelter. The Company's concentrator is also to be moved to a more convenient location. The Standard Mine near Silverton, B.C., has developed 42 feet of galena ore, between the walls, which is said to be the widest ore showing yet developed in the Slocan district, the grade of this ore is reported as seventy per cent. lead, and 90 ounces silver.

Owing to local differences with their employers (the Crow's Nest Pass Coal Company, Limited) the coal miners at Michel, B.C., suspended work on the twenty-third instant, awaiting or pending a settlement of their grievances. This suspension directly affects about 1,300 men, and if continued any length of time would affect fully as many more indirectly. The present working agreement between the employing companies and the Miners' Union terminates on March 31, 1911. The miners are asking an increase in wages, to which the companies, up to the present, have made no reply. Both

Michel and Coal Creek miners are again starting their ambulance and first-aid classes under the supervision of the local surgeons. Michel has organized a Draeger apparatus school of instruction. The Doukhobors' Colony has still further extended its territory in this district by purchase of the Manhart ranch on the Kootenay river, opposite Tarry's. The property is about fifty acres in extent, of which some ten acres are cleared, and about five acres planted in bearing fruit trees. The price was $12,000.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

In comparison with the corresponding months of previous years, the present month showed an unusual activity; and sewer and street improvement work was pushed ahead rapidly. B. F. Dowd, representing eastern and British Columbia capital, to be known as the Drop Forge Manufacturing Company, has secured an option on a piece of property across the river, near the end of the Westminster bridge. It is the intention of the Company to at once commence the construction of three large buildings for the manufacture of carpenters' and other tools. The amount of money to be at first invested is about $125,000, and it is intended to employ over one hundred men. Among the many items of local interest mentioned in the Provincial Government's estimates, before the House, on the ninth instant, are the provisions for large expenditures on provincial institutions. One of the largest single estimated expenditures is to be on the grounds and houses at the new asylum farm at Coquillam, being $355,000. There is a further amount of $22,500 for alterations to the New Westminster Court House, and $13,076.80 for the completion of the Land Registry Office. The grants for roads, bridges and such like improvements, throughout the Fraser river valley include $65,000, to be spent in the Chilliwack district; $60,000 in the Delta; and $125,000 in Dewdney.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Already one or two of the halibut boats have visited the halibut banks, and a few have returned with fair catches. With the moderation of the stormy weather, halibut fishing will be resumed in earnest. A few nets have been thrown out in the river, but only one or two steelhead salmon to the boat has been the success so far. The mills which were forced to suspend operation during the cold weather are again running at their full capacity.

Railway construction.—The middle of the month saw the first sod turned on the Lulu Island branch of the British Columbia Electric Railway. This line, which is only a little over a mile in length, extends to the Richmond boundary, and will mean a great help to the section of the city served, besides making possible the establishment of new industries on both the north and south arms of the Fraser river. The new train line, the Fraser Valley Railway section of the British Columbia Electric Railway, running from Sapperton, through Burnaby and Hastings townsite to Vancouver, is being pushed ahead with great vigor. It is anticipated that the line will be most serviceable for freight traffic between Vancouver and Chilliwack. The purchase of a site for terminals at Coquillam has been officially announced by the Canadian Pacific Railway Company officials. The property extends from Westminster Junction on the west,to the Pitt river on the east, and along the west branch of the Pitt river to the confluence of the Pitt and Fraser rivers, giving a water frontage of 1½ miles. It is officially stated that the purchase has been completed at an approximate cost of $750,000. The proposed yards at Coquillam will very greatly facilitate the handling and distribution of freight cars, east and west-bound.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet, as were carpenters, lathers and plasterers.

Plumbers and steam fitters were fairly active, with builders' labourers quiet. Iron moulders and helpers were very quiet. Electrical workers and linemen were active, as were blacksmiths and sheet metal workers. Shipwrights and caulkers were very quiet, while horseshoers were busy. Upholsterers and varnishers and electric car builders were active. Printers, pressmen, journeymen tailors were all active. Bakers, butchers and cigar makers were fairly active. Barbers, clerks, stenographers delivery employés and hotel employés were busy. Laundry workers were exceptionally active. Railway employés, steamboat men and street railway employés were active, with dray men and teamsters fairly active. Unskilled labour was fairly active.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

The Civic waterworks committee decided to recommend to the Council the expenditure of $163,100. The amount spent last year was $129,414.78. The increase, therefore, will be $33,685.22. The civic board of works will expend $674,610 on public works this year.

The members of St. Mark's Church (Church of England) decided to build a new edifice in Kitsilano, to cost $125,000. The contract for the building of the proposed labour temple, to cost when completed and furnished $150,000, was awarded. The British Columbia Telephone Company let a contract to build a suburban exchange building for $43,000. A contract was let by the Provincial Government for an addition to the new court house, which latter building has not yet been completed. The new wing will cost $350,000.

Provisions were cheaper during week ending February 26, and there was a distinct drop in the price of eggs, as the result of the large supply from Kansas. The fruit trade was very brisk. Fresh vegetables were plentiful and much in demand.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—During the week ending February 25, there were a number of the smaller Vancouver steamers engaged in carrying herring shipments to Tacoma, for shipment to the Orient. About 1,000 tons were taken on the steamer *Oanfa* at Vancouver. The steamer *Strathy* (British) took 1,500 tons. Herring were very plentiful.

Mining. The local mining market was buoyant towards the end of the month, and there was marked activity in some lines.

Lumbering was fairly active, with prospects bright.

Railway construction was very active throughout the province.

CONDITION OF PARTICULAR TRADES.

The different branches of the building trades reported trade fair, the weather being a hindrance to progress. A joint movement has been started for an increase in wages all around, to take effect on May 1 next. The present rate of wages paid sheet metal workers is $24.75 a week of forty-four hours, with Saturday half-holiday. Machinists are still on strike. Shipbuilding is very active. The union shop machinists are practically out of employment. The different branches of the woodworking industry report activity and prospects promising. Work has been fair in the printing and allied trades. Butchers and meat cutters were active. Cigar makers report trade exceedingly quiet, owing to competition of eastern made cigars. Leather workers on horse goods report trade fair, there being some seven shops here. Barbers report a number of idle men. Clerks and stenographers are very much overcrowded. All carriers report trade very active. Large extensions are being made to handle the heavy volume of traffic which is constantly on the increase.

DISTRICT NOTES.

North Vancouver.—The building trades are active. and about 300 men are laying

sewer pipes. Shipbuilding was very active. On February 26 the new ferry, costing $140,000 was launched at the Wallace shipyards.

Imperial.—Work has been started on the proposed new graving dock.

Steveston.—The report that the Canadian Northern Railway Company intends to divert its line to this place instead of Port Mann, on the Fraser river, has caused a real estate boom. Building is fairly active.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chrow, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in this district has been fairly active during February, being somewhat better than in January, and much better than at the same month a year ago. The building trades have been fairly well employed, there being a considerable number of buildings under construction, and the outlook for the season being fully as good if not better than last year. All other skilled workers were well employed with no reduction in the working hours. Unskilled labour has been more regularly employed than is generally the case at this time of year, owing to the large number of city improvements under way. At the request of the Trades and Labour Council the city authorities have inserted a clause in all city contracts making it compulsory for all contractors doing street improvement work to pay not less than 34½ cents per hour, for an eight-hour day. Also that preference must be given to bona fide residents of the city, and no Chinese, Japanese or Hindoos to be employed. Bank clearings for January were $9,013,716 compared with $7,390,767 in 1910; $4,235,476 in 1909, and $4,391,595 in 1908. The value of building permits issued during January amounted to $151,455, compared with $128,985 for the corresponding month a year ago, an increase of $22,470 or eighteen per cent. The inland revenue returns for the month of January showed a total of $18,127.72, or an increase of $2,016.40 over the same month last year. During the month a branch of the Canadian Industrial Peace Association was formed in Victoria, when a number of local gentlemen intimated their willingness to serve as directors. The objects of the Association as stated by the promoters was to interfere in the case of labour troubles in behalf of the public interest between employés and employer, and try if possible to effect an adjustment of difficulties, thereby hoping to bring about justice for both sides and for the general public. Wholesale and retail trade continued in a healthy condition. Several new retail establishments have been opened during the past two months. The School Board has granted the teachers under their jurisdiction substantial increases of salaries. The Royal Commission investigating the alleged smuggling of Chinese into this Province held several sessions here during the month, the chief witnesses being customs' officials and Chinamen. The British Columbia Marine Railway Company is about to commence the construction of a new dry dock at Esquimalt at a cost of $3,000,000. The dock will be 900 feet long and 100 feet wide, and will be one of the largest in the world. The enterprise will give work to a large number of men.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The whaling vessels operating on the west coast of Vancouver Island are about to commence operations for the season, whales being reported unusually plentiful.

Mining.—According to a statement for 1910, just issued by the timber and coal administration branch of the lands department, the total revenue of coal and timber licenses, for the year of this branch of the lands' department was $1,794,213.40.

Railroad construction.—On February 18, His Honour the Lieutenant-Governor turned the first sod of the Island division of the Canadian Northern Pacific Railway. It is hoped that the first section (about 30 miles) will be in operation within a year.

CONDITION OF PARTICULAR TRADES.

The building trades were fairly busy, plumbers especially. Painters and paper-hangers were more fully employed. Builders' labourers were dull with a surplus of help. The metal trades reported work as fair, with some idle men. The machinists' strike still continues. Printing and allied trades were in good condition, business fair and few idle men. Garment workers reported business as above the average, all available help being employed. Bakers and confectioners, butchers and cigar makers were fairly busy. Barbers, clerks, stenographers, waiters, &c., were constantly employed. Unskilled labourers had considerable work, with an abundance of help available.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district shows an improvement over last month, there being a good deal of work starting up. But there are still a good many idle men in the district. The prospects are better for the coming month. There is still exceptional activity in the coal trade. There is a growing increase in travel and the transportation of goods. Business men report trade good. The men employed by the South Wellington Coal Company met the officials of the Company and signed the scale of wages common in this district.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have started plowing this month.

Fishing.—There is very little work among the fishermen in this district since the close of the herring season.

Lumbering.—The sawmills in the district are running steadily but not with large forces as yet. Work has not started in the logging camps as yet.

Coal mining.—In this district is very brisk most of the mines working to their full capacity but there are still quite a number of men looking for work in the mines.

The grading of the extension of the railway to Alberni is about finished and work is being pushed on the bridges, the track being laid as fast as the bridges are completed. There is a good deal of land clearing going on here and in Alberni for building purposes. There is also a lot of clearing for agricultural purposes going on all over the district.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons are quiet at present. Carpenters and joiners are active especially for the season. Painters and paperhangers report fair and improving. Plumbers were busy during the month. Builders' labourers have not done much. Blacksmiths and carriage makers report business active. Printers report work as fair. Cigar makers have had a fairly good month. Teamsters and expressmen report work fairly good. Unskilled labour did very little the first part of the month, but are doing better now, although there are a lot of idle men.

LABOUR ORGANIZATION IN CANADA DURING 1910.

TABLES are published herewith containing a list, by industries and groups of trades, of the labour organizations formed and dissolved in Canada during the year 1910, with details relating to locality, date of organization and other particulars.*

*The tables are based on information collected by the Department of Labour during the year from the daily press, the trade journals of the different central labour organizations, and other sources, details having been obtained or verified by correspondence with the secretaries of unions, the organizers of central bodies, the correspondents of the *Labour Gazette*, and other persons in a position to furnish accurate information. Instances may have occurred of labour organizations in particular localities having been formed or dissolved without the fact being reported to the Department, though the extent of organization and dissolution in the several trades or provinces is indicated, it is thought, with considerable accuracy in the table. It was found especially difficult, however, in some instances to obtain exact information with regard to the causes leading to the surrendering of charters.

The tables, with accompanying matter, are designed to present an analytical review of the progress of labour organization in the Dominion during the past calendar year, and are similar in form and scope to the annual reviews previously published by the Department each year since 1903.

The General Result.

According to information received by the Department up to the end of February, 1911, the total number of labour organizations formed in Canada during 1910 was 171, and of organizations dissolved 165. This would represent an actual increase of six in the number of organizations in existence. There was an increase of nine in the number of organizations formed, compared with the previous year, but the number of organizations dissolved increased by sixty-five. The net gain of six in 1910, compares with a gain of seventy-two in 1909; 107 in 1908; 174 in 1907; sixty-nine in 1906; a loss of two in 1905; a gain of forty-four in 1904; and a gain of 221 in 1903, the last mentioned being the year in which the formation of labour organizations was most active since the record of the Department was established.

The Record by Industries, and Trades.

The following is a statement, by industries and groups of trades, of the labour organizations formed and dissolved in Canada during 1910:

Trades and Labour Councils.—A Trades and Labour Council was formed at St. John, N.B., One at Nelson, B.C., went out of existence.

Mining.—The United Mine Workers of America organized three local unions in Nova Scotia and two local unions in Alberta. The Western Federation of Miners organized local unions at Porcupine, Ont., Silver Centre, Ont., and at Portland Canal and Vancouver, B.C. The Provincial Workmen's Association organized a local union at New Waterford, N.S., and the Quarrymen's International Union a local at Fox Island, B.C. Six lodges of the Provincial Workmen's Association ceased to exist in Nova Scotia. Thirteen unions of United Mine Workers were dissolved,two in Nova Scotia, two in Saskatchewan, and nine in British Columbia. Of the Western Federation of Miners two unions were dissolved, one at Camborne and the other at Slocan, B.C. Five Quarry Workers' International Unions went out of existence, two in Quebec and three in Alberta.

The building trades.—A Building Trades' Council was formed at Victoria, B.C. The Amalgamated Society of Carpenters and Joiners organized six local unions, one in Ontario, one in Saskatchewan, one in Alberta, and three in British Columbia, but three unions of this body ceased to exist, one in Quebec and two in Ontario. The United Brotherhood of Carpenters and Joiners added eleven unions, three in Nova Scotia,two in New Brunswick, two in Ontario, one in Saskatchewan, one in Alberta and two in British Columbia; on the other hand eleven unions of this organization were dissolved, four in Ontario, two respectively in Saskatchewan, Alberta and British Columbia, and one in Manitoba. The Wood, Wire and Metal Lathers' International Union organized one branch and dissolved two. The Operative Plasterers' International Association formed a union at Saskatoon, Sask. The International Brotherhood of Painters, Decorators and Paperhangers organized one and dissolved four unions. The Brotherhood of Painters, Decorators and Paperhangers formed a local union at Port Arthur, Ont. A union of International Bricklayers and Masons at Haileybury, Ont., was dissolved. The International Association of Granite Cutters added a union and dissolved one. Two unions of the Paving Cutters of Canada and the United States were formed and two went out of existence. One union of each of the following organizations was formed: the Journeymen Stone Cutters' Association; the International Association of Marble Workers; the International Brick, Tile and Terra Cotta Workers' Alliance; the International Slate and Tile Roofers'

Union; the Ceramic, Mosaic and Encaustic Tile Layers and Helpers' International Union; and the Builders' Labourers' Union. The United Association of Journeymen Plumbers, Gas and Steam Fitters organized six local unions, one in St. John, N.B., one in Quebec, Que., three in Ontario and one in Alberta. Five locals of this organization ceased to exist, three in Ontario and two in Manitoba. The Hod Carriers' International organized three unions, in New Brunswick, Saskatchewan and British Columbia, respectively.

The metal, engineering and shipbuilding trades.—A Metal Trades' Council was organized at London, Ont. The International Moulders' Union formed four branches. The International Association of Machinists formed four unions while five were dissolved. The Federal Union of Machinists' Helpers and Labourers formed five branches and the American Federation of the same class of workmen, one branch. One union respectively of the Metal Polishers, Buffers and Platers' International Union, International Stove Mounters and Steel Range Workers' Union, International Union of Journeymen Horseshoers' Union, International Brotherhood of Stationary Firemen, Stokers and Helpers were formed, and one each of the International Association of Bridge and Structural Iron Workers, Elevator Constructors' International Union, Halifax Boilermakers' Iron and Steel Ship Builders and Steel workers and Benefit Society, and International Association of Sheet Metal workers were dissolved. The International Brotherhood of Boilermakers and Iron Ship Builders organized five locals and three were dissolved. Two branches of the International Brotherhood of Blacksmiths and Helpers were formed and three went out of existence. The Amalgamated Sheet Metal Workers' International formed two new locals, and one was dissolved. The International Union of Steam Engineers organized four new unions, and dissolved two. Two branches of the Jewellery Workers' Union went out of existence, one in Quebec and the other in Ontario.

The printing and allied trades.—The International Typographical Union formed one and the International Brotherhood of Bookbinders two new branches.

Clothing trades.—The Journeymen Tailors' Union added four new branches during the year and eight branches went out of existence. Two unions of the United Garment Workers were dissolved, and one branch of the United Cloth, Hat and Cap Workers.

Textile trades.—In this group two branches of the Federation of Textile Workers of Canada ceased to exist.

Food and tobacco preparation.—The Bakery and Confectionery Workers International Union formed three and dissolved four unions. A branch respectively of the Cigar Makers' International Union and a Cigar Factory Tobacco Strippers' Union, the first at Saskatoon, Sask., and the other at Toronto, Ont., were formed. The United Brewery Workmen inaugurated six new unions, and six went out of existence. A union of the Amalgamated Meat Cutters and Butchers' Workmen at Ottawa was dissolved.

Leather trades.—Three branches of the United Brotherhood of Leather Workers on Horse Goods and one branch of the Travellers' Goods, and Leather Novelty Workers' Union went out of existence.

Railway service.—The Order of Railway Conductors formed two branches; the Brotherhood of Locomotive Engineers, three; the Brotherhood of Locomotive Firemen and Enginemen, four; the International Brotherhood of Maintenance-of-Way employés, eleven; the Brotherhood of Railway Carmen, nine; and the Brotherhood of Railway Employés, five. The railway unions dissolved during the year were: Canadian Brotherhood of Railway Employés, five; Brotherhood of Railway Carmen, two; Interior Freight Handlers and Railway Clerks' International, one; and the International Brotherhood of Maintenance-of-Way employés, nineteen.

Street railway employés.—A branch of the Amalgamated Association of Street and Electric Railway Employés at St. Thomas, Ont., went out of existence.

General transport.—Seven branches of the Brotherhood of Teamsters and one branch of the Bread Wagon Drivers' Union were formed, nine branches of the Teamsters' Union were dissolved.

Navigation.—A Ship Liners' Union was formed at Montreal, Que. Four International Longshoremen's Association branches were formed and two ceased to exist. Two new unions of the National Association of Marine Engineers, at Charlottetown, P.E.I., and Sault Ste. Marie, Ont., respectively, came into existence, while one branch of the International Marine General Freight Handlers' Union was dissolved.

Hotel, restaurant and theatre employés.—In these trades the International Alliance of Theatrical Stage Employés formed three unions and dissolved one. The American Federation of Musicians formed one union and dissolved one, while two branches of the Musicians' Canadian National Union were dissolved. The Bartenders' International League added three new branches to its list, while five other branches went out of existence. A union of the Hotel and Restaurant Employés International Alliance was formed at Vancouver, B.C., while at Montreal, Que., two branches of the Cooks' National Association dissolved.

Miscellaneous.—In this group, one union of the Retail Clerks' International Association was formed and one was dissolved. The Journeymen Barbers' Association founded three new unions, but four others were dissolved. Each of the following organizations formed a new branch during 1910: the Asbestos Workers' International Association; the Amalgamated Glass Workers' International Association; the Glass Blowers' Association; Ottawa Gas Workers' Union, and the International Brotherhood of Paper Makers. Two unions of Commercial Telegraphers were formed, one known as the Canadian Brokers' Division and the other the Great North Western System Division.

General labour.—A Federal Labour Union was formed at Guelph, Ont., and one at Lethbridge, Alta., was dissolved.

Aggregate Results by Industries and Groups of Trades, during the past six Years.

It will be seen from the table that there have been increases in the number of organizations in the following trades: building, metal, printing, food and tobacco preparation, railway employés, navigation, public employés and miscellaneous, while decreases have occurred in the number of organizations in the mining industry and in the following trades: woodworking, clothing, textile, leather, hotel, restaurant and theatre employés, and general transport. In Trades and Labour Councils and general labour the number remained unchanged. The most pronounced gain was among metal workers who formed forty and dissolved twenty unions, a net gain of twenty. Miscellaneous trades and railway employés increased by seven each; food and tobacco preparation, and navigation employés by four each; building trades by three; printing trades by two and public employés by one. The heaviest decreases in the number of organizations among the other industries and trades were as follows: mining, fifteen; hotel and restaurant employés, eight; clothing trades, seven; leather trades, four; textiles and woodworking trades, two each.

The accompanying table sets forth the aggregate number of labour organizations formed and dissolved in Canada during 1910, according to industries and groups of trades, compared with the years 1904, 1905, 1906, 1907, 1908 and 1909:

TABLE SHOWING BY INDUSTRIES AND GROUPS OF TRADES, THE NUMBER OF LABOUR ORGANIZATIONS FORMED AND DISSOLVED IN CANADA DURING 1904, 1905, 1906, 1907, 1908, 1909 AND 1910.

THE COMBINES INVESTIGATION ACT—ORDER FOR INVESTIGATION OF ALLEGED COMBINE IN SHOEMAKING MACHINERY

THE Minister of Labour received on February 27, from the Honourable Mr. Justice L. J. Cannon, of the Superior Court, Quebec, an order directing the establishment of a Board of Investigation under the Combines Investigation Act, to inquire into the existence of an alleged combine on the part of the United Shoe Machinery Company of Canada in respect of the manufacture and sale of boot and shoe machinery. This order was the first to issue under the provisions of the Combines Investigation Act [1] a statute enacted at the last session of the Dominion Parliament. On receipt of the Judge's order, steps were immediately taken by the Minister, looking to the establishment of a Board in this matter, the parties respectively concerned being each requested to recommend a person for appointment to the Board under the provisions of the statute.

In his order, above mentioned, Mr. Justice Cannon declared that, after having read the application which was presented to him in this matter, under date of November 10, and the statutory declaration accompanying the same, he was satisfied "that there is reasonable ground for believing that a combine exists with regard to the manufacture and sale of machinery for manufacturing boots and shoes, which has operated to the detriment of consumers and producers, and that it is in the public interest that an investigation should be held."

The application to Mr. Justice Cannon was signed by Napoléon Drouin, Louis Létourneau, Eugène Lamontagne, Michel Brunet, Joseph-Etienne Samson, Joseph Picard, Ernest Caron, J. Alphonse Langlois, Robert Stewart, and Charles W. Walcot, all of the city of Quebec, and may perhaps be regarded as, to some extent, a sequel to proceedings in the case of the United Shoe Machinery Company of Canada vs. Brunet, et al., which was tried before Mr. Justice Cimon, of the Superior Court, Quebec, in March, 1906, and which was carried in appeal to the Court of King's Bench and thence to the Judicial Committee of the Privy Council.

The case of the United Shoe Machinery Company of Canada vs. Brunet, et al., here referred to, was an action for injunction and damages based on alleged breach of contract by the defendants for the leasing and use of certain machinery employed in the manufacture of boots and shoes. To the action for injunction and damages the defendants pleaded that they had been induced to take the said leases by false representations, and that the covenants therein, by reason of their unjust and oppresssive nature and of the practical monopoly which the United Shoe Machinery Company of Canada had acquired in Canada in the manufacture and supply of shoemaking machinery, were in restraint of trade and therefore void. The action was dismissed by the Superior Court, the judgment of the latter being affirmed in the year following on appeal by the Court of King's Bench. The judgment of the trial court was, however, reversed by the Judicial Committee of the Privy Council.

In delivering the judgment of the Privy Council in this case, Lord Atkinson said in part:

> "If the monopoly established by the appellants and their mode of carrying on their business be as oppressive as is alleged (upon which their Lordships express no opinion), then the evil, if it exists, may be capable of cure by legislation or by competition, but in their view not by litigation. It is not for them to suggest what form the legislation should take, or by what methods the necessary competition should be established. These matters may, they think, be safely left to the ingenuity and enterprise of the Canadian people. On the

[1] See *Labour Gazette* for May, 1910, Pages 1260–1271 for a statement of the object of this legislation and procedure thereunder.

whole, therefore, their Lordships are of opinion that the respondents' defences cannot be sustained, and that the appellants are entitled to have the injunction they obtained made perpetual."

In the application of Messrs. Drouin and others for an order directing the establishment of a Board of Investigation, to inquire into the operations of the United Shoe Machinery Company of Canada, the latter Company was referred to as a corporation organized under the laws of the State of New Jersey, and dealing in machinery of practically all kinds required and used in the manufacture of boots and shoes and also in supplies used in the making of boots and shoes. The applicants asserted that this Company refused to sell its machines, but leased them to manufacturers who might require the same for use in their business; that one or more of the machines controlled by the United Shoe Machinery Company have heretofore been used in all boot and shoe factories as part of their customary equipment; that all, or practically all, of the leases above referred to are under written contract for long periods, usually twenty years, each covering one machine, and that the same are therefore "practically interminable;" also that practically all the boot and shoe machinery now in use in Canada is held subject to the conditions above referred to.

The applicants further declared that "manufacturers of boots and shoes all throughout Canada are absolutely tied down to the Company, compelled to buy the Company's machines, parts and supplies, as provided in their contracts, at the Company's own prices, and are deprived of the benefit of all competition." The contracts, agreements, and acts of the United Shoe Machinery Company as aforesaid were declared by the applicants to constitute it a combine within the meaning of the Act.

It was also alleged by the applicants, that this Company is the Canadian representative of the United Shoe Machinery Company of Boston, a foreign corporation, and that the same is owned or controlled by the said last mentioned parent corporation or interests allied thereto and in the interest of the said parent corporation, itself a combination, merger and amalgamation of numerous companies controlling in the United States the manufacture of boot and shoe machinery by somewhat the same methods as had been employed by the United Shoe Machinery Company of Canada. It was declared that the combine affected prices by placing boot and shoe manufacturers at the mercy of the United Shoe Machinery Company as regards prices for machinery and supplies, thus increasing the cost of boots and shoes. The combine also restricted competition in boot and shoe machinery, thus injuring the manufacturer as well as the consumer. It was claimed by the applicants that the Company had made use of its exclusive rights and privileges as the holder of certain patents under the Patent Act to restrain and injure trade and commerce.

At the hearing of the above application before the Honourable Mr. Justice Cannon in Quebec, objection was taken by Mr. T. C. Casgrain, K.C., who appeared as counsel for the United Shoe Machinery Company of Canada, to the hearing of this application in Quebec. Mr. Casgrain submitted that the application should have been made in the District of Montreal where the Company had its principal office in Canada, and accordingly submitted a motion to this effect. Reply was made thereto by Mr. A. Falconer, K.C., on behalf of the applicants, that the Company had also an office in Quebec, and that the application could be made, therefore, before a Quebec judge. Mr. Casgrain's motion was dismissed by the Honourable Mr. Justice Cannon on December 10. An appeal from this judgement was taken by Mr. Casgrain to the Honourable Mr. Justice Carroll of the Court of Appeals. The matter was referred by the latter to the five judges of the Court of Appeals of Quebec, and judgment was given by the latter on February 8, dismissing the said appeal. Hearing was then continued before the Honourable Mr. Justice Cannon on February 10, who on February 25, issued an order as above stated, which was in the following terms:

In the matter of the application of Napoléon Drouin, Louis Létourneau, Eugène Lamontagne, Michel Brunet, Joseph-Etienne Samson, Joseph Picard, Ernest Caron, J. Alphonse Langlois, Robert Stewart, Charles W. Walcot, all of the City of Quebec, dated the tenth day of November, 1910, for an order directing an investigation under the "Combines Investigation Act" into an alleged combine with regard to the manufacture and sale of machinery for manufacturing boots and shoes.

I, the Honourable Lawrence John Cannon, a judge of the Superior Court for the Province of Quebec, after having read the application of Napoléon Drouin, Louis Létourneau, Eugène Lamontagne, Michel Brunet, Joseph-Etienne Samson, Joseph Picard, Ernest Caron, J. Alphonse Langlois, Robert Stewart and Charles W. Walcot, dated the tenth day of November, 1910, the statement and statutory declarations accompanying the same and the evidence produced by the said applicants, am satisfied that there is reasonable ground for believing that a combine exists with regard to the manufacture and sale of machinery for manufacturing boots and shoes, which has operated to the detriment of consumers and producers, and that it is in the public interest that an investigation should be held, and I do therefore direct that an investigation be held, under the provisions of the said Act, into the following matters, that is to say:—

The United Shoe Machinery Company of Canada, a corporation organized under the laws of the State of New Jersey, one of the United States of America, hereinafter referred to as the "Company," deals in machinery of practically all kinds required and used in manufacturing boots and shoes, and also in supplies used in the making of boots and shoes. The Company does not, and for years past has refused to sell its machines, but leases them to manufacturers who may require them for use in their business, and one or more of the machines controlled by the Company have heretofore been used in all boot and shoe factories as part of their customary equipment. All, or practically all, the leases are under written contracts for long periods, usually of twenty years, each covering one machine, and are therefore practically interminable, and these contracts contain certain conditions such as the following, which are extracted from some of said contracts:—

"The lessor and its agents and employés shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor."

"The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers or other inscription now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively, and shall pay therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices of every kind needed or used in operating, repairing or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction, or alteration to, from, or in the leased machinery, without the consent in writing of the lessor, nor interfere with the proper operation of the same."

"The lessee shall use the leased machinery to its full capacity on all boots, shoes and other footwear made in his factory in the manufacture of which it can be used, but the leased machinery shall not, nor shall any part thereof, be used in the manufacture of any boots, shoes or other footwear which are or shall be welted or the soles stitched on welt sewing or sole stitching machines not leased from the lessor, or in the manufacture of any turn boots, shoes or other footwear, the soles of which are or shall be attached to their uppers by turn sewing machines not leased to the lessee by the lessor, or in the manufacture of any boots, shoes or other footwear, which have been or shall be pegged, slugged, heel-seat nailed, or otherwise partly made by the aid of any pegging or metallic machinery not leased to

the lessee by the lessor or its assignor."

"If at any time the lessee shall fail or cease to use exclusively lasting machinery held by him under lease from the lessor for lasting all boots, shoes or other footwear made by or for him, which are lasted by the aid of machinery, or shall fail or cease to use exclusively tacking mechanisms and appliances held by him under lease from the lessor for doing all work in the manufacture of all boots, shoes and other footwear made by or for him which is done by the aid of tacking mechanisms and appliances, the lessor, although it may have waived or ignored prior instances of such failure or cessation, may at its option, terminate forthwith by notice in writing this lease and license and any other lease or license of lasting machines, lasting machinery, lasting mechanisms, or lasting devices then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and the possession of and full right to and control of all the leased machinery, and all lasting machines, lasting machinery, lasting mechanisms and lasting devices held by the lessee under any other lease or license from the lessor or its assignors shall thereupon revest in the lessor free from all claims and demands whatsoever."

"The lessee agrees as rent or royalty for the said machinery to purchase of the lessor at the prices established by the lessor all the fastening materials used by him or in connection with the said machinery."

"The lessee admits the validity of each and every of the Letters Patent of the Dominion of Canada owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery, and agrees that he will not directly or indirectly infringe or contest the validity of, or the title of the lessor to, any of said patents. The termination or cesser of this lease and license from any cause whatever shall not in any way effect the provisions of this clause, or release or discharge the lessee from the admission and estoppel herein set forth."

The Company will not sell its machines, nor will it lease them except on conditions such as above recited, and such has been its practice for many years past, and therefore all, or practically all the boot and shoe machinery now in use in Canada is held subject to conditions as hereinbefore set forth.

A number of the machines are protected by Canadian Patents and can be obtained only from the Company. Boot and shoe manufacturers requiring any of these machines can obtain them only on condition of signing contracts such as above indicated, and by the terms of such contracts are forced to buy all or practically all of their other machinery, and a large part of their supplies, from the Company.

Among the more important machines covered by such contracts are lasting machines, eyeletting machines, channelling machines, turners, screw machines, slugger machines, tacking machines, nailing machines, pegging machines and compressing machines.

Inasmuch as the Company has heretofore for a long period kept control of the market for shoe machinery by every means in its power, especially by insisting on leases as aforesaid, practically all manufacturers of boots and shoes are in consequence bound to it by contracts containing conditions as aforesaid and unable, except at the cost of complete disorganization of their factories and at excessive expense, to purchase or acquire any machines they may require or deem useful in their business except from the Company. The result is that manufacturers of boots and shoes all throughout Canada are absolutely tied down to the Company, compelled to buy the Company's machines, parts and supplies, as provided in their contracts, at the Company's own prices, and are deprived of the benefit of all competition.

The contracts, agreements and acts of the Company as aforesaid constitute an arrangement which is a combine within the meaning of the Act.

Moreover, the said Company is the Canadian representative of the United Shoe Machinery Company, of Boston, a foreign corporation, and is owned or controlled by the said last mentioned or parent corporation or interests allied thereto and in the interest and advantage of the said parent corporation.

The said parent corporation is a com-

bination, merger or amalgamation of numerous Companies manufacturing and dealing in boot and shoe machinery, and controls in the United States the business of manufacturing and dealing in boot and shoe machinery in a somewhat similar way and extent to those above indicated as the method and extent of the control of the boot and shoe machinery business in Canada by the United Shoe Machinery Company of Canada.

The said United Shoe Machinery Company of Canada and its various contracts, agreements and arrangements above set out, and the control of the said boot and shoe machinery business in Canada, as aforesaid, constitutes a trust, monopoly, merger and a combine within the meaning of the Act.

The said combine affects prices as follows:—

It compels all manufacturers of boots and shoes having contracts with the Company or requiring any one of their machines to obtain all their machinery from it, also to buy from the Company certain supplies used in the manufacture of boots and shoes. It prevents them from buying machinery that would do the same or better work from other manufacturers or dealers, and in like manner restricts their purchase of supplies. It thus places them at the mercy of the Company as regards prices for machinery and supplies, increases the cost of their machinery and supplies and thus increases the cost of the manufactured article, boots and shoes. By thus increasing the cost of manufacture, the price to the consumer is thereby increased on all the principal lines of boots and shoes. The percentage of such increase the applicants are unable to state, but it must be large, for the extra cost of supplies purchased from the Company used in connection with the Metallic System alone is between forty and fifty per cent. over the cost of similar supplies in the open market.

The said combine also restricts competition in machinery used in the manufacture of boots and shoes, as it destroys the market for all other manufacturers of and dealers in such machinery, who are unable to make sales to boot and shoe manufacturers. It prevents the establishment of Canadian industry in the making of such machinery, and keeps the whole of such business in the hands of the Company, and it stifles all incentive to invention or improvement in machines, the more so as the Company insists on the letter of its contract and invokes the aid of the Courts to prevent the purchase by manufacturers of boots and shoes of any machines other than its own. On the other hand, the Company's unchallenged control of the shoe machinery industry in the past has been so complete that there has been no incentive on its part for effort to improve its machinery.

This combine also by increasing the cost of the manufacture of boots and shoes, and thus necessarily making the selling price of the manufactured article higher, restricts the manufacturers' sales, and thus to some extent injures the manufacturer, as well as the consumer.

It works to the detriment of makers of competing machines, as it prevents the sales of such machines.

The Company is the holder of Patents under the Patents Act, and has made use of the exclusive rights and privileges which as such holder it controls, so as to restrain and injure trade or commerce as aforesaid.

The names of the persons said to be concerned in the alleged combine are: The United Shoe Machinery Company of Canada, and its officers and agents, more especially, Sidney W. Winslow, its president, and George W. Brown, its general manager and treasurer, both resident in or near Boston, in the Commonwealth of Massachusetts, and Frank W. Knowlton, of Montreal, its manager and agent of the business in Canada; and also the various boot and shoe manufacturers in Canada with whom such contracts are made, among others, The John Ritchie Company Limited, The William Marsh Company Limited, Tourigny & Marois, The Louis Gauthier Company, all of the City of Quebec, and also J. B. Blouin & Company, of the Town of Levis.

And I am of opinion that the Minister of Labour should communicate with Frank W. Knowlton, of the City of Montreal, manager and agent of the business in Canada of the said United Shoe Machinery

Company of Canada, in order to obtain the recommendation for the appointment of a person as a member of the Board of Investigation on behalf of those concerned in the said alleged combine.

Dated at Quebec, this twenty-fifth day of February, 1911.

(*Signed*) L. J. CANNON,
Judge, Supreme Court.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF FEBRUARY, 1911.

ON January 16, an application was received in the Department for the establishment of a Board of Conciliation and Investigation on behalf of the employés of the North Atlantic Collieries Company, Limited, of Port Morien, N.S., the dispute affecting, it was alleged, 110 employés directly and 150 indirectly.

Reports Received.

During the month of February reports were received of three Boards of Conciliation and Investigation established under the Act, as follows:—

1. Report of Board to which had been referred certain differences between the Crow's Nest Pass Railway Company and its employés.

2. Report of Board to which had been referred certain differences between the Intercolonial and Prince Edward Island Railways and their telegraphers, train dispatchers, and station agents, members of the Order of Railway Telegraphers.

3. Report of Board to which had been referred certain differences between the Wettlaufer Silver Mining Company, Limited, of South Lorrain, Ont., and its underground miners, machine men, drillers and muckers.

Other Proceedings under the Act.

In the application of the employés of the North Atlantic Collieries Company, Limited, of Port Morien, N.S., for the establishment of a Board of Conciliation and Investigation it was stated that the differences in question related to changes in wages and conditions of employment which were objectionable to the employés concerned. The number of employés affected by this dispute was said to be 110 directly and 150 indirectly.

A Board was established by the Minister of Labour in this matter on February 16, and was constituted as follows:—

Mr. Duncan G. MacDonald, of Sydney Mines, N.S., appointed by the Minister on behalf of the Company, to take the place of Mr. C. Ochiltree McDonald, of Halifax, N.S., the Company's nominee, who was regarded as being disqualified under the provisions of Section 11, the Industrial Disputes Investigation Act from acting as its representative; Mr. Alexander McKinnon, of Glace Bay, N.S., appointed on the recommendation of the employés concerned; and Mr. Stuart McCawley, of Glace Bay, N.S., Chairman, appointed by the Minister in the absence of any joint recommendation from the other members of the Board.

I. REPORT OF BOARD IN DISPUTE BETWEEN THE CROW'S NEST PASS COAL COMPANY LIMITED, AND ITS EMPLOYÉS.

THE Minister of Labour received, on February 18, the unanimous report of the Board of Conciliation and Investigation to which had been referred, for adjustment, certain matters in dispute between the Crow's Nest Pass Coal Company, Limited, of Fernie, B. C., and employés.

In the employés application for the establishment of this Board the differences in question were embodied in two complaints, namely: (1) the increased charge by the Company for the use of special trains to convey those of their employés who were members of the United Mine Workers of America from Coal Creek, B. C., to Fernie, B. C., and return; and (2) an alleged reduction in the wages of certain employés in contravention of the existing agreement be-

tween the Company and its employés. The number of employés concerned in this dispute was given as 3,000.

The Company claimed that the trains and tracks belonged to the Morrisey, Fernie and Michel Railway Company, and that the schedule of rates objected to was passed by the Directors of the latter Company at a meeting held by them on March 11, 1910.

A Board was established in this matter by the Minister of Labour on November 27, 1910. Messrs. W. S. Lane, of Fernie, B. C., and Clement Stubbs, of Bellevue, Alta., were appointed members on behalf of the Company and of the employés respectively; and in the absence of any joint recommendation from the foregoing, the Board was completed by the Minister of Labour on December 18 by the appointment of Sheriff I. S. G. Van Wart, of Calgary, Alta., as Chairman.

On the first point involved in this dispute the award of the Board of Conciliation and Investigation is substantially in favour of the men, the Board considering that the relations between the Crow's Nest Pass Coal Company and the Morrisey, Fernie and Michel Railway Company are so close that it is impossible to find the distinction between the two; and that therefore, the Crow's Nest Pass Coal Company should, during the life of the agreement, continue to supply trains at the old rate. Regarding the question of the alleged unfair reduction of wages of certain employés, the finding of the Board is also in favour of the men with the exception of one instance where the Company's action is upheld.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:

In the matter of the Industrial Disputes Investigation Act, 1907, and amending Acts, and in the matter of certain disputes between the employés of the Crow's Nest Pass Coal Company, Limited, as represented by District No. 18, United Mine Workers of America, whose headquarters are at Fernie, B. C., and the said Crow's Nest Pass Coal Company, Limited, a body corporate, having its Head Office at Fernie aforesaid.

The Board of Conciliation in the above beg to report the following findings:

Complaint I.—

The Board find as follows:—

That the relations between the Crow's Nest Pass Coal Company, Limited, and the Morrissey, Fernie and Michel Railway Company are so close that it is impossible to find the distinction between the two; that the employés of the Crow's Nest Pass Coal Company, Limited, in regard to special trains, have always considered they were doing business with the Crow's Nest Pass Coal Company, Limited, and we, therefore, find that the Crow's Nest Pass Coal Company, Limited, should, during the life of the Agreement, namely, up to March 31, 1911, continue to supply trains at the old rate.

Complaint II.—

In regard to the cases of wages formerly paid to employés over and above the schedule price, we find that in the case of David Atherton, he was dismissed for cause by the Company and later signed on as a new man; therefore, he is not entitled to wages above the schedule price.

In the case of Parsons and Gaskell, we find these men were employed to work in an abnormal place, and had been promised their pay would be made up to the extent of $3.50 per day, and went to work on this understanding. Their wages for May were paid at the rate of $3.25 per day. They afterwards made claim for sufficient to make their wages up to $3.50 per day. This was allowed and paid by the Company, the Company claiming it was through a misunderstanding that the extra allowance was made. We find that these men had been working with the understanding that they were to receive $3.50 per day, and that, therefore, the Company shall pay them at the rate of $3.50 per day for their work during the month of June. This decision is not to be used as a precedent.

(Sgd.) I. S. G. Van Wart,
Chairman.

W. S. Lane,
Representing the Crow's Nest Pass Coal Company, Limited.

C. Stubbs,
Representing United Mine Workers of America.

II. REPORT OF BOARD IN DISPUTE BETWEEN THE INTERCOLONIAL AND PRINCE EDWARD ISLAND RAILWAYS AND THEIR TELEGRAPHERS, TRAIN DESPATCHERS AND STATION AGENTS, MEMBERS OF THE ORDER OF RAILWAY TELEGRAPHERS.

THE Minister of Labour received, on February 20, the unanimous report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Intercolonial and Prince Edward Island Railways and their telegraphers, train despatchers, and station agents, members of the Order of Railway Telegraphers.

In the employés' application for the establishment of this Board it was stated that the differences in question related to the failure of the Management to live up to the terms of the existing schedule of rules and rates of pay with respect to certain of their employés; also to the refusal of the Management to agree to certain proposed amendments to the same schedule. The number of employés affected in the dispute was said to be 490.

Both parties subsequently agreed to meet for the purpose of adjusting, if possible, the differences between them. These conferences, however, failed to settle the matters in dispute; and a Board was accordingly established by the Minister of Labour on December 17, being constituted as follows: Messrs. J. H. Gilmour, of Brockville, Ont., and J. G. O'Donoghue, of Toronto, Ont., appointed on the recommendation of the Managing Board and the employés respectively, and His Honour Judge John A. Barron, of Stratford, Ont., Chairman, appointed on the joint recommendation of the foregoing members of the Board.

Sittings of the Board were held at Ottawa on January 20 and 21, and subsequently at Ottawa, Montreal, Halifax and Toronto, from February 2 until February 16.

In its report the Board compliments all the representatives on the care shown in the presentation of their evidence and argument, and the spirit of fairness displayed throughout the investigation. The Board recommends an increase in the wage rate to date from October 1, 1910. With regard to the number of hours operators should be required to work, the Board does not recommend any change except in the case of those operators employed at certain specified terminal points, in which case the Board recommends that an eight-hour day be granted instead of the twelve hour day at present in force.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

Report of the Board of Conciliation and Investigation.

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of differences between the Intercolonial and Prince Edward Island Railways and their telegraphers, train despatchers and station agents, members of the Order of Railroad Telegraphers.
February 16, 1911.

TORONTO, ONT., February 16, 1911.

The Honourable,
The Minister of Labour,
Ottawa, Ont.

SIR:

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of differences between the Intercolonial and Prince Edward Island Railways and their telegraphers, train despatchers and station agents, members of the Order of Railroad Telegraphers.

The undersigned, members of the Board of Conciliation appointed under the provisions of the above named Act to investigate the differences between the parties concerned, beg to report as follows:—

Sittings of the Board were held at Ottawa on January 20 and 21, 1911, at which were present Messrs. A. W. Campbell, Deputy Minister of Railways, F. P. Brady, General Superintendent of the Intercolonial, J. B. T. Caron, Counsel for the Intercolonial Board of Management, and R. Colclough representing the employers. Messrs. D. Campbell, S. C. Charters, K. Stewart, N. Fortin, R. A. McMillan and J. J. Trainor were present in behalf of the employés. Subsequent sittings were held at Ottawa, Montreal, Halifax and Toronto, beginning February 2, and continuing until this date, February 16.

All the matters in dispute were carefully inquired into, and we must compliment all the representatives on the care shown in the presentation of their evidence and argument, and the spirit of fairness displayed throughout the investigation.

The parties having already agreed upon all other points, there remained but the following matters to be disposed of by the Board:

First, as to the claim for an increase in wage rate. The Board is of the opinion that the sum of $35,000 per year should be allotted for this purpose to be distributed by increasing the minimum salaries as set forth in Article 24 of the Schedule hereunto annexed, and the balance to be apportioned to the regular salaries of the men now employed, as may mutually be agreed upon between the Committee of the employés and the Board of Management. The Board is further of the opinion that this increase should date from October 1, 1910.

Second, as to the number of hours operators should be required to work per day. At present the men work twelve hours per day with the exception of train despatchers, who work eight per day. The Board does not, for the present, recommend any change in this regard except in the case of those operators employed at terminal points indicated in Article 20 of the schedule hereunto annexed, in which case the Board recommends that an eight hour day be instituted for these men.

The Board is unanimous in its opinion on the above points.

All of which is respectfully submitted.

(Sgd.) JOHN A. BARRON,
Chairman.

(Sgd.) J. H. GILMOUR,
Representing the employers.

(Sgd.) J. G. O'DONOGHUE,
Representing the employés.

Schedule of Rules for telegraphers including those agreed upon by the Board of Management and the Committee of the employés together with those recommended by the Board of Conciliation and Investigation.

INTERCOLONIAL AND PRINCE EDWARD ISLAND RAILWAYS.

RULES AND RATES OF PAY FOR TELEGRAPHERS.

Effective October 1, 1910.

ARTICLE 1.

Employés required to perform telegraph service of any character or duration, whether termed agent, assistant agent, operator, train despatcher, or otherwise, also employés filling any position incorporated in Article 24 will be considered telegraphers within the meaning of this schedule irrespective of the title by which designated, or character of service performed.

ARTICLE 2.

Telegraphers will not be discriminated against for being members of the Order of Railroad Telegraphers, nor for serving on Boards of Adjustment representing telegraphers, and will be given leave of absence, and furnished with free transportation on Canadian Government Railways for such purpose, when it is possible to do so without inconvenience to the Railway.

ARTICLE 3.

No telegrapher will be suspended or discharged without just cause, and any

telegrapher charged with, suspended or discharged for an alleged fault, the same shall be fully specified in writing giving full particulars two days prior to any investigation, and he will have a full and impartial hearing, and decision will be rendered within fifteen days after filing his written request therefor with the proper official and if suspended for investigation, such investigation will be held and decision will be advised within fifteen days without such request. If found blameless, as charged, he will be reinstated and will be paid for time lost at stated rate of salary.

If he is detained at the instance of the Management for more than fifteen days awaiting investigation, he will be paid for the additional time at his stated rate of salary, whether found guilty or not. If decision rendered is considered unjust, an appeal may be made in writing within fifteen days to higher officials, who will deal with it under the same procedure as indicated in the previous clause.

Telegraphers will have the right to be represented by one or two of their number at any investigation, and a written statement giving the result of such investigation will be furnished to telegraphers affected, by the Management.

ARTICLE 4.

When a telegrapher is dismissed, or leaves the service after giving the due notice required by the rules, he will be given the usual certificate from the proper official, stating term of service, capacity in which employed, and whether discharged or leaving of his own accord. If discharged, cause of dismissal to be stated.

ARTICLE 5.

Telegraphers employed by this Railway will, on application, have returned to them all service cards and letters of recommendation that may have been taken up for inspection.

ARTICLE 6.

Clause 1. The right of promotion of telegraphers, except train despatchers, shall extend over the following districts:

(*a*) Ste. Rosalie Junction to Metapedia, inclusive.

(*b*) Flat Lands to Berry's Mills, inclusive.

(*c*) St. John to Athol, inclusive.

(*d*) Spring Hill Junction to Halifax, Pictou and Sydney, inclusive.

(*e*) Prince Edward Island Railway.

In the case of Spring Hill Junction the agent only is included in paragraph (*d*) the others named in the schedule at that station are included in paragraph (*c*). Provided also that any new positions opened after the date of this schedule between Berry's Mills and Moncton shall be included in paragraph (*b*).

Clause 2. The right of promotion of train despatchers shall extend over each of the three districts as follows:—

(1) Ste. Flavie West.

(2) Ste. Flavie East.

(3) Prince Edward Island: and will be in order from senior relieving despatcher to trick despatcher, and from trick despatcher to chief despatcher.

In filling vacancies in any office, senior despatchers shall have choice of tricks, but no change of tricks will be permitted within one year, except with the consent of the Superintendent, or in the event of a vacancy occurring.

When there is a vacancy in the relieving despatching staff it will be advertised on the district (as per clause (1) ofthis article) where the ultimate vacancy occurs, and telegraphers will be given an opportunity to pass an examination as train despatcher in the order of their seniority. The senior qualified applicant will receive the appointment.

Train despatchers will retain their seniority standing among the agents and operators.

In filling the position of chief despatcher any despatcher in the territory in which the vacancy occurs, including the chief despatchers shall be eligible.

Clause 3. All promotions will be governed by merit and ability of which the General Superintendent will be the judge, these being sufficient, the telegraphers longest in the service, or those holding seniority rights according to their class, will have the preference. When a vacancy occurs, the Superintendent will

fill the same by oppointing the senior man who is in his opinion entitled to the position, but this will not prevent any telegrapher senior to the man so appointed claiming his right to the position, provided he files his protest within fifteen days after the appointment has been made.

Clause 4. Telegraphers will have the exclusive right to any position incorporated in Article 24 of this schedule, also to any new telegraphers' positions created.

Telegraphers will also be eligible with employés in other branches of the service to be considered in line of promotion to any of the agencies not incorporated in Article 24.

Clause 5. In the case of vacancies occurring, or of new positions being created, for which telegraphers are eligible under this schedule, they will be advertised for fifteen days by a bulletin sent to all stations, during which time applications can be made.

Permanent appointments will be made and vacancies will be filled within a reasonable time thereafter, and will be immediately bulletined. The acceptance by the senior qualified applicant is imperative.

When a telegrapher accepts a transfer, and after a fair trial is found incapable, he will take his place as a spare telegrapher, and will retain his seniority rights.

Article 7.

When a telegrapher is transferred by order of the proper official he will receive free transportation for himself, family and household goods, and will suffer no loss of time in consequence.

Article 8.

Telegraphers not wishing to accept promotion offered by the Management will not lose any right to any vacancy occurring thereafter.

Article 9.

The Management will not abolish positions incorporated in Article 24 except in case of a reduction of staff. A telegrapher holding such position so abolished will receive fourteen days' notice of the same, and will be entitled to the position then held by the junior permanently located telegrapher in that district, but will retain his seniority rights.

Article 10.

Complete lists of all telegraphers on each of the districts named in Article 6 will be prepared within thirty days after the date of this schedule, such lists to show the seniority of all telegraphers on such districts and to be open to their inspection at the Superintendents' offices. These lists will be subject to correction on proper representation from any telegrapher, and a correct copy of the lists will be furnished to the General Chairman on application at the beginning of each year.

A telegrapher's seniority will count from the date he last entered the service as a telegrapher.

A train dispatcher's seniority, as such, will date from the time his examination papers were approved by the Superintendent.

Article 11.

Telegraphers transferred at the request of the management to any other branch of the service, temporarily or otherwise will receive not less than their regular salaries under this schedule and will, likewise, be entitled to all the privileges therein provided.

Article 12.

Telegraphers will not be required to clear the platforms of snow, cut wood, load or unload wood or coal, sift ashes, clean or disinfect stock or other cars,or outbuildings.

Article 13.

Telegraphers will not be required to teach telegraphy nor will a telegrapher teach telegraphy on the Railway premises without the written permission of the Superintendent.

ARTICLE 14.

Telegraphers called upon to attend court or investigation at the request of the proper official of the Railway will receive pay at their stated rate of salary, not more than one day's time for each twenty-four hours, and, if away from home will be allowed reasonable expenses.

ARTICLE 15.

Telegraphers performing duty at wrecks, washouts, or other emergency offices will be paid their stated rate of salary and reasonable expenses.

ARTICLE 16.

Telegraphers will not be required to work on Sundays except when absolutely necessary to protect the Railway's interests and when required to work on Sundays will be paid for such services pro rata on stated salary, but not less than 25 cents per hour, and in no case will less compensation than for two hours be allowed.

In regard to this Article, when the extreme time limits of the time worked during any number of calls do not exceed two hours' time, it will be considered as one call, for which two hours' compensation will be allowed.

EXAMPLE.—A telegrapher called at 8.00 o'clock relieved at 8.15, called again at 9.00 o'clock, relieved at 9.20, called at 9.45, relieved at 10.00, one call, two hours' time allowed.

If the second, or any subsequent call, or the time worked is not covered by the two hours' limit, the additional time in excess of the two hours will be allowed.

EXAMPLE.—A telegrapher called at 8.00 o'clock, relieved at 8.30, called again at 8.45, relieved at 10.45, three hours' time.

Fractions of an hour to be computed as in Article 22.

EXAMPLE.—A telegrapher called at 8.00 o'clock, relieved at 8.30, called again at 9.45, relieved at 10.25, two hours' time.

If the calls are separated so that each call occurs beyond the two hour limit, two hours' time will be allowed for each call.

EXAMPLE.—A telegrapher called at 8.00 o'clock, relieved at 8.15, called again at 10.30, relieved at 10.35, called again at 13.00 o'clock, relieved at 13.30, called again at 15.00 o'clock, relieved at 15.20, four calls, eight hours' time allowed.

ARTICLE 17.

Telegraphers who are regular trick despatchers will be granted three weeks' leave of absence annually, with full pay, other telegraphers who are permanently employed will, after one year's service be granted two weeks' leave of absence annually, with full pay. Telegraphers who are temporarily employed will, after working three hundred days in any one holiday year, be granted two weeks' leave of absence, with full pay, and will be furnished free transportation for themselves and families to any point on the system.

They will, on application, receive from their Superintendent a letter showing that they have been granted such leave of absence.

In the event of the railway not being able to relieve the telegrapher and grant him his leave of absence at any time in any one year, such leave of absence will be added to his leave of absence in the following year.

ARTICLE 18.

Present arrangements of permitting telegraphers to accept commissions from express and telegraph companies doing business on the railway will be continued.

ARTICLE 19.

If telegraphers are required to attend oil lamps in switches or semaphores they will receive $4 per month for four or less such lights, and 50 cents per month for each additional switch or semaphore light at such station.

Nothing in this Article will relieve telegraphers from their responsibilities of seeing that the telegraph signal and all other signals are in perfect working order, and at night that all lamps are clean and burning brightly.

ARTICLE 20.

Clause 1. Twelve consecutive hours, including meal hours will constitute a day's work for a telegrapher except as otherwise provided for in this schedule.

Clause 2. Eight consecutive hours train despatching and time for transfer will constitute a day's work for telegraphers who are train despatchers.

Clause 3. Eight consecutive hours will constitute a day's work for telegraphers at the following points: Levis, River du Loup, Campbellton, Moncton, Truro, Newcastle and New Glasgow.

Clause 4. The hours of duty will be defined from time to time by the Superintendent of the district, and when telegraphers are required to exceed the above named hours they will receive an official order and will be excused in the same manner, and will be allowed overtime as per Article 22.

Clause 4. On the Prince Edward Island District the hours of duty of the train despatchers are to remain as at present subject to the discretion of the Superintendent.

ARTICLE 21.

When a telegrapher is called on duty after his regular hours, he will be entitled to the allowance provided for as a "special call."

ARTICLE 22.

Overtime will be computed pro rata on stated salary, but in no case at less than 25 cents per hour.

In computing overtime, less than thirty minutes will not be counted, thirty minutes and less than sixty minutes will be considered an hour.

Special calls and up to one hour's service connected therewith will be paid at the rate of 50 cents per call.

Overtime will not be allowed unless overtime tickets are mailed to the proper official within forty-eight hours from the time the service is performed. If overtime is not allowed telegraphers will be notified within ten days from the time such service is performed, setting forth the reason for disallowance.

ARTICLE 23.

A sufficient number of regular relief agents shall be appointed on each Superintendent's Division, who will receive the salary of the man relieved, but in no case less than eighty dollars ($80.00) per month.

Regular telegraphers called upon to do relief work temporarily will receive the salary of the one relieved, provided it is not less than their own, and 50 cents (50c) per day additional for expenses if away from their regular stations.

Spare telegraphers called upon to do relief work will receive the salary of the man relieved.

It is understood that when regular relieving agents are not engaged in relieving they may be used in the Superintendent's offices, audit, or other offices, or at any other employment when required.

Vacancies in the regular relief agents' staff will be advertised in the usual way and the senior qualified applicant in each Superintendent's District will receive the appointment.

Regular relief agents will only be required for duty on their Superintendent's District, and will be eligible for promotion to positions within the territory (as specified in Clause 1 of Article 6) from which they are taken.

ARTICLE 24.

WAGE SCHEDULE.

The minimum monthly salaries for train despatchers will be as follows:

Train despatchers, 1st year	$110.00
Train despatchers, 2nd year	115.00
Train despatchers, 3rd year	120.00
Train despatchers, 4th year	125.00
Relieving despatchers	105.00

and 50 cents per day for expenses when away from headquarters, and allowed for travelling expenses if moved.

On the Prince Edward Island District the monthly salaries will be as follows, for train despatchers:

Senior despatcher	$125.00
Assistant despatcher	110.00

The minimum monthly salaries for telegraphers will be as follows:

Agent and telegrapher with dwelling, fuel and light	$53.00
Agent and telegrapher without dwelling, fuel and light	58.00
Telegraphers	53.00
Telegraphers shown in Clause 3 of Article 20	70.00
Relief agents	80.00

III. REPORT OF BOARD IN DISPUTE BETWEEN THE WETTLAUFER SILVER MINING COMPANY LIMITED, OF SOUTH LORRAIN, ONT., AND ITS UNDERGROUND MINERS, MACHINE MEN, DRILLERS AND MUCKERS.

THE Minister of Labour received, on February 28, the unanimous report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Wettlaufer Silver Mining Company, Limited, and underground miners, machine men, drillers and muckers in its employ.

In the application for the establishment of this Board it was stated that the dispute in question related to the proposed reduction of 25 cents per day in the wages of the men directly concerned. The number of employés affected in the dispute was given as thirty-five directly, and thirty indirectly.

The Board which was appointed to investigate this dispute was constituted as follows: Messrs. R. F. Taylor, of Cobalt, Ont., and Chas. H. Lowthian, of Silver Centre, Ont., being appointed on the recommendation of the Company and the employés concerned, respectively, and Mr. George Ritchie, Barrister, of Toronto, Ont., Chairman, appointed by the Minister in the absence of any joint recommendation from the other members of the Board. In the February number of the *Labour Gazette* it was stated that Mr. John Seward, of Cobalt, Ont., had been appointed on behalf of the Company. Mr. Seward's appointment, however, was not in accordance with section 42 of the Industrial Disputes Investigation Act. It was accordingly annulled and Mr. R. F. Taylor appointed in his stead.

The Board met at Silver Centre on February 22 and at Cobalt on February 23, evidence being taken at both these sittings from representatives of the Company and the employés. On February 24, the Board met to consider the evidence submitted, and, after considerable care in analysing the whole situation, came to the unanimous conclusion that the scale of wages now paid to the employés should stand, and recommends that the Company withdraw the action of its former manager in notifying the men that a cut of 25 cents per man would be made on January 4, 1911.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

COBALT, Feb. 24, 1911.

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of differences between the Wettlaufer Silver Mining Company and certain of its employés.

Between the Wettlaufer Mining Company, Employers; and Underground miners, machine men, drillers, muckers, and Patric Redmond, employés.

The Board of Conciliation appointed to adjust the disputes between the Wettlaufer Mining Company, Limited, and its employés met at Silver Center on Wednesday, the 22nd day of February, 1911, at two o'clock, P.M.

Present: George Ritchie, chairman; Charles H. Lowthian, and R. F. Taylor.

Each of the Board of Conciliation having been duly sworn, the Wettlaufer Mining Company were represented by John Seward, Edward Wettlaufer, and James McDonald; the employés being represented by William Davidson, James McIntosh and Dan McDougal. Both parties consenting, the Mining Company presented its side of the case, and submitted a scale of wages and confirmed their previous offer to increase that scale by 10 cents per day per man, because of the inconvenience of living in the locality of the Wettlaufer Mine, and submitted evidence which showed that the net result to the employés would be to their advantage, and a net loss to the Company, although the Company alleged

that the change from the present scale of wages to the one proposed by them was done to operate the mine on more economic lines. Upon analysing the losses and gains both ways it was clear that the company would be the losers by the proposed change. After the Company's evidence was in the Board adjourned and convened a meeting in the bunk house at the mines in the evening, in the presence of all the employés. At this sitting several of the principal men came forward voluntarily and gave evidence showing that the local conveniences of living in the camp were fairly good, and did not make any complaint, but submitted the scale of wages under which they were working, and preferred that the Company should continue to follow that scale without any alterations whatever. Although the men swore that the bunk house was overcrowded they were all willing to put up with this difficulty until the Company could see its way clear, as the mine developed, to furnish better accommodation, the mine being a new one. It developed during the taking of the evidence that the scale proposed by the Company was pretty well recognized by the miners in and around Cobalt, and the Board deemed it necessary to adjourn to Cobalt, reaching there on the evening of the 23rd of February. Having made general enquiries as to the scale of wages it appeared that about seventy-five per cent of the miners in and about Cobalt are working under the scale submitted by the Company, and about twenty-five per cent. are working under the scale asked for by the employés.

A list of the companies and an estimated number of the men employed by them is hereto annexed.

On Friday, the 24th day of February, the Board met to consider the evidence submitted, and after considerable care in analysing the whole situation came to the unanimous conclusion that the scale of wages now paid to the employés should stand, and recommend that the Company withdraw the action of its former manager in notifying the men that a cut of 25 cents per man would be made on the 4th of January, 1911.

Attached to this report is a schedule submitted by the Company and marked as exhibit "2", and a scale of wages submitted by the men and marked as exhibit "1", together with a letter signed by Mr. Gauthier, marked as exhibit "3". A letter from Elk Lake, Gowganda and Porcupine, marked as exhibits "4", "5", and "6". The recommendation of the Board has been submitted to the Manager of the Wettlaufer Mining Company, Limited, and which he is submitting to his Board of Directors in New York City with his recommendation.

Dated at Cobalt, Ont., this 24th day of February, 1911.

(Sgd.) George Ritchie,
Chairman.
(Sgd.) R. F. Taylor.
(Sgd.) Chas. H. Lowthian.

Respectfully submitted to—
The Honourable
W. L. Mackenzie King, C.M.G.,
Minister of Labour,
Ottawa.

WAGE SCALE.

Adopted by
Cobalt Miners' Union No. 146.

July 1907.

The following scale was adopted unanimously for all mines in the district:—

Carpenters	$3.50
Mechanics	3.50
Pipe fitters	3.00
Blacksmiths	3.50
Helpers	2.75
Engineers, (nine hours)	3.25
Over nine hours, 32½ cts. per hr.	
Firemen (nine hours)	2.75
Over nine hours, 27½ cts. per hr.	
Ore sorters	2.75
Hammermen	3.00
Teamsters	2.75
Hoistmen (nine hours)	2.75
Over nine hours, 27½ cts. per hr.	
Cage or bucketers	2.75
Other labour on surface	2.50

UNDERGROUND.

Timbermen	$3.50
Machine men	3.50
Helpers	3.00
Cage or bucketers	2.75
Other underground labour	2.75

Miners ask that not more than 60 cents per day be charged for board; miners in shafts 25 cents extra per day; in wet shafts mine owners to furnish oil clothes to the men. Surface to work nine hours, and all underground work to be nine hours. Cooks' minimum wages per month, $75.

Cabalt Miners' Union, No. 146, W.F.M.

COBALT SCHEDULE.

Machine miners	$3.25
Machine helpers	2.75
Muckers	2.50
Underground deckman	2.50
Underground cagetenders	2.50
Pumpman (per hour)	.25
Underground hoistmen (per hour)	.25
Shift boss	4.00
Ore sorters	2.50
Head ore sorters	2.75
Deckmen	2.50
Surfacemen	2.25
Mechanics (per hour)	.30
Engineers (per hour)	.30
Firemen (per hour)	.30
Hoistmen (per hour)	.25
Blacksmiths	3.50
Blacksmiths' helpers	2.75
Carpenters (head)	$3.50 or 35c.
Carpenters (general)	3.25
Carpenters (helpers)	2.75

Respective Scale of Wages observed by the Companies Operating in and about Cobalt.

The following companies pay the scale of wages fixed by Association of mine owners:—

The Rose & Lawson; O'Brien; Kerr Lake Mining Company; Nova Scotia; Right of Way; Cobalt Town Site; Cobalt Lake; Colonial; Crown Reserve; Chambers Ferland; Nipissing; Buffalo; King Edward; Provincial; Coniagas; Trethewey; about 1,900 men.

Those operating under the Employés' scale are:—

City of Cobalt; Temiscaming; Hudson's Bay; Green Meehan; Foster; Lagdola; Casey Cobalt; Ophir; Columbus; employing about 500 men.

COBALT MINERS' UNION No. 146
of the
WESTERN FEDERATION OF MINERS.

COBALT, January 31, 1911.

Mr. CHAS. H. LOWTHIAN,
Secretary, 148 W.F.M.,
Silver Centre, Ont.

Dear Sir and Brother:

In answer to yours of the 30 instant, in reference to the names of the different mines for the jurisdiction of this local paying the Union scale of wages. I am giving you here as complete a list as I can think of. Of course some of them are small mines, and partly closed down now on account of shortness of power.

The Red Rock, the Green Meehan, the Hudson Bay, the Temiscaming, the City of Cobalt, the White Mines, the Foster, the Sagdola, the Casey-Cobalt, the Meteor, the Alexandria, the Columbus, the Ophir, the Ontario Development Mining Companies. I can't give you further information as to how to act in the matter other that you have to appear when the appointed board will be notified to convene, and use your best judgement against the Company's man's arguments. It might be advisable to quote the result obtained by the Board in the Hudson Bay case. Let me know when the Board shall convene, and I will try and get you more particulars. C. B. Dugy was representing us vs the Hudson Bay. You might communicate with him at Porcupine.

Fraternally.

A. U. GAUTHIER.
Secretary No. 146 W.F.M.

WAGES IN GOWGANDA CAMP.

Labrick Mine:

Machine runners (with board)	$3.25
Helpers (with board)	2.75

Muckers (with board)..... 2.25
Firemen (with board)..... 3.00
Blacksmiths (with board)..... 3.50
Engineers (with board)..... 3.15
Nine hours and air.

Ottawa-Gowganda Mining Company:
Machine runners sinking (with board).....$3.75
Helpers (with board)..... 2.50
Surface (with board)..... 2.25
Nine hours and air.

Boyd-Gordon Mining Company:
Machine runners (with board)...$3.50
Helpers (with board)..... 2.50
Blacksmiths (with board)..... 3.50
Engineers (per mo., with board)100.50
Power is air and nine hours.

Calcite Lake Mining Company:
There is likely to be a strike declared here on 15th proximo., unless a settlement is made. These people cut 32½ cents per day. Up to date the wages here have been:
Machine runners (with board)...$3.25
Helpers (with board)..... 2.50
Muckers (with board)..... 2.25
Power air and nine hours.

Powerful Mines, Limited:
Machine runners (with board)...$3.25
Helpers (with board)..... 2.50
Power steam, nine hours.

Hudson Bay Mines, Limited:
Machine runners (with board)...$3.50
Helpers (with board)..... 2.50
Blacksmith (machine steel) at *all* mines is $3.50 and board, nine hours. Power steam.

Reeves-Dobie, Blackburn & Big Six Mines:
Run ten hours and pay runners from $2.80 per day upwards. Others in proportion. These are the only three mines operating upon the ten hours basis and unfair wages.

All of these properties are running to-day. These are all of the mines working in Gowganda Camp.

ELK LAKE, ONT., February, 20, '11

Mr. C. H. LOWTHIAN,
Secretary,
Silver Center Miners' Union,
Silver Centre, Ont.

Dear Sir and Brother:

Hereunder you will find the general acknowledged wage schedule of this district:

Machinemen,	$3.00–$3.25	and board.
Helpers,	2.50– 2.75	"
Muckers,	2.25– 2.50	"
Hammermen,	2.50– 3.00	"
Surface work,	2.00– 2.50	"

Not more than nine hours' work for one day in any mine.

Yours fraternally,

(*Signed*) P. DWYER,
Secretary, Elk Lake Miners' Union No. 140,

Elk Lake, Ont., Box 348.

Porcupine Miners' Union No. 145
of the
Western Federation of Miners.

P. O. Box 9,

PORCUPINE, ONT., February 2, 1911.

MR. CHAS. LOWTHIAN,
Secretary of Silver Centre No. 149,
SILVER CENTRE, ONT.

DEAR SIR AND BROTHER,—

In reply to your letter of January 30, in reference to wages paid by the mines operating in this district, I will endeavour to give you an outline as near as possible:

The Hollinger Company pays:—

$3.50	for	machine men...	9 hours.
3.25	"	helpers.....	9 "
2.75	"	muckers.....	9 "
2.50	"	surface men.....10	"
4.25	"	blacksmiths.....	
4.50	"	engineers.....12	"

Less Board, 60 cents.

Flynn Vipond:—

Hammermen,	$3.75,	8 hours,	60c board
Blacksmiths,	4.00,	9 "	60c "
Engineers,	3.75,	12 "	60c "
Deckmen,	3.75,	12 "	60c "
Teamsters,	75.00 per month and board.		
Surface men,	$2.50 and board.		

Rea Mines:—

Hammermen...	3.00 and board,	8	hours.
Blacksmiths....	3.00 "	9	"
Surface men....	2.50 "	9	"
Engineers'....	3.50 "	9	"
Cook.....	90.00 "	9	"
Teamsters.....	75.00 "	9	"

Scottish Ontario:—

Hammermen...	$2.75 and board,	9	hours.
Blacksmiths....	4.00 "	9	"
Engineers.....	4.00 "	12	"
Surface men....	2.50 "	9	"

Crown Chartered Mining Company:—
(Scab.)

Hammermen...	$3.00,	9 hours.
Surface men....	2.50,	9 "
Machine men...	3.50,	9 "
Engineers.....	3.75,	9 "
Blacksmiths....	3.75,	9 "

Sixty cents off for board.

Armstrong McGibbon Company:—
(Scab.)

Machine men...	$3.25, 9 hours.
Helpers.....	3.00, 9 "
Engineers.....	Cannot find out what wage paid.
Surface men....	$2.50, 9 hours.
Blacksmith.	3.50, 9 "

Steam drill furnish their own oil clothes.

Sixty cents off for board.

Dome Mine:—

Machine men,	10–12	hours...	$3.50
Engineers,	12	"	4.00
Blacksmith,	10	"	3.75
Surface men,	10	"	2.25

Less 60 cents for board.

Those are a few of the principal mines working. There are several small properties paying probably better than what is here listed. The Dome is owned by the Canadian Copper Company, of Copper Cliff, and it is an impossibility to organize there, at the present time.

Yours fraternally,

(*Signed*) E. P. McCURRY,
Financial Secretary.

STATEMENT OF PROCEEDINGS UNDER INDUSTRIAL DISPUTES INVESTIGATION ACT, SINCE 1907.

IN connection with the consideration in the House of Commons, on February 10, of the estimates of the Department of Labour for the fiscal year 1911–12, the Minister of Labour furnished a statement of the results which have attended the operation of the Industrial Disputes Investigation Act since the enactment of this statute in March, 1907. During this period, there had been, he said, 100 disputes referred for investigation. In only nine of these cases had strikes not been averted or ended. In other words, the legislation had been the means of averting ninety per cent. of the strikes which would otherwise have taken place, many of them affecting important industrial interests and large numbers of work people. Almost exactly 100,000 men had been involved in these disputes, and assuming the average wage of the men so employed to be $2.50 per day, there had been saved, through the operation of the Industrial Disputes Investigation Act, to Canadian workmen in wages alone a sum of close upon $6,000,000. This calculation is based upon an estimate of twenty-four days as the average duration of the strikes which have taken place in this country, during the last decade. If it is assumed that an employer would receive in profits ten per cent of the amount spent in wages to his employés, there had been saved to employers, through the avoidance of strikes and lockouts, an amount in round figures of something like $600,000. If an estimate were made of the value of goods which

would have been produced with that amount of labour and profits the smallest figure at which it could be placed would be something like $10,000,000. So much for the monetary side of this question. The industries to which the Act applied were, however, industries in the nature of public utilities, upon which other industries, and indeed the very happiness and welfare of the community depended, so that the benefit which the law had conferred upon the public was not one which could be described in terms of money alone.

The results attending the nine strikes which had occurred under the Industrial Disputes Investigation Act since 1907, showed that in every instance the employés had in every instance either returned to work on the terms which the Board had recommended, or else upon terms less favourable to those concerned.

It might, the Minister thought, be fairly claimed that the Act which the Canadian Parliament had placed upon the statute books four years ago for the prevention and settlement of industrial disputes had done very good service. In this connection, the Minister referred particularly to the record of street railway strikes before and after the adoption of the Industrial Disputes Investigation Act. In the four years prior to March 1907, there had been six or seven street railway strikes in Canada, some of them of a very serious nature entailing great suffering and loss. Since the Act had passed, seven street railway disputes had been referred under its provisions affecting this important public service in Ottawa, Toronto, Hamilton, Quebec and Winnipeg. The only case in which a strike had resulted was the recent case in Winnipeg, the outcome of which was well known to all. Here then was a concrete instance of the immense service this legislation had accomplished, not only for the workers but for the public as well.

Results of Compulsory Arbitration Law of New Zealand and New South Wales.

Continuing, the Minister observed that a great deal had been said in Parliament, from time to time, of the effect of the compulsory arbitration laws of New Zealand and New South Wales, and in some quarters it had been suggested that these countries had devised a panacea for labour disputes which no other nation had found. He had received, however, from the Canadian Trade Commissioner in New Zealand, in the month of August last, a report containing a list of sixteen strikes which had occurred in New Zealand within the preceding eighteen months. If allowance were made for the difference in population between New Zealand and Canada it would be seen that strikes are more frequent in that country than in this. It was also of interest to note the effect of the enforcement of the New Zealand law. Under compulsory arbitration employers and employés who did not abide by the findings were subject to penalties. Supposing we had a similar law in Canada, and a number of strikes occurred proportionate to those which have occurred in New Zealand, the enforcement of such a law in this Dominion would have involved the fining of no fewer than 9,672 employers and 5,840 employés in our Courts last year. This comparison was made on the basis of eight to one, the population of New Zealand being in round figures 1,000,000, and that of Canada, 8,000,000. The above was the record in New Zealand of compulsory arbitration after sixteen years of this experiment.

Investigation by Mr. H. S. Weinstock who was recently sent to New South Wales as a special commissioner from the State of California, had shown that the following strikes had occurred in that State, despite the existence of its compulsory arbitration law: In 1901, 2; in 1902, 12; in 1903, 11; in 1904, 11; in 1905, 36; in 1906, 29; in 1907, 52; in 1908 (in the first three months only), 33. Incomplete returns of the strikes which occurred in New South Wales in 1906–7 showed a total of eighty-one. The total number of strikes in Canada in two years was 138. The population of Canada was in round figures about five times that of New South Wales. Were our strikes proportionate, therefore, in number with those of New South Wales, they would have reached in two years the very high figure of 405, a much higher record than has been shown in any of the ten years during which statistics have been kept in this country.

LOSS OF LIFE AND ACCIDENTAL INJURY IN THE RAILWAY SERVICE.

IN the House of Commons on February 20, Mr. H. H. Miller (South Grey) moved:

> "That, whereas it is stated that on Canadian railroads last year one trainman in every 199 was killed, and one in every thirty-three was injured, in the opinion of this House it is the duty of the government to cause to be made a most thorough investigation as to the facts and conditions, as a result of which some means may be devised for the better protection of railway employés, and of preventing so great a loss of life and so great and frequent accidental injury."

In addressing himself to the above motion Mr. Miller referred to the hardships and exposure to which railway trainmen are subjected. A comparison of the Canadian and of the United States legislation for the protection of trainmen showed the existing laws on this subject to be very much alike, with, however, this important difference, that in the United States, Mr. Miller thought more effective provision is made for the enforcement of both statutes and regulations than exists in Canada. In the United States the Interstate Commerce Commission is authorized to employ two sets of inspectors, one to make a careful inspection of cars used by the various railway companies and the other to see to the enforcement of laws and regulations. In Canada inspectors are employed by the Board of Railway Commissioners to inspect cars and devices used in connection therewith for the protection of the lives of railway employés. It is not, however, the duty of the Board nor of any of its officers to bring any action or lay any information where it has been shown that the laws or regulations so provided are not being observed, with the result that it rests with the person aggrieved or with someone else to institute proceedings. In passing Mr. Miller observed that a railway employé would be likely to hesitate very much before bringing action against any railway company because by so doing he would be likely to forfeit his position.

In the United States a law was passed in 1907 making it unlawful for any railway company to require or permit its employés to remain on duty for more than sixteen consecutive hours, also stipulating that any employé who has been on duty for sixteen hours shall be allowed reasonable rest before returning to his employment. The Interstate Commerce Commission was at the same time authorized to institute proceedings for any violation of this law which might come to their notice. In Canada, Mr. Miller observed, the Canadian Pacific Railway Company and the Grand Trunk Railway Company have regulations of their own for limiting in some such way as the United States statutes have done the hours of labour of their employés. Mr. Miller did not, however, know how carefully or carelessly such orders were being enforced or whether similar regulations existed on other Canadian roads. He understood that a few years ago the Board of Railway Commissioners was asked to make an order or to obtain legislation limiting the hours of railway employés in somewhat the same way as was done under the United States statutes of 1907. He had been told that the engineers and firemen favoured such measures but that the conductors and brakemen were opposed thereto. Continuing, Mr. Miller said that it might very well be that the employés of a railway company would oppose any statute limiting the hours of employment and that conductors or brakemen for the sake of making the greatest possible earnings would be willing to work longer hours than were proper having regard to their own safety and to the safety of the travelling public.

An Act had been placed upon the United States statute books in 1905, entitled "An Act to promote Security of Travel upon Railroads engaged in the Interstate Commerce and to encourage the saving of Life." The object of this measure was to authorize the bestowa-

of medals of honour upon persons who by their extreme daring endangered their own lives in saving or endeavouring to save others from any train disaster or in preventing the occurrence of train disasters.

Complaint had been made that many of our Canadian railway companies do not employ a sufficient number of section men to keep the track in safe condition. He was pleased to note, however, that in Canada, as in the United States, those whose duty it is to protect railway employés are encouraged with the result of their efforts. The report of the chief traffic officer of the Board of Railway Commissioners for last year showed that fifty-one passengers, 194 employés and 211 other persons were killed, while 211 passengers, 745 employés and 167 other persons were injured through the operation of trains in Canada. Investigations were made in 262 of the above cases as well as a general inspection of equipment, stations and crossings of all railways under the jurisdiction of the Board. The report of the Interstate Commerce Commission indicated that the efforts of that body throughout the United States were meeting with great success and that its inspection of cars and equipment was very thorough. In conclusion Mr. Miller offered the following suggestions:

> "In the first place I think our Railway Act might well be amended after consultation between the Minister of Railways and the Board of Railway Commissioners, so as to give us something like the same machinery for enforcing our laws and regulations as prevails under the legislation of the United States. Notwithstanding that some of the employés oppose this, while others favour it, I believe it would be a step in advance if our Railway Act did contain provision that would limit as the United States law does, the hours of service of trainmen and of telegraph and telephone dispatchers. Then, there is legislation in the United States as to the granting of medals, and the Minister of Railways might deem that worthy of consideration."

The Minister of Railways.

Honourable George P. Graham, Minister of Railways and Canals, expressed the opinion that the subject of Mr. Miller's motion was one of great importance. Accidents to railway employés, he thought, might be divided into several classes. In some instances they resulted from carelessness on the part of the workman. In such cases rules and regulations were of no avail. Many railway employés were killed whilst serving as train crews. Accidents sometimes arose from defects in track or roadway, whilst others were caused by the neglect of officials. In still other cases mishaps were due to defects in the rolling stock. The extremes of heat and cold in Canada rendered railway operation very difficult. Today the track might be in good condition, but today's frost might be followed by a thaw and resultant heaving of the rails. Such conditions were almost unavoidable, although much greater care is now exercised than formerly. The number of section men to be employed per section depended, to some extent, upon the traffic. He had recently discussed this subject with one of the employés' Brotherhood officials who agreed with him that in Canada at the present time a sufficient number of men on the average were employed to keep the tracks in fairly good condition.

The construction of heavy rolling stock had necessitated the use of heavy rails. No new rolling stock was allowed to go into use which did not meet the requirements of the Railway Commission. All old rolling stock was also being brought up to a like standard. There had been a great advance in the last few years in the protection of railway men by the introduction of automatic brakes and other improved appliances. The rolling stock of Canadian railway companies had to be up to the standard in these respects because a Canadian car which was not so equipped and constructed was not allowed to enter the United States.

Arrangements were being made between railway companies and the employés' Brotherhoods which applied not

only to wages, but were intended to regulate every phase of a workman's employment, including hours of labour, duties, remuneration for overtime, &c.

The best railways of the United States are equipped with double tracks; in Canada the mileage of double track line, on the other hand, is small. On double track lines the accidents are reduced to a minimum. The Minister was of opinion that a careful examination of the records, bearing in mind that the greater amount of business in Canada has been done on single track lines, would show that there are relatively far fewer accidents in Canada than in the United States. Greater care was exercised in Canada than in the United States, and the exercise of care did more for the prevention of accidents than any rules or regulations. In Canada we, perhaps, make the mistake of thinking that the cure for any evil is to pass a law of some kind and then forget it. An effort was being made in Canada, however, through a practical Board, which had much greater power than the United States Board, to encourage care on the part of the railway employés as well as on the part of the railway companies. To a large extent this result had already been attained. After all, a great deal depended on the quality of the men employed. He believed he was safe in saying that there was no country in which a more intelligent class of workmen could be found than were employed on the railways of Canada. The more such men could be encouraged to go into railway work, the fewer the accidents would be.

The Railway Commission of Canada was in a somewhat different position from the Interstate Commerce Commission of the United States. In the United States fines were imposed for violation of the railway laws. The same procedure did not exist in Canada, but if a railway company was found operating a car against the order of the Railway Commission it was forbidden to run such a car again until it conformed to the regulations. No company dare break such an order, because the Railway Commission had power to prevent the company from doing business at all until its direction was complied with. In this way the power given the Railway Commission of Canada was even greater than that possessed by the Interstate Commerce Commission of the United States. In the United States there were many appeals from the Board decisions to the Courts. Last year the Railway Commission of Canada disposed of over 3,000 cases, most of them without hearing and without formality, and in very many instances through the use of the mails alone. The results of the control exercised by the Board of Railway Commissioners of Canada, whatever our laws may be, were, the Minister believed, as beneficial as the results in the United States. If, however, our laws could be improved, he would be pleased to see this done.

Whenever a railway accident occurred in Canada, an inspector of the Board of Railway Commissioners was at once sent out to investigate.

MR. MILLER: "Have the inspectors the authority to prosecute, and if not, would it not be well that they should have it?"

HON. MR. GRAHAM: "That is a question for argument. The result is what we are after, and I believe that we have better results than in the United States. Although our inspectors have not the power to prosecute, they can be ordered to lay an information, but that is not part of their duty. Under our system, when an accident occurs, if the circumstances warrant such an investigation, the coroner holds an inquest, and where there is any negligence, the coroner's jury lays the foundation for criminal prosecution, and the provincial authorities prosecute the party supposed to be guilty. Therefore, I am not sure that we would gain anything in that regard, although the suggestion might be worth thinking about."

Continuing, the Minister explained that the accident inspectors reported upon the circumstances of all important accidents. This information was compiled and brought to the attention of the Board, which immediately took the matter up with the company concerned. The railway companies, in their own interests as well as in the interests of the public, exercised great care that the rolling stock underwent a thorough inspection before being put into service, employing expert

and impartial examiners for this purpose. It had also been represented that inspectors should have authority to inspect rolling stock in motion. If the Board had not the power already to authorize such inspection, the Minister observed that it might be given to them. His own opinion was, however, that the Board had such power already.

The Canadian railways were being constantly improved, and an effort was being made to protect life in all positions. It was the desire, however, of the Railways Department that the lives of both passengers and employés should be protected to the fullest extent, and to that end the Department would be pleased to receive suggestions from any quarter for the improvement of the Railway Act in these respects.

The Minister of Labour.

The Honourable W. L. Mackenzie King, Minister of Labour, concurred in what had been said as to the importance of the subject of industrial accidents. He also endorsed the statement made by the Minister of Railways to the effect that fewer persons were killed on the railways of Canada than on the railways of the United States, in proportion to the number employed. A statement had been carefully compiled in the Department of Labour from the railway statistics of Canada, the reports of the Interstate Commerce Commission of the United States, and of the British Home Office, which threw considerable light upon the subject of railway accidents in Canada, United States and Great Britain, respectively. The Minister regretted to notice that the proportion of railway employés killed and injured through the occurrence of railway accidents in Canada was somewhat larger than appeared in Mr. Miller's motion.

In this connection, the Minister submitted to the House the following tables:

Statement showing the number of railway employés of all classes for one killed:

	Canada.	United States.	Great Britain.
1909	650	576	.....
1908	499	422	.....
1907	478	369	1,221

Statement showing the number of railway employés of all classes for one injured:—

	Canada.	United States.	Great Britain.
1909	132	20	.....
1908	91	17	.....
1907	106	19	29

Statement showing the number of trainmen (engineers, conductors, firemen, baggagemen, brakemen) for one killed:—

	Canada.	United States.	Great Britain.
1909	172	205	.....
1908	168	150	.....
1907	136	125	1,084

Statement showing the number of trainmen (engineers, conductors, firemen, baggagemen) for one injured:—

	Canada.	United States.	Great Britain.
1909	28	9	.....
1908	23	8	.....
1907	26	8	35

Continuing, the Minister observed that it would be seen from the foregoing tables that the percentage of killed in Canada was much lower than in the United States. The difference between the showing in Great Britain on the one hand, and in Canada and the United States, on the other, was very marked. This difference was no doubt accounted for in part by the climatic conditions with which railways in this country have to contend, and the vast stretches of territory over which railways operate. Despite thse considerations, the figures quoted would, however, come as a surprise to the public generally.

Summarizing the figures above given, it would appear that the total number of railway employés killed in Canada in the past three years has been 633, and the total number injured, 3,134, making a total of 3,767 fatal and non-fatal accidents in this period; in other words, of the 19,443 trainmen in Canada in 1909, one out of every 172 was killed, and one out of every twenty-eight injured. In 1908, the proportion of killed was one out of every 168, and the proportion of injured, one out of every twenty-three. In 1907, the proportion of killed was one out of every 136, and proportion of injured one out of every twenty-six.

Reference had been made by Mr. Miller to the railway legislation of the United States, but whatever the legislation existing in that country, it was clear that the accident showing in Canada was more favourable than in the United States.

The following statements were from an address delivered by Mr. Daniel L.Cease,

before the Fourth Annual meeting of the American Association for Labour Legislation, in St. Louis, on December 29 last:

"The railway casualty statistics for the last year showed that nine men were killed each twenty-four hours, and that one was injured or killed every seven minutes. One man was killed for each 205 employed, and one was injured for every nine employed. The working life of a brakeman is estimated at only seven years.

"Full statistics covering other occupations are lacking, but the miners claim that four men are killed in America to one in Europe; and it is admitted that mining ordinarily and normally ought to be accomplished with less danger here than abroad."

The following statement, no less striking than the foregoing, was from a booklet entitled "Perils of Peace," published in 1906, by the American Institute of Social Service.

"Our peaceful avocations cost more lives every two days than all that we lost in battle during our war in Spain. It has been pointed out that the Pennsylvania coal fields alone furnish 'an industrial Bull Run' annually.

"In these piping times of peace, we in the United States kill in four years some 80,000 people more than all who fell in battle and died of wounds, on both sides, during the four years of our civil war; that is, in the same length of time, we are now killing fifty-three per cent. more people than two great armies could destroy, equipped with all the weapons that ingenuity could then devise, and making destruction their eager business.

"We are killing more than twice as many every year as perished by violence in both the French and English armies during the three years of the Crimean war. There are more killed and wounded on our railways exery year than the entire losses of the Boer war on both sides in three years."

An article by Mr. John W. Gitterman, published in McClure's Magazine for June, 1910, contained the following statistics and statements:—

"It is difficult to realize that in the fiscal year 1908 the railways of the United States killed, in addition to passengers, 3,470 of their own employés an average of 328 deaths each month since 1903.

"Injuries are twenty times more numerous than deaths. Last year, six and four-tenths per cent. of all the railway employés in the United States were injured: thus the chances are that no man can escape accident for nine years. No wonder that most of the life insurance companies refuse to insure a railway man on any terms, while in any sort of company a switchman can be insured only at a rating twenty years in advance of his actual age.

"Where, twenty years ago, the employé had an even chance of remaining uninjured for more than fifteen years, his expectation has sunk nearly to eight. In spite of double-tracking and safety devices and palliative legislation, matters have come to such a pass that if the injured of one bad year could all wait in line before one hospital door, the queue, if laid side by side, would make a row nearly two miles long.

"In twenty-one years the percentage of employés killed or injured on the railways of the United States has nearly doubled. At the present rate, it would take only seventeen years to kill or injure all the employés now on the rolls. If the number of railway employés remains constant for fifteen years, 1,300,000 men, at the present mortality rate, will be killed or injured. But the number, of course, will greatly increase. It is therefore, probably no exaggeration to say that, unless the railways radically improve their present methods of safe-guarding their employés' lives, they will either kill or injure, within the next fifteen years, not far from 2,000,000 men."

Mr. Miller had referred to the existence of American legislation providing for the granting of medals to persons who have endangered their own lives in endeavouring to save others in train disasters, or to prevent the occurrence of train disasters. The Minister of Labour reminded the House that two or three years ago his

late Majesty, King Edward, instituted a medal for a similar purpose, and extended this offer to the self-governing dominions of the British Empire. The medal in question was known as the Albert Medal. One of these medals was awarded last year to Conductor Thomas Reynolds, of the Canadian Pacific Railway Company, for his conspicuous gallantry in saving the lives of eleven persons on the occasion of a train disaster at Spanish River Bridge, near Webbwood. The Minister also understood that the Albert Medal was awarded not only for heroism in the railway service, but on the part of miners and workmen in other branches of industry.

Industrial Accidents in Canada.

The scope of the present resolution might, he thought, well have been extended so as to cover the loss of life occurring not only on the railway service but through industrial accidents in other classes of employment. The Department of Labour had for a number of years past been gathering and compiling statistics of industrial accidents in Canada. These figures were obtained from a great variety of sources, from the press, from labour organizations, from railway boards, and other quarters. A special effort was made in all cases to obtain accurate information.

The statistics showed that in the year 1907, 1353 persons in Canada were killed outright in the course of their employment; in 1908, 1272, and in 1909, 1278, or an average of about 1,300 a year for the years mentioned. These returns were, however, necessarily incomplete, and it was not too much perhaps to say that something like 2,000 working men are killed in Canada each year in the course of their employment, trade, or calling. The number of those whose industrial efficiency is impaired for all time through loss of limb or impairment of health was at least five times the number killed; thus in the course of ten years it may be said that 20,000 men are killed and 100,000 others permanently injured in the course of their employment, a tremendous loss to the nation.

Whilst an effort was being made to conserve the natural resources of Canada, a most worthy object, the conservation of human health and human energy was a matter of equal importance, not only from the point of view of economic wealth but also from that of national strength and well being. To the extent which Mr. Miller's resolution helped to direct public attention to the loss of life through industrial accidents, and the necessity for the State doing all in its power to help reduce this death toll, the Minister thought that Mr. Miller had rendered to the people, and especially to the working classes of Canada, a very great service.

Workmen's Compensation

There was another phase of the question of the subject of industrial accidents, not mentioned in the resolution before the House, to which the Minister said he would like to direct attention. Reference had been made to the fact that compensation for industrial accidents was only obtained, as a rule, as the result of civil action. It was worth while considering whether there was not a necessity for remedying this circumstance.

> "We can say with certainty at this moment that a year hence another 2,000 lives will be swept off the list of workers in Canada, and in another two years there will be 20,000 men whose industrial efficiency will be permanently impaired as a consequence of the callings in which they are engaged. We know that loss of life is incident to a calling itself. If that is so does it not appear that in some way the industry itself should be made to bear what is inevitable to it? Take the case of a railway company with its cars; they allow so much for broken cars or for repairing damage done to cars. I am just throwing out this thought or suggestion because it is a large subject and it would involve much consideration before anything in the shape of legislation could be based upon it, but is it not worth considering whether human life is not entitled to the same amount of protection as is afforded to

what is part of the rolling stock of the company and whether in some way the industry could not be made to bear part of the cost of its inevitable loss of life and limb with the result that those who are left behind, those who belong to the family of the man who may have been killed outright, shall not, in consequence of his death, be put in the position that in order to get some compensation for the loss of his life they must enter upon litigation and add to the distress which they already have? These are the points that I thought I would like to make because I think they are points which are attracting considerable attention among the industrial workers of the country and, having regard for the conservation of human life, for the upbuilding of the strength of the nation as a whole, too much attention cannot be given to a very serious aspect of this very serious question."

Mr. T. W. Crothers (West Elgin) in the course of further discussion upon Mr. Miller's motion, stated that he knew through intercourse with railway men that many of these employés are compelled to serve too long hours, that they have not sufficient time for rest between runs, and that railway men, indeed, are sometimes kept on the go for three or four days with practically no rest, other than what can be obtained whilst the train is on a siding. The railway men of Canada would expect action to be taken, with a view to lessening the appalling death toll in this service.

The debate on Mr. Miller's motion was adjourned on motion of the Prime Minister.

REVIEW OF PARLIAMENTARY PROCEEDINGS AFFECTING LABOUR DURING FEBRUARY, 1911.

REFERENCE has been made in the February number of the *Labour Gazette* to a Bill of Mr. Alphonse Verville (Maisonneuve) respecting hours of labour on public works. Third reading was given to this Bill in the House of Commons, on February 13. The Bill was introduced and read a first time in the Senate on February 16.

Reference has also been made in the February number of the *Labour Gazette* to the Bill of the Minister of Labour to prohibit the improper use of opium and other drugs. The Bill in question, after passing the House of Commons, was introduced in the Senate by the Right Honourable Sir Richard Cartwright, on February 2. The Bill received a second reading in the Senate on February 8, and was considered in Committee of the Whole on February 15. Further consideration of the Bill in Committee of the Whole was postponed until March 8.

On February 20, the House of Commons gave second reading to a Bill of Mr. M. Martin (St. Mary's, Montreal) to amend the Railway Act, with the object of providing for fortnightly payment of wages to all railway employés. A similar Bill was introduced by Mr. Martin at the last session of Parliament, and was referred to the House of Commons Committee on Railways and Canals. Reference was made by Mr. Martin, in the course of a brief debate on the second reading of this Bill, to a petition bearing the signatures of 1,071 railway employés, asking for fortnightly payment of wages. The Prime Minister expressed sympathy with the object of the Bill, and suggested that the third reading should stand over in order that the railway companies might be given a hearing before final action was taken upon this Bill. The Bill was accordingly reported from Committee of the Whole, and stands for third reading.

On February 27, the Minister of Labour presented to the House of Commons a Return to an Order of the House, of the twentieth of February, for "a copy of all applications made by employés of the North Atlantic Collieries for a Conciliation Board, within the past six months, and of all letters, telegrams, documents, statements and other papers and documents touching the same, or having any

relation thereto, including all correspondence received by the Government or any Department of the Government from the said North Atlantic Collieries, or from the employés thereof, touching the matter aforesaid."

In the Senate, bills were introduced by the Right Honourable the Minister of Trade and Commerce providing for the control of terminal grain elevators by a commission, and for an amendment of the Chinese Immigration Act, giving the Governor-in-Council full power to make regulations defining the persons comprised in the various classes entitled to exemption from the head-tax of $500.

The estimates of the Department of Labour for the fiscal year 1911–1912 were under consideration by the House of Commons in Committee of Supply on February 10 and on February 24, respectively. The following votes were adopted:

Conciliation and Labour, including publication, printing, binding and distribution of the *Labour Gazette*, and allowance to correspondents	$27,300
Industrial Disputes' Investigation Act, 1907, including payment of members of Board, witnesses, travelling expenses, &c.	20,000
Combines' Investigation Act	10,000
To provide for the appointment of inspectors in connection with shipping gear, dangerous machinery, railway construction, &c.	5,000

A vote of $25,000 was also adopted for the expenses of the Royal Commission on Industrial Training and Technical Education during the fiscal year 1911-12.

A supplementary estimate of $10,000 required for the work of the Technical Education Commission during the year ending March 31, 1911, was also adopted by the House of Commons in Committee of Supply on February 17.

In connection with the consideration on February 10 and February 24, respectively of the estimates above referred to, reference was made in debate to the terms of settlement of the strike of last summer of conductors, brakemen, baggagemen and yardmen in the train and yard service of the Grand Trunk Railway; also to industrial conditions in the coal fields of Nova Scotia, and more particularly to the existing strike in the mines of the Cumberland Railway and Coal Company at Springhill.

Work of the Technical Education Commission.

In connection with the work of the Royal Commission on Industrial Training and Technical Education the Minister presented to the House a brief statement prepared by Dr. James W. Robertson, Chairman of the Commission, in the following terms:—

"In general the testimony has been that provision for industrial training and technical education, in institutions and industrial establishments, exists in very few places and in them not to an extent adequate to the needs of the industrial population. The testimony indicates that some further opportunities are necessary to enable young men and women, from the ages of fourteen to eighteen, to enter upon the various industrial and productive occupations with such educational qualifications that they may become industrially efficient.

"I. In almost every place representative men have stated that urgent need exists for night classes for boys, after the age of fourteen, who have left the day schools.

"II. The workmen have been practically unanimous in the expression of a desire for opportunities for such a measure of technical education as will enable them to acquire a knowledge of the principles which underlie the processes of their occupations, and also to give the more energetic and ambitious of them a fair working chance to prepare themselves for advancement and promotion.

"III. There has been a unanimous expression of opinion that the several towns need some provision for industrial training and technical education

which, in its general character, shall have an educational value equivalent to the high school or academy courses of study, but which shall be adapted specifically and directly to the needs of those who are to enter upon industrial occcupations; and also to meet the case of those who would like to matriculate into, or enter upon the more advanced work of, technical colleges or agricultural colleges.

"IV. Statements in respect of these four matters have come alike from the representatives of industries, from those who are responsible for educational work, and from the workingmen and women themselves. Not only are they all agreed as to the need for industrial training and technical education, but they have evinced enthusiastic keenness in offering co-operation, towards meeting the need in some adequate manner."

REGULATION OF FOUNDRIES IN THE PROVINCE OF QUEBEC.

UNDER date of January 30, 1911, an order-in-council was passed by the Government of the Province of Quebec having an important bearing on sanitary conditions in foundries. The matter had previously been brought to the attention of the Government by the Provincial Executive of the Trades and Labour Congress of Canada. A copy of the regulations follows:—

Under Article 3832 of the revised Statutes of the Province of Quebec, 1909, it is ordered that the following regulations relating to foundries be approved and declared obligatory throughout the Province of Quebec.

ARTICLE 1.—In future, all entrances to foundries shall be constructed so as to minimize draughts.

ART. 2.—All passageways in foundries shall not be obstructed during the hours of casting.

ART. 3.—Whenever the ordinary means of ventilation in a foundry shall be deemed insufficient by the inspector, the latter may order the installation of suction fans in sufficient number to expel the noxious gas, dust or smoke arising from the work.

ART. 4.—The installation in foundries of furnaces, forges or heaters, shall be prohibited unless ventilation or suction pipes be installed, or any other means suggested by the inspector to expel smoke from the establishment.

ART. 5.—Ventilators shall in future be placed in sufficient number in the roofs of foundries, which must be lighted and heated to the satisfaction of the inspector. Hot water shall be supplied to the employés for washing purposes throughout the period that artificial heating is necessary.

ART. 6.—All open pits around furnaces or any other openings in the floors of foundries shall be surrounded by a railing or covered by a grating to the satisfaction of the inspector. This applies to permanent openings. The stairs leading to furnaces or platforms shall be constructed of iron.

ART. 7.—The placing of medicine-chests for first-aid to the wounded, prescribed by Article 105 of the regulations of industrial establishments, shall in future be compulsory in all the foundries in the Province.

ART. 8.—All establishments wherein cores are made, foundries, blast-furnaces, and where metals are refined, shall be deemed foundries, within the meaning of this regulation.

ART. 9.—The proprietors or agents of all foundries employing more than fifty persons shall have installed a shower-bath room supplied with hot and cold water. The floors of such rooms shall be of cement or other substance suggested by the inspector, and shall be provided with adequate drainage.

CONDITIONS OF EMPLOYMENT IN WESTERN CANADA EMPLOYMENT BUREAUS—REPORT OF SPECIAL COMMITTEE AT WINNIPEG, MAN.

A SPECIAL committee consisting of representatives of the Winnipeg Development and Industrial Bureau, the Trades and Labour Council, and the Ministerial Association, acting with the General Secretary of the Associated Charities, and Mr. Frank Kerr, City, Market, License and Relief Officer of Winnipeg, was appointed recently for the purpose of investigating conditions in connection with employment in the city of Winnipeg in particular, and in the province of Manitoba and the Dominion in so far as they affect the city of Winnipeg.

The Committee recently brought in the following report:—

Your committee find that this question has to be considered under nine headings.

1. Farm employment.
2. Unskilled labour in camps (lumber, logging and construction).
3. Unskilled manual labour in the city of Winnipeg.
4. Unskilled male service in the city (hotel porters, elevator attendants, &c.).
5. Trades.
6. Office help (male and female).
7. Female service (waitresses, housemaids, cooks, in and out of city, in hotels, restaurants, private houses).
8. Unskilled casual chore labour in the city.
9. Unskilled casual female labour (washing, cleaning, &c.).

Your committee agreed that the following conditions are axiomatic when considering employment bureau problems:

1. That an employment agency should be satisfied as to the character of the employer applying, and that his application is a bona fide one.

2. That the health and efficiency of the applicant for employment should be ascertained as far as possible.

3. That every effort should be made to de-casualize and de-seasonalize labour.

4. That adequate knowledge as to the demand and supply, at all points, should be at the disposal of all employment bureaus.

Your committee find the following defects in the present employment system:

1. An improper distribution of harvest labour.

2. An exodus of labourers, who might be permanent in the city or on railway construction, to the harvest field in order to gain a temporary higher wage.

3. Inadequate inspection of conditions in camps.

4. A tendency to rush work to completion during the spring, summer and fall, which might be undertaken during the winter months, thus making a large number of unskilled labourers purely seasonal, with its attendant evils.

5. Able-bodied, young, homeless men filling positions in the city for service which might be filled efficiently by married men partially incapacitated.

6. An influx of office help from Great Britain, for which there is absolutely no justification. An inadequate service for office help; employer and employé depending to a large extent upon the press.

7. An inadequate supply of female help; the majority of agencies supplying same, having little or no guarantee as to the moral atmosphere in which girls will work.

8. Homeless, able-bodied men, capable of filling a continuous demand from country points during the winter months, stealing seasonal labour from married men with wives and children, depending on casual day chores, which would help the latter to make both ends meet. Employers depending as often as four and five days a week on casual help in preference to employing a man permanently.

9. Women with families to look after, with husbands working, going out on day labour to supplement income, instead of taking care of their children.

Your committee was unanimous in feeling that the Dominion Government would eventually realize the necessity of operating government employment bu-

reaus throughout the length and breadth of the land; for the time being, they feel strongly that the provincial government should be approached, with a view to establishing a system of labour bureaus for all classes of labour, with headquarters in Winnipeg and Brandon.

Your committee call your attention to the fact that the province of Quebec has recently established a system of employment bureaus with headquarters in Quebec.

Your committee recommends that before any steps should be taken to alter present conditions, the provincial government should be approached with a view to their taking action at this session of the legislature.

Should the provincial government be unwilling to consider the matter your committee feels that a considerable improvement can be made along the following lines:

1. Make licensed intelligence offices responsible for producing a written order from an employer in case of a dispute. failure on the part of intelligence offices to do same, placing the responsibility upon intelligence offices.

2. That civic contracts should be let and work done on the basis that such work as can be done, at even a slightly higher cost, in winter, should be done then instead of summer, in order to secure work for unskilled labourers, continuous employment throughout the year.

3. To meet the inadequate service for office help, your committee would recommend that the Young Men's Christian Association should operate a bureau for this purpose.

4. That a civic employment bureau for casual labour for male and female should be operated, which would be no hardship to the intelligence offices, in so far as they did not busy themselves with this kind of employment. That all charitable organizations should be prohibited from operating casual employment bureaus, but should co-operate with the civic bureaus, allowing their offices to be used as districts wholly responsible to the civic office—that this casual civic employment bureau should also act as an information bureau in regard to all other kinds of employment, directing the uninitiated applying as to where and how he can secure employment.

THE EXPLOSIVES INDUSTRY IN CANADA.

A REPORT on the explosives industry in Canada by Captain A. Desborough, H. M. Inspector of Explosives, has been issued by the Mines' Branch of the Department of Mines, of Canada. The Report begins with a brief statement of the principles upon which British regulations are based. These provide that no explosive may be manufactured in or imported into the United Kingdom for sale until it has been examined by the chemical advisers of the Explosives' Department and authorized by them. Explosives can only be manufactured in an authorized place, in buildings of specified construction, erected at safe distances from each other and from other buildings. The maximum number of persons allowed to work in a building for the manufacture of explosives is from two to six, according to the nature of the building. Since these regulations were put in force, it is stated that no member of the general public has been killed, and no dwelling house has sustained any serious structural damage by an explosion in any factory. The annual death rate among the employés has been for a considerable number of years well below one per 1,000.

The following are among the most important recommendations made in the Report for adoption in Canada: (1)the authorization of explosives as in England; (2) the licensing of factories, so as to limit the amount of explosives allowed to be present in a building, the types of construction of the buildings, the number of people allowed to work in each building, and the nature of the operations to be carried on in them; (3) the control of the storage of explosives. For this purpose buildings of a certain type of reinforced concrete are

stated to have given the best results; (4) control of transportation. Regulations have been made by the Railway Commissioners governing the transportation by rail of explosives in bulk, but as it is generally certain that there is a traffic in explosives in small quantities, it is suggested that this matter be taken up with the Railway Commissioners. In Great Britain, small quantities of explosives, if packed in a special manner are transported by the railways in cars loaded with other freight. (5) Control of importation. Before any explosive is imported into the Dominion, a sample should be submitted for authorization, and subsequent importations should be kept in a licensed place of storage until tested and approved by the Department. (6) Inspection and Sampling. There should be frequent inspections of the factories and magazines, and frequent tests of the explosives, to see that the standard is being maintained and that the explosives have not deteriorated through prolonged storage. (7) Establishment of testing station. In addition to the chemical laboratory, it will be necessary to establish a station for the testing of explosives for use in coal mines, with apparatus for the testing of safety lamps. (8) Accidents in explosives' factories. It should be obligatory for the occupants of these factories to report as soon as possible all accidents which occur either by fire or explosion, even where no personal injuries are sustained, and to leave things untouched, as far as practicable, in case it should be deemed advisable by the Department to have the circumstances of the accident investigated officially. (9) Accidents in storage, transportation and use of explosives should also be reported and kept on record.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF FEBRUARY, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the Labour Gazette. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 264 individual work people in Canada, during the month of February, 1911, were reported to the Department of Labour. Of these, eighty-four were fatal and 180 resulted in serious injuries. In addition, four fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before February, 1911.

In the preceding month there were eighty-two fatal and 201 non-fatal accidents reported, a total of 283, and in February, 1910, there were forty-one fatal and 196 non-fatal accidents, a total of 237. The number of fatal accidents reported in February, 1911, was therefore two more than in the preceding month, and forty-three more than in February, 1910,. The number of non-fatal accidents reported in February, 1911 was twenty-one less than in the preceding month, and sixteen less than in February, 1910. Altogether, there were nineteen less industrial accidents reported in February, 1911, than in the preceding month, and twenty-seven more than in the same month of the preceding year.

Of 135 returns received during the month, giving the ages of the victims of industrial accidents, twelve referred to persons under twenty-one years of age, fifty-four to persons between twenty-one and forty-five, and twelve to persons over forty-five. Fifty-seven persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month, by industries and trades:—

STATEMENT OF ACCIDENTS DURING FEBRUARY 1911, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total
Agriculture	14	12	26
Fishing and hunting	2	.....	2
Lumbering	15	12	27
Mining	8	12	20
Building trades	3	7	10
Metal trades	7	42	49

Printing trades	.....	1	1
Clothing trades	.....	2	2
Food and tobacco preparation	1	5	6
Railway service	24	26	50
Navigation	.....	2	2
General transport	.....	14	14
Civic employés	2	13	15
Miscellaneous	1	8	9
Unskilled labour	4	6	10
Total	84	180	264

Nature of Fatalities and Accidents.

The disasters of the month involving more than one fatality were: The death of five train hands in a railway collision at Paris, Ont.; the killing of five railway construction hands by an explosion of dynamite at Kitselas, B.C.; the scalding to death of three pulp mill workers at Hawkesbury, Ont.; the running over by train of two sectionmen at Glencoe, Ont.; the drowning of two fishermen off the coast of Nova Scotia; the death of two railway employés respectively in a collision at New Germany, N.S., and in a derailment of a snow plough at Guelph, Ont.

Disastrous Railway Collision near Paris, Ont.

On February 4, the west-bound passenger train, No. 39, on the Buffalo-Goderich branch of the Grand Trunk railway, running from Buffalo to Goderich, met light engine No. 629, near Paris, Ont. In the collision, the engineer, fireman, express messenger, baggageman and mail clerk on the former train were instantly killed, and three other trainmen seriously injured. A coroner's inquest was held at Princeton, and the verdict rendered was:—

"The jury is unanimous that Conductor Wm. Meecham and Engineer Robert Earith, in charge of the engine 629, were responsible for the wreck in collision with the regular, No. 39, which caused the death of Peter McFarlane and others."

Disastrous Powder Explosion at Kitselas, B. C.

On February 12, five men were killed and two severely injured as the result of the explosion of a box of powder in a small tunnel on the Grand Trunk Pacific Railway, at Kitselas, B.C.

Three Workman Scalded to Death at Hawkesbury, Ont.

On February 22, by the opening of the door of a boiler by a workman in the Riordan pulp mill at Hawkesbury, Ont., an outburst of steam and boiling water occurred, and the workman in question, with two others, were scalded to death, a fourth worker receiving probably fatal injuries.

Killing of Two Sectionmen at Glenavon, Sask.

In a blizzard which occurred on February 12, two sectionmen returning to Glenavon, Sask., on a hand-car, were run over by an extra Canadian Northern Railway train and were instantly killed.

Railway Wreck Near New Germany, N. S.

On February 24, the Halifax and South Western Railway train from Middleton for Lunenburg was derailed. In the wreck a brakeman and baggagemaster were killed. The coroner's jury called to investigate the disaster rendered the following verdict:—

"We, the jury, formed to inquire into the cause of the death of the victim in the disaster on the Halifax and South Western Railway, near New Germany Junction, find the bodies to be those of Lothard Sargent and Oren McLaughlin, and that they came to their death between the hours of eight and nine o'clock, on the night of February 24, 1911, by derailed cars falling upon them, the cause of the derailment being unknown to us.

"But we are of the opinion that it was caused by rotten railway ties.

"We would urge that the force of section men should be strengthened, and further, we strongly protest against the

Company attaching passenger coaches to long trains and heavy freight trains.

"We would further suggest that the occasional rotten ties mentioned in the evidence should be removed and replaced by new ones."

Drowning of Two Fishermen off the Coast of Nova Scotia.

On February 2, off the coast of Nova Scotia, two fishermen left the fishing schooner *Conqueror* in a dory to set trawls when their vessel carized and they were both drowned.

Fatal Derailment of Snow Plough Near Guelph, Ont.

By the overturning of a snow-plough on the Canadian Pacific Railway, near Guelph Junction, Ont., two workmen operating it were killed.

Record by Industries and Trades.

Agriculture.—There were fourteen fatal and twelve non-fatal accidents in this industry during February, 1911, compared with sixteen fatal and twenty non-fatal accidents in January last, and six fatal and twenty non-fatal accidents in February, 1910. Of the fatal accidents three respectively were due to machinery and to being run over, two each to live stock, drowning and exposure, and one each to falling material and to a runaway. Four respectively of the non-fatal accidents were due to falls, to live stock and to machinery.

Fishing and hunting.—Two fishermen were drowned during February. In the preceding month there were three fatalities and one in February of last year.

Lumbering.—There were fifteen workers killed and twelve injured during the month under review, compared with three killed and nineteen injured in the month before, and three killed and eleven injured in February, 1910. Of the deaths four were caused by machinery, three respectively by an explosion of a boiler, by falling material and by burns or scalds, and one each by a fall and by being run over. Of the injuries, seven were caused by falling material, four by machinery and one by burns or scalds.

Mining.—In this industry eight were killed and twelve injured during last February, as against seventeen killed and eight injured in the previous month, and six killed and eighteen injured in February, 1910. Three of the fatalities were due to falls, two each to falling material and to explosions of dynamite, and one to being run over. Five of the injuries were due to being run over, three each to explosions of dynamite or powder, and to falling material, and one to an explosion of gas.

Building trades.—In this group three workers met death by accident and seven were injured. In the month of January, 1911, the record was four killed and fifteen injured, and in February of last year eleven injured. Two of the fatal accidents were caused by falls and one by falling material. Of the non-fatal accidents four were caused by falls, two by falling material and one by flying material.

Metal, engineering and shipbuilding trades.—In these trades there were seven workmen killed and forty-two injured, compared with six killed and thirty-five injured in the preceding month, and six killed and thirty-seven injured in February, 1910. Three of the fatalities were due to machinery, two to falls and one each to an elevator and to being caught between cars. Of the injuries, fifteen were due to falling material, eight to molten metal, seven to machinery, four respectively to falls and to burns or scalds, two to flying material, and one each to being caught between cars and to an explosion of gas.

Woodworking trades.—Three woodworkers were killed in February and eighteen injured, as against thirteen injured the month before, and ten injured in February, 1910. The three fatalities were caused respectively by flying material, by machinery and by an elevator. Fifteen of the injuries were caused by machinery, and one each by flying material, by an elevator and by a fall.

Printing trades.—A stereotyper was injured by molten metal during Febru-

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES F. No. 89

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF FEBRUARY, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	St. Placide, Que	Feb. 1	1	Kicked by horse.
"	St. Catharines, Ont	" 1	1	Rupture of artery.
"	Chatham, Ont	" 8	1	Caught in hay press.
"	Chatham, N.B	" 11	1	Kicked by horse.
"	Malbaie, Que	" 11	1	Drowned; fell into well.
"	Grandview, Man	" 9	1	Frozen to death.
"	Red Deer, Alta	" 8	1	Frozen to death.
"	Ste. Philomène, Que	" 21	1	Tree fell on him.
"	Emily Township, Ont	" 6	1	In a runaway.
"	Yarmouth Township, Ont	" 22	1	Run over by train at crossing.
"	Lobo, Ont	" 22	1	Run over by train at crossing.
Grainelevator employé	Indian Head, Sask	" 5	1	Caught in machinery.
Farmer's wife	North Portal, Sask	" 17	1	Drowned; fell into cistern.
Cattle dealer	St. Thomas, Ont	" 21	1	Run over by train at crossing.
Hunting and fishing—				
Fishermen	Off Nova Scotia	" 13	2	Drowned; dory upset.
Lumbering—				
Saw mill hand	Bury, Que	" 6	1	Caught in shafting.
" (engineer	Jordan River, B.C	" 7	1	Run over by engine.
"	St. Lazare, Que	" 20	1	By fall from load of logs.
"	St. Damien, Que	" 16	3	By explosion of boiler.
"	Montreal, Que	" 23	1	Fell on circular saw.
"	Masham, Que	" 22	1	Fell on circular saw.
"	Brandon, Man	" 11	1	Caught in pulley.
Logger	Salmon Arm, B.C	" 6	1	Tree fell on him.
"	Glencoe, Ont	" 1	1	Tree fell on him.
"	Edmonton, Alta	" 22	1	Tree fell on him.
Pulp mill workers	Hawkesbury, Ont	" 21	3	Scalded to death.
Mining—				
Miner	Stellarton, N.S	" 3	1	By falling mine timber.
"	Fernie, B.C	" 8	1	Run over by mine train.
"	Cobalt, Ont	" 16	1	By explosion of dynamite.
"	Asbestos, Que	" 20	1	Fell 60 feet.
"	New Michel, B.C	" 20	1	Falling material.
"	Phoenix, B.C	" 1	1	Fell into chute.
"	Britannia, B.C	" 21	1	Overcome by powder gas.
"	Rossland, B.C	" 19	1	Fell down shaft.
Building trades—				
Roofer	Hamilton, Ont	" 6	1	Fell 65 feet.
Bricklayer	Ottawa, Ont	" 11	1	Fell from platform.
Builders' labourer	Montreal, Que	" 15	1	By falling brick.
Metal trades—				
Watchman in wire works	Hamilton, Ont	" 6	1	Fell in elevator shaft.
Electrical worker	St. Johns, Que	" 5	1	Fell 10 feet; skull fractured.
Stationary engineer	Toronto, Ont	" 14	1	By machinery.
Steel plant worker	Hamilton, Ont	" 10	1	Crushed between cars.
Iron worker	Toronto, Ont	" 16	1	Fell from a ladder.
"	Toronto, Ont	" 13	1	Found dead; injured by engine.
"	Hamilton, Ont	" 28	1	Caught in shafting.
Woodworking trades—				
Chair factory hand	Danville, Que	" 7	1	By flying material.
Sash factory hand	Brantford, Ont	" 13	1	Caught in belting.
Furniture factory hand	Montreal, Que	" 25	1	Fell in elevator shaft.

STATISTICAL TABLE, SERIES F. No. 89

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF FEBRUARY, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Food and tobacco preparation—				
Milkman	Cobalt, Ont.	" 13	1	Run over by train.
Railway service—				
Engineer	Swift Current, Sask.	" 3	1	In a derailment.
"	Oxford, Ont.	" 4	1	Head on collision.
Fireman	Oxford, Ont.	" 4	1	Head on collision.
Brakeman	Westmount, Que.	" 3	1	Run over by train.
"	New Germany, N.S.	" 24	1	Derailment.
"	College Bridge, N.B.	" 24	1	Run over by train.
"	Finch, Ont.	" 28	1	Run over by train.
Baggageman	Oxford, Ont.	" 4	1	Head on collision.
"	New Germany, N.S.	" 24	1	Derailment.
Sectionman	Valleyfield, Que.	" 27	1	Run over by train.
Roadmaster	Moose Jaw, Sask.	" 5	1	In rear end collision.
Sectionman	Woodstock, Ont.	" 22	1	Run over by train.
Sectionmen	Carlsburg, Sask.	" 13	2	Handcar struck by train.
"	Guelph, Ont.	" 14	2	In head on collision.
"	Fraserville, Que.	" 9	1	Run over by train.
Express Messenger	Oxford, Ont.	" 4	1	Head on collision.
Member of survey party	Athabasca River, Alta.	" 7	1	Frozen to death.
Construction hands	Kitzelas, B.C.	" 13	5	Premature explosion of powder.
Yardman	Montreal, Que.	" 27	1	Run over by train.
Public employés—				
Mail clerk	Oxford, Ont.	" 4	1	In head on collision.
Civic power house employé	Calgary, Alta.	" 22	1	Electrocuted.
Miscellaneous trades—				
Boarding house keeper	Montreal, Que.	" 12	1	Smothered during burning of house.
Unskilled labour—				
Labourer	Todd Inlet, B.C.	" 6	1	Explosion of dynamite.
"	Montreal, Que.	" 7	1	Run over by train.
"	Valleyfield, Que.	" 23	1	By cave-in of stone.
"	Lake Bunsten, B.C.	" 23	1	By falling rock.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN FEBRUARY, 1911.

Miner	Sydney, N.S.	Jan. 30	1	By falling material.
"	Coal Creek, B.C.	" 29	1	Kicked by horse.
"	Cobalt, Ont.	" 26	1	Fell down shaft.
Brakeman	Thamesville, Ont.	" 30	1	In rear end collision.

ary. Two workers were injured the month previous, and in February, 1910, one was killed and two injured.

Clothing trades.—Machinery and an explosion of gas injured each a workman during February. There were no accidents in January, 1911, and one worker was injured in February of last year.

Food and tobacco preparation.—A milkman was run over by a railway train in February and killed, and five others were injured. In the month before the record

was two killed and eight injured, and in February, 1910, one killed and six injured. Of the five injuries above mentioned, two were due to explosions of steam, and one each to a fall, to burning and to machinery.

Railway service.—In February under review twenty-four railway employés met death by accident and twenty-six were injured, compared with twenty killed and twenty-nine injured in January last, and six killed and thirty-one injured in February, 1910. Nine workers were killed by being run over, six by collisions, five by an explosion of powder, three by derailments and one by exposure. Nine of the injuries were caused by derailments, six by falls, five by being run over, two by collisions and one each by being caught between cars, by being struck by a passing object, by falling material and by an explosion of gasoline.

Navigation.—Falling material injured two workmen in February, 1911, two workers were killed in the preceding month, and in February, 1910, two workers were killed and three injured.

General transport.—In February, fourteen workers were injured,six through falling material, three through live stock, two each through a collision and a fall, and one through flying material. The month before, one worker was killed and fourteen injured, and in February, 1910, two were killed and seven injured.

Public employés.—Two of these employés were killed during February, 1911, and thirteen injured, compared with five injured the month before and two killed and eleven injured in February, 1910. One of the accidental deaths was due to electric shock, and the other to a collision. Four of the injuries were due to falls, three to exposure, two to collisions, and one each to falling material, an explosion of gas, to an elevator and to machinery.

Miscellaneous.—One fatality caused by asphyxiation and eight injuries caused, three by machinery, and one respectively by a fall, by falling material, by flying material, by an elevator and by a runaway occurred in February last, as against two killed and eight injured in the preceding month, and three killed and eleven injured in February, 1910.

Unskilled labour.—During February, four labourers were killed and six injured, compared with four killed and twenty injured in January last, and two killed and ten injured in February, of last year. Two of the fatal accidents were due to falling material, and one each to an explosion of dynamite and to being run over. Three of the non-fatal accidents were due to falling material and three to falls.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

Homestead Entries during January, 1911.

The following statement shows the number of homestead entries made during the month of January, 1911, as compared with January, 1910.

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF JANUARY, 1911, AS COMPARED WITH JANUARY, 1910.

Lands Patented.

An abstract of Letters Patent covering Dominion lands, situate in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory issued by the Department of the Interior, during January, 1911, as compared with January, 1910, was as follows:

Nature of Grant.	January, 1911.	
	No. of Patents.	No. of Acres.
Alberta Railway and Irrigation Company's sales	6	1,663.50
British Columbia homesteads	7	867.30
British Columbia sales	13	1,143.58
Coal lands' sales	3	206.525
Coal surface sales	2	49.75
Commutation grants		
Homesteads	1,915	302,836.154
Hudson's Bay Company	2	260.00
License of occupation	3	36.09
Military homesteads	1	320.00
Mineral rights (9,493.88 acres)	34	
North-west half-breed grants	14	2,461.09
Quit claim, special grants (320 acres)	2	
Railways:—		
Canadian Northern Railway	13	72.57
Canadian Pacific Railway grants	2	1.32
Canadian Pacific Railway grants, Souris Branch	3	673.80
Canadian Pacific Railway roadbed and station grounds		
Grand Trunk Pacific Railway	27	457.26
Manitoba South Western Colonial Railway		
Qu'Appelle Long Lake and Saskatchewan Railway and Steamboat Co		
Sales	57	7,035.975
School lands' sales	28	3,445.04
Special grants	23	303.607
Yukon Territory sales	5	186.63
Totals	2,160	322,200.19

In January, 1910, the number of patents issued was 1,881, covering an area of 309,278.67 acres, showing an increase for the month of January, 1911, of 279 in the number of patents issued, and of 12,921.52 acres in the area patented.

During the months of December, 1910, and January, 1911, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

BRITISH EMIGRATION DURING JANUARY, 1911 AND 1910.

Total	144	642	568	6	1,360

Number of souls represented by above entries 3,038.

Of 328 homestead entries made during January, 1911 by persons coming from the United States, there were 108 from North Dakota, fifty-three from Minnesota, and twenty-eight from South Dakota.

Note.

The Assistant Superintendent of Immigration for Canada, who has recently returned from Europe, states that the outlook for emigration to Canada was never more promising than it is this year. The inquiries at the Department's offices in London, Birmingham, Belfast, Dublin, Aberdeen, York and other places are much greater than ever before at this season. The various booking agents also report heavy inquiries. In some cases steerage accommodation is sold out until May, and second-cabin bookings are also exceptionally heavy.

Regulation re Entry of Railway Labourers.

In order to meet the demand for railway labourers in Canada last year the regulations relating to money qualifications and "continuous journey" were relaxed for a certain period. This year, railway labourers going to assured permanent employment at construction will be admitted to Canada from May 1 until September 30, both dates inclusive, irrespective of money qualifications or continuous journey, provided they are natives or citizens of the countries, or some one of the countries, in which immigration effort is made by Canada, i.e, Great Britain, Ireland, France, Belgium, Holland, Germany, Denmark, Iceland, Norway, Sweden, Switzerland or the United States of America, and provided also, that the immigrants are suited to railway work and are in all other respects desirable, have sufficient money to carry them to the work for which they have been engaged, and documentary or other sufficient evidence of definite employment to go to. On October 1, 1911, this relaxation of the regulations will come to an end, without further notice.

WAGES OF FARM HANDS AND VALUE OF BOARD THROUGHOUT CANADA, 1909 AND 1910.

The following table showing average wages of farm help including board and the average value of board per month throughout Canada in the years 1909 and 1910 was issued by the Census and Statistics Monthly of the Department of Agriculture during February.

Provinces.		Average wages of farm help including board.				Average value of board per month.	
		Per month summer season.		per year

TRADE DISPUTES DURING THE MONTH OF FEBRUARY, 1911.

THERE were very few trade disputes in existence in Canada during February, the only ones of importance being a strike of coal miners at Springhill, N.S., which had been in force since August, 1909, and a strike of coal miners at Michel, B.C., which continued during the last week of the month.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during February was six, being two less than in January, and six less than in Feb-

ruary, 1910. About six firms and 2,134 employés were involved in these disputes, three firms and 1,067 employés having been involved in new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during February was approximately 32,525 working days, compared with a loss of about 29,100 in January, and 49,484 in February, 1910.

Trades affected by new disputes.—The following table shows the trades affected by new disputes, and the number of employés in each group of trades.

Trades.	No. of disputes.	No. of employés.
Mining	1	950
Metal trades	1	100
Miscellaneous trades	1	17
Total	3	1,077

Localities affected by new disputes.—Two new disputes of the month occurred in the Province of Ontario, and one in the Province of British Columbia.

Causes of disputes.—The cause of one dispute was a demand for an increase in

wages, the cause of another was the discharge of an employé, and the cause of the third was a demand for better working conditions.

Methods of settlement.—Out of five disputes that were in existence during February, settlements were reached in two, leaving three still in existence at the end of the month. Both the disputes that were terminated were settled through negotiations between the parties concerned.

Results of disputes.—One of the disputes ended in favour of the employers, the strike having occurred through a misapprehension. The other dispute that was terminated resulted in a compromise.

Disputes which commenced prior to the Beginning of the Month.

The trade disputes in existence in February which began in previous months comprised strikes of coal miners at Springhill, N. S., silver miners at Silver Centre, Ont., and fur workers at Sandwich, Ont.

Strike of Coal Miners at Springhill, N. S.

No change in the situation was reported in the case of a strike of coal miners of the Cumberland Railway and Coal Company, which began at Springhill, N.S., on August 11, 1911, on account of the refusal of the Company to grant demands for recognition of the United Mine Workers of America and to grant an increase in wages and certain changes in the conditions of employment. The mines continued in partial operation as in previous months, but there were still about 1,000 men on strike.

Strike of Silver Miners at Centre, Ont.

No settlement was reported in the case of a strike of thirty-five silver miners at Silver Centre, Ont., who stopped work on January 15, on account of a reduction in wages, of which they had received notice.

Strike of Fur Workers at Sandwich, Ont.

No settlement was reported in the case of a strike of fur workers at Sandwich, Ont., which took place on January 14, on account of the refusal of their employers to grant a demand for an increase of ten per cent., in their wages Seven men were directly affected by this dispute, and twenty-five indirectly.

New Disputes.

The new disputes of the month comprised a strike of coal miners at Michel, B. C., a strike of blacksmiths at St. Catharines, Ont., and a strike of basket makers at Stoney Creek, Ont.

Strike of Coal Miners at Michel, B.C.

On February 21, a strike of coal miners to the number of 950, took place at Michel, B. C. According to the company, the dispute arose from a demand of the miners for the employment of four more men on the ventilating fans, in addition to the two already working on them, the company considering that only two were required. No settlement of this dispute took place during the month. The company stated, however, that some time before, material had been ordered for a telephone from the fan house to points underground.

Strike of Blacksmiths at St. Catharines, Ont.

On February 6, about 100 blacksmiths of the McKinnon Dash & Metal Company were reported to have stopped work on account of the discharge of a foreman, the men fearing that they were going to be supplanted by foreign labour. At a conference between a committee of the men and the management, the latter assured the strikers that the company had no intention to supplant local labour with foreign labour, and the men returned to work on February 8. The settlement of the strike was effected on the advice of Ald. Jas. A. Wiley of the District Trades and Labour Council.

Strike of Basket Makers at Stoney Creek, Ont.

On February 16, a strike of seventeen basket makers took place at Stoney

TABLE OF TRADE DISPUTES DURING THE MONTH OF FEBRUARY, 1911. DEPARTMENT OF LABOUR, CANADA, STATISTICAL TABLE, SERIES C, No. 125

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.				Date of commencement.	Date of termination.	Result.
					Directly.		Indirectly.				
			Directly.	Indirectly.	Males.	Females.	Males.	Females.			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.											
Mining—											
Coal miners	Springhill, N.S.	For recognition of union and increase in wages, and against conditions of employment	1		1,000				Aug. 11 1909		No settlement reported, but places of many strikers were filled.
Silver miners	Silver Centre, Ont.	Against reduction in wages	1		35				Jan. 15		No settlement reported at end of month.
Clothing trades—											
Fur workers	Sandwich, Ont.	For increase of 10 per cent. in wages	1		7		25		Jan. 14		No settlement reported at end of month.
DISPUTES WHICH BEGAN DURING THE MONTH.											
Mining—											
Coal miners	Michel, B.C.	Demand for more men on ventilation fans	1		950				Feb. 21		No settlement reported at end of month.
Metal trades—											
Blacksmiths	St. Catharines, Ont.	Men stopped work because foreman was let go, fearing it was the beginning of a movement to supplant local labour with foreign labour	1		100				Feb. 6	Feb. 8	Company assured men that they had no intention to employ foreign labour, and that they understood that the foreman had intended to leave soon.
Miscellaneous trades—											
Basket makers	Stony Creek, Ont.	For increase in wages from 40 and 45 cents per 100 to 45 and 50 cents, which was summer scale	1		17				Feb. 16	Feb. 21	Employer agreed to pay summer scale from May 1, instead of July 1.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishment concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

Creek, Ont., on account of the refusal of the employer to grant a demand for an increase in piece work prices. The men had been receiving a winter rate of 40 and 45 cents per hundred, and they demanded an advance to 45 and 50 cents per hundred, which was equivalent to the summer scale. After some negotiations the strikers returned to work on February 21, under an agreement by which the winter rate remains in force until May 1, after which the summer rate would be paid. This would be two months earlier than in other years.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of February, and which have been reported to the Department.

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF FEBRUARY, 1911.

The following is a list of contracts awarded by the Department of Public Works and the Department of Marine and Fisheries which has received the signatures of both parties, together with the fair wages schedules inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

ALTERATIONS TO POST OFFICE AT ST. HENRI, QUE.

ALTERATIONS and additions to Post Office at St. Henri, Que.; names of contractors, J. Jacob & Company, Montreal, Que.; date of contract, January 11, 1911; amount of contract, $4,890.

Stonecutters	3.00
Plumbers and steamfitters	2.50
Sheet metal workers	2.00
Builders' labourers	1.50
Common labourers	1.25
Driver, 1 horse and cart	2.50
Driver, 2 horses and wagon	4.00

Department of Marine and Fisheries.

PIERS AND LIGHTHOUSES AT JANVRIN SHOAL AND PADDY SHOAL, GASPE BASIN, QUE.

The construction of two cribwork piers and two wooden lighthouses on Janvrin Shoal and Paddy Shoal respectively, at the entrance to Gaspé Basin, Que.; date of contract, January 10, 1911; name of contractor, Arthur Morin, carpenter, Gaspé, Que.; amount of contract, $3,255.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenters	$1.75
Painters	1.75
Bricklayers	3.50
Masons	3.00
Labourers	1.50

Post Office Department.

During the month of December orders were given by the Post Office Department for the supplies below mentioned, subject to the regulations for the suppression of the *sweating* system and the securing of payment to the working men and working women of fair wages, and the performance of the work under the proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals	$ 787.69
Making and repairing rubber dating stamps and type, also other stamps	62.25
Supplying stamping material and wooden boxes and repairing stamping pads	1,361.97
Supplying mail bags	1,731.95
Repairing mail bags	1,616.87
Making and repairing Post Office scales	668.50
Making and repairing mail locks and supplying mail bag fittings	339.95
Supplying Railway Mail Clerks' tin travelling boxes, and repairing portable letter boxes, parcel receptacles, and Railway Mail Clerks' tin travelling boxes	92.50
Making and repairing miscellaneous articles of Postal Stores	179.90
Making and supplying articles of official uniform	2,484.05

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during February, 1911.

QUEBEC REPORT.

Industrial Conditions in Quebec.

General report of the Minister of Public Works and Labour of the Province of Quebec for the year ending June 30, 1910. Quebec: King's Printer, 1910. Pages, 110.

THE portion of the Report of the Minister of Public Works and Labour of Quebec dealing with labour and industry comprises reports of the Registrar of Councils of Conciliation and of Arbitration, and of the Inspectors and Inspectresses of industrial establishments and public buildings. It is stated by the Registrar of Councils of Conciliation and Arbitration that the relations between labour unions and the employers in the Province are growing more cordial, and the number of strikes continues to decrease, owing to the methods of conciliation which have been adopted. In the year ended June 30, 1910, it is stated that only one serious dispute took place, which was a strike of about two hundred sawmill hands at Levis, Que. This dispute, which began on August 2, 1909, was settled some days later through the friendly intervention of the Registrar.

The Chief Inspector of Industrial Establishments mentions in his report the new labour laws of the Province, which had gone into force or had been passed during the year. These included the Workmen's Compensation Act, which fixes the age of admission of boys and girls to factories at fourteen, and renders it compulsory for all workers under sixteen to be able to read and write; an Act prohibiting the employment of children under fifteen in theatres; an Act limiting the working hours of children, girls and women in cotton mills to fifty-eight hours per week, and an Act estabishing free employment bureaus.

Among the recommendations of the Inspectors made in the Report are the

following: That all industries be put on the same footing as regards the annual inspection of boilers; including butter and cheese factories; the reduction in the number of working hours for women and children to fifty-five hours per week for all industries; and that some means be provided to assist widows with small children dependent on them, so that they could stay at home and look after the children, and not depend for support on the wages of children under the authorized age.

SASKATCHEWAN REPORT.

Grain Elevator Commission.

Report of the Elevator Commission of the Province of Saskatchewan, 1910. Regina: King's Printer, 1910. Pages, 141.

Upon the petition of the Saskatchewan Grain Growers' Association to the Legislative Assembly of that Province for the establishment of public ownership with respect to grain elevators, a Commission was appointed by the Government of Saskatchewan in February, 1910, for the purpose of inquiring into their proposals. The Commission instituted a full investigation, and in their report, which was presented on October 31, the subject was dealt with under the following headings: The Farmers' Claims upon the Provincial Government; Charges against the Present System; Schemes of Provincial Ownership; The financial side of Provincial Ownership Schemes of Municipal and District Elevators; The Province and Grain Exchanges; Terminal Elevators, Banks and the Large Milling Companies; Present Conditions in Initial Elevators; Weighing and Cleaning the Grain; Farmers' Elevators; Summary of Conclusions.

In their conclusions the Commission reported against provincial ownership of elevators on the grounds that there is excessive storage capacity in the province at present, if tested on a storage and handling basis, and if it purchased some of the independent elevators, it would meet with keen competition from the larger companies, which would not only store and handle but also buy and sell grain, and therefore can afford to charge less for the storage. The farmers having no direct and personal financial interest in the provincial elevators would be free to take their grain to whatever elevator paid them best. Government elevators would also be at a disadvantage, owing to the general disposition to exact the utmost possible from the public treasury, while not giving the utmost return, owing to the fact that political influences would tend to make themselves felt, and owing to the opportunity they would afford an unsympathetic government to discredit the whole principle of public ownership. The Commission also opposed the schemes of municipal and district elevators on the ground that they do not secure such a personal and direct pecuniary interest from the farmer as is needed to make the elevators a success in competing with other elevators.

In lieu of the above schemes, the Commission held that the solution should be sought along the line of co-operation by the farmers themselves, assisted in the matter of finance by a provincial loan, and recommended special legislation for the creation of a co-operative organisation of the farmers on the principle of the maximum amount of local control consistent with ownership by the whole body of shareholders and management through a central board of directors.

BRITISH REPORTS.

Foreign Labor Statistics.

Board of Trade (Labour Department.) Fourth Abstract of Foreign Labour Statistics. London: Wyman & Sons. 1911. Pages, 527. Price, 2s., 1d.

The Fourth Abstract of Foreign Labour Statistics prepared in the Labour Department of the Board of Trade of Great Gritain, contains statistics relating to twenty countries, namely, Russia, Norway, Sweden, Denmark, Germany, Holland, Belgium, France, Italy, Austria, Hungary, Switzerland, Spain, Portugal, Luxemburg, Roumania, Servia, Bulgaria, the United States of America, and Japan. The tables in the Report give the latest available statistics relating to the following subjects: Occupations of the People, Fluctuations in Employment, Wages, Hours of Labour, Trade Unions, Trade Disputes, Conciliation and Arbitration,

Co-operation, Workmen's Insurance, Subsidized Unemployment Funds, Labour Registries, and Labour Colonies.

In comparing the statistics of the various countries with each other, it is pointed out that difficulty arises from the different methods adopted for collecting and classifying the statistics; and the figures, therefore, not absolutely comparable. Subject to these limitations, the statistics show that the largest proportion of the population engaged in occupations of all kinds occurs in Austria, where the percentage is 51·53, compared with 51·27 in France, 50·11 in Italy, 46·08 in Belgium, 45·51 in Germany, 44·05 in the United Kingdom, and 38·38 in the United States.

A brief summary is given of the methods of conciliation and arbitration in trade disputes established by law in the various countries. It is stated, that most European countries have legislation of this kind, almost without exception on a purely voluntary basis.

Pauperism in England and Wales.

Return (in part) to an Order of the House of Commons for copy of statement of the number of paupers relieved on January 1, 1910, and similar statement for July 1, 1910. Statement for July 1, 1910. London: Wyman & Sons, 1910. Pages, 33. Price, 4d.

A Return prepared by the Local Government Board shows that the total number of persons in receipt of poor relief in England and Wales, on July 1, 1910, was 887,102, being a decrease of 16,926 compared with July 1, 1909. The paupers other than the insane and casual paupers, comprised 194,397 men, 318,964 women, and 241,657 children, a total of 755,018, a decrease of 18,050 compared with July 1, 1909. The insane paupers comprised 52,704 men, 62,423 women and 2,227 children, an increase of 2,191 compared with the same day of the previous year, and the casual paupers numbered 15,661, a decrease of 1,051. Estimating the population of England and Wales to have been 36,169,150, there were on July 1, 1910, 24·5 persons per 1,000, in receipt of indoor and outdoor relief, exclusive of the insane and casual paupers. Only 3·2 per 1,000 were ordinarily able-bodied adults, but of the able-bodied indoor paupers 30,823 out of 47,470 were sick or temporarily disabled on the day to which the return relates.

Trade Unions

Reports of the Chief Registrar of Friendly Societies for the year ending December 31, 1909. Part C. Trade Unions. London: Wyman & Sons, 1911. Pages, 40. Price, 4½d.

The Report of the Chief Registrar of Friendly Societies on trade unions in Great Britain states that at the close of the year 1909 there remained on the register 666 trade unions, of which 638 furnished returns. During the year, twenty-nine trade unions were added to the register, and twenty-seven were cancelled, having given notice of dissolution. Compared with the previous year, four more returns were received, but there was a decrease in the number of members from 1,971,238 in 1908, to 1,957,904 in 1909, a decrease in the total income from £3,295,941 to £3,042,421; and in the total expenditure from £3,724,486 to £3,158,698. The balance of funds declined from £5,996,032 in 1908, to £5,886,272 in 1910.

UNITED STATES REPORTS.

Woman and Child Wage-earners.

Report on condition of woman and child wage-earners in the United States, in 19 volumes. Volume I: Cotton Textile Industry, Volume II: Men's Ready-made Clothing. Published under the direction of Chas. P Neill, Commissioner of Labour, Washington: Government Printing Office, 1911. Pages, 1044 and 878.

A Report is in course of preparation by the United States Department of Commerce and Labour dealing with the condition of woman and child wage-earners in the United States. Two volumes of the Report have just been issued, Volume I dealing with the Cotton Textile Industry, and Volume II with men's ready-made clothing. The Report on the cotton textile industry is divided into nine chapters, under the following headings: The Labour Force; Employment of Children; Hours of Labour, Overtime and Night Work; Earnings of Operatives in Representative Mills, as shown by the Pay-Rolls; the Cotton Mill and Working Conditions; Cotton Mill Processes and Occupations; Family Conditions and Amount and Sources of Family Incomes; The Mill Community; General Tables.

The investigation showed that there has been a steady increase in the percentage of men employed in these mills, and a corresponding decrease in the percentage of women and children. The percentage of males sixteen years of age and over increased from 34·6 in 1880, to 40·6 in 1890 and 46·9 in 1905. In the same period, the percentage of females decreased from 49·0 in 1880, to 48·7 in 1890 and 40·2 in 1905, and the percentage of children was 16·4 in 1880, 10·7 in 1890, and 12.9 in 1905.

The Report on women and children in the industry of men's ready-made clothing is arranged under the following headings: The Labour Force; Employment of Children; Hours of Labour and Overtime; Earnings of Employés in Representative Establishments, as shown by Pay-Rolls; Home Work in the Clothing Industry; The Clothing shop and Working Conditions; Family Conditions, and Amount and Sources of Family Income; Organization of the Clothing Industry; Development of the Clothing Industry; General Tables.

Strikes and Lockouts in Massachusetts.

Tenth annual report of strikes and lockouts, 1909. Part II of the fortieth annual report on the Statistics of Labour. Bureau of Statistics of Massachusetts. Boston: State Printers, 1910. Pages, 146.

The Report on strikes and lockouts in Massachusetts for 1909 shows that there were 183 in that year compared with ninety-eight in 1908, the increase in number being attributed to a return of prosperity. The number of working days lost, however, was only 228,363 in 1909, compared with 325,015 in the previous year. Only two of the disputes were classified as lockouts. The boot and shoe industry was affected by strikes to a greater extent than any other industry in Massachusetts during 1909. An analysis of the results of the strikes shows that in 39·41 per cent. of the establishments affected, the men were successful, in 46·96 of the establishments they failed, and in 13·63 they were partially successful.

Germany.—Drucksachen des Beirats fur Arbeiterstatistik. Verhandlungen Nr. 24.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

NOVA SCOTIA CASE.

Besetting and Watching.

JUDGE Longley has given judgement in the case of the Cumberland Railway & Coal Company v. McDougall, granting a writ of attachment against Joseph Moss, Milton Cameron, Lionel Dobar, James Price and Thomas Long for disobedience of the order made before Mr. Justice Drysdale, restraining them from besetting and watching plaintiff's premises with a view to intimidating the Company's employés.

NEW BRUNSWICK CASE.

Workman's Compensation.

In the King's Bench division, on February 27, Mr. Justice McKeown delivered judgement in the case of Robert Campbell v. Donaldson Brothers, and gave the plaintiff $472.50, or $7.50 for sixty-three weeks. On November 23, 1909, the plaintiff was employed as a labourer on board the *Almora* for the defendants. Coal was being hoisted from the steamer, and in the operation of hoisting it was the duty of the plaintiff to guide the hoisting bucket. For this purpose a rope becket was attached to the bucket, and by the means of the becket the plaintiff pulled the bucket in order to guide it to the place at which its contents were to be deposited. To do this it was necessary for the plaintiff to stand upon a scaffolding while so working. The rope becket broke, and the plaintiff was thrown to the deck of the steamer and was hurt. He alleges that it was through the negligence of the defendants that the rope broke. He claimed $10,000 at common law, or alternatively under the Workmen's Compensation Act.

QUEBEC CASES.

Damages for Negligence Settled by Eye Test.

Sudden tests of alleged defective eyesight were examined in the Superior Court at Montreal, in a case brought against the City for damages for an accident by Mr. Alexander McDougall, ex-president of the Montreal Grain Elevating Company. It was claimed for the City that the accident by which the plaintiff fell down an unguarded stairway was due to his bad sight. After arguing to this effect, counsel for the City suddenly turned to the plaintiff and demanded: "What time is it?" Without a moment's hesitation, the plaintiff turned in the gloomy court room and looked over to the clock at the other end of the room. Without putting on his glasses, he replied, "Five minutes to twelve." This was the exact time shown by the clock, and the answer to the plea of bad sight. The jury shortly after retired and brought in a verdict for $800 in his favour.

The action was taken by Mr. McDougall against the City for $5,000. Mr. McDougall claimed that on January 1, 1910, he went to do his duty as a citizen and vote

at the municipal election, his polling station in St. Andrew's ward being at No. 1 Buckingham avenue. When he went to the poll booth it was quite dark, and while moving over to get some light the plaintiff claimed that he stepped into an unguarded stairway, like a ship hatchway, and dropped seven feet into the cellar, breaking two ribs and sustaining other bruises when he landed. It was shown that the unguarded stairway was within 6 inches of the table for marking the ballots. No actual proof of monetary damages was adduced, and Doctors Roddick and Martin gave evidence to show that for a man of his age Mr. McDougall made a most remarkable recovery, being only laid up for a month.

$5,000 for Engineer's Death.

Judgement was rendered by Justice Monet in the suit entered against the Rutland Railway Company by Mrs. Avila McDonald, of Iberville, claiming $15,000 damages for the death of her husband, which occurred two years ago. The Court allowed Mrs. McDonald $3,000 and $2,000 for her children. McDonald was a locomotive engineer.

Test Case as to Wages for Prisoners' Work.

Is the law passed by the Legislature, whereby wages, earned by a husband for work performed while incarcerated in the common goal, may be turned over to his wife, a dead letter?

This is the question which will be tested as a result of a decision handed down by Recorder Weir, at Montreal. The case was that of one, Elford, accused of drunkenness as well as ill-treatment and non-support of his wife. The recorder sentenced him to six months hard labour, with the provision that all wages earned by him whilst incarcerated should be turned over to his wife and children. Judge Weir said that his only idea in making this restriction was that he desired to test the new law. He knew there were no funds available for the payment of wages to prisoners, but, as the law was on the statute books, he desired to see whether it would have any practical effect, if put to a test. There is no fund to provide for the payment of wages to prisoners.

The clause in the statutes by which Recorder Weir was guided in handing down his decision, reads as follows:—

"The Lieutenant-Governor-in-Council may from time to time direct or authorize the employment upon any special work or duty, within or without the limits of any common goal, of any prisoner sentenced to hard labour, &c., &c.

This article was amended in May, 1908, by adding the following (1229): "but if an offender who is condemned to imprisonment for any offence, has a wife or a wife and children dependent on him for their livelihood the wages earned by such prisoner shall be paid by the sheriff to the wife or to the wife and children as the case may be."

ONTARIO CASES.

Unsuccessful Claim for Damages.

Plaintiff, a business man in the employ of the defendant railway Company, was engaged in repairing a broken connection in the trolley line. He was standing on the defendant's tower repair wagon when a guy wire broke, causing him to be thrown to the ground. He brought action to recover damages for injuries sustained, alleging negligence on the part of defendants. Each guy wire was temporarily attached to the woodstrain by being passed through an opening and then twisted around itself, and, if properly twisted, the wire could not pull out. The accident was caused by a defect in the making of one of these ties by McE, the plaintiff's fellow workman, as the wire which pulled out could not have been securely twisted over itself. The jury found that defendant's foreman, one S., was negligent in not observing that the ties of the guy wire with the wood-strain were insecurely made, and awarded plaintiff $975 damages. Upon appeal to the Divisional Court, it was held that the plaintiff had suffered, not from any negligence of the foreman, who did not see, and if he had seen, could not have noticed the defect in the tie, but from the negligence of the plaintiffs' fellow workman, McE. Appeal allowed and action dismissed, without costs.

(Davidson v. Toronto Ry. Co. 17 W. R. 844.)

Neglect to Provide Necessaries for Wife.

The Criminal Code (Section 242, 2) provides that "Every one who is under a legal duty to provide necessaries for his wife, is criminally responsible for omitting without lawful excuse, so to do, if the death of his wife is caused, or if her life is endangered, or her health is or is likely to be permanently injured, by such omission". Upon the conviction of the defendant under the above section of the Code, at the General Sessions of the Peace for the County of York, before Judge Denton and a jury, the judge reserved a stated case for the Court of Appeal in regard to certain disputed questions which arose at the trial. The Court of Appeal held, (1) that not every case of neglect or omission to provide necessaries for a wife renders the husband criminally responsible; (2) that the jury must be satisfied that the omission was without lawful excuse; (3) that the question of lawful excuse is to be determined upon all the facts and circumstances, the burthen of proof being upon the prosecution; (4) that defendant's evidence as to his liability and means are matters for the consideration of the jury; (5) that where defendant had been previously charged with an offence under above section and acquitted, evidence as to what took place previous to his acquittal should not be received at a subsequent trial for another charge. The Court ordered that the conviction should be set aside, and the prisoner discharged.

(Rex v. Yuman, 17 W. R. 859)

Restraint of Trade.—Employé's Agreement.

Action by a laundry employer for injunction and damages on ground that defendant, a former employé of plaintiff's, had entered into a partnership with another ex-employé, and was carrying on a rival laundry business, and was canvassing customers of plaintiffs, with a view of inducing them to give their work to defendants, and was also trying to induce employés of plaintiffs to leave plaintiff's employment, and enter into defendant's employment, in contravention of an alleged agreement that he would not do so. The action was tried by Chief Justice Mulock, who held that the custom laundry business entered into by the defendant was no breach of his engagement not to enter into any business of a similar kind to that carried on by the plaintiff, and he dismissed the action. Upon appeal to the Divisional Court, it was held that the defendant, having been educated in the improved methods of business in the plaintiff's laundry and entrusted with their secrets, should not be at liberty to cut into that very profitable part of their business by a competitive laundry in the same city; that the defendant left the business of the plaintiff on June 2, 1910, and he should be prevented for three years from that date from violating the terms of his agreement with plaintiffs; that the operation of the interlocutory injunction having been suspended on an undertaking to keep an account of profits, the profits should be investigated by the Master, and paid over to plaintiffs, with costs of action and appeal.

(Allen Mfg. Co. v. Murphy, 17 W. R. 917.)

The Bread Sales Act.—Sale of "Small Bread."

Under section 2 of the Constitutional Questions Act, 9 Edward VII, chapter 52, the Lieutenant-Governor-in-Council referred to the Court of Appeal for hearing and consideration the following question: "Under sub-section 2 of section 3 of the Bread Sales Act, 10 Edward VII, chapter 95, is small-bread required to be sold in separate loaves, or can a number of loaves of small-bread, so called, be joined together and so sold without being detached by the vendor, when the same exceeds in the aggregate 12 ounces in weight?"

SECTION 3.—(1) Except as provided in sub-section 2, no person shall make bread for sale or sell or offer for sale bread except in loaves weighing 24 ounces or 48 ounces avoirdupois.

(2) Small-bread may be made for sale, offered for sale and sold in any weight not exceeding 12 ounces avoirdupois.

The following are the answers of the Court of Appeal judges:—

Chief Justice Moss.—As I read the question, an answer is only called for as to the effect of the legislation with regard to the sale of small-bread, and not at all as to

the manner of baking, and, so understanding it, I answer that, as I read the enactment, where a number of loaves of small-bread, so-called, joined together, exceed in the aggregate 12 ounces in weight, they are not to be so sold.

Mr. Justice Garrow.—In my opinion, the plain meaning of sub-section 2, properly considered in its relation to sub-section 1, is that no small-bread, if made into loaves and so sold or offered for sale, no matter how much less the individual or detachable portions may weigh, shall exceed in weight 12 ounces. And the palpable object is to keep the loaf of small-bread so small that no purchaser need be deceived by having it put off on him for a full loaf of 24 or 48 ounces.

Mr. Justice Maclaren.—I am of the opinion that sub-section 2 of section 3 only permits the sale of "small-bread," so-called, when the loaf does not, or the loaves thereof joined together do not, in the aggregate, exceed 12 ounces in weight.

Mr. Justice Meredith.—The question is one of fact; if there are really different rolls or loaves, or "small-bread"—an undefined expression— they are none the less rolls, loaves, or small-bread because they have run together in the baking, or are attached in the way loaves commonly have been ever since loaves were made, without any one dreaming that they were anything but several loaves, there is no infringement of the provisions of the enactment; but, if in truth and in fact, they are not so attached, but the bread is all in one piece, and it is not of one of the specified weights, there is such an infringement: and is none the less so for any colourable marks or other pretences of actual division, and whether so sold or offered for sale, or even if so made for sale without any offering for sale or sale.

I desire to add an expression of my entire concurrence with Judge Morson, in the views of the subject which he expressed in the case, under the Act, recently decided by him—Rex v. Nasmith Company, Limited—views which I cannot help thinking, and saying, ought to commend themselves to all reasonable men, from whom only, and not from those too much possessed by the subject, legislation should emanate.

Mr. Justice Magee.—Small-bread is not required to be sold in separate loaves when, if joined together, the aggregate weight does not exceed 12 ounces, and a number of loaves of "small-bread" may be joined together and so sold without being detached, where the same do not exceed in the aggregate 12 ounces in weight; but not if they do exceed in the aggregate that weight.

(2 Ont. W. N. 736.)

MANITOBA CASES.

Dangerous Works.—Effect of Judgement against one Joint Wrongdoer.

The defendants sublet a portion of their contract for the construction of a line of railway. In the execution of the work the sub-contractors made use of dynamite for the purpose of blasting rock excavations, and, in the process, the plaintiff sustained personal injury, for which, in an action against them for damages, he recovered judgement, issued execution, and, on the levy, the sheriff returned a writ of execution *nulla bona*, the result being that the judgement against the sub-contractors remained unsatisfied. Subsequently, the plaintiff brought action against the present defendants to recover damages for the same injuries, and, at the trial, his action was dismissed. This decision was affirmed by the judgement of the Manitoba Court of Appeal, from which appeal was taken to the Supreme Court of Canada. This Court held that a proprietor or principal contractor, undertaking works in the circumstances inherently dangerous, cannot delegate the duty of providing against such danger, so as to escape personal responsibility if that duty be neglected. Failure to discharge such duty makes the proprietor and his contractor, or the contractor and his sub-contractor, as the case may be, equally liable as joint wrong-doers, for the resultant injury. A judgement for damages sustained in consequence of any such injury against one of such joint wrong-doers is a bar to a subsequent action therefor against another. Judgement appealed from (19 Manitoba R. 641) affirmed, and appeal to Supreme Court dismissed.

(Longmore v. J. D. McArthur Co. 43 S. C. R. 640.)

Concurrent Findings of Facts as to Negligence.

Upon an appeal from the judgement of the Court of Appeal for Manitoba, affirming the judgement of Mr. Justice Metcalfe at the trial, by which the plaintiff's action was maintained with costs, the Supreme Court of Canada has held, that concurrent findings on questions of fact in the courts below ought not to be disturbed on appeal unless a mistake is clearly shown.

A ship lying at her dock caught fire during the night and was destroyed. The officers of the ship failed to arouse passengers in time to permit them to escape in safety and, in an action to recover damages for injuries sustained in consequence by a passenger, the owners adduced no evidence to explain the origin of the fire. The Supreme Court held, affirming the judgement appealed from (19 Manitoba R. 430), that, in the circumstances, the only inference to be drawn was that the owners were grossly negligent. In such an action the owners of the ship cannot invoke the limitation provided by section 921 of the Canada Shipping Act, R.S.C., 1906, chapter 113. The *Orwell* (13 P.D. 80), and Roche v. London & South-Western Railway Company. (1899), 2 Q.B., 502, referred to. The appeal from the Manitoba Court of Appeal was dismissed with costs.

(Isbester v. Dominion Fish Co., 43 S. C. R. 637.)

Damages for Dismissal of Contractors.

In his judgement in the Calgary City Hall case, Mr. Justice Scott finds in favour of Wm. Davey, the contractor. The judge, after discussing at considerable length the reasons which led to the dismissal of the plaintiff, says: "I hold that the act of defendants in dismissing the plaintiffs from the work and preventing their completing the work, was a wrongful and unwarranted act, and that by reason thereof the plaintiffs are entitled to recover for the value of the work done and materials supplied by them upon and for the building in question, and also for damages sustained by them by reason of the defendants having taken possession of and converted to its use their plant, appliances and tools." The judgement states further, that the clerk of the Court or such others as are agreed upon or appointed by the Court, shall fix the amount due Mr. Davey.

BRITISH COLUMBIA CASE.

Violations of Fruit Inspection and Sales Act.

Following orders from Ottawa, the Dominion fruit inspector inaugurated a campaign against the illegal packing and labelling of fruit put up by growers for shipment. As a part of his plan for the abolition of fraud and deceit in the sale of fruit, arrests of several prominent fruit-growers in widely scattered points of the province have taken place. Henry Kipp and Jacob Zinck, two residents and fruit-growers of the Chilliwack district, appeared before Magistrate D. McGillivray to answer the charge of illegal packing and labelling of apples.

Mr. Zinck pleaded guilty to two charges, one for having labelled a box of apples of an inferior grade as "Class 2," and one of packing several large apples on the top tier of a box made up chiefly of small apples. He was fined $10 and costs for each offence. Mr. Kipp was charged with having labelled as "Class 1" a box of apples which the inspector claimed could not be properly classed as No. 3 fruit. He entered a plea of not guilty, but was adjudged guilty by the Court and fined $20 and costs.

The actions were brought under the Dominion Fruit Inspection and Sales Act, which provides that fruit shall be sorted before shipped and classed in groups, numbers 1, 2 and 3, according to its size and general condition, and that different classed apples shall not be shipped in the same box.

ALBERTA CASES.

Public Works Health Act.—Medical Treatment of Workmen.

The provisions of section 3 of the "Public Works Health Act," Revised Statutes of Canada, 1906, chapter 135, do not impose on a Government Department, or a company constructing a public work, the

obligation to provide hospitals and surgical attendance for the treatment of personal injuries sustained by employés, whether of themselves or of their contractors or sub-contractors, in the construction of such work.

This is, in effect, the judgement of the Supreme Court of Canada, upon an appeal from the judgement of the Supreme Court of Alberta, affirming the judgement of Harvey J., at the trial, whereby the plaintiff's action was maintained as against the Company, with costs, and dismissed in respect to the other defendant.

The plaintiff, a labourer employed by a firm of sub-contractors engaged in the construction of a portion of the Grand Trunk Pacific Railway (a work being prosecuted under the control of the Parliament of Canada), while in the performance of his duties met with an accident by which his leg was broken. The injured limb was set and placed in a temporary splint at a local emergency hospital by the surgeon in charge, and the plaintiff was then transferred to the permanent hospital, at Edmonton, where he received treatment by Dr. Hislop, one of the defendants, until discharged from that hospital some weeks later. As a result of the injury, the plaintiff's right leg remained shorter than the left, and he lost proper use of his right ankle. The action for damages was brought against the Company and Dr. Hislop. The fault charged against the Company was failure to provide proper surgical treatment and appliances, as required by the Public Works Health Act and the regulations made thereunder, by Order-in-Council, and it was also alleged that the medical attendant at the emergency hospital was not a properly qualified practitioner, because he was not registered as such under the statute in force in the Province of Alberta. The other defendant, Hislop, was charged with malpractice. On an application in chambers, to compel the plaintiff to elect as to which of the defendants he would proceed against, Mr. Justice Beck held that these causes of action might properly be joined, and, at the trial, the jury exonerated Hislop, and found that the plaintiff's injury was the result of negligence on the part of the Company in failing to provide a suitably equipped hospital, a duly authorized physician and attendants, in compliance with the terms of the Public Works Health Act. The action was dismissed in respect to Hislop, and, on the findings of the jury, the trial judge ordered judgement to be entered against the Company for the amount of damages assessed ($5,000), with costs of the action. This judgement was affirmed by the judgement now appealed from, but the Supreme Court of Canada was unanimous in allowing the appeal against the judgement.

(White v. Grand Trunk Pacific Railway Co. and Hislop, 43 S. C. R. 627.)

UNITED STATES CASES.

Conviction of Labour Union for Conspiracy.

A verdict of guilty against members of the New Orleans Dock and Cotton Council, charged, under the Sherman anti-trust law, with conspiracy to interfere with foreign commerce has been returned by a jury in the United States Circuit Court.

The Dock and Cotton Council has about 50,000 members. From the moment a bale of cotton or load of lumber or any other through freight reaches the port until it is stowed on a vessel it is not handled by anyone except the members of the ten or more unions affiliated with the central body. It was argued by the government's attorneys that when these men conspired to strike and tie up the port they inferfered with interstate commerce. The convicted men are James Byrnes, former president of the Council and at present state labour commissioner of Louisiana; Philip Pearsaw, former president of the local Coal Wheelers' Union, and U. S. Swan, former president of the Longshoremen's Union. Sentence has been deferred.

The strike, which was begun two years ago, grew out of the refusal of the Coal Wheelers' Union to coal the steamer *Habil* because non-union longshoremen had been employed to load the vessel.

Trade Conspiracy a Continuing Offence.

Announcing that conspiracy under the Sherman anti-trust law is a continuing offence, the Supreme Court of the United States has held good the indictment in New York, in 1909, of Gustave E. Kissel and Thomas B. Harned under this law, as far as the statute of limitations was concerned. The case in which Harned and Kissel were involved grew out of the suit of the Pennsylvania Sugar Refining Company against the trust for $30,000,000, under the Sherman anti-trust Act, which, after the trial had proceeded for several days, was settled out of Court for $750,000, and the return of the note for $1,250,000 given by one Adolf Segal for the Pennsylvania Sugar Refining Company to Gustave E. Kissel. It was about this note that the whole case centred, the charge being made that the money which Kissel and others, including Harned, advanced was furnished from sources identified with the American Sugar Refining Company, and that the note was foreclosed and the Pennsylvania refinery immediately shut down as the result of a conspiracy to put the Company out of business, and thus do away with its competition. Within three weeks of the settlement of the suit, a Federal grand jury in New York returned an anti-trust indictment against the American Sugar Refining Company and others, including Harned and Kissel.

The indictment charged that the American Sugar Refining Company and the individuals jointly indicted with it engaged in an unlawful and corrupt conspiracy among themselves in restraint of the trade and commerce in refined sugar; "that is to say, a conspiracy unreasonably to restrain and eliminate free competition and prevent all competition, with said corporation defendant . . . by said Pennsylvania Sugar Refining Company, to the very great injury and detriment, financial and moral, of the people of the United States, and this by and through the unfair deceitful, unlawful and corrupt means and practices on the part of said corporation and individual defendants."

The indictment next charged that the defendants accomplished the control of the Pennsylvania Sugar Refining Company by inducing Segal, through Kissel, acting as a broker and the agent for a lender unknown at the time the loan was made, but which lender was in fact the defendant corporation, to borrow $1,250,000 for use in his business as a promoter of hotel and manufacturing enterprises, and to transfer to Kissel, with a majority stock, a voting power as the holder of 26,000 shares of stock of the Pennsylvania Sugar Refining Company.

All of the defendants entered demurrers to the indictment as being bad in law, which the lower Court sustained in every case, throwing the cases out of Court. The pleas of Kissel and Harned were of peculiar interest, however, inasmuch as their attorneys interposed the plea of the statute of limitations, the alleged offence having occurred in 1903. It was urged by the defence that the conspiracy, if any, occurred at that time, and that conspiracy was not a continuing offence. It was on this ground that Judge Hand discharged them. The case was then taken to the Supreme Court, which has now declared that conspiracy in restraint of trade is a continuing offence, and that Kissel and Harned cannot escape trial on that ground. The decision is an extremely important one in its bearing on other trust prosecutions of the same nature before the Courts of the United States.

THE

LABOUR GAZETTE

APRIL, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF MARCH, 1911.

I.—GENERAL SUMMARY.

A feature of the past month having a considerable effect upon the condition of employment was the continuance of cold weather up to the opening days of April. All provinces of the Dominion with the exception of British Columbia and some portions of Alberta were affected by these conditions, which had the result of retarding outside operations until an unusually late date. Agriculturists were unable to get on the land, though conditions otherwise were favourable; the engagement of farm help for the summer season was in progress, experienced labour being generally scarce. The resumption of spring activity in the Ontario and Quebec mining districts was also delayed. In the railway construction camps forces were considerably increased, and the outlook is for a very active summer. In the building trades, though several of the outdoor trades were still inactive, there was a considerable increase in the amount of employment, the number of permits issued during the first three months of the year being in excess of the returns for the corresponding period of 1910. Lumbering operations in the woods had ceased in many sections of Ontario and the Eastern provinces, and the drives are expected to be late; in British Columbia, however, logging was generally under way, and many of the larger mills had opened. Low water in the streams hampered sawmills and other manufacturing plants dependent on water power, but the manufacturing industry otherwise had a very active month. Railway traffic continued very heavy, but navigation will be late in opening. The supply of unskilled labour was still in excess of the demand at certain points, but in general was well absorbed, notwithstanding the exceptionally heavy immigration movement. The outlook in almost every branch of industry is for pronounced activity during the coming summer season.

Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during March, 1911.

Building.—Stonecutters at Calgary had their wages raised 2½ cents per hour to 65 cents per hour, and electricians in the same city, 5 cents an hour to 50 cents an hour. Painters, paper-hangers and decorators at Victoria, B.C., obtained an advance from $3.50 to $4.00 per day of eight hours.

Railway employés.—Intercolonial Railway yardmen and Intercolonial Railway trainmen received advances of 20 per cent. and 10 per cent. respectively, dating from January 1, 1911. Trainmen and yardmen employed by the Canadian Pacific Railway Company west of Port Arthur also received advances.

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

Street railway employés.—The Winnipeg Street Railway Company has advanced wages 2½ cents per hour.

Civic employés.—Day labourers in the Municipality of Nanaimo, B.C., had their wages advanced 25 cents per hour. Civic employés at Vancouver, B.C., obtained substantial increases.* Firemen and policemen at Brantford, Ont., received a new scale of wages.* Firemen at Peterborough, Ont., also received an advance.* At Ottawa, Ont., departmental heads and assistants, and firemen had their salaries increased, and day labourers had their wages increased from 20 cents to 22 cents per hour, ward-foremen being advanced from $2.25 to $2.50 per day.*

Interruptions to Industry.

Among industrial establishments, etc., destroyed by fire or through other causes during March, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia—Three tenements at Halifax, loss, $10,000; hotel (partial) at Hubbards, loss, $1,000; railway station at Sydney, loss, $60,000; storehouse and offices at Sydney; power house (partial) at Sydney; freight sheds at Truro, loss, $70,000.

The steamer *Bruce* was wrecked at Porta Nova Point, Scetteri Island, 20 miles from Lunenburg, and became a total loss.

Prince Edward Island.—Three stores at O'Leary, loss, $5,000.

New Brunswick.—Plaster mill at Hillsboro, loss, $112,000, with 100 men out of employment; outbuildings and residence at Midgic, loss, $3,000; outbuildings and residence at St. Stephen, loss, $2,500; freight shed and warehouse at St. John, loss, $67,000; hotel at Sussex, loss, $50,000; woodworking factory at Woodstock, loss, $4,000.

Quebec.—Lumber mill at Buckingham, loss, $50,000; match factory at Drummond, loss, $5,000; railway station at Belœil, loss, $2,000; saw-mill, hotel and store at East Richford, loss, $50,000; theatre at Grand Mère, loss, $2,500; bakery at Hull, loss, $1,200; business block at Kingsey Falls. At Montreal, stationery and printing establishment; stable and five horses, loss, $1,500; bank (partial); stock yards and cattle, loss, $20,000; carriage factory, loss, $20,000; lunch room. Outbuildings and residence at Napierville, loss, $2,000; sash factory and bank building at Pointe aux Trembles, loss, $50,000; lumber yard at Quebec, loss, $2,000; library and residence at Richmond, loss, $40,000; granary and residence at Scotstown; church at Stanfold, loss, $60,000; warehouse and contents at St. Johns, loss, $10,000; saw-mill at St. Michel des Saints loss, $2,000; two shops and ten tenements at Verdun, loss, $10,000.

Ontario.—Business block at Arnprior, loss, $5,000; hardware store at Barrie, loss, $17,000; eight Grand Trunk cars and contents at Brockville; shoe store at Cargill, loss, $1,500; two stores at Cochrane; granary and residence at Galt; business block at Hamilton, loss, $27,000; half of the business portion of Kelso, loss $100,000; box factory at London, loss, $8,000; spring bed factory (partial) at London; business block at Millbrook, loss, $15,000; portion of business section of North Bay, loss, $200,000; stables and store at Ottawa; livery stable and fourteen horses at Ottawa, loss, $10,000; paper box factory at Ottawa, loss, $5,000; three stores and dwellings at Tamworth, loss $7,000. At Toronto: clothing factory, loss, $5,000; business block, loss $5,300; tenements, loss, $3,000; foundry, loss, $6,000. Paint factory (partial) at Windsor, loss, $1,200; business block at Wingham, loss, $15,000.

Manitoba.—Juniorate at St. Boniface, loss, $15,000; business block at Winnipeg.

Saskatchewan.—Stable and automobile garage at Arcola, loss, $1,200; business portion of Cupar, loss, $50,000; elevator and 6,000 bushels of grain at Broadview; business block at Regina, loss, $40,000.

British Columbia.—Business block in Chinese quarter of Vancouver, sash and door factory at Revelstoke, loss, $5,000.

On March 25, the steamer *Sechelt* capsized off the shore of British Columbia and became a total wreck.

*See reports of local correspondents.

Conditions in the Industries and Trades.

Conditions of employment during March in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Preparations for the beginning of spring work were under way throughout Canada but were retarded in Manitoba and the Eastern Provinces by cold weather. Further west, however, the weather was considerably milder and farmers were expecting to be on the land at an early date. There was a marked revival in the demand for farm help, which was generally scarce. Other features of the month were the activity in connection with the pruning and spraying of trees in the fruit-growing districts, and the favourable reports from the maple sugar industry. Farm produce continued to bring good prices. Stock sales were well attended, prices ruling high. A general increase in farm values took place in the North-west provinces, some large holding companies having advanced prices by from $5 to $10 per acre.

Successful seed fairs were held during the month at Summerside, P.E.I., Guelph, Ont., and other points.

An important Order-in-Council was

passed during March, regulating the importation of nursery stock with a view to the prevention of insect pests and diseases destructive to vegetation. Inspectors to carry out the regulations will be appointed.

The final statistics of crop yields and acreage in crop in Saskatchewan during 1910 show that the province raised a total grain crop of 145,071,663 bushels. Although the returns indicate that an increasing amount of attention is being devoted to mixed farming, the province still holds a premier place as a wheat growing country, having raised 72,666,399 bushels of that cereal, exceeding by four million bushels the estimate issued early in the season. This was grown on 4,664,834 acres, or 579,834 more than were cropped in 1909, an average of 15.58 bushels per acre.

Fishing.

Catches have been light in the Maritime provinces, drift ice having interfered with off-shore operations. The first of the Lunenburg fishing fleet had left for the banks. The yield of winter fishing appears, on the whole, to have been somewhat below the average. Lobster and shad fishing will begin shortly. Quietness was also reported from other fishing districts of the Dominion. The run of spring salmon had begun on the Fraser River, but catches were light. Whaling operations off Vancouver Island promised to be on a larger scale this year than in any previous season.

The fishing regulations of the Dominion government have been amended to prevent beam or other trawlers from participation in bounties.

Lumbering.

The Ontario and Quebec camps closed in certain districts somewhat earlier than usual owing to the depth of snow. The result was to throw a considerable number of men on the market, though in several sections work has been prolonged to a later date than last year. Concurrently, the low water in the streams curtailed the operation of mills. The drives, it is expected, will be considerably later than last year. The cut is estimated to fall, on the whole, only slightly under that of 1909–10, and there will be an abundance of material for an active sawing season. In Manitoba, the winter just closed is reported to have been the best in many years for bush work, about 20,000 men having been employed in the territory tributary to Winnipeg cutting ties, poles and other lumber. In British Columbia, some of the larger mills have begun sawing, and logging was active.

It was announced by the Honourable the Premier of Quebec, that the policy of the Province with regard to the manufacture of pulpwood cut on Crown lands as enunciated by the Order-in-Council of April 2, 1910, would be maintained. Prices have been firm throughout Canada.

Mining.

Activity has been well maintained in the Nova Scotia collieries and the outlook is for a busy summer in the coal trade. In Quebec preparations were under way looking to the resumption of activity in the asbestos and copper mines, but the prevailing cold weather here, as in Eastern Ontario, hampered operations. Conditions remained with little change in the Cobalt camp. Development work was active in the Porcupine district and a very busy summer is expected. Labour disturbances affected the output of the Alberta and Crow's Nest Pass collieries, but on Vancouver Island operators were very busy and extensive developments are planned by the employing companies. Little change in conditions in metalliferous camps occurred as compared with February.

The mineral production of Nova Scotia for the year ending September 30, 1910, was as follows:

Mineral.	Quantity.
Coal raised (gross tons)	5,477,146
[1]Iron ore (net tons)	52,640
Pig iron made (net tons)	341,764
Ingots steel made (net tons)	409,663
Limestone quarried (net tons)	483,100

[1]Iron ore imported 705,351 net tons.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, active, very active; (2) quiet and very quiet.

Patent fuel (coke) made (net tons)	493,167
Gypsum quarried (gross tons)	322,974
Building stone, quarried (net tons)	8,503
Bricks, made	21,305,500
Drain-pipe, made (feet)	974,819
Grindstones quarried (net tons)	325
Gold bearing ore mined (net tons)	49,557
Gold produced (ounces)	10,675
Manganese ore (net tons)	25
Copper ore (net tons)	nil
Antimony concentrate (net tons)	203
Moulding sand (net tons)	180
Scheelite (net tons)	75
Sulphate of Ammonia (net tons)	3,622

The returns of coal sold in 1910 were 1,806,999 tons as against 1,769,803 in 1909. The output of iron increased by 40,640 tons over 1909. The gold production was 10,675 ounces from 49,557 tons of ore, an average yield of $4.09 per ton. This is the smallest number of tons of ore mined since 1894, and the smallest number of ounces of gold recovered since 1874. The output of gypsum was 322,974 tons, an increase of 23,929 tons over 1909. There was no change in brick and clay products from that of 1909. Building stone fell off greatly, the output of the quarries being but 8,503 tons as against 63,861 tons in 1907. This is accounted for by the increased use of cement in building operations. The number and classes of workmen employed in the Nova Scotia coal mines, for the year ending Sept. 30, 1910, were:

Underground: Skilled workmen, 4,883; labourers, 3,018; boys, 767. Surface: Skilled workmen, 937; labourers, 1,194; boys, 171. Construction: Skilled workmen, 21; boys, 10.

The thirteenth annual meeting of the Canadian Mining Institute was held at Quebec, Que., March 1-3.

The annual meeting of the Crow's Nest Pass Coal Company was held on March 10. The coal mined by the Company during the year amounted to 1,209,762 tons; the amount of coke produced 194,498 tons. The amount spent on improvements $144,314, and the amount charged to mine development $19,316.

The annual meeting of the Amalgamated Asbestos Corporation was held on March 8. A deficit of $59,213 was announced on an expenditure period of seven months and an income period of five months.

Manufacturing.

Industrial establishments continued very active in nearly all of the larger centres of industry throughout Canada. The outlook is for a considerable expansion in buildings and equipment during the coming season. Low water interfered with operations, but these conditions were local in effect. Exceptional activity was reported from the iron and steel industries and from farm implement establishments.

The second annual meeting of the Canadian Cement and Concrete Association was held March 7.

Railway Construction.

No material change from winter conditions had occurred up to the close of March, though staffs were generally augmented. Detailed arrangements as to work of the coming season were being completed. In this connection, several important plans were announced and contracts awarded. The contract for 100 miles of railway grading and ballasting on the Alberta Central Railway was awarded to Janse, McDonald, and Company. It was announced that the Canadian Pacific Railway Company would spend several million dollars in Ontario on improvements, stations, yard, etc. Contracts amounting to $8,000,000 for grading, in Western Canada, were awarded by the Canadian Northern Railway Company. It is expected that the main line of the Grand Trunk Pacific Railway will be completed this year as far as Tete Jaune Cache; contracts to the amount of $17,000,000 on new work were awarded in March. In British Columbia the year will be very active: in addition to new lines projected by the Grand Trunk Pacific and Canadian Northern Railway Companies, the Canadian Pacific Railway Company will spend about $8,000,000 on betterments in the Province; altogether it is estimated the Canadian Pacific Railway Company will spend $14,000,000 this year on new branch lines, which in western Canada alone are now under contract to the extent of 344 miles. The first section of the Quebec and Saguenay Railway, extending from the east

end of the Qubeec Railway at St. Joachim to Murray Bay, a distance of fifty-six miles, has been put under contract to Mr. M. J. O'Brien of Renfrew.

General Transport.

Railway traffic was well maintained and the earnings of companies continued to show substantial increases compared with the corresponding period of 1910. Car shops were very busy. Street railway traffic was also heavy and staffs were being gradually augmented. There was some activity in the work of preparing boats for the season of navigation; the outlook at the closing of the month of March was that the season would be late in opening. The first steamboat of the season arrived in Toronto harbour on March 29. A weekly service between Germany and Canada is announced as a feature of the approaching trans-Atlantic shipping season.

The Board of Railway Commissioners will, during May, take up the question of requiring all railway companies to protect main line switches and to adopt an adequate block system.

The report of the Harbour Commissioners of Three Rivers for 1910 showed that fifty-three steamers registered, compared with forty-seven in 1909. The number of canal boats declined from 1,179 to 772. The high showing of 1909 was due to the heavy export of pulpwood in anticipation of the prohibition of export.

Up to the closing week of March it was estimated that the value of exports via the port of St. John, N.B., during the past winter exceeded $13,000,000, a substantial increase over the same period of last year. Import business has also been larger.

The Chief Operating Officer of the Board of Railway Commissioners was recently called upon to report on the operating rules of electric lines and found a marked difference in some. The Board has accordingly directed the companies to appoint a committee to deal with the matter of compiling a uniform code of rules suitable for operation for electric railways, both single and double track.

The Trades.

Building.—There was a considerable increase in activity among the various branches of the building trades during March, though in some localities the severity of the weather prevented outdoor operations. The outlook is that the approaching season will be still more active than in 1910. The number of permits issued and the value of buildings represented therein during the first three months of the year exceeded the similar returns for 1910 in many localities.

Metal and woodworking trades.—Employés in industrial establishments had an active month and the outlook is for a continuance of these conditions.

Printing and allied trades.—Members of the allied trades were well employed in the various cities.

Clothing.—Journeymen tailors were busy, and garment workers and boot and shoe workers had an active month.

Textile trades.—Woollen and cotton mills were working steadily with good orders ahead.

Leather.—Conditions remained with little change from last month. Prices were firm.

Food and tobacco preparation.—Bakers were active and confectioners had a good month. Cigar and tobacco workers were active.

Miscellaneous.—Retail clerks, hotel and restaurant employés reported activity.

Unskilled labour.—Though the continuance of the cold weather delayed outside operations, unskilled labourers were gradually resuming work. The return of lumbermen from the camps increased the supply of general labour at a few points, but it is expected that a few weeks time will see all at work. The railway construction camps were already taking on large numbers of men, and in farming, civic improvement work and building there will shortly be a pronounced demand for labour.

Canadian Trade and Revenue.

Foreign trade.—During February, 1911, the total value of imports entered for consumption in the Dominion of Canada,

was $35,589,249, compared with $30,341,462 in February, 1910. For the first eleven months of the present fiscal year ending February, 28, 1911, the total value of imports entered for consumption was $412,070,765, compared with $332,391,669 in the corresponding months of the last fiscal year. The total value of domestic exports during February, 1911, was $15,045,014, compared with $15,337,043 in February, 1910. The total value of exports during the eleven months ending February 28, 1911, was $253,952,299, as against $257,012,262 in the corresponding months of last year. During February, 1911, there were increases in exports of the mine and manufactures, and decreases in exports of the fisheries, the forest, animals and their produce and agriculture. The grand total of Canadian trade for February, 1911, was $52,946,413, compared with $46,291,201 in February, 1910, and for the eleven months ending February 28, 1911, $687,377,488, as against $610,577,981 in the corresponding months of the last fiscal year.

During March Canadian Trade Commissioners received instructions from the Department of Trade and Commerce, Canada, to investigate the possibility of introducing or increasing the importation of carriages, wagons, motor vehicles, bicycles and Canadian lumber abroad. Openings for dairy machinery were reported in Colombia.

Imperial trade.—A demand for Canadian box boards, staves, strong hog hairs for brush manufacture, ropes, binder twine, apples, rubber footwear, and birch for spool making, was stated to exist in Great Britain. Canadian buggies were said to be popular in Barbados; with more activity on the part of commercial travellers could be made to replace the lighter articles produced in the United States. An increase in the importation of Canadian whiskey was reported in British Honduras. The appointment of a Trade Commissioner to Canada was proposed by the government of Barbados. and a branch of the Royal Bank of Canada has been opened at Bridgetown in that Dominion. A market for Canadian marine motors, wood and cardboard boxes was reported in Newfoundland. The value of Canadian exports to New Zealand during the calendar year 1910 amounted to £261,221. It was reported to the Department of Trade and Commerce, Canada, from Durban that the Canadian imports into South Africa during 1910 reached a total value of £467,578.

Domestic trade.—General trade was fairly active. The cold weather had the effect of clearing out supplies of winter goods. Spring lines were correspondingly slow, but a healthy tone was noted. Collections were somewhat slow.

The February bank statement showed an advance in current loans, and deposits also showed a heavy increase. Note circulation showed a larger February expansion than in any year since 1901. A steady increase in business activity is indicated by the statement.

A feature of the past two months has been the heavy increase in bank clearings as compared with the corresponding period of 1910. For the week ending March 17, for example, the increase amounted to over twenty per cent.

The fifty-seventh annual report of the Bank of British North America showed total profits of $554,941. Average profits during five years, 1905-1910 were $518,008.

Canadian revenue.—For the eleven months of the fiscal year 1909-1910 the total revenue was slightly in excess of $104,000,000, an increase of over $14,000,000 as compared with the same period of 1908-1909.

The annual Budget Statement of the Honourable Minister of Finance was presented to the House of Commons on April 4. A surplus of $30,500,000 on a revenue of $117,500,000 was announced.

Notes.

The installation of Hydro-electric power generated at Niagara Falls was completed at St. Thomas, Ont., and the service successfully inaugurated on March 24.

The annual banquet of the Guelph

Co-operative Association was held on March 7. On the same date, the thirtieth quarterly meeting of the Industrial Co-operative Society of Valleyfield, Que. was held, the reports showing an increase of $1,197 in sales over those of the preceding quarter and an increase of $974 over those of the corresponding quarter of last year. Further progress in connection with establishing a furniture factory on the labour-copartnership plan was reported from Guelph. The Workmen's Store (co-operative) at Dominion, C.B., held its eighth annual meeting on April 1, reporting sales of $51,999 during the last half year, an increase of $11,994 over the previous six months. The Seventeenth Quarterly Report of the Sydney Mines, C.B., co-operative stores show sales for the quarter of $30,416, an increase over the previous quarter of $1,102.

As previously reported in the *Labour Gazette*, the Royal Commission on Industrial Training and Technical Education spent a considerable portion of January and February at the Department in Ottawa, for the purpose of preparing a digest of the evidence taken in the course of its investigations throughout Canada and in the United States. Some weeks were spent by the Commission at this task, in order that, in connection with subsequent investigations to be carried on in Europe, it might have at its command in the most readily accessible form, details as to the requirements of Canada with respect to the matters that have been the subject of their enquiry. The work in this connection was completed in March and the Commission sailed in the closing days of the month for Europe. No final itinerary of the Commission while in Europe had been arranged prior to their departure, but it was expected that the Commission will first inspect the more important technical institutions of the United Kingdom, and will thereafter visit Germany, France, Belgium, and other countries on the continent of Europe, returning to this country at the end of the summer.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

LABOUR continued active during March, and except for an occasional idle day at some of the mines, the larger industries were busy. Preparations being made by the Coal Companies, in the opening up of new collieries and the further development of those now in operation, point to a busy summer in the coal trade. The continued enlargement of the Sydney steel plant and improvements made in different departments will result in larger outputs of steel and an increase in the volume of business in iron and steel products. The Dominion Steel & Coal Corporation will have a fleet of twenty vessels in the coal trade during the summer. Two large vessels with a capacity of 10,500 tons will carry ore from the Wabana mines to the Sydney Steel plant, and another large vessel will be continuously employed in carrying limestone. The Nova Scotia Steel & Coal Company will have eight vessels of large capacity in the coal trade and ten others in the iron ore business. A large amount of coal has been placed in the coal heaps in the Glace Bay and Sydney Mines districts and these will be added to until the navigation season opens up. Further additions to the Sydney steel plant are being made. The work of excavation for the foundation of No. 7 blast furnace was begun during the month. The foundation of No. 8 furnace was completed, and the framework of the furnace itself is being constructed. Machinery for a new nail mill arrived and was unloaded. The frame-work over the two 450-ton mixers will be completed early in June. The new mixers will greatly facilitate the making of Bessemer steel, and the holding capacity of molten

iron will be increased from three hundred to twelve hundred tons, which will eliminate any necessity for making or re-heating pig-iron, as the metal will be used in its molten state. The large power plant equipped with electric turbine engines will be ready by the first of August. A second rod mill is soon to be added. Two new steamers for the ore trade are due to arrive at Sydney in the latter part of April. Winter weather, while very cold, was favourable to railway transportation, and the Intercolonial Railway handled much freight. The tramways were uninterrupted by snow-storms and were busy. The cement works, the tar and chemical works, the woodworkers and other factories, were all busy. The frosty weather brought much work to plumbers and kept them busy making repairs. The building trades were quiet. The retail and wholesale trades had a good month.

A committee of the Provincial Workmen's Association, together with members of the Dominion Coal Company's Employés' Benefit Society, waited on the local Government with a view of having the Government increase its contribution to the fund. The Provincial Workmen's Association part of the Committee objected to the proposed change in the mining law, forcing lock safety lamps into all collieries, whether they are required or not. They also asked that riding raikes into and out of a coal mine become compulsory when the slopes are steep or of great distances. Rescue service corps with rescue apparatus in case of accident in coal mines were also discussed with the Government. A Board of Conciliation to inquire into the North Atlantic Coal Mining dispute sat at Port Morien and took evidence.

CONDITION OF LOCAL INDUSTRIES.

Agriculture was quiet.

Fishing.—Drift ice has so far prevented fishermen from doing anything on the Cape Breton coast.

Lumbering.—Large amounts of pit timber were cut and placed on the railway sidings for transportation.

All other industries were quiet.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet. All the other trades were active. There was an abundant supply of unskilled labour.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Work, in general throughout this district in February was brisk, especially around the collieries. The output and shipments from the mines show a marked increase over the corresponding month of 1910. Other industries, not ruled by weather conditions, have been in general well employed. Coal shipments from the coal mines in this town and district for the month of February, 1911, were about 47,000 tons.

The town of Westville has installed a new pump at the town water works. The other pump is kept in readiness as an emergency pump.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farming was quiet owing to weather conditions.

Lumbering.—This industry has been very brisk. In addition to the log cut there has been a large supply of pit timber delivered at the collieries.

Manufacturing.—The several industries were generally well employed.

Mining.—The market for coal is very good at present with favourable outlook for a continuance of same.

CONDITION OF PARTICULAR TRADES.

The building trade is at present in its preparatory stage, making ready for work as soon as weather permits it. It is expected that work in the building line will be very brisk in this district during the summer. The other skilled trades were active.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Work, particularly in the building trades, remained dull during March. There were few permits issued, and they did not aggregate much in value. Work on street cleaning and sewer building was practically at a standstill owing to the weather. Nothing substantial has yet developed in regard to the erection of larger buildings, although it is rumoured that there will be some large bank structures and extensions undertaken in the near future. The erection of a new naval college and barracks on the Admiralty grounds should cause a stir in the now very quiet building trades. Work along the water front has been fairly brisk, owing to the arrival of large numbers of immigrants. In March, 1909, some 4,806 landed; in March, 1910, 11,675; but March, this year, promises to exceed the latter figures. Not only are there large numbers, but the classes are probably better, as regards financial standing and other desirable qualities.

By the returns published in the Provincial Secretary's report for Nova Scotia (recently brought down in the Provincial Legislature) it is shown that 102 companies were incorporated during the year ending September 30, 1910, as against 138 during the previous year. During the same period the number of companies registered was 744, as against 649 in the previous year. There were four additional farmers' fruit, produce and warehouse associations formed during the year, viz.: Hillside Packing Company, Limited, capital, $2,000, head office, Bear River, Annapolis county; Port Williams Fruit Company, Limited, capital, $10,000, head office, Port Williams Station, Kings county; Round Hill Fruit Company, Limited, capital, $6,000, head office, Round Hill, Annapolis county; Maple Leaf Fruit Company, Limited, capital, $8,000, head office, Canning, Kings county.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Local fishermen made but small catches during the month. There is much demand for fish, owing partly to the Lenten season, but the articles has been scarce and prices were well maintained.

Manufacturing.—Manufacturing was fair. Some seventy men were laid off at the Acadia Sugar Refinery for a few days, owing to lack of raw material; they resumed work March 20.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plumbers, stone cutters and builders' labourers were dull. Electrical workers were fair. Blacksmiths, horseshoers, ship caulkers and boilermakers were dull. Woodworkers were fair. Car builders and finishers were employed above the average. Printers, pressmen and bookbinders were busy. Tailors were generally active. Boot and shoe workers, barbers, hotel employés and laundry workers had a fair month. Freight handlers were busy. Maintenance-of-way employés were fair. Longshoremen had a good month. Unskilled labour was dull.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

At this season of the year with the prospect that spring work will be opening shortly, it might not be out of place to make a forecast for the coming summer. Building operations promise to be very brisk, and as soon as the weather permits, a large number of new buildings will be started which will furnish more work than the local market for labour can supply. An opera house, a new twelve-roomed school building, and a new hotel, all brick structures, will be started in April or May and a large number of new residences will also be built. During the past month

the Crawshaw Furniture Company started operations. This industry will for the summer employ about twenty hands, but look for an increase before many months. The Canadian Car Company added two new shops to their extensive plant. A dry kiln was also erected and in this industry everything points to a busy summer. It may be safely said that the summer of 1911 will be the busiest in this town since the industrial depression of 1907.

At Springhill the strike continues. The town has been placed under a police commission.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This industry is of course quiet at the present season. Farmers are complaining of the want of a sufficient market for hay, which is the staple crop in this vicinity. A large quantity of last year's crop has not yet been marketed. The price is, as a natural result, low. Other farm products high and a good local market.

Fishing.—No fishing has been done during the past month, but active preparations are being made for the lobster season which opens on April 15.

Lumbering.—The past month has witnessed operations of the most active character. The cut has been the heaviest for years. Parrsboro and Pugwash, the two main shipping points, expect to export over 40,000,000, from each port this year.

Manufacturing.—All the manufacturing industries are exceptionally busy at this time. The pay rolls were never larger than in March and the outlook for the summer is good.

Mining.—The strike at Springhill still curtails the output of the collieries of that town but in the other coal mining centers the output is well up to the average.

CONDITION OF PARTICULAR TRADES.

Climatic conditions have prevented bricklayers, masons and stonecutters from being at work, but if April is a favourable month all these trades will be well employed. Painters and paper hangers have been very busy. Carpenters and joiners have been well employed. Iron moulders have been well employed. Iron workers and helpers have had steady work. Machinists and engineers have been busy. Boilermakers are well employed, and electrical workers have been active. Woodworkers have been busy, upholsterers only fairly well employed. Car builders have been exceptionally busy, with pattern makers very busy. Printers and pressmen very busy. A limited number of printers could find employment here. Clothiers are busy and garment makers well employed. Boot and shoe makers were steadily employed. Bakers and confectioners report work brisk. Trunk and bagmakers were very busy. Barbers are steadily employed. Clerks and stenographers were busy. Unskilled labour has been well employed.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market during March showed the usual improvement over that of February, although the supply was still in excess of the demand. There was little change to be noted in out-door work. In Charlottetown, the remodelling of the new Royal Bank of Canada, and the fitting up of the new offices for the Marine Department were among the principal contracts of the month. The breaking up of the roads in the latter part of the month interfered to some extent with the general business, but the volume of trade, on the whole, was fully equal to that during March 1910.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The usual work of tending cattle, hauling mussel mud, fitting up fence rails was carried on during the month and there was no noteworthy

feature in the agricultural labour situation.

Fishing.—With the approach of spring there was the usual activity among the lobster fishermen, getting their traps ready for the opening of the season.

In the local legislature, which was in session all this month, a resolution was carried unanimously, asking parliament to suspend until next season the operation of the regulations requiring the enlargement of the spaces between the laths, and the size of the net meshes in the heads of the lobster traps.

Manufacturing.—Conditions in this line were unchanged, the supply of, and the demand for, labour being well balanced.

Railroad construction and employment.—Conditions were unchanged from those of February. Routine work was carried on as usual. Operations on a limited scale were carried on in connection with the building of the Elmira branch.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners were active. Lathers and plasterers had a dull month. Painters, decorators, paper hangers, plumbers, gas and steam fitters and stone cutters were active. Builders' labourers had a dull month. Iron moulders, workers and helpers, machinists and engineers, steam engineers, electrical workers, linemen and sheet metal workers were active. Woodworkers, carriage and waggon makers and car builders were active. Printers, pressmen and bookbinders were active. Journeymen tailors, garment workers and boot and shoe workers, bakers, confectioners and tobacco workers were active. Tanners and curriers had a dull month; saddlers were active. Clerks and stenographers, railroad conductors, locomotive engineers, firemen, railroad telegraphers, trainmen, switchmen and trackmen were active. Freight handlers and longshoremen, except at Georgetown, the winter port, had a dull month. Steamboatmen, except those on the winter boats, had a dull month. Teamsters and expressmen were fairly active. The supply of unskilled labour in its various departments was considerably in excess of the demand.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions remained quiet and unchanged from those of February during the first three weeks of March, but brightened materially during the last week. Building operations are still limited and civic labour light, but all local manufacturing concerns are active. The Moncton Cooperage branch of the Acadia Sugar Refinery employ forty men, with a fortnightly pay roll of about $650.00, and will handle over 5,000 cords of wood. The J. A. Marvin Company, Limited, biscuit factory will install $8,000 of new machinery this season and have a staff of fifty operatives which will be increased. This firm pays weekly and reports outlook good and business expanding. Excavation for the gas mains was commenced on the nineteenth instant by the Moncton Tramways, Electricity and Gas Company, and the initial work of installing the natural gas in the city begun. Work upon the projected street railway was started on the twenty-second instant and as soon as the ground is free of frost a very large force of men will be employed. In pursuance with the agreement made between the City of Moncton and the above Company, May 11, 1910, the lighting plants of the city passed from municipal control to the representatives of the Company. On March 16, the large gypsum mill and plant of the Albert Manufacturing Company, at Hillsboro, was entirely destroyed by fire, total loss $112,000.00. The mill had been closed for repairs for some weeks, and was to resume operations the morning of the disaster. About 100 men are thrown out of employment. The citizens of Hillsboro offer 20 years tax exemption as an inducement for the Company to rebuild. Customs returns for the month of February show material increases in both value and duty, as compared with February, 1910. The Board of Management of the Intercolonial Railway

have granted an increase of twenty per cent. to men employed in yards and ten per cent, to trainmen in the freight service out on the road, dating from January 1.

On February 26, the operatives of the Dominion Textile cotton factory went on a schedule of fifty-eight hours per week instead of sixty hours as before. The hours are now from 6.30 A.M. to 12 a.m. and from 1 p.m. to 6.06 p.m. Monday to Friday, and 6.30 a.m. to 11.30 a.m. on Saturday; about 240 hands are affected.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The thirty-fifth annual session of the Farmers' and Dairymen's Association was held at Fredericton, February 28 to March 3 and was was well attended. The dairy school at Sussex opened March 20, with courses in creamery and home dairy butter-making, cheese making and lectures upon care of dairy animals, etc. Farmers in sugar sections are busy in the manufacture of maple candy, syrup and sugar.

Fishing.—Quietness prevailed.

Lumbering.—Favourable weather for hauling throughout March greatly facilitated the getting out of logs, and the season's cut in some sections will exceed that of last winter.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners were quiet. Painters, decorators and paperhangers were active, with a good demand for experienced workers. Plumbers were quiet; also stone cutters and builders' labourers. Iron moulders, iron workers and helpers were steady, and machinists, engineers, electrical workers, stove mounters, boiler makers, blacksmiths and horseshoers busy. Woodworkers, upholsterers, carmen and coopers (barrel factory employés) were active. Printers, pressmen, bookbinders and photographers active. Journeymen tailors and garment workers were busy and in good demand. Milliners and milliners' apprentices were active. Butchers and bakers were active, and leather workers busy. Clerks and stenographers were busy, and the demand was fair. Hotel and restaurant employés were fairly active; theatre employés were active and laundry workers busy. The large influx of immigrants at the Ports of Halifax and St. John, for the west, and the heavy movement of freight created a large demand for railway crews and good time has been made by the men. Switchmen and trackmen were very busy. Freight handlers were active, also teamsters and expressmen. The demand for unskilled labour has so far been limited, but, with the commencement of street railway construction and of the gas installation, the call will be good.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market during March showed an improvement over February, and as spring approaches will apparently grow more active. The Wilson Box Company, Limited, has started operations at Fairville. The plant and lumber yards cover eight acres, while the box mill itself has 42,000 square feet of floor space.

For the two weeks ending March 20, the city cashier paid out $9,915.21 in salaries, and $8,143.45 in wages, making a total of $18,058.66. Bank clearings for the four weeks ending March 23 were $5,569,388, and for the corresponding period last year, $5,423,693, being $145,695 greater in 1911 than in 1910, and $6,327,162 less than for the five weeks ending February 23 of the current year. The deposits in the Dominion Savings Bank for the month of February were $46,032.93, and the withdrawals, $49,199.05. Inland revenue receipts for the month of February show a decrease of $1,428.60 as compared with February last.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—D. Fraser & Sons, Limited, have purchased all of the property of James Murchie's Sons Company, in Madawaska county and at Lake Temiscouata. The sale includes 70,000 acres of timber land at Lake Temiscouata and on the Madawaska river, the mill and mill property at Edmundston, with two miles of piers and booms along the Madawaska river the store and twelve dwelling houses at Edmundston. J. S. Gregory, of St. John, has purchased the standing timber on Martin Dolan's property at Golden Grove, and is having part of the timber cut and hauled to Rothesay. In the spring it will be brought down to St. John to be sawed. The Thomas Nagle Lumber Company has been absorbed by the Maritime Lumber Company, Limited. Thomas Nagle will be the general manager of the new company. The Babbitt estate mill at St. Mary's commenced sawing early in March, and will manufacture about three million feet this season. The York and Sunbury Milling Company's mill at Gibson, will commence sawing about the first of April and will manufacture between four and five million feet this year.

CONDITION OF PARTICULAR TRADES.

The building trades and shingle weavers were dull; other skilled trades were active, with unskilled labour quiet.

DISTRICT NOTES.

Fredericton.—The Farmers and Dairymen's Association convention opened here on March 1.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market has been very quiet, in fact the dullest for a long time. The weather during the winter was so fine the lumbermen got through with their operations earlier than usual. Consequently the men were thrown out of work and there will not be any other work yet for about a month. By that time the lumber drives will be on the move and a number of men will be employed getting the mills ready for the summer. There will also be considerable work repairing steamboats and ferry boats for the opening of navigation. The Baptist church has been completed and was reopened on March 17.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is no work at present; nearly all the farmers have their winter manure out, and many were engaged storing ice.

Fishing is now over for a while. Shad will be the next run; the season begins about the first of May. The catch for the winter was hardly up to last season's.

Lumbering.—The teams and most of the men are out now. The winter was very fine and the cut is up to the average.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners were quiet. Machinists and engineers were fairly busy preparing the saw mills, getting them ready for sawing about the last of April, also getting the steamboats ready; carriage makers were busy.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and *P. J. Jobin, correspondents,* reported as follows:—

GENERAL CONDITION OF LABOUR.

The month has been a quiet one, fine and cold in the early part and with heavy snowstorms in the latter half. Weather conditions had a very pronounced effect on watercourses, resulting in lack of hydraulic power, the consequence being that a number of men and electric cars were laid off for some time. The cotton mills were only working half time owing to these conditions, and in the outside district several pulp

mills were only able to produce one half of their normal output. Outdoor building operations had not commenced, but steamboatmen were actively employed painting and refitting generally for their next season's work. The closing of the Provincial Legislature on March 24 lessened activity among hotel and restaurant employés and carters.

The thirteenth annual convention of the Canadian Institute of Mines was held at Chateau Frontenac on March 1, the chairman being Dr. Adams, President. After the various reports had been read and approved, the election of officers proceeded and resulted as follows:—

President.—Dr. Adams, Montreal, re-elected.

Vice-Presidents.—Dr. A. C. Barlow, Montreal; Mr. T. Cantley, New Glasgow.

Council (ten vacancies).—Dr. J. K. Bancroft, Montreal; Mr. R. W. Brock, Ottawa; Mr. A. A. Cole, Cobalt; Mr. E. T. Corkill, Toronto; Mr. Theo. Denis, Quebec; Mr. John Donnelly, Kingston; Mr. T. Dulieux, Montreal; F. W. Gray, Glace Bay; Mr. G. E. Silverter, Copper Cliff, Ont.; Mr. J. B. Tyrell, Toronto.

Several interesting papers and reports were presented during the sittings of the convention, which came to a close on March 3.

An incipient strike occurred in the John Ritchie Company, Limited, shoe factory when twenty-five shoe machine workers quit work on Friday, March 17, because a foreman had done some work of an absent employé. The men returned to work on March 20, Monday, only being out one day. The city council has awarded the contract for the new bridge over the St. Charles River to Messrs. François Lemoine and Sons of Montreal. The new bridge will be of the bascule design, 150 feet in length, and the price is $150,000. Good progress has been made during the month upon the new theatre on St. Joseph street, St. Roch.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Some camps were abandoned for the season, but conditions are such that lumbering generally was as good during March as in midwinter.

Manufacturing.—In the shoe manufacturing industry there was a perceptible falling off in the output, winter orders being filled, and the customary slack between seasons being already felt.

CONDITION OF PARTICULAR TRADES.

Carpenters and joiners, lathers and plasterers were active; painters, and plumbers were busy, but the other building trades were dull. From busy to active conditions prevailed in the metal and printing trades. Garment workers were active, boot and shoe workers were generally busy, but journeymen tailors were dull. Cigar makers and tobacco workers were dull. Tanners and curriers reported active conditions. Laundry workers were active, delivery employés, hotel and restaurant employés were quiet, and furriers were dull. Railway employés were active; steamboatmen were quiet and ship labourers and longshoremen were dull. The supply of unskilled labour was in excess of the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

For the season of the year labour has been in good demand. Machine shops and all inside industries have been well employed, running full time. The demand for labour when the season opens up will be good. In addition to the extension of the street railway system, which was uncompleted last fall when the bad weather set in, there will be many contracts let which will call for labour. This is especially so in the building line. Among the contracts let already are: New head offices for the Quebec Central Railway Company; a new monastery for the Redemptorist fathers, to cost at least $86,000; additions to St. Charles Seminary, to cost about $70,000; a new busi-

ness block in East Sherbrooke; a new and additional school by the Protestant Board, in the South Ward. Besides this, many private residences have been contracted for. The contractors for the new dam for the power plant on the Magog river for the city will start operations just as soon as weather conditions permit. When the above are under way, and when the work ahead of the various other industries is taken into consideration, there will be no lack of work in Sherbrooke during the coming season.

Retail business was somewhat quiet during the month, owing to the fact that the weather was very stormy. The Lenten season is always expected to be quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Work was quiet.

Lumbering.—Operations closed about the middle of the month, but many men were kept on to look after the spring drives. Reports from various centres go to show that the season was a good one.

Manufacturing. — All manufacturing concerns are running full time.

Mining.—Operations, especially in the Quebec Central district, will start on the first of April. Several of the asbestos properties, which were practically closed down during the winter, will start again, which means employment to a large number of men. In the copper mines at Eustis, where the weather conditions do not affect the workmen, they have been running to full capacity.

CONDITION OF PARTICULAR TRADES.

The building trade was practically at a standstill. Paperhangers and plumbers were busy. Moulders were active only in one of the large shops, owing to the fact that they were ahead of the machine shops. In the latter, night gangs were running to catch up with the work. Blacksmiths and jewellery workers were busy. The woodworking trade was busy getting out orders to be ready when the building season opens up. Carriage and waggon workers were busy. The printing trade was busy. Journeymen tailors and garment workers were active. Bakers and confectioners were busy; butchers were quiet; ice cutters active; cigar makers busy. Miscellaneous trades were active. Railway employés in this section were busy. Street railway employés, cabmen, hackmen and expressmen were active. Unskilled labour was in fairly good demand, for the season.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market has been quiet, but there was a decided improvement over February. The building trades have improved considerably. Work on the City Hall has been pushed with vigour. Contractor has now some sixty men employed on the new buildings of the Wyagamack Pulp and Paper Company, and will more than double that number next month. Merchants and shippers report trade normal for the time of the year. Business activity showed a remarkable improvement over February, both in wholesale and retail trade. Rates of wages and hours of labour remain the same, and harmony exists between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Quietness prevailed in this industry, but farmers are already preparing for the maple sugar season.

Fishing.—Local fishermen had a quiet month.

Lumbering.—Fine weather and enough snow helped the lumbermen a great deal in making logs, and it is hoped that there will be enough water in the rivers to float them all down.

Manufacturing.—All the factories were steadily employed, and report business improving.

Railway construction and employment.—Railway construction has been quiet in this district, but regular employment has been good.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have had but little work, but carpenters and joiners were fairly busy. Painters and paperhangers were quiet, with plumbers busy. Builders' labourers were rather quiet. Iron moulders were busy, and iron workers had plenty of work. Machinists were well employed, with electrical workers and blacksmiths busy. Woodworkers and upholsterers were fairly busy. Carriage and waggon makers and pattern makers were active. Printers and pressmen were well employed. Journeymen tailors were active, with garment makers very busy, and boot and shoe workers well employed. Bakers and confectioners were well employed. Butchers and meat cutters were rather quiet. Ice cutters and drivers have had a busy time, the ice crop being extra good and thick. Cigar makers and tobacco workers were also well employed. Barbers were active. Clerks, stenographers and delivery employés were fairly busy. Furriers were dull. Hotel, restaurant and theatre employés were farly active, and laundry workers were very busy. Railway transport was fairly active during the month. Cab drivers, hackmen and carters have had a fair month. For unskilled labour, work was rather scarce part of the month, but will certainly improve in April.

DISTRICT NOTES.

Shawinigan Falls.—The contractors are rushing the construction of piers for a bridge to be stretched over the St. Maurice river, a little above the falls.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There has been a change for the better in the labour market since last month. There was a demand for help, especially in the machine shops. On account of the opening of navigation within a month, there was much activity displayed in overhauling the fleet which has been wintering in this port, in order to have it ready in time, and over 1,500 workmen of all classes have been engaged at it. No building permits have been issued yet. Nothing in that line can be done before May, however, on account of weather conditions, so that masons and carpenters are out of work for the present. Business has slackened a little from seasonable causes. A number of families are leaving for Montreal, where the boys and girls may find work, so that many houses will remain empty on May first. There is some talk of an underwear factory being established here which will give employment to about one hundred people.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have completed their winter work, and were getting ready for the collection of maple sap for the manufacture of syrup and sugar. The local meat market was not very active. There was plenty of fish, and it sold cheap: haddock 5 cents a pound, instead of 8, and salmon 8 cents, instead of 15; and it was the same with other fish. The price of eggs has fallen, in three weeks, from 40 cents to 25 and 28 cents for fresh eggs, and limed eggs sold for 20 and 22 cents. Butter has also come down 3 to 5 cents per pound. Veal sold for $1 and $1.50 a quarter. Pork and beef were also cheaper. As a whole, the cost of living is today from ten to twelve per cent. cheaper than it was last fall and during January and February.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the outdoor trades during March was an active one, but the local supply was more than sufficient to meet the demand. Boot and shoe factories were quiet. The iron industry had a good month. There was much activity in the leather industry. Sash and door

factories were busy, working with full staffs. Organ builders were very active. A number of painters and joiners are being employed on paint and wood work at the cathedral. Wholesale and retail business was very good. Banks reported collections easy.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The agricultural situation was very prosperous. Fruit and vegetables sold readily. The demand for men to press hay was very satisfactory, but supply was not wanting.

CONDILION OF PARTICULAR TRADES.

Carpenters, painters and plumbers had a rather quiet month. Stone cutters and builders' labourers had a fair month. The metal and engineering trades were very active. Blacksmiths and horseshoers had a good month. Woodworkers were very busy. The printing trades had a good month. Garment workers were fairly well employed. Work was quiet in the boot and shoe factories. Bakers, confectioners and butchers had a very good month. Tanners and curriers were active Barbers were quiet. Clerks, stenographers and delivery employés had a fair month. Railway men were busy. Hackmen and carters were quiet. Unskilled labour was fairly well employed.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market was active during March in St. Johns and throughout the district. A large number of summer houses were being built on the banks of the Richelieu river. Sash and door factories had a very active winter season, running with full staffs. The Standard Drain Pipe Company, outside of its local business during the year 1910, shipped 1,000 carloads of its product, which was a record, and a still larger output is anticipated for the present year. The Trenton and Dominion Potteries have had the best year in the history of these firms, and now the plants have been enlarged, a number of hands have been hired so as to increase the output. Six hundred hands now find steady employment in the Singer machine factory where there were only 300 in January, 1910. The Molleur hat factory, the Corticelli silk plant, as well as the agricultural implement factory and the various machine shops and foundries have been running full time, with full staffs. Wholesale and retail business was good for the season. Banks reported a satisfactory month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Good roads have made it easy for farmers to haul their products to market. Prices were high and steady.

Railway construction.—Work on the railway bridge between St. Johns and Iberville has been completed. Good progress was made in the demolition of the temporary bridge, employing a number of men.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners were very active. Lathers and plasterers had a quiet month. Painters and decorators, plumbers and steamfitters, stone-cutters and builders' labourers were very busy. Iron moulders and workers and helpers, coremakers, machinists, engineers and steam engineers were well employed. Electrical workers and linemen were rather quiet. Ship carpenters, caulkers, tinsmiths, tool sharpeners, horseshoers and jewellers had a good month. Woodworkers, upholsterers, polishers and varnishers, woodcarvers, carriage and waggon makers reported a good month. The printing trades were well employed. Journeymen tailors, garment workers, hatters, glove makers and boot and shoe workers were rather quiet. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers had a good month. Tanners and curriers were well employed. Barbers, clerks, stenographers, delivery

employés, furriers, hotel and restaurant employés and laundry workers were fairly well employed. Railway conductors, engineers, firemen, telegraph operators, trainmen, switchmen, trackmen and freight handlers were active. Cab drivers, hackmen, carters and draymen, teamsters, expressmen and unskilled labour were well employed.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

March was no better than February for the building and other outdoor trades. The other trades had a fair month. Business was fair, and collections satisfactory. Preparations were being made for a busy summer in building operations. Contractors were getting ready to begin operations at an early date, and large contracts have already been awarded. The City will also carry on considerable work this year, so that all classes of workmen anticipate a good season, and the indications are that work will commence earlier than last year.

CONDITION OF PARTICULAR TRADES.

Painters were in demand. Bricklayers were fairly active, but masons were quiet. Lathers and plasterers were fair. Plumbers and gas and steam fitters had a good month. Builders' labourers were quiet. All the metal trades were active, blacksmiths, tinsmiths and horseshoers being in demand. Carriage and waggon makers and car builders were very active. The printing trades had a very good month, pressmen and bookbinders being in demand. Journeymen tailors and custom garment workers were in demand. The food trades were very busy, bakers being in demand. The leather trades had a good month. Barbers were much in demand, as well as delivery clerks. The transport trades were busy, with the exception of ship labourers, longshoremen and unskilled labourers.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audette, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The activity which was expected to prevail at the beginning of the month was delayed by the cold weather. The building trades only had work on the larger contracts, which had to be completed for the first of May. In many places there were complaints of lack of lumber for flooring. Carpenters and joiners, however, had a fair month, and a busy summer is anticipated in the building trades. Eighty-six permits were issued during the month, for new buildings valued at $572,740, and fifty-four for repairs valued at $69,688, being an increase over March, 1910, of thirty-three permits, and $368,398 in the estimated value. Bank clearings during February amounted to $162,165,125, as against $145,685,050 and $120,115,223 during February 1910 and 1909, respectively, being an increase of nearly $17,000,000 over 1910. Custom duties on imports received in Montreal during the month of February show a slight decrease as compared with the same month last year, the figures being $1,387,240 and $1,397,947 respectively.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The sale of farm products during the month was large.

Manufacturing was generally active.

Railway construction was quiet.

CONDITION OF PARTICULAR TRADES.

With the exception of stone cutters, who were quiet, the building trades were fairly well employed. The metal trades were generally active, linemen, shipwrights, caulkers and bicycle workers, however, being quiet. The woodworking, printing, clothing, food and tobacco preparation, leather, miscellaneous and transport trades, as well as unskilled labour, were active.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq Mars, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions during March have been very active, except at the mills at the Chaudiere Falls, where they ran short of water. Special activity was reported for fresh water boatmen, owing to the extensive repairs and other works done to the boats of the Ottawa Forwarding Company before the opening of navigation. Snow shovellers have had good employment, as last month has been just as severe for snow as any of the preceding months.

A large number of men have left to work on the drives. The lumbermen are expecting a flood, so they are getting all the hands they can hire, in order to save the logs left last year on the lakes and rivers.

The demand for all classes of labour is better this spring than ever before. Preparations are being made for an active season in the building trades. The City Council has a new loan amounting to $93,500 to be spent in civic works. Retail trade was fairly active during March. Collections are reported better than usual. No change is reported in the wages of the men employed in the lumber mills.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The demand for men in the building trades during March showed a marked improvement over the three previous months. The winter on the whole was less active in building operations than last season. Construction permits issued in February 1911 totalled $64,500, as against $97,200 in 1910. The civic corporation, at the end of March, was employing 500 hands under the city engineer, a much larger staff than usual. Work in the pulp and sulphite mills of J. R. Booth was hampered by low water, and some men were thrown idle. As far as possible special jobs were found for men laid off through closing the mills. Sixty carters were taken on by the city to rush the spring scavenging. Merchants reported brisk trade and future outlook for buying, good. The total customs collections in February were $105,340, as against $89,267 the corresponding month of last year. The Ottawa bank clearings reached $14,000,000, a gain of $400,000 over the previous February. The first four weeks of March showed a gain of $1,000,000. The civic publicity bureau reported a new wholesale grocery firm ready to start business in Ottawa. A "Greater Ottawa Association" was formed to further promote the city's commercial interests.

An extensive change in the civic salary list was made, increasing the income of almost every employé. Some 500 labourers are advanced from $1.80 to $1.98 per 9 hour day. This staff will grow to 1,000 in the summer. An increase of $50 per year was given to eighty members of the fire department. Sixty carters were raised from $2.50 to $2.70 per day for man, horse and cart. The following changes providing increases ranging from $50 to $450 per year were made:—

	Old.	New.
City Clerk, minimum	$1,600	$2,000
Assistant City Clerk	$ 800–1,600	$1,200–1,800
2 First class clerks	800	950–1,200
2 Second class clerks	400– 800	750– 900
Third class clerk	400– 700	500– 800
Accountant	1,300–1,500	1,600–1,800
City Collector	1,600	1,800–2,300
Assistant Collector	1,500	1,600
6 Senior bookkeepers		900–1,250
Junior bookkeeper		650– 900
2 Bailiffs		600– 900
Assessment Commissioner	1,600–2,000	1,800–2,300
Assistant Commissioner	1,000–1,500	1,200–1,600
Chief Assessor	1,000–1,500	1,200–1,600
Senior Clerk (Assessment)	500– 800	600– 900
2 Second class clerks (Assmt)	400– 600	500– 700
Assistant City Engineer	1,500–2,000	1,800–2,400
Drain Inspector	1,400	1,500
City Auditor	1,200–2,000	1,800–2,300
Building Inspector	800–1,200	1,200–1,500
Charity Officer	1,200	1,300
Superintendent Fire Alarms	1,550	1,700
Chief Fire Brigade	1,700	2,000
Deputy Police Magistrate	750	1,200

The Allied Trades and Labour Association took exception to the statement in the publicity bureau folder to the

effect that workingmen's houses could be had as low as $7 per month. The advertising committee of the Greater Ottawa Association proposes to advertise $11 as the minimum. The strike declared by the plumbers on the Grand Trunk Hotel on February 1 was still in progress. Of the twelve men who quit work, six found other employment. All the strikers have been replaced by the contractor. Eleven stage hands went on strike at the Russell Theatre on March 6, because the management refused to increase their wages. Most of the strikers are members of the local union which claims a scale of $11 to $16 per week. The theatre management found substitutes for the strikers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Dairy produce was plentiful. Tub butter sold at the end of March at 23 cents per pound, and new laid eggs at 25 cents per dozen. Farmers were killing hogs in considerable numbers and $8 per cwt. was an average price in Ottawa. The season was favourable for outdoor work such as ice packing and manure spreading.

Lumbering.—An expert estimated the Ottawa valley log cut a little below last year or less than 500,000,000 feet. There will be enough for steady operation of the saw mills. Camps closed early owing to deep snow. The drive and navigation on the upper Ottawa waters are likely to be delayed. The quotations for middle grades of pine and spruce in Ottawa were $2 higher than a year ago.

Manufacturing.—The Continental Bag and Paper Company, of Ottawa, which has a new factory on Bridge Street, was kept back by delay in delivery of machinery, but was ready to start at the end of the month. The capacity is 3,000,000 bags a day. The manager says the prospect of selling is very bright.

CONDITION OF PARTICULAR TRADES.

Several plumbers who had left Ottawa early in the winter to get work returned in March and found employment. Demand improved for carpenters, painters and bricklayers. The situation was quiet for builders' labourers. Electrical workers found an average quantity of employment. Machine shops had many orders for repair work in mills, etc. Work was active on new barges which will be used on the Ottawa to carry lumber the coming summer. Woodworking trades were busier than the previous month. Car builders and printing trades were busy. Girls for sewing factories were in demand. Ice cutters finished a satisfactory season. Railway hands were well occupied. Shantymen returned home a little earlier than usual, increasing the number of unemployed among the unskilled classes. Trained nurses were too few to meet the demand, owing to a typhoid epidemic.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Activity characterized nearly all branches of the labour market in Kingston during the month of March. Opportunities for employment were more numerous than during the preceding month, and the corresponding month last year. Although marine operations will start rather late, activity characterizes every department, and the various companies are making extensive preparations for a good season. The Kingston Dry Dock and Shipbuilding Company has begun the construction of the new vessel for the Montreal division of the Department of Marine. The vessel will cost in the neigh bourhood of $125,000, and is to be delivered this season. All the other shipbuilding, and marine companies are very active. Appointments to positions on the various boats have been made, and all are patiently waiting for the opening of navigation. The Nicol metallurgy building for Queen's University is to be erected. Contracts for the work have been awarded, and amount to $45,000. When completed and equipped the total cost will reach $55,000. The wing portion for laboratory purposes is to be ready by September 1,

and the main portion to be ready for occupation January 1, 1912.

Extensive improvements have been commenced along the line of the Kingston and Pembroke railway. The Company will ballast and ditch about 12 miles of track, also build 10 miles of new fencing, paint and repair all stations and buildings along the line, repair and renew about thirty-five small bridges and culverts. In addition the Company will put in six or seven thirty-inch and thirty-six inch concrete pipe culverts, erect three small girders, and two six-foot concrete arch culverts, and four rail top culverts. The Company will also install a pillar crane for handling coal at Renfrew. A by-law for $40,000 was passed by the rate payers for the purpose of building a new public school.

CONDITION OF LOCAL INDUSTRIES.

Farmers, fishermen, lumbermen, manufacturers, miners, railroad construction, and various miscellaneous industries reported an active month.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering, shipbuilding, woodworking and furnishing trades reported an active month. Printers, tailors, bakers, butchers, ice cutters, tanners, barbers, broom makers, delivery employés, furriers, hotel, restaurant, laundry and theatre employés, together with all branches of the transport business report an active month. On account of stock-taking in the bonded warehouses cigar makers were quiet. Unskilled labour was busy. Two new restaurants and Turkish bath rooms were opened during the month.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Conditions during March compared favourably with February, and were better than in the corresponding month of last year. The cordage works were again in operation, having been shut down for some months, and about seventy-five men are employed at the plant. At present only the cordage and rope departments are in operation, and the employés are working overtime. The street railway company will extend its line south to Byesville this summer; it will also erect a new car barn at once, to cost $10,000, and inaugurate the pay-as-you-enter system on its cars. The Canadian General Electric Company has been awarded the contract for the plant for the new power station to be erected this summer for the Winnipeg Electric Railway Company. The city firemen have been successful in getting an increase in their salaries: First year men, from $500 to $525; second year men, from $550 to $575; and third year men from $575 to $600. The increase will go into effect on April 1. The city also appointed two more policemen at $500 per year. The market tolls were awarded to Jos. Girven for $915.00.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy preparing for spring. There is a great demand for farm labourers in this section.

Lumbering.—Lumbering was active. The men have had a good winter's work. The cut will be equal to that of last year. The mills are getting ready to start for the season.

Manufacturing.—The manufacturing establishments were very busy, some working overtime. Sylvester's foundry at Lindsay has started operations again after being shut down for some time. About one hundred men are employed.

Railroad construction.—Railway construction was active on the Canadian Northern Railway, at Port Hope, and on the Canadian Pacific Railway grain route at Lindsay.

CONDITION OF PARTICULAR TRADES.

The building trades were rather quiet, but the outlook is good. Iron moulders, iron workers, core makers and machinists

were active. Electric workers and line men were busy. Metal polishers, buffers and brass workers were active. Blacksmiths were very busy. Boilermakers and horseshoers were active. Woodworkers had a good month. Printers and allied trades were busy. Journeymen tailors and garment workers were active. Bakers and confectioners were busy. Butchers and meat cutters were active. Leather workers were busy. Broom makers were active. Railway and street railway employés were busy. Teamsters and expressmen had a good month. Unskilled labour was fairly well employed.

DISTRICT NOTES.

Cobourg.—The building industry will be very active in Cobourg the coming summer; a large number of contracts have already been let.

Omemee.—A new town hall is to be built by Mr. J. C. Eaton and will be presented by him to the village.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Conditions during March were improved as compared with February, and both skilled and unskilled workers were generally well employed. There was a large influx of immigrants, so that the supply of labour in some lines is in excess of the demand. The building trades were active, the weather during the greater part of the month being favourable. Building permits representing an approximate value of $969,000 were issued in February, as compared with permits representing the value of $860,440 in February, 1910. At a board meeting of the House of Industry, held on the twenty-first, the report showed a total of 1,382 families receiving assistance, 312 casuals sheltered, and inmates to the number of 179. The receipts of the Street Railway Company for February were $307,774, as compared with $277,601 for February, 1910.

Dr. Helen MacMurchy, in an official report to the Ontario Government on infant mortality in the Province, states that 125 children in every 1,000 die before reaching the age of one year, as compared with 109 per 1,000 in England, and 79 per 1,000 in New South Wales. The report says that infant mortality is heavy in Toronto on account of the unsanitary conditions prevailing in large areas. An act of the legislature has placed the management of the civic electric light, heat and power works in the hands of a Board, to be known as the Toronto Electric Commissioners, to consist of three members, including the Mayor, ex-officio, one member to be appointed by the City Council on the nomination of the Board of Control, and the third to be appointed by the Hydro-Electric Power Commission of Ontario. The members, other than the Mayor are to receive salaries not exceeding $4,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy preparing for spring work and farm labourers were much in demand. During the month a large number of stock sales were held and high prices obtained. Fall wheat and clover crops were damaged to some extent by cold and unsettled weather after the snow had disappeared, but towards the latter part of the month some improvement was noticeable as the result of heavy rains. Farmers were generally well supplied with feed for stock.

Manufacturing.—Active conditions prevailed in nearly all lines of the manufacturing industry, with orders coming in freely, and every prospect of a busy season. The Aluminum & Crown Stopper Company has begun the erection of a six-storey building of steel and reinforced concrete on the north-east corner of King and Parliament streets. Gunns Ltd. are erecting a refinery for cotton-seed oil on St. Clair Avenue, West Toronto, which will be the first refinery of its kind in Canada.

Railroad construction.—Work will immediately be proceeded with by the Canadian Pacific Railway on the double-tracking of the road from the Union station to Leaside Junction, and enlargements and improvements of the freight and passenger terminals at West Toronto, North Toronto, the Don and Cherry street. A freight car repair shop covering about half an acre is under construction in West Toronto.

CONDITION OF PARTICULAR TRADES.

The building trades were generally well employed so far as the unsettled weather permitted; plumbers and steam fitters were not as active as the other trades. The Amalgamated Carpenters and the Brotherhood of Carpenters have demanded an increase of wages to 40 cents per hour. The Brick, Tile and Terra Cotta Workers' Union has organized two locals. Iron and steel workers had a good month, work being more plentiful than in February. Electrical workers were fair. Brass workers, jewellers and silversmiths had steady employment. Furniture workers, cabinet makers, upholsterers and carriage workers were active. Piano workers were well employed. Printers, bookbinders, pressmen, stereotypers and lithographers had an active month. Custom tailors reported trade fair. Garment workers and boot and shoe workers had steady work. Costume workers were quiet. Whitewear workers were busy. On the twenty-fourth the Toronto Carpet Manufacturing Company locked out 114 carpet weavers, on account of their belonging to the Carpet Weavers' Association. The management called upon the employés to sign an agreement to the effect that they would not belong to any union and, on their refusal to do so, locked them out. The Company is advertising for weavers in England, offering to advance the fare. Harness and leather workers were active. Bakers, butchers, and the other provision trades had plenty of work. An agreement for three years was concluded on the sixth, between the Brewery Workers' Union and the Toronto Brewers' Association, adopting a new schedule of wages, which gives increases over the old rate, ranging from $1.25 to $1.50 per week, making their earnings from $12 to $16 per week, according to the nature of their work. The working week was fixed at fifty hours, a reduction of two and one-half hours. Cigar makers had a good month. Hotel and restaurant employés, barbers and laundry workers were fairly well employed. On the third the waiters in the restaurant and grill room of the King Edward Hotel, to the number of fifty-seven, went on strike against the reduction of wages from $30 to $25 per month, and on account of other grievances. Their places were filled in a few days. Railway and street railway employés, expressmen and teamsters were active. Unskilled labour was in better demand than in February but a number were out of work.

DISTRICT NOTES.

North Toronto.—The ratepayers have adopted a by-law for the issue of debentures to the amount of $265,000 for the construction of a sewerage system.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

March was a quieter month than was expected. This was largely due to the long continued cold and stormy weather. Out-of-door work of all sorts was stopped or seriously interrupted. There was little demand for labour of any class, and a good many men were idle. Spring weather will undoubtedly bring greatly improved conditions. Freight traffic on the east and west trunk lines was steadily increasing, and showed large margins over the same period of last year. The Grand Trunk and Wabash roads alone showed an increase for one week of 1,259 cars passing over the Niagara river at this point. Similar increases were recorded by the same roads at Bridgeburg and also by the Michigan

Central and Pere Marquette railways at both points. The Queen Victoria Niagara Falls Park commissioners received tenders for building five steel and concrete bridges, and a mile of permanent roadway on the Niagara boulevard system. It was announced that the Electrical Development Company would commence in April the installation of three additional sets of turbines and generators of 12,500 horsepower capacity each, in its power house. Appropriations were made for enlargements of city schools.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fruit-growers were pruning and spraying orchards and vineyards. Tobacco-growing will be carried on near Virgil, during the coming season, on a much larger scale than heretofore.

Manufacturing.—Manufacturing concerns continued active. The shredded wheat factory is to be enlarged. The corset factory advertised for girls. Other factories were running full time with full staffs.

Railroad construction and employment.—Three hundred labourers were employed in re-laying both tracks of the middle division of the Grand Trunk westward from this city, with new rails of 100 pounds to the yard. All railway men were busy.

CONDITION OF PARTICULAR TRADES.

With the exception of men employed in shops and planing mills, all the building trades were quiet. Metal-working concerns of all classes were busy and employment was consequently steady. Electrical workers were fairly active with linemen busy. Journeymen tailors, hat makers and employés of haberdashery factories were all busy. Cereal food manufactories were active, other food handling trades were quiet. The new leather tire goods factory employed twenty persons. Shop, office, hotel and restaurant employés were quiet. Railway employment of all classes, especially for train, engine, yard, switch and trackmen, was good. Electric lines were quieter. Teamsters were active. Unskilled labour was very quiet.

DISTRICT NOTES.

Welland.—A new company will operate the plant of the Robertson Machinery Company, lately assigned to creditors. The municipality secured from the Government a valuable water-power privilege for the benefit of the waterworks system. Some building contracts were let.

Bridgeburg.—The foundry plant was busy. Railway employment was good.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour generally was well employed during March. All mills, factories and works were running full time, with prospects good. The prevailing open weather has favoured outside building operations and there was, as a result, a marked increase of activity in these lines of trade. Present indications point to a good season's work. Business, retail and wholsale, was reported good, and compared favourably with the corresponding month of last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers were busy with their spring work, pruning, spraying and early spring seeding.

CONDITION OF PARTICULAR TRADES.

The building trades were more active than during the previous month. The metal and engineering trades were all active to busy. Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, and coopers were all active. The printing trades were busy. Journeymen tailors were active to busy. Boot and shoe workers were busy. Bakers and confectioners,

butchers and meat cutters, ice cutters and drivers, cigar makers and tobacco workers, barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés and laundry workers were active. All lines of transportation were active to busy. Unskilled labour was active, with the supply and demand about equal.

DISTRICT NOTES.

Pt. Dalhousie.—Labour was well employed. The Maple Leaf Rubber Company was advertising for additional hands.

Merritton.—All mills and factories were running full time, with conditions of employment good.

Thorold.—Activity prevailed in the labour market and business was good.

HAMILTON, ONT., AND DISTRICT.

Mr. William T. Cooper, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of labour during the month of March was, for the most part, active and compared favourably with conditions last month. Civic outside work has been carried out more extensively during the winter months than ever before. The average paid in wages per month during the past winter was $3,000, while other years it has been as low as $400. The present year promises to be a record one for general city construction work. Already 250 men are employed laying water mains, and on sewer work, and it is estimated that as many more will be employed within a few weeks. Miles of cement walks are to be laid. The Dominion Power and Traction Company will relay many of its tracks and extend its street car service. The Board of Education has called for tenders for a new twenty-room school, to be built in the eastern section of the city, at a cost of $100,000. It is estimated that the Oliver Chilled Plow Works will spend about $600,000 in erecting new buildings and installing new plant. The Diamond Flint Glass company will erect what will probably be the largest glass works in Canada here during the present year. The Sawyer-Massey Company is preparing plans for a large extension. The Canada Steel Goods Company will double the capacity of its plant. The International Harvester Company, the Canadian Westinghouse Company, the Chipman-Holton Company, and the Steel Company of Canada, are among other firms which will increase their plants this year.

Building permits have been issued for 160 houses since the first of the year. The value of building permits issued in February was $75,450, as compared with $37,650 for the corresponding month of last year. Tenders have been called for the new Public Library at an estimated cost of $100,000. The Wood-Gundy Company, of Toronto, have been appointed fiscal agents for Hamilton to place on the London market $533,800 of four per cent. twenty year debentures to be sold at 100½. The city's contract for asphalt has been awarded to O. G. Carscallen at $22.50 a ton; a saving of $2 a ton on last year's price. Keen competition is ascribed as the reason for the reduction. An expert will be engaged to make a report on the cost of a municipal street lighting, power and incandescent plant for Hamilton. Bank clearings for the four weeks ending March 4, 11, 18 and 25, as compared with those of the same weeks last year were:

1911.	1910.
$2,306,713	$2,133,794
1,267,698	1,781,540
1,886,781	2,065,957
1,912,360	1,542,796

Wholesale and retail merchants report having had a favourable month; wholesale shipments of goods for spring and summer trade have been heavy. A deputation of stone cutters waited on Mayor Lees and urged that the contract for the stone work of the new library building be given to a Hamilton firm, if possible, to ensure the stone being cut in Hamilton, and giving employment to a large number of men. The hospital governors are considering the idea of incorporating that institution, so that local nurses could secure a standing in

other hospitals to which they might go for a post-graduate course. The International Harvester Company has added the services of a trained nurse to its staff. Her services are available to all the Company's employés, and their families, in cases of sickness, accident or distress, free of cost. Judge Barron has concluded the hearing of twelve Grand Trunk Railway employés' cases here, some of which were complaints by the Company against the men, and some vice-versa. A new firm, the American Construction Company, will employ about fifty men. The assessment rolls for 1911 have been printed in book form and circulated throughout the city. The ratepayers, on the whole, are satisfied that the assessment has been more equalized than it ever has been before. The price of bread has advanced from 5 to 6 cents per loaf of 1½ lbs. There was no change in the situation concerning the moulders' strike of two years ago. The men, who are still out and unemployed, are drawing union strike pay.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in the district have been employed with regular routine work, and the trimming of apple orchards. Those engaged in making maple syrup reported a good run of sap during the month. The prices of farm produce remained steady. Inquiries were being made for farm help. The Milk Producers' Association has accepted the following offer of the Retail Dealers' Association. From May 1 till September 30: 16 cents per gallon; and from October 1 until April 30, 18 cents per gallon. Sixteen cents was the price paid previously throughout the year. The charge for washing cans has been withdrawn by the retailers, which will mean a considerable saving to the producers. The following advanced prices were being paid by some of the canning factories for this year's crops.

Tomatoes, 27½ cents; last year, 25 cents.
Raspberries, $1.80 per crate; last year, $1.68 per crate.
Strawberries, $1.00 per crate; last year, 96 cents per crate.

Manufacturing.—Two large Hamilton Companies have been incorporated, viz:—The Ellis Underwear Company, Limited., with an authorized capital of $200,000, and the Hamilton Lock & Hardware Manufacturing Company, Limited, with an authorized capital of $100,000. The International Harvester Company is working overtime and has increased its staff of employés from 1,800 to 2,000. Manufacturers of material used on railroad construction work have been very busy.

Railroad construction.—The Canadian Pacific Railway Company is asking for tenders for the construction of the Hamilton and Guelph Junction line, and it is now regarded as certain that the Company will begin the construction of this as soon as the season opens. Owing to a change in the Company's plans the Toronto Suburban Railway Company will not be extended to Hamilton this year as was expected.

CONDITION OF PARTICULAR TRADES.

The building trades have been well employed during the month, when weather conditions were favourable, but gas and steamfitters were rather slack. Moulders in the machinery line had a fair month, but stove moulders and mounters were quiet. Machinists, electrical workers, blacksmiths, wire workers, iron structural workers and workers on all kinds of farm implements were busy. Jewellers and silversmiths were fairly well employed. Woodworkers, carriage and waggon makers and pattern makers were busy. All branches of the printing trades were active. Journeymen tailors had a fair month, but garment makers and boot and shoe workers were quiet. Bakers and confectioners were well employed. Butchers were quiet. Barbers had a busy month. Clerks, theatre employés and laundry workers had an active month. Broom makers were fairly well employed. Railway employés were busy. Teamsters, expressmen and street railway men had steady work. Steamboat employés commenced their season's work. Unskilled labour found plenty to do, especially toward the end of the month, when outside work begun.

DISTRICT NOTES.

Dundas.—The Chapman Engine Company is rapidly getting its works into shape and has lately increased its staff of employés. All the local manufacturing firms were very busy and business prospects are exceedingly good.

Burlington.—Work has commenced at Burlington beach, on the retaining wall and park on the bay front. The wall will be about 1,700 feet long.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows.

GENERAL CONDITION OF LABOUR

Labour was well employed during March, it being a better month than February, and the corresponding month of last year. The iron trades were particularly busy, and in the building trades there was considerable work for carpenters, plasterers and painters.

The following increases in salary were granted to the members of the police force:—

First year men were raised from $1.70 to $1.85 per day; second year , $1.80 to $1.90 per day; third year, $1.90 to $2.05 per day; fourth and fifth years, $2.00 to $2.20 per day.

Class A men were advanced from $2.15 to $2.40 per day; sergeants, $2.50 to $2.75 per day. The salary of the Chief was raised from $1,675 to $1,800 per year. Fourteen men were affected by the increase.

The following increases in wages were granted to the members of the fire department.

First year men were raised from $1.70 to $1.85 per day; second year, $1.80 to $2.00 per day; third year, $1.90 to $2.15 per day; fourth year, $2.00 to $2.25 per day; assistant foremen, $2.25 to $2.50 per day; foremen, $2.50 to $2.75 per day.

The salary of the Chief was raised from $1.200 to $1,500 per year, 19 men were affected by the increase.

CONDITION OF LOCAL INDUSTRIES.

Agriculturists were becoming active.

Manufacturing.—Manufacturers were very busy, some working overtime.

Railroad construction and employment. Street railway construction work was carried on as weather conditions permitted. Considerable work will be completed this year.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were idle. Carpenters and joiners were well employed for March. Lathers, plasterers, painters, decorators and paperhangers were from active to busy. Plumbers, gas and steamfitters were active. Iron and brass moulders, coremakers, machinists and engineers were very busy. Electrical workers, stove mounters and sheet metal workers were active. Metal polishers, buffers and platers, blacksmiths and boilermakers were busy. Horseshoers were active. Woodworkers, carriage and waggon makers and pattern makers were busy. Coopers were active. Printing and allied trades were busy. Tailors, tailoresses and shoe workers were busy. Bakers and confectioners were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were busy. Barbers, clerks, delivery employés, hotel and restaurant employés had steady work. Laundry workers were busy. Railroad trackmen were active. Freight handlers were busy. Street railway employés worked steadily. Teamsters were active. Draymen were busy. Unskilled labour was well employed for this early season of the year.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of labour in March was not as favourable as in the corresponding month last year. Owing to the unfavourable weather very little work was done in the building trades, but the outlook for the coming season is good. Tenders for alterations to the Bank of Montreal to the amount of $17,000 have been let and work commenced thereon.

A large force of men have been employed at the Homewood Sanitarium, clearing away the burned debris and getting the grounds in shape for new build-

ings which will be erected this season at a cost of $150,000. Contracts have been let for a new shelter, to cost $20,000, by the Guelph Humane Society. Contracts have also been let for the new steel gate factory. The City Council is asking for tenders for a new Isolated Hospital. The light and heat commissioners presented their annual report to the City Council, which shows profits to the amount of $44,725.11 for the year. Manufacturers reported trade good; some were employing extra help to enable them to meet the demand for their goods. Wholesale and retail merchants report a fair month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The annual seed fair was held and proved a success. A large quantity of good clean seed was shown, and the demand for same was very brisk. The annual pure bred shorthorn bull sale proved very successful, both in numbers and prices paid.

Railway construction.—Railways showed considerable activity, work having been commenced on the Canadian Pacific Railway Company's extension of the Guelph Junction line to Hamilton, and the Grand Trunk Railway Company have commenced work on the retaining walls, made necessary by the raising of its tracks.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported a dull month; carpenters, lathers and plasterers were fair. Painters and paperhangers were busy. Plumbers, gas and steamfitters were quiet. Iron moulders, coremakers and helpers had a fair month. Tube mill workers were active, men for this class of work were in demand. Electrical workers and linemen were busy. Stove mounters and blacksmiths had a good month. Piano and organ makers and carriage makers had an active month. Printers and allied trades were fairly well employed. Journeymen tailors and garment workers reported a good month. Unskilled labour had a fair month, with the supply in excess of the demand.

DISTRICT NOTES.

Paris.—The factories and mills were busy.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of March was a busy one among factory employés, some of whom worked overtime. Activity in industrial establishments generally exceeded that of the corresponding month of 1910. General labour was well employed. There were thirteen building permits issued during the month valued at $47,150, all for residences. Bank clearings were larger than in the previous year. Wholesale and retail trade was very active. Four of the employés of the lighting plant made a demand for an increase of four cents an hour in their wages. The first one was receiving 20 cents per hour and was increased to 24 cents, the new scale of the second is now 25 cents instead of 22½ cents per hour and of the third 23 cents instead of 21 cents. The fourth was receiving 26 cents per hour and refused a new scale of 28 cents per hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have not been able to work on the land as yet, but have been engaged in marketing their produce. On Saturday, March 25, the following prices obtained for farm products and provisions:—

Eggs, 18 cents to 19 and 20 cents per dozen.
Butter, 23, 24 and 25 cents per pound.
Cheese, 16 cents per pound.
Lard, 17 cents per pound.
Pork sausage, 17 cents per pound.
Ham, 18 cents per pound.
Bacon, 20 cents per pound.
Beef, in quarters, 8½ and 10 cents, per pound.
Pork, in quarters, 10 and 12 cents per pound.
Limburger cheese, 25 cents per case.
Potatoes, 75 cents per bag.
Carrots, 25 cents per basket.
Beets, 25 cents per basket.
Parsnips, 25 cents per basket.
Turnips, 25 cents per two baskets.
Cabbage, 5 to 8 cents each.
Maple syrup, 40 cents per quart.
Hay, first class, $15 per ton.
Hay, medium, $14 per ton.
Wood, black ash, $5.50 to $7.00 per cord.

Lumbering.—This industry was active.
Railroad construction and employment. Quietness prevailed.

CONDITION OF PARTICULAR TRADES.

Stone cutters were active; painters were well employed towards the end of the month, and plumbers, gas and steamfitters were fairly busy; the other building trades were quiet. Active conditions were reported in the metal trades and the woodworking trades were all busy. Activity prevailed in the printing, clothing, food and tobacco preparation, leather, miscellaneous and transport trades. Unskilled labour was very quiet.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

With the opening up of the spring season, labour conditions showed a tendency toward change. There is some demand for skilled labour. Employers are not suffering for want of labour, but some of them say that there may be a more urgent demand later on. The scarcity of farm labour reported from other parts of the Province was not noticeable in this district. A few farmers were complaining, but generally speaking there has been, so far, little difficulty in securing all the labour needed. The reports from the various industrial establishments continued uniformly encouraging. The usual report was that the factory was busy, the trade as good as, or better than, a year ago, and the outlook even better. This applies to the furniture trade, the piano and organ trade, and the waggon trade. This is the slack season in the stove and furnace industry, but the Stewarts reported the prospects to be very good. The outlook for the building trades was not yet easily defined. The season will open late here, but the prospects are there will be about the usual amount of building. The Maximilian Pneumatic Tool Company, a new concern here, laid off most of its men—ten or a dozen skilled mechanics—on the 18th instant, and they are still off. The factory is operating only nominally, pending the settlement of some matters affecting the management. There were prospects of the establishment of a pickling factory here, a branch of a large American concern; but the chances are now that nothing will be done this season, owing partly to the lateness of the season and partly to the difficulty of securing a guarantee of sufficient vegetables of the kind required. The local tannery, which is making sole leather alone, at present, reported business good and prospects bright.

CONDITION OF PARTICULAR TRADES.

Painters, paper hangers and decorators reported employment fairly steady. Most of the iron workers were busy, and there was some demand for skilled mechanics. The Tobin Arms' Company would take on some good men. Woodworkers, especially those employed in the factories, were busy, as well as varnishers, polishers, upholsterers and wood carvers. Printers and pressmen were busy. Tailors and garment makers were busy. The employment was regular and there was little changing of hands. Butchers, bakers, confectioners and cigar makers were busy. Tanners reported business good, and the outlook excellent. There was practically no demand for unskilled labour; but on the other hand, there was almost no complaint of want of employment.

CONDITION OF PARTICULAR TRADES.

Conditions are poor in the building trades, and a large number of bricklayers, painters, plasterers, lathers &c., are idle. Iron moulders and iron workers are busy. and machinists, electrical workers and linemen are exceptionally busy. Metal polishers, brass workers, stove mounters and boiler makers are active. Wood workers and carriage and wagon workers are busy, and report large shipments to the west. Car builders are busy, having commenced summer hours on March 1st. Printers and pressmen are very busy, and good

job compositors are scarce. Overtime is being worked. Bookbinders are busy. Journeymen tailors were slack in the early part of the month, but business improved towards the end. Garment workers were slack, in some cases hands were laid off. Boot and shoe workers, bakers and confectioners are busy. Cigar makers report trade good. Tanners, curriers and broom makers are busy. Furriers are slack. Laundry workers and railroad train crews are very busy, but teamsters and carters were slack. Unskilled labour has had little to do, and a number are idle.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Favourable weather conditions made possible some outside work in the building trades, and, as a result, considerable work was done which would otherwise have been postponed until April. Wabash and Pere Marquette trainmen had a good month, but Michigan Central trainmen were not so busy, although regular crews made about full time. During the month reduction was made in the number of crews employed on the Michigan Central Railway to handle the winter traffic, and a number of men were laid off for the present.

The Official Inauguration of the Hydro-Electric power took place. The installation was decidedly successful. The city is exceptionally well-lighted, and every detail appears to have been considered before the final turning on the power. Prominent public men, including the Hon. Adam Beck were present on the opening night. It is generally conceded that the inauguration of Hydro-Electric power marks a new era in the industrial life of the city. Many homes are being wired, preparatory to the installation of the new system.

During the month the Southerland-Innis stave factory resumed operations, and indications point to a successful season. The supply of material is reported to be very satisfactory. $15,000 worth of material is now stored in the yards, and contracts are made for at least an additional $10,000 worth. In the neighbourhood of sixty men are now employed at high wages, and this number will be added to as the season advances. Work has been commenced on the new Roman Catholic Church and Parish Hall. A movement is on foot to procure $50,000 for the erection of a new Young Men's Christian Association building in this city. An energetic committee composed of prominent citizens has been appointed, and undoubtedly, the efforts of those interested will meet with generous response on the part of the citizens.

Just what to do with the city street railway is a live issue at the present time. It is felt that to put the road on a paying basis, considerable expenditure will have to be made on rolling stock, equipment and road bed, with additional extension. The road has been a money loser for years, and it is causing the ratepayers considerable concern. It is the only department controlled by the municipality that is not a money producer, and how to make it so is a problem which the city authorities are trying to solve.

The St. Thomas branch of the Trades' Congress is actively engaged considering questions affecting the wage earners, with a view to bettering their conditions. Friendly relations prevail in labour circles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — Weather conditions have prevented spring work commencing. However, very little frost is in the ground, and with a few warm days work can be gone on with without interruption. The markets have been well attended. The supply of maple syrup has not been as great as last year, and it is possible that the price will remain somewhat higher than usual.

Manufacturing.—Local industries report the month a good average.

CONDITION OF PARTICULAR TRADES.

The building trades were enabled to do considerable outside work during the month. The weather, however, was unsettled and work was interrupted. Blacksmiths, boilermakers and machinists engaged in railway shops and local industries were well employed. Tailors and garment workers were well employed. The conditions for unskilled labour showed an improvement over the previous month, although the supply continued greater than the demand.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions during March compared favourably with the corresponding month of 1910. All the factories and machine shops were very busy with plenty of orders ahead.

In the building trades business has been dull; some of the tradesmen have not worked since November, but the prospects are bright for the summer months. A number of men were installing the lights for the Niagara Power Company. The Canadian Pacific Railway Company survey gang began work along the south side of the Avon river, for entrance to the city. Wholesale and retail merchants reported trade active.

The customs returns for the month for the port of Stratford show a total receipt of $14,029.62, an increase of $2,000 over corresponding month of 1910. No change occurred in rates of wages or hours of labour this month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were engaged in the usual work of the season, and are looking out for farm help for the coming summer. Fresh arrivals from the old country prefer to stay in the city.

Market prices were:—

Butter 25 cents per lb.
Eggs, 16 cents a dozen.
Maple syrup, 40 cents a quart.
Wheat, 80 cents a bushel.
Oats, 32 cents a bushel.
Barley, 48 to 50 cents a bushel.
Peas, 65 to 70 cents a bushel.

Manufacturing.—All establishments were working full time with plenty of orders ahead.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were quiet; painters and paper hangers are fairly well employed; plumbers were busy. Iron moulders, workers and helpers were active; machinists, electrical workers and linemen were busy; blacksmiths, boilermakers and all factory workers had a busy month. Woodworkers, upholsterers and carriage and waggon makers did a good trade. Coopers were busy. The printers had a busy month. Journeymen tailors and factories were busy. Bakers, confectioners and butchers did a good trade. Cigarmakers were steadily employed. Harnessmakers were busy. Barbers, clerks and delivery employés were active. Hotel, restaurant and laundry workers were busy with a demand for girl help for hotels. Railroad conductors, engineers, firemen, trainmen, trackmen and freight handlers had a busy month. Cab drivers, draymen and teamsters were active. Unskilled labour was rather dull.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

General employment shows but little improvement over the previous month, and none over the corresponding month last year. Outside work has not yet commenced, and in the building trades there is very little work. Indoor work is more encouraging, and the factories and foundries are all busy, and large quantities of goods are being shipped

from this city to Western Canada. The railroads are exceptionally busy; during the month of February nearly 25,000 cars passed through the London yards of the Grand Trunk Railway Company. A large number of people are this spring leaving from this section for Western Canada, and the empty house problem continues to be a source of disquietude to property holders. The brickmakers are preparing their yards for the making of brick, and will soon employ their usual number of hands. The merchants of this city have arranged a "Trade-in-London Week" from April 3 to 8, when anyone residing within 65 miles of this city will receive a refund of their railroad fare upon showing that they have spent $20 with the merchants of the city. The city has placed in the estimates $40,000 for street repairs; $6,500 for sewers and $15,000 for street cleaning for the coming summer. A large number of the citizens are having their houses connected with hydro-electric power for domestic purposes; this is making a lot of extra work for electricians and linemen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural interests in this section are suffering through the withdrawal of farmers' sons and farm labourers to the Canadian West, leaving a scarcity of help here at all times, and causing the employment by the farmers of inexperienced help, fresh from the large cities. Farmers in this district are busy gathering and boiling maple syrup of which there is a good run. Syrup is selling at $1.25 per gallon. Butter maintains its high price, selling at 30 cents per pound retail, but eggs have dropped to 17 cents per dozen.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market showed considerable improvement over the preceding month. All branches of the building trades, with the exception of bricklayers and plasterers, who were practically idle, were well employed; especially carpenters who were very busy on outside work. Several of the large manufacturers are preparing to make large additions to their factories, the International Harvester Company, and Gananoque Spring & Axle Company having already commenced operations. The American Pad & Textile Company called for tenders for a large factory. This being a new company, will employ a large number of hands. Otherwise the permits have been for small amounts. In manufacturing, all branches were particularly active. The municipal board of works is preparing for a large amount of work. Labourers and painters were advertised for. Everything points to a busy season. No strikes were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the continued cold weather, farmers were unable to commence spring work. Rough roads were the cause of small attendance at the Wednesday and Saturday markets. Good farm hands are asking $30 and $35 per month, and board for six to nine months, owing largely to the large number of young men leaving for the North-west.

Railway construuction.—There was nothing done in railway construction.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, lathers and plasterers were practically idle during the whole month, but carpenters and joiners were busy. Printers, decorators and plumbers were active, and builders' labourers fairly busy. Machinists, engineers, electrical workers and linemen were busy, with metal polishers, buffers, plate and brass workers active, and blacksmiths, boilermakers and sheet metal workers quiet. Woodworkers, carriage and waggon makers were very busy. The printing and allied trades had steady work. Journeymen tailors and garment workers had a fair month. Bakers, but-

chers, cigar makers and tobacco workers reported trade good. Barbers, clerks, stenographers, hotel, restaurant and theatre employés and laundry workers report a very good month. Street railway men were kept busy. Cab drivers, carters, draymen and teamsters were very well employed. Unskilled labour was in demand.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during the month was very active, especially in the building trades. It is impossible to rent a house in Windsor at the present time, and dwelling houses are going up all over the city. During February, 1910, the total value of the new buildings projected was $5,200. For February, 1911, there were twenty-four permits issued for new buildings valued at $37,150. The buildings for which permits were issued during the month are residences of the smaller class. Although no large buildings have been started yet, contracts have been let for a large plant for the Maloney Electric Company, one for the Winkley Brass Company, a large building for the D. M. Ferry seed firm, and a large addition to the Penberthy Injector Company, and the prospects look good for a record year in the building trades. All manufactures were working full time. The planing mills and lumber yards were giving employment to more hands than they had any time last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy getting ready for their spring work.

Lumbering.—Retail lumber yards were very busy.

Manufacturing.—Manufactures were running full time.

CONDITION OF PARTICULAR TRADES.

Building was active, with several of the contractors advertising for men in all the trades. All those connected with the iron trades were well employed. Woodworkers and the furnishing trades were active. Printers and pressmen were busy. Journeymen tailors report trade fairly good. Garment workers were in demand. Bakers, butchers and tobacco workers were fully employed. Leather workers reported plenty of work, mostly repair. Barbers reported a good month. Clerks, hotel and laundry workers were busy. Transport employés on the whole were fairly well employed. Unskilled labour was well employed.

SAULT STE., MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The weather during March was rather cold for the season. As usual at this time of the year the supply of unskilled labour was in excess of the demand. This applied to the building trades, but machinists, moulders and other metal trades were very busy. Contracts for about five miles of cement sidewalks were awarded by the city. A large number of new sewers and numerous other improvements will be carried on during the coming summer. The outlook for the building trades is good, a very active season being anticipated. Marine men were busy at repairs on the different crafts. Retail trade was quiet, and general commercial activity fair.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Normal conditions prevailed.

Lumbering had finished for the season, there remaining only the driving of logs.

Manufacturing.—The Algoma Iron Works started a night crew. The Lake Superior Paper Company reported a good market for pulp. This company contemplates extensive additions to its plant in the near future. The Algoma Steel Company started operations with its coking plant and rail fastenings mill. The former will give employment to from

50 to 100 hands. Brisk conditions were also reported in other manufacturing establishments.

Railway construction.—Work on the extension of the Algoma Central Railway continued.

CONDITION OF PARTICULAR TRADES.

Painters were busy. Plumbers and gas and steam fitters had a fair month; the other building trades were quiet. The metal trades had a busy month, the other skilled trades reporting normal conditions.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour has not yet entered on active operations, and the month compares a little less favourably with the corresponding month of last year. There is every indication of steady work for this district during the coming months, but there are plenty of men in the twin cities to cope with everything in sight for some time to come. Commercial and business activity have been normal for this time of the year. There have been no changes in rates of wages. There has beeen no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers in the vicinity are back on their farms, the snow having gone sufficiently to make sleighing at the latter end of month impossible. During the early part of the month the farmers brought out many loads of ties, cord-wood and piles, besides bringing to the market of Fort William and to the stores of Port Arthur much farm produce, potatoes, butter and eggs.

Lumbering.—Men began coming into the cities at the end of the month from the lumber camps, and the rooms of the Sailors' Institute at Port Arthur were gladly taken advantage of by many of them. This Institute, which was opened for a few months last fall and was to be closed at the close of navigation had proved so helpful to men out of work and having nowhere to go that the local committee petitioned to have it kept open. The City Council in January granted $65 a month for three months towards the upkeep; the following table will show what has been done to help destitute men during these first three months of the year.

Free meals supplied to destitute men	225
Free beds supplied to destitute men	150
Writing materials supplied and letters written	134

An interesting feature of the report is that many men as soon as they secure work pay back their indebtedness for food and shelter to the Institute, although, of course, the help is given freely, but this indicates the independence and thankfulness of the men helped. Nearly two thousand five hundred visits have been paid to the institute during these months, where papers, books and games are provided.

CONDITION OF PARTICULAR TRADES.

No work has started in the building trades, so that the operatives have been quiet, some men having done very little since last November. There were indications of a stir in the middle of the month as a warm spell of weather set in, and the snow and ice to a great extent disappeared. Thunder Bay, as far in as the docks at Port Arthur, was clear of ice early in the month, and this continued for some two weeks, when the weather changed with a heavy snow storm for two days; the ice pack was blown back into the bay and winter conditions prevailed to the close of the month. At the close of the month the thermometer is around zero every night, only a few degrees above or below.

The metal, engineering and ship-building trades are all quiet. The steamer *Dunelin* is waiting in port for repairs at the new dry docks, Port Arthur. All other trades are quiet in the cities and will remain until the opening up of navigation. The printing and allied trades are following their regular course; no special work is on hand. The jour-

neymen tailoring trade is quiet; there are no other garment workers in the cities. At the beginning of the month the ice harvest was safely stored away, making a few men and teams busy for a couple of weeks. The butchers, bakers and other retail merchants have worked steadily. The transfer and transport trades have been quiet, some being laid off for a season. Hotel, restaurant and theatre employés have had their usual winter work as also have the laundry workers. Unskilled labour has not been wanted in the cities, except occasionally for clearing the streets, but many men have been sent from these cities to lumber, tie and railway construction camps.

The Port Arthur Trades and Labour Council and the City Council are in conference on the question of Labour Exchanges.

Navigation with Duluth opened on April 3, 1911, when the steamer *Easton* with the United States mail arrived at 4.45 p.m. The ice-breaker *James Whalen* broke the ice for her at the Booth Dock and secured her a safe berth.

DISTRICT NOTES.

The City Council of Port Arthur took up the matter of a market with the farmers of the district, and secured some information on why farmers sent away for goods. The desire for a market was unanimous, and plans are being prepared for a building of this character.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During March a large number of immigrants arrived in Winnipeg and amongst them a considerable proportion seeking employment. The demand for labour of all kinds is better than normal, but the number seeking employment is larger than usual. Contractors are of the opinion that they will not be able to get all the men they will require as soon as the weather permits them to get to work grading.

Trade, both wholesale and retail, is very good. Wholesale grocers and dry goods houses are especially busy. The amount of customs collection at the Port of Winnipeg for the fiscal year ending March 31, was $6,491,183, as compared with $4,972,128 a year ago. Monthly returns for the year just closed are as follows:—

April, 1910	$ 549,218
May	493,504
June	547,791
July	551,101
August	572,032
September	588,829
October	487,471
November	523,217
December	556,944
January, 1911	528,109
February	504,291
March	588,671
Total	$6,491,183

The gain is approximately thirty per cent. At the present moment the indications are that there will be a corresponding increase for the current year.

Bank clearings for the month of March show a gain over the corresponding month of last year of approximately thirty-five per cent., and for the first three months of the present year of eighteen per cent.

An important wage advance affecting approximately 550 men employed by the Winnipeg Electric Railway Company was announced on March 15. The notice intimating an advance of 2 cents per hour was posted in the Company's office, a copy of which is as follows:—

To all Motormen and Conductors:—
The management of the company have been for some time discussing with the directors the advisability of increasing the scale of wages paid to its motormen and conductors, and with a view of bringing the service to its highest possible efficiency, the directors have voluntarily decided to make an increase of two cents per hour all around, to take effect on April 1 next. The following will be the new schedule of wages:

Twenty-three cents per hour for the first six months.
Twenty-five cents per hour for the second six months.
Twenty-six cents per hour for the second year.
Twenty-eight and one-half cents per hour for the third year.
Twenty-nine cents per hour for over three years.

This increase will mean to the company an additional expense of approximately $50,000 per year, and in view of the above increase, unsolicited on the part of the men, the directors expect the hearty co-operation of its motormen and conductors in rendering to the public the most efficient and complete service possible.

(*Signed*) WILSON PHILLIPS,
Acting Manager.

Negotiations are pending between the Canadian Pacific Railway Company and the federated mechanical trades in their employ, for a new schedule.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During the month grain deliveries have been better as a result of improved roads. In isolated districts some work was done on the land during March, but as yet no seeding has been reported.

Building.—Building is very active. The permits for March numbered 270 for 328 buildings, valued at $1,007,400, compared with $2,543,150 for March of last year. The total for the first three months of the present year is now $1,639,600, as compared with $3,067,050 for the corresponding period of last year. A large number of dwelling houses are being erected.

The falling off in the value of the buildings projected as compared with the figures of last year cannot be taken to indicate any considerable decline in building activity. Several large buildings are to be erected and permits for them will be taken out during the present summer. One of the undertakings at present being considered by the Fire, Water and Light Committee will involve an expenditure of $1,000,000.

Railway construction.—During March several important announcements were made by the several railroad companies with roads at present in this country. The Canadian Pacific Railway Company, Canadian Northern Railway Company, and Grand Trunk Pacific Railway Company each have planned for the construction of 600 miles of new track, and each of the lines named are undertaking during the summer the building of many new depots.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The supply of labour has exceeded the demand during the month of March. This is of course usual at this time of the year, but opportunities for work have not been so good this year as last. A large gang of men were employed pulling down the ruins of the Asylum, in readiness for the new building. A few bricklayers and labourers have been employed during the month on the Canadian Northern Railway station, and carpenters are now preparing forms for the reinforced concrete work of the hotel part. The Brandon Construction Company has secured the contract for the reinforced concrete school to be erected in the East Ward. The City has decided to build the new fire station of reinforced concrete. The city engineer has prepared plans for the street railway, about nine miles in all, and the Council passed them at a special meeting. A by-law authorizing the raising of $300,000 by debentures for the street railway will be voted on shortly. The Council decided to pave about one mile of the streets in the business section. The School Board is asking the co-operation of the City and the Board of Trade in securing a Public Library for the City. The delegation from the City Council and the Board of Trade to Ottawa to interview the Government and the Grand Trunk Pacific Railway Company officials, in the endeavour to get a branch of the Grand Trunk Pacific Railway built to Brandon, have returned with promises that the road shall be built this year. The Manitoba Winter Fair was held here early in the month, and was one of the most successful fairs yet held. Business of every kind was good, and an exceptional year in the development of Brandon is expected. The Labour market was free from unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fine weather has enabled work to commence on the land, and soon plowing and seeding will be general.

Manufacturing.—The Hanbury Manufacturing Company and the McDiarmid & Clark sash and door factory are working full time, and a busy season is expected.

CONDITION OF PARTICULAR TRADES.

A few bricklayers were working, but the prospects are that work will be general in a few weeks. Carpenters and joiners, painters and decorators and stone-cutters were busy. Builders' labourers and iron moulders were dull. Machinists were busy. The allied printing trades were busy. Cigar makers were active. Railway transport was active. Unskilled labour was dull.

SASKATOON, SASK., AND DISTRICT.

Mr. A. B. Jones, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market has been much better than during the first two months of the year. The snow having disappeared earlier than was expected has given builders an opportunity to start work in good time, and, the weather remaining fine throughout the month, much more has been done than was done in the same months in previous years.

Factories and mills are again running full time, and look for a rush early this season. Transportation is heavy, many carloads of settlers coming in daily. It is estimated by good authority that one thousand additional families will settle in the city this season.

The building permits for the first twenty days of the month were $24,017, a little more than they were for the two months January and February. The bank clearings for the week ending March 22 were $916,722.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are very busy preparing for spring seeding. The land is in first class condition. The heavy snowfall during the winter has provided sufficient moisture to insure an early growth. It is expected that seeding in some localities will begin early in April.

Railway construction.—A large number of men and teams are being sent out on the Canadian Northern Railway line between Saskatoon and Calgary. The contractors expect to close up the remaining gaps early this season.

CONDITION OF PARTICULAR TRADES.

The building trades were considerably better employed than in the two previous months. Painters, decorators and paperhangers being the most active among the trades. Iron moulders, steam engineers, electrical workers and linemen were all well employed. Blacksmiths and sheet metal workers were very busy. The printing and allied trades were very busy. Journeymen tailors and garment workers were well employed. Bakers and confectioners, butchers and meat-cutters were well employed. Cigar makers were very slack. Barbers, clerks, stenographers, hotel, restaurant and theatre employés were well employed. Laundry workers were very busy. All railway employés were steadily employed. Teamsters and expressmen were busy. Unskilled labour was fairly well employed.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

With spring-like weather, and a fair programme of building construction, labour in all its branches has already found demands for its services. There was a marked improvement in comparison with the previous month, also of the corresponding period of last year. There was a substantial increase noticeable in the clearing house figures for the month of February, over the corresponding period of last year, as follows:—

February, 1910	$2,472,312
February, 1911	3,984,897

showing an increase of 1911 over 1910 to be $1,512,585. There was also a very substantial increase in February in building permits, which shows the rapidity with which the city is growing. Building permits issued February, 1910, were valued at $28,225; building permits issued Feb-

ruary, 1911, $66,475, showing an increase of $38,220. The following are some of the buildings already started or about to be commenced:—

The new Donahue business block, to be built of British capital, to cost $100,000; the addition, two stories, to the King's Hotel, to cost $35,000; the Canadian Bank of Commerce, to cost $150,000; a new armoury, to cost $50,000; the new Methodist College, to cost $500,000; the L. V. Kerr five-story business block, to cost $60,000; Cameron & Heap, wholesale grocers, a warehouse, $50,000; Haug Brothers & Nellermore Company, a new warehouse, $20,000; Toronto Type Foundry Company, new warehouse, $60,000.

The following are probable additions to Regina's industries: A flax grinding mill; a stove and furnace factory; a nail factory, costing $80,000; a manufactory of gas and gasoline engines.

In the building trades a slight change in hours and wages has been effected, as will be seen by the following, which was issued by the Regina Builders' Exchange. So far, no steps have been taken by the Building Trades Council in adopting the conditions of labour as set forth by the Builders' Exchange.

The Regina Builders' Exchange have amended the schedule of last year to meet the conditions of this year's business.

Comparing this schedule with the one of last year, it will be noticed that there are certain trades in which a slight alteration has been made, in each case in favour of the workman. An eight hour day on Saturday is a change from the nine hour day of last year.

The changes which take place by the new schedule are:—

Electrical workers: Journeymen, 35 cents to 45 cents per hour, as against 35 cents to 40 cents, last year.

Painters will this year get from 30 to 40 cents per hour, whereas last year they got from 30 to 35 cents.

Bricklayers, stonemasons and stonecutters have been increased to 65 cents per hour straight. Last year their wage was 60 cents.

THE NEW SCHEDULE.

The following is the schedule issued by the Builders' Exchange:—

At the regular meeting of the Regina Builders' Exchange held on Tuesday, March 7, 1911, the schedule of June 7, 1910, was amended: the same to take effect from this date and remain in operation until the 30th day of December, 1911.

HOURS OF LABOUR PER DAY.

Carpenters.—Ten hours, except Saturdays, which shall be eight.

Factory Hands.—Ten hours, except Saturdays, which shall be eight.

Plasters.—Nin e hours, except Saturday, which shall be eight. No overtime until after six p.m.

Electrical Workers.—Nine hours, to be worked between seven a.m., and six p.m., overtime to be paid only after six p.m.

Plumbers and steamfitters.—Nine hours, to be worked between seven a.m. and six p.m., overtime to be paid only after six p.m.

Painters.—Ten hours, with Saturday afternoon optional.

Bricklayers, stonemasons, stonecutters.—Nine hours, except Saturday, which shall be eight.

WAGES.

Carpenters.—Forty cents to 45 cents per hour.

Factory hands.—Thirty to 40 cents per hour.

Plasterers.—Sixty cents per hour.

Electrical workers.—Journeymen 35 cents to 45 cents per hour. Helpers, 20 cents to 25 cents per hour.

Plumbers and steamfitters.—Journeymen, 50 cents to 55 cents per hour. Improvers 30 cents to 45 cents per hour.

Painters.—Thirty cents to 40 cents per hour.

Bricklayers, stonemasons, stonecutters.—Sixty-five cents per hour.

Handy Men.—Twenty-five cents to 30 cents per hour.

Labourers.—Twenty cents to 25 cents per hour.

OVERTIME.

Overtime at the rate of time and one-half to midnight, double time after midnight, Sundays and Christmas Day.

This schedule governs all men who may be employed by members of the Exchange, whether such men belong to any trade organization or not, from this date, and that any existing agreement between master and employés will remain in effect until cancelled by one party or the other.

By Order,

BOARD OF DIRECTORS,
Regina Builders' Exchange.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—It will be but a short time before the farmers will be busy with the plow. Providing these favourable conditions continue, seeding this year will be very early.

Railway construction.—By the first week in April the first consignment of street railway material will have arrived, and a large gang set to work so as to enable 4 miles of track to be laid for street cars prior to the opening of the Dominion Exhibition, which starts the latter part of July.

CONDITION OF PARTICULAR TRADES.

The bricklayers and masons have had a very active month, though there has been one here and there idle, owing to the fact that insufficient material was obtainable. Carpenters and joiners were busy, also lathers and plasterers. Paint-

ers and paperhangers were active, as were plumbers. The demand for stone cutters was poor. Builders' labourers were very active. Electrical workers had a busy month, also blacksmiths. All branches of the printing trade report a good month, the demand at no time exceeding the supply. Journeymen tailors were active, also the garment workers. Bakers and confectioners were well employed. Butchers were busy. The cigar makers were active. Barbers were well employed, as were the clerks, stenographers, delivery employés, hotel and restaurant employés. Laundry workers were very busy. Freight handlers had a good month, also cab drivers, hackmen and draymen, whilst teamsters and expressmen were in demand. Unskilled labour was in demand.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market during the past month remained much the same as in the previous month. The building trades were still quiet, but many excavations were being carried on, and shortly it is expected there will be a great demand for all trades. Seven by-laws were passed authorizing an expenditure of nearly a million dollars. The Hudson's Bay Company will shortly commence to build a departmental store, at a cost of $1,500,000, which it is claimed will be the largest of its kind in the Dominion; it will be six stories high, and later ten, and have frontage of 250 feet, by 130 feet; will contain a roof garden, concert hall, café, grill rooms and bath rooms; and it it is expected to be completed by November 1 next. Wholesalers and retailers reported trade satisfactory, and much better than at the corresponding period of last year. A deputation of the Canadian Pacific Railway mechanical employés has gone to Winnipeg to negotiate for an increase in wages.

The various building trades which gave notice for new schedules, have not yet been settled, with the exception of the stone-cutters, who have been granted an increase of 2½ cents per hour, making 65 cents per hour, which will come into force on April 1. The electricians have been granted an increase of 5 cents, making 50 cents per hour.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators and builders' labourers had a quiet month. Iron moulders, iron workers and helpers, coremakers, machinists, engineers, blacksmiths, boilermakers, sheet metal workers and horseshoers reported trade satisfactory. Electrical workers and linemen reported a busy month. Woodworkers and upholsterers were fairly busy. Printing trades continued to be very busy. Tailors had a good month. Butchers and bakers were fairly well employed. Leather workers reported trade fair. Miscellaneous trades reported conditions improving. Transport employés on the whole had a good month. Unskilled labour greatly improved, but there were still some unemployed.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions during the month showed a marked improvement over the previous month, and compared favourably with the corresponding month of last year, especially in the building trades. Owing to lack of employment in railway construction camps, there was a large number of unskilled labourers unemployed. Weather conditions being favourable, a larger number of buildings have been started than in previous years and prospects are very bright for a good building season. There is a good demand for all classes of houses, and warehouse facilities and office accommodation must be provided. Real estate values have been steadily increasing for some

time. A contract has been let for a six-storey business block to cost $160,000; also a school building at a cost of $100,000. The Oliver school was opened during the month, and the new high school will be opened after the Easter holidays. It is the intention of the government to rush the work on the parliament buildings that they may be ready for occupancy next fall. Work is progressing favourably on the piers of the Canadian Pacific Railway bridge over the Saskatchewan river, and the contractors report they will have them completed before the ice goes out.

The following figures for the second month of 1911 appear to indicate that the previous predictions as to favourable business prospects for the year are being fully justified:—

	Feb., 1910	Feb., 1911	Increase
Customs' returns.....$	32,504 $	50,035	53%
Building permits.....	29,130	83,820	188%
Bank clearings.....	3,823,302	2,213,881	115%
Post Office (stamps only)	5,578	7,052	26%
Street Railway—			
Passengers carried..	219,562	329,149	48%
Revenue.....	9,277	13,709	48%

A garment factory was opened during the month, employing about sixty hands. There was no change in rates of wages or hours of labour. Wholesale trade was good, an exceptionally large amount of goods being shipped to the north and northwest. Implement dealers reported business active, they having shipped large quantities of goods during the sleighing season, to points that have no other transportation facilities. Retailers reported trade very good.

CONDITION OF LOCAL INDUSTRIES.

Railway construction and employment.—The contract for the 60 miles grading on the Canadian Northern Railway main line, west from Entwistle to Wolf Creek, has been let, and work will commence at once.

Contractors on the Grand Trunk Pacific Railway have shipped large quantities of supplies west, and a very busy season is anticipated.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet. Carpenters and joiners had a fair month. Lathers, plasterers, painters and plumbers reported an improvement in their trades during the latter part of the month. Stone-cutters and builders' labourers were very quiet. Iron moulders and coremakers were active. Electrical workers and linemen were quiet. Blacksmiths were active. Sheet metal workers were quiet. Printing and allied trades were active. Tailors and garment workers were busy. Employés in the food and tobacco trades had a very good month. The miscellaneous trades were active. Transportation employés were very active. The supply of unskilled labour was much greater than the demand.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

All through the month of March labour has not generally been well employed. There has been very little improvement over last month. The only exception was in the work the City is doing in laying down water mains, and on sewers. There was some demand for men to go on farms for seeding, but it was soon supplied. The supply is far in excess of the demand at present. There was more work on hand March, 1910. The coal trade is now slack, the miners working half-time. The bank clearings for the week ending March 23 were $478,782; on March 2, $462,031; on the ninth, $447,197; on the sixteenth, $530,667, a decrease of over $51,885 for the last week. There is apparently a great deal of unrest in labour circles, owing to new demands being made in wages, both in coal mining and building operations.

There were eighteen building permits issued in January, 1911, valued at $25,800; and in February, twenty-five permits, valued at $30,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The prospects for a good season were never better than at pre-

sent. The winter wheat is reported to be the best that has been seen in this part for this time of year. Many new settlers are coming in and the farming communities are busy. There is said to be more moisture in the soil this spring than has been known in the memory of the oldest settler.

Mining.—Coal mining was very slack, and as mining is next to farming in importance in this district, there is a general depression on that account.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been mostly idle during the month of March. Carpenters and joiners have been a little better employed than last month, owing to a number of small framed houses going up. Lathers and plasterers have been very little employed during the month. Painters were dull. Plumbers had fair employment. Stone-cutters were dull. Builders' labourers had a very poor month. Electrical workers were fairly well employed, and linemen well employed. Sheet metal workers were busy. Printers and pressmen were very busy. Bakers and butchers were busy. Laundry workers were very dull. Transport employés have been dull throughout the month. Teamsters were well employed. Unskilled labour had the best month of any class of workmen.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market throughout Kootenay district during the month of March has been quiet, the supply of labour being greater than the demand, both as regards mining and lumbering. The general outlook for spring and summer employment is excellent, excepting only for rumors of a pending strike of coal miners in the Crow's Nest Pass, which, should it occur, would be serious to a very large number of men throughout and outside of this district.

The building contractors of Nelson report that they have work under contract aggregating over $140,000, and that Nelson appears to be upon the eve of considerable building expansion. A new apartment block on Victoria street, at a cost of $60,000 is expected to be completed during the early summer.

A wholesale merchant and candy manufacturer has announced that he will open and operate a new jam factory in Nelson, and that he expects to have everything in readiness to receive the first consignment of strawberries next June, and to manufacture a large output of jam of all small fruit varieties during the rest of the summer.

The new concentrator for the Van-Roi mines, near Silverton, is now completed and in operation. The Molly Gibson silver-lead mine, on Kokanee Creek, has resumed shipments after a long shutdown. This mine is now the property of the Trail Smelter Company, which has extensively developed the property and rendered transportation of the ore easier and cheaper by the construction of a tramway.

The Kootenay Ice and Fuel Company has purchased the block at the Northeast corner of Baker and Ward streets, price $30,000. The Yale-Columbia sawmill at Nelson started operations on the fourteenth instant, with a force of fifty-two men. Several of the other mills throughout the district that shut down for the winter months, have started or are about to start operations, and report a fairly good out-look for sales in the prairie provinces.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Compared with the corresponding month of 1910, March presented a marked improvement. Indications were bright for an active month in all lines of trade. The splendid weather has given all outdoor work increased activity.

The sewer work and laying water-main extensions were being pushed rapidly and there was every indication of an exceptionally busy spring. Some idea may be obtained of the commercial expansion of this city and district by the following comparisons:—

In the month just closed no less than $6,512.03 was collected by the New Westminster Land Registry Office, being an increase of $1,466.61 over the corresponding month of last year. In the Customs Department, the receipts for the month totalled $26,265.23, as against $18,134.02 last February, or an increase of $8,131.21. A branch of the Bank of Vancouver was established in this city during the month. The Bank of Toronto has established a branch in the town of Aldergrove.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The season for spring salmon fishing opened March 1. So far, only a few licenses have been issued, there not being sufficient fish in the river to make it worth while.

Lumbering.—All the lumber mills in and around the city reported their quota of orders, and in one or two cases were putting in overtime for rush orders.

Railway construction.—The British Columbia Electric Railway Company has under construction a large wharf at the foot of Eighth street, with a view to accommodating vessels of large tonnage. The warehouse being built on the wharf will be 200 feet long, by 60 feet wide, and will have two landing slips to the river.

One of the busiest places on the Fraser river waterfront at present is at the new wharf at Port Mann. At this wharf, which is 500 feet long, is now being unloaded the *Strathallan*, loaded with 5,560 tons of steel rails, spikes and other accessories necessary for track laying. Her sister ship, the *Fitzpatrick*, has just completed unloading at the same wharf 5,557 tons of steel rails. The contractors of the present wharf are about to commence the construction of another 500 feet one on the west end of the present wharf.

Within a few weeks will be commenced the steel-laying for the Canadian Northern Railway Company's transcontinental line, from Port Mann eastward through the Fraser river valley. The contractors having the grading of the first 80-mile section, have the work well under way, and will have it about finished in two months' time.

In the Surrey municipality preliminary work has already started for the building of two dams, one across the Nicomekl and the other across the Serpentine rivers. The area affected comprises 14,000 acres. It is estimated that the work will cost in the neighbourhood of $150,000.

The British Canadian Lumber Company, capitalized at $20,000,000, is at present negotiating with the City for certain rights to enable it to establish a large-sized plant in New Westminster. In the event of a favourable conclusion of the negotiations, this Company will proceed to erect a first-class mill, which will employ from 400 to 500 men.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were fairly active, with carpenters, lathers and plasterers active. Plumbers, steam fitters and builders' labourers were fairly busy. Iron moulders and helpers were very quiet. Electrical workers, linemen, blacksmiths and sheet metal workers are active. Shipwrights and caulkers were quiet. Horseshoers, upholsterers, varnishers, and electric car builders were active. Printers, pressmen and bookbinders were active, and journeymen tailors busy. Bakers, butchers and cigar makers were busy, with barbers, clerks, stenographers and delivery employés fairly active. Laundry workers were exceptionally active. Railway employés were active, with steamboat employés fairly busy. Street railway employés, draymen and teamsters were very active. Unskilled labour was fairly active.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The city will spend $563,062.50 in the proposed new water supply from Sey-

mour Creek, and the installation of the new thirty-four-inch pipe. Tenders are called for steel pipe, and will be opened by May 1. Out of the above amount $99,418.75 will be spent on the work in Hastings Townsite, recently annexed to the city, providing a total in mileage of pipe in the district of 16·6 miles.

Regarding salmon fishing, fishermen are looking forward to heavy runs of salmon on the Fraser, Skeena and Naas rivers, and there will be a heavy coastwise traffic in cannery supplies northward, and the finished product southward. The steamer *Amur* carried a large shipment of tin plate for the Rivers Inlet canneries on her last voyage.

The bank clearings for the week ending March 23, amounted to $9,731,605. For the same period in 1910 they were, $8,571,250, and in 1909, $5,066,748. The clearings for Thursday (twenty-third) amounted to $1,579,850.

It was stated by Superintendent Busteed of the Canadian Pacific Railway Company to the civic Board of Works that the proposed subway near the waterfront, half way between Carroll street and Columbian avenue, would cost $225,000.

Contracts were awarded by the city for the paving of Woodland Drive $5,827 and Twelfth Avenue, $4,971. Also for bitulithic paving Seventh Avenue for $42,396.

Organized labour has established a Free Labour Bureau at Labour Hall.

Several hundred dwellings, a number of apartment houses and several large buildings, for which plans have been in preparation since January, valued at hundreds of thousands of dollars, will be erected in and around the city. Work was started on many of these structures towards the end of the month. General activity in the building trades is looked for during the coming season.

The British Columbia Electric Railway Company will operate thirty additional tram cars by May and twenty more by July 1.

Changes in Wages.

Occupations effected: Civic employés. Wages paid before increase:

Foremen, $100.00 a month; sub-foremen, 37½ cents an hour; powdermen, 34 cents an hour; labourers, 31½ cents an hour; inspectors, $3.50 a day; drivers, $2.30 a day.

The eight-hour day prevailing with Saturday afternoon half-holiday, or forty-four hours a week.

Wages paid after increase, to take effect April 1, 1911.

Foremen, $100.00 a month, unchaanged; sub-foremen, 37½ cents an hour, unchanged; powder men, 35 cents increased; labourers, 35 cents an hour, increased; inspectors, $3.75 a day, increased; drivers, $2.50 a day, increased.

The eight-hour day prevailing, with Saturday afternoon half-holiday, or forty-four hours a week.

About 1,000 men will be effected.

Condition of Local Industries.

Agriculture.—The end of the month found that spring ploughing had been started in the Delta and elsewhere in the Lower Mainland of British Columbia. In and around the city gardening was commenced.

Fishing.—Except for halibut, operations were limited during the first part of the month. Nearing the close of March the industry became more active, especially cod fishing.

Lumbering.—Indications are that the coming season's cut will be more than equal to that of last year. The demand for loggers was fairly active.

Railroad construction and employment.—Railway surveying was active, and the amount of mileage of new railroad under construction was the highest recorded.

Mining.—The local mining market continued depressed. The oil market showed no signs of improvement.

Condition of Particular Trades.

In the building trades, activity prevailed. Blacksmiths, machinists, horseshoers and caulkers reported state of trade quiet. All others report trade active. Woodworkers, upholsterers and shingle weavers report trade quiet. Newspaper compositors report a surplus of unemployed men. The job offices report trade quiet. Tailors report trade fair generally, and some shops report trade quiet. Cigar makers report trade very quiet, but bakers report trade good. Leather workers were quiet. In general transport activity prevailed.

Barbers report trade quiet, *i.e.*, there is a surplus of men, but the amount of work equals expectations. Other branches report state of trade fair. Among unskilled labour, quietness prevails. The bootblacks' organization, numbering thirty-three, report trade good.

DISTRICT NOTES.

Prince Rupert.—A strike is reported in progress among the labourers on railway construction. The building trades report that the season has not opened, but that the outlook is promising.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chrow, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

With the arrival of spring weather, there has been a marked improvement in the labour market over the previous month. Work in the building trades has improved considerably and there has been an increased demand for unskilled labour, owing to the large number of city improvements just started. The total number of building permits issued during February was ninety-five, as compared with eighty-eight for the same month a year ago. The aggregate value of the permits was $182,940, compared with $151,760 for the same month a year ago. The bank clearings for February amounted to $9,078,881, as compared with $6,404,570 for the corresponding month a year ago. The total inland revenue receipts amounted to $19,505 during February, as compared with $15,565 for the same period a year ago. The customs returns for February were as follows: Duties, $130,636; Chinese, $47,528; other duties $459; total, $178,623.

Wholesale and retail trade was reported in a very healthy condition, with indications of steady growth in the future. The real estate market was active, both business and residential property being in demand at rapidly increasing prices. Painters, paperhangers and decorators have obtained an advance in wages from $3.50 to $4.00 per day of eight hours, or $24 for a week of forty-eight hours.

Owing to the voters' list used at the last municipal election being illegally prepared, the Courts unseated the mayor, aldermen and school trustees elected in January, and a new election, on legally prepared lists will be held early in April. The decision of the Court has delayed for a few months some of the important civic works contemplated by the Council, but when the new Council takes office these will be carried out with the least possible delay.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have commenced sowing their crops and the indications are that there will be a considerably larger area under cultivation this year than previously, owing to an increased number of settlers having taken up land along the line of the island railway. The indications are that the growing of fruits will be conducted on a much larger scale than heretofore and the prospects for this branch of horticulture were never brighter.

Fishing.—The whaling season has commenced with every indication of a successful season. It is expected that six or seven whaling vessels will be operated along the British Columbia coast this season.

Lumbering.—The lumbering industry was reported in a healthy condition, all the mills being busy with local and export orders.

CONDITION OF PARTICULAR TRADES.

Conditions in a large majority of the building trades showed a marked improvement during the month, especially with regard to carpenters, bricklayers and painters. Carpenters and plumbers are negotiating for an increase of wages to take effect on May 1. Iron workers reported work as fair. The machinists' strike continued with no

change. Blacksmiths and horseshoers were steadily employed. Wood workers upholsterers and coopers reportedwork as normal. Printing and allied trades were busy, all men being employed. Tailors and garment workers reported work as brisk. Bakers and butchers were fully employed. Cigar makers reported work as fair. Unskilled labour was employed in increasing numbers, with plenty of help available.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market in this district shows a decided improvement over last month, and although there are a large number of unemployed men in the District a good deal of work has been started, employing a number of men. Work on the cement sidewalks has been started and on the sewerage sytsem, the latter being done by both day labour and contract.

The coal trade is still exceptionally active. The Local Company and the Ladysmith Collieries are sinking new shafts and drifts which, when completed, will about double their output. Carpenters are very active. Business men report trade as good with good signs ahead. The City will start and pay the city labourers $2.75 per day on April 1, being an increase of 25 cents per day.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy with their spring work.

Fishing.—Fishing is quiet.

Lumbering.—The saw mills of the district are very busy, and the logging camps are starting to work extensively.

Mining.—The coal mines of the district are working to their full capacity to meet the demand for coal which is steadily increasing.

Railroad construction.—Railroad construction is going on as fast as conditions will allow. Land clearing by the Canadian Pacific Railway Company is being steadily pushed. Land clearing for business and farming purposes is on the increase in the district.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons report work as active. Carpenters and joiners are very active as there seems to be more buildings going up than during last year, which was an exceptional year.

Lathers and plasterers are busy. Painters and paper hangers report work as good and improving as the weather gets better. Plumbers are active. Builders' labourers are active, but the supply exceeds the demand. Blacksmiths and carriage makers report work as fairly active. Printers are active. Cigar makers report work as fair. Teamsters and expressmen are very active. Unskilled labour has been better employed during the month than for some time past, but there are still a large number of men in the district looking for work.

BUILDING OPERATIONS IN CANADA DURING 1910.

A DETAILED statistical return is presented herewith relating to building operations in the leading industrial centres throughout Canada, during the calendar year 1910. The return is similar in general scope and form to those previously issued by the Department with reference to building operations in the years 1905, 1906, 1907, 1908 and 1909.

The article is intended to afford an index to the nature and extent of building activity during the period mentioned, and to throw light thereby, not only on the amount of employment rendered available to workingmen in the building trades and in the manufacture of building material, but on the general character of industrial development in Canada during the period covered.

The statistics were collected by the

Department during the months of January, February and March, information being sought of the number of permits issued in municipalities having a population of 5,000 and upwards and of the declared valuation of the buildings erected therein, the returns being further classified according as the work was in connection with new buildings or repairs. In municipalities in which no system of issuing permits is in use returns based on estimates prepared by local architects, building contractors, assessment commissioners or others in a position to furnish reliable information were secured.

The statistical information collected in this way is presented in full in the accompanying tabular statement, details being added where such were available for the preceding year. A description in detail is given below with reference to the more important features characterizing the operations of the year in the several localities.

General Result.

It will be seen that detailed information was obtained by the Department with reference to seventy-nine localities throughout the Dominion, being about the same in number as 1909 (eighty-two), owing to certain municipalities, given separately last year, having since been absorbed by the City of Montreal, an estimate of the total value of the buildings being obtained in each case.

The total value of the buildings erected in the above localities was $113,121,783. Of this total, Toronto, Ont., contributed $21,127,783, being, as in 1909, 1908, 1907 and 1906, the locality in which building was most active during the year. The city of Montreal, Que., with $15,815,859, stood second; the city of Winnipeg, Man., with $15,116,450, stood third; the city of Vancouver, B.C., with $13,150,365, stood fourth; the city of Calgary, Alta., with $5,589,594, stood fifth and the city of Ottawa, Ont., with $3,022,560 stood sixth.

The following statement shows the localities in Canada, other than above mentioned, where an expenditure of $500,000 or over in building operations took place:—

Localities.	Amount of Expenditure.
Saskatoon, Sask.	$2,817,771
Hamilton, Ont.	2,604,605
Regina, Sask.	2,416,288
Fort William, Ont.	2,381,125
Victoria, B.C.	2,373,045
Edmonton, Alta.	2,161,356
Maisonneuve, Que.	2,000,000
Westmount, Que.	1,974,670
Brandon, Man.	1,224,385
Lethbridge, Alta.	1,211,310
Moose Jaw, Sask.	1,116,690
Port Arthur, Ont.	1,062,616
Outremont, Que.	1,034,332
London, Ont.	805,074
Quebec, Que.	762,998
Brantford, Ont.	681,030
Niagara Falls, Ont.	672,200
Prince Albert, Sask.	662,475
Verdun, Que.	619,000
Prince Rupert, B.C.	610,590
Sherbrooke, Que.	555,000
St. John, N.B.	524,475
Peterborough, Ont.	517,958

Comparative returns relating to the value of buildings in 1910 and 1909 were obtained in the case of sixty-seven localities. These included all the larger centres. In these localities the total value of buildings erected in 1910 was $110,859,999, and in 1909, $76,979,007, an increase in the past year of over forty-four per cent.

The localities from which returns were received to the effect that the year was less active than in 1909, were, Westville, N.S.; Halifax, N.S.; Joggins' Mines, N. S.; Charlottetown, P.E.I.; Moncton, N. B.; Newcastle, N.B.; St. Andrews, N.B.; St. Hyacinthe, Que.; Lachine, Que.; Hull Que.; Kingston, Ont.; Galt, Ont.; Woodstock; London, Ont.; St. Thomas, Ont.; Chatham, Ont.; Windsor, Ont.; Innisfail, Alta.; Daysland, Alta.; Lethbridge, Alta.; and Nelson, B.C.

The following cities showed decreases of $500,000 and over in the amount of building operations during 1910:—

City.	Amount of Decrease.
Ottawa, Ont.	$1,504,940
Fernie, B.C.	1,049,700
Three Rivers, Que.	770,050
Fort William, Ont.	589,240
Total	$3,913,930

The following table shows the amount expended during 1910 in building operations according to Provinces:—

Nature and Extent of Building by Localities.

The following is a brief statement showing the nature and extent of building

operations in 1910, in the more important centres of population throughout Canada.

Nova Scotia.

Sydney.—One hundred and ninety-four permits were issued for new buildings and repairs, amounting in value to $347,550, compared with a total of $160,470 in 1909, and of $65,615 in 1908.

Sydney Mines.—Buildings to the approximate value of $150,000 were erected in 1910. The estimated value of buildings in 1909 was $65,000. No system of issuing permits is in practice and no account of repairs is kept.

Westville.—Building operations in Westville during 1910 totalled $10,000; in 1909 the total was $20,000.

Halifax.—Permits for new buildings, numbering 124, valued at $388,825, and for repairs, numbering 420, valued at $95,220, or a total value of $484,045, were issued, compared with a total of $630,380 in 1909, a reduction of 25.27 per cent. There were no important industrial premises erected during the year.

Amherst.—During 1910 the total value of building operations in Amherst amounted to $140,000, compared with $65,000 in the preceding year. No building permits are issued in Amherst.

Stellarton.—About $100,000 were expended in building in 1910.

New Glasgow.—Building operations amounted in value to $250,000 approximately.

River Hebert.—About $10,000 were expended in building in 1910; the same amount as in 1909.

Joggins' Mines.—There was a diminution from $60,000 in 1909 to $20,000 in 1910 in building returns.

[Prince Edward Island.

Charlottetown.—Building operations in Charlottetown during 1910 amounted in value to $55,000, as against $61,755 in 1909.

New Brunswick.

Moncton.—In Moncton proper fifty-eight permits for new buildings valued at $79,040 and eighteen permits for repairs, valued at $5,875 were issued. This comprises thirty new cottages and dwellings, one warehouse and twenty-seven shops, barns, outbuildings, etc. In the suburbs of Moncton about twelve dwelling houses, valued at $20,000 and twenty outbuildings, shops, etc., valued at $8,000 were constructed. The total amount, therefore, of building operations in Moncton and suburbs for 1910, was $112,915, compared with $239,610 in the previous year. The outlook for 1911 was pronounced better than for 1910.

Newcastle.—An estimate of the amount of building throughout this district in 1910 is as follows:—

Locality.	New Buildings.	Repairs.
Newcastle	$13,000	$8,000
Nelson	14,000	2,000
Millerton	3,800	1,600
North Esk	4,000	2,000
Blackville	4,500	2,000
Docktown	3,000	1,600
Total	$42,300	$20,300

Making a total expenditure of $62,600, as against $195,800, in 1909.

St. John.—The number and value of buildings erected in 1910 were as follows:

The permits issued for wooden buildings were:—

	Cost.
97 dwellings	$203,675
8 banks	3,900
3 garages	2,100
2 stores and offices	1,300
4 blacksmiths' shops	2,800
6 warehouses	38,100
3 factories	10,500
5 exhibition buildings	18,800
1 boat house	3,000
3 carriage houses	3,600
2 laundries	5,500
1 fire station	6,500
135	$299,775

For brick construction work the permits issued were:

4 dwellings	$20,200
12 stores	43,200
1 bank	8,000
1 blacksmith shop	7,000
1 telephone building	35,000
1 hotel	2,000
1 picture show	2,000
3 garages	14,900
2 schools	51,500
1 store	400
2 barns	40,500
29	$224,700
164 Totals	$524,475

The number of permits issued was twenty-eight in excess of 1909, and the cost of work done exceeded 1909 by $148,275. The inspector does not keep new work and repairs separate.

The following statement shows the number of permits issued and the value each year for ten years past:

1899–186 permits	$ 388,810
1900–105 permits	203,505
1901–101 permits	203,506
1902– 76 permits	184,155
1903– 72 permits	369,600
1904 (no record)	
1905–107 permits	220,300
1906– 99 permits	306,550
1907–104 permits	459,575
1908–101 permits	270,150
1909–136 permits	376,200
1910–164 permits	524,475
Total	$3,506,826

St. Andrews.—Thirty-seven permits for new buildings and repairs were issued in 1910, valued at $20,000, compared with $176,000 in 1909. It is expected that a large number of residences will be built in 1911.

Quebec.

Quebec.—One hundred and two permits for new buildings, valued at $715,293 and 118 for repairs, valued at $47,775, making a total of $762,998, were issued. The total value of building operations in 1909 was $711,519.

Sherbrooke.—Approximately $555,000 were expended on building in 1910, compared with $234,000 in 1909. There is no system of issuing permits.

Three Rivers.—The City issued forty permits during 1910 for new constructions, of which eight were for first-class, eleven for second, and twenty-one for third-class buildings, to the value of $207,000, and four permits for repairs valued at $3,300, or a total amount of $210,300. In 1909 the sum expended in building operations was $980,350, and in 1908 the sum was $581,900. The larger portion of the business section of Three Rivers was destroyed in the fire which took place on June 22, 1908. This, no doubt, accounts for the higher figures of the years 1908 and 1909 as compared with 1910.

St. Hyacinthe.—Thirty-nine new buildings to the value of $119,600 and repairs to the value of $50,000 were carried out in 1910, making a total expenditure of $169,000, compared with a total of $272,200. There is no system of issuing building permits.

Sorel.—New buildings costing $20,300 and repairs $6,800, amounting in all to $27,100, were completed in 1910.

Berthier and St. Ours.—Building operations approximating $8,200 were completed during 1910.

St. Johns.—Ten permits for new buildings valued at $137,700 and eleven permits for repairs valued at $26,870, making a total of $164,570 were issued in 1910. In 1909 the value of building operations was $65,215.

Montreal.—The following extract from the thirteenth annual report of the Montreal Builders' Exchange, under date of January 23, 1911, shows the marked activity in building operations which prevailed in that City and surrounding municipalities during 1910.

"In comparing the value of building operations during 1910 with the years immediately preceding, the figures at first sight look disproportionately large. In order to arrive at a just comparison it must be remembered that in the present year's figures issued by the Building Inspector's Department all the newly-annexed suburbs are included for the first time. The official values of building operations for Greater Montreal during 1910 were:—

City of Montreal (annexations included)	$15,815,859
City of Westmount	1,974,670
Outremont	1,034,332
Verdun	619,000
Maisonneuve	2,000,000
	$21,443,861

These figures really understate actual values, as building permits issued by the city proper only represent at the most sixty per cent. of real worth. The statistics for Greater Montreal issued by this Exchange for previous years (allowing full estimates for city permits) were:

1909.	1908.	1907.
$19,643,193	$12,562,390	$16,788,185

which places Montreal easily in the first place for the whole Dominion. It is satisfactory to the craft in Montreal to thus ascertain that while our percentage of increase may not be so spectacular as in the West, it is commensurate with the general development of the Dominion, and is solid and permanent in character.

But while recording the success of the banner year of 1910, your Directors take even more pleasure in predicting greater things for 1911. Much of the larger work barely commenced in 1910 has yet to be developed in 1911, such as the Dominion Express and Transportation Buildings, the new Art Gallery, the Queen's Hotel, the Canadian Pacific Railway Company's terminals, the Ogilvie, Young Men's Christian Association, Wilder, Blumenthal and Morgan Buildings, the Montreal Street Railway Shops at St. Laurent, &c. Of new work yet to be awarded, may be mentioned the new Herald Building, extension to Lamontagne Limited, Rea's East End

Branch Store; Post Offices in Westmount and St. Lamberts; the Ritz Hotel Company; new Princess Theatre on St. Catherine (present building to be altered for commercial block) ; new Canadian Northern Railway Company's Station; Shawinigan Power Station, &c., to state only a few. Of larger municipal projects now mooted, are:

1. A tunnel through the Mountain at Cote des Neiges Road.
2. A subway on St. James street to form the nucleus of Rapid Transit service.
3. Underground conduits for electric wiring.
4. The opening of a boulevard 125 feet wide, to run through the city from east to west.
5. The opening of a boulevard to run from St. Catherine Road to the Back river.
6. The inauguration of an annual National Exhibition.
7. The establishment of a Municipal lighting plant.
8. The use of tunnels to draw long distance traffic from the streets."

Lachine.—Sixty-nine permits for new buildings, valued at $179,890, and thirteen permits for repairs amounting to $2,845, were issued in 1910, making a total of $182,735, compared with a total of $263,565 for 1909.

Hull.—There was a total expenditure of $80,000 on building operations in the City of Hull during 1910, compared with an aggregate of $114,100 in 1909. There was also a very large expenditure on public works.

Ontario.

Ottawa.—The following table shows the number of building permits granted in each month of 1910, and the value of the buildings covered by the same:

BUILDING PERMITS ISSUED DURING 1910 AT OTTAWA.

For New Buildings.

Month.	Number.	Value.
January	25	$57,650
February	24	97,200
March	65	219,350
April	117	340,675
May	78	651,150
June	73	304,000
July	60	202,500
August	46	146,800
September	38	160,950
October	63	438,925
November	57	229,100
December	25	174,350
Total	671	$3,022,650

Compared with 1909, the year 1910 showed a falling off in the number of building permits issued in Ottawa, amounting in value to about $1,500,000. The total of 1909 was, however, abnormal, as it contained the figures for a new Grand Trunk hotel and station. Leaving the Grand Trunk Railway permits out the two years were about equal. Owing to the fact that the construction of the Grand Trunk Railway hotel and station went on actively during 1910, the season was an exceptionally busy one in the building trades. In order to keep pace with the demand for interior finishing in wood some of the sash and fine lumber factories worked extra time.

A majority of the buildings were of brick or brick veneer. There is no separate record kept in the city of repairs and additions, but the building inspector reports that almost every permit issued covers either a new building or an important addition. Among the costly business blocks started are those of A. Rosenthal & Sons; J. Hope & Sons; Blackburn Brothers; and Geo. Matthews Company. The year witnessed a move toward replacing small and cheap structures in the business centre of the city with tall, fire-proof buildings. A large brick paper bag factory was erected by the Continental Bag & Paper Company, and two new power houses were built at the Chaudiere. A $60,000 enlargement was made to the City Hall. The number of tenements and detached dwellings was very large.

Several farm properties were surveyed into building lots within a radius of 7 or 8 miles of the city. About seventy-five new houses were erected in the immediate vicinity of Ottawa in this territory representing an outlay of over $100,000. The early winter was very favourable to building operations.

The building inspector reported the class of structures for which permits issued in Ottawa in 1910 as follows: Solid brick or stone, $1,136,325; concrete, $370,650; brick veneer, $1,364,350; iron clad, $68,850; wood or frame, $82,475.

Cornwall.—During 1910 building operations in Cornwall approximated $49,850 in value, compared with $25,500 in the previous year.

Kingston.—The number of building permits granted during each month of 1910 and the value of the buildings

covered by the same are shown in the following table:

BUILDING PERMITS ISSUED DURING 1910 AT KINGSTON.

For New Buildings.

Month.	Number.	Value.
January	6	$ 1,975
February	5	4,050
March	30	14,850
April	82	48,188
May	55	19,535
June	44	11,545
July	46	35,818
August	62	18,778
September	76	17,576
October	80	23,317
November	50	23,965
December	9	495
Total	545	$220,092

The above statement includes the totals for new buildings, alterations and repairs, &c.

Peterborough.—Building activity in Peterborough is shown in the following table, which indicates the number of building permits issued and the value of the buildings covered by the same:

BUILDING PERMITS ISSUED DURING 1910 AT PETERBOROUGH.

For New Buildings.

Month.	Number.	Value.
January	3	$ 7,150
February		
March	13	10,327
April	43	121,201
May	37	124,845
June	31	145,470
July	22	30,725
August	17	23,865
September	21	21,865
October	24	14,700
November	11	8,570
December	9	9,240
Total	231	517,958

There is no record kept of repairs and no permit issued for less than $100. There has been, or are being built, two factories—the Canadian General Electric Company is building a large addition and the Quaker Oats Company has just completed a large warehouse and elevator. Two churches have also been completed; also the new Public Library. At Port Hope there has been considerable building, but there is no account kept by the town officials. The Ideal Company has put up an addition to its factory, and has also built a foundry. The outlook for this year is not so bright as last year, but it is a little early to speak as yet.

Niagara Falls, Ont.—The activity in the building trades which has prevailed for about five years, continued during 1910 and seems likely to be the ruling condition during 1911. During five years past, the estimated expenditures on new buildings and repairs were: 1906, $360,000; 1907, $460,000; 1908, $690,000; 1909, $500,000; 1910, $672,200. Thus, expenditure in 1910 exceeded that for 1909, but was somewhat less than in 1908. The features of the year's operations were the large number of good dwelling houses erected and the great expenditure of the Ontario Power Company in enlarging its power house. An approximate summary follows:—

Ontario Power Company, power house	$400,000
Bell Telephone Company, exchange	10,000
Business buildings, shops, &c	46,000
Factories	6,500
Municipal buildings	7,000
Hotel	4,000
Residences, dwellings	148,700
Repairs	25,000
Total in city limits	$647,200
Closely adjacent	25,000
Total	$672,200

Toronto.—The following is a copy of the official classified list of buildings erected in Toronto in 1910:

The total value of buildings for the year 1909 was $18,139,247.

The number of buildings for 1909 was 7,184.

The item "Stores and Offices" includes also the Bank buildings erected during the year. The reason given for this is that the Bank buildings are in most cases the large office buildings now being erected, and are occupied by many tenants beside the banks.

LIST OF BUILDINGS ERECTED IN TORONTO, 1910.

Permits.	Buildings.	Value.
3,535	Brick dwellings	$ 9,907,377.00
217	Brick dwellings.....Alt. & Add	370,480.00

1	House of Industry.....Alt. & Add	13,000.00
1	Fire Alarm Telegraph Building	17,000.00
3	Hydro-Electric Sub-Stations	98,000.00
8,499	Total	$21,127,783.00

St. Catharines.—One hundred and thirty-nine permits for new buildings valued at $216,500 and 123 permits for repairs were issued in St. Catharines during 1910, making a total expenditure of $263,000, as against a total for 1909 of $238,250. Included in the return for 1910 were three new buildings, additions to factories costing $45,000, and 78 new residences, almost all of the better class. The rest were sheds, barns, garages and two business places.

Hamilton.—The report of the building and plumbing inspector of Hamilton for the year ending October 31, 1910, showed that 918 permits were issued with a total value of $2,546,280, being an increase of $998,755 over that of 1909. The classification of the buildings is as follows:

Class of Buildings.	No. of Permits.	Value.
Alterations to dwellings	110	48,935
Brick dwellings	592	1,083,110
Frame dwellings	350	304,750
Hospitals	3	29,000
Police stations	2	37,000
Hotels	5	9,600
Factories and additions to same	64	645,725
Churches and schools	14	87,465
Registry office	1	39,000
Grand stand	1	13,000
Cement buildings	10	12,250
Stores and office buildings	56	152,495
Stables and other buildings	41	25,750
Warehouses	10	58,200
Total	1,259	$2,546,280

The number and value of permits per month were as follows:—

Year.	Month.	No.	Value.
1909	November	60	165,850
1909	December	31	69,300
1910	January	8	19,000
1910	February	9	37,650
1910	March	103	289,390
1910	April	142	382,175
1910	May	90	202,625
1910	June	108	301,885
1910	July	95	268,500
1910	August	76	230,100
1910	September	93	266,475
1910	October	103	318,330
	Total	918	$2,546,280

NUMBER OF NEW BUILDINGS PER WARD FOR YEAR ENDING OCTOBER 31, 1910.

	No.	Value.
Ward 1	202	330,900
" 2	33	122,750

" 7	58	230,950
Total	157	$349,460

The following is a detailed statement of factory buildings and additions constructed in Hamilton during the calendar year 1910 together with the value of same:

Buildings.	Value.
Brown, Boggs & Company	$ 5,000
E. Matthews	600
International Harvester Company	7,500
Gurney Tilden Company	300
International Harvester Company	15,000
D. Aitchison Company	700
Sawyer Massey Company	11,000
Laidlaw Bale Tie Company	200
E. T. Wright Company	11,000
Chipman Holton Company	8,000
Ludlam, Ainslie Company	1,500
Chadwick Brothers	600
City Corporation	8,500
Sanford Manufacturing Company	1,500
Otis-Fensom Elevator Company	4,000
Canada Preserving Company	1,200
Hamilton Cotton Mills	2,500
International Harvester Company	14,000
Canadian Westinghouse Company	35,000
Dominion Power & Transmission Company	200
Princess Underwear Limited	3,000
Linkert Brothers	200
International Harvester Company	45,000
International Harvester Company	65,000
Hamilton Rag & Metal Company	800
Laidlow Lithographing Company	4,100
Ontario Lamp & Lantern Company	2,500
Malcolm & Souter Furniture Company	1,500
Sawyer Massey Company, Limited	15,000
Wray & Nichols	8,000
International Harvester Company	6,000
Imperial Cocoa & Spice Company	700
Oliver Chilled Plow Works	65,000
Canadian Shovel & Tool Company	900
International Harvester Company	20,000
Oliver Chilled Plow Works	50,000
F. W. Bird & Son	1,500
J. R. Beckett	2,300
Canadian Westinghouse Company	22,000
Hamilton Bridge Works Company	10,000
Pure Milk Company	12,000
F. F. Dalley Company	20,000
Oliver Chilled Plow Works	45,000
Canadian Drawn Steel Company	300
Canadian Westinghouse Company	18,000
Canada Steel Goods Company	600
J. D. Patterson & Company	500
London Machine Tool Company	500
Otis-Fensom Elevator Company	300
Oliver Chilled Plow Works	30,000
Appleford Counter Check Book Company	10,000
B. Greening Wire Company, Limited	1,800
Oliver Chilled Plow Works	20,000
L. O. Buist	1,500
Gurney Tilden Company, Limited	1,500
Gurney Scale Company	3,500
Canada Steel Goods Company	10,000
Coppley Noyes & Randall	4,000
International Harvester Company	60,000
Chipman Holton Company	5,700
Ludlam Ainslie Company	12,000
Wagstaffe Limited	25,000
Dominion Power & Transmission Company	8,000
Total	$ 742,000

PLUMBING.

Since May 1, 1910, the plumbing installed in 661 buildings, has been inspected, and as far as can be learned the plumbing by-law seems to be giving satisfaction.

NEW BUILDINGS IN PROSPECT, 1911.

The Oliver Chilled Plow Works Company which has erected three of its twelve factory buildings during 1910, will build the other nine during the present year. These, with their equipment, are estimated to cost a million and a half dollars.

The Hamilton Bridge Works Company has acquired ten acres in the eastern district and will instal a plant thereon as an auxiliary to its present works.

The Diamond Flint Glass Company will build a modern factory in the eastern district for the manufacture of bottles, jars and canners' packages by automatic machinery.

The National Fireproofing Company will build its works on the north shore of Hamilton Bay, about three miles from the city. These works will be very extensive, and the only works of its kind in Canada.

The Imperial Bank will erect a $75,000 building.

The prospects are that a large amount of dwelling construction will be under way during the year. Much of this now being prepared by city architects is for dwellings of the better sort, ranging in value from $2,500 up to $5,000.

In addition to the above a contract for the building of a new office for the International Harvester Company was let on January 20, 1911, to George E. Mills, and this concludes the building program that was started by the Company last June. The new office building will cost $40,000 and will be 100 x 40 with a basement and two storys. The new office will be the last word in the way of office building construction, and will be a handsome addition to the great plant.

The program that was announced last June by the Company called for the erection of a series of buildings at a cost of nearly half a million dollars, and these are all completed with the exception of the new office. The Company through the erection of this series of buildings has added eight and one-third acres of floor space to the plant.

Brantford.—The value of new buildings erected in 1910 was $405,930, and of repairs carried out $275,100, making a total of $681,030. The number of permits issued for new buildings was 268 and for repairs 100. There were expended on new factories and factory extensions the sum of $248,450; on extensions to schools, $55,100; on new stores, $28,300; on alterations and additions to hotels, $17,100; on additions to churches, $10,000; on alterations to banks, $8,000. For new residences 210 permits were granted, a large quantity being for workingmen's houses averaging about $1,500 in value each. Prospects for 1911 are bright. In 1909, the aggregate for building operations was $439,335.

Guelph.—Fifty-five permits for new buildings, valued at $123,800 and three permits for repairs to cost $10,900, making a total aggregate of $143,900, were issued in 1910, compared with an aggregate for 1909 of $127,625. There were four factory extensions and a new factory built in 1910. The outlook for 1911 is very promising in every respect.

Berlin.—One hundred and thirty-eight permits for new buildings and repairs were issued of a total value of $349,906, compared with a value of $232,365 in 1909.

Waterloo.—Twenty-nine permits for new buildings and repairs amounting in value to $149,800 were issued in 1910, compared with an aggregate expenditure of $79,400 in 1909.

Galt.—Sixty-six permits valued at $150,000 were granted; in 1909 the expenditure on building operations was $172,500.

Preston.—In 1910, there were erected forty-six buildings valued at $155,000 and repairs valued at $5,000, or a total of $160,000 compared with a total expenditure of $85,950 in the previous year.

Elmira.—One new factory was erected and an addition made to another, and twelve new dwelling houses, totalling the sum of $69,900, as against a total of $33,200 in 1909.

Hespeler.—Seven new houses were built and expensive additions to three factories made, costing in all the sum of $88,300. No estimate of expenditure for building in 1909 was received.

The total sums expended in Berlin and district in building operations, during 1910, were as follows:—

Locality.	Aggregate Amount.
Berlin	$349,906
Waterloo	149,800
Preston	160,000
Galt	150,000
Hespeler	88,200
Elmira	69,900
	$967,806

Woodstock.—The building operations of the year were made up to $130,500 for new buildings and $23,200 for repairs, or a total of $153,700, compared wiht a total expenditure in 1909 of $165,300. The buildings were classified as follows:—

Two new schools	$ 44,000
Hydro-Electric transforming station	25,000
Three new factories (two not yet completed)	41,500
Private residences	20,000
Additions and repairs	23,200
Total	$153,700

There is no system of issuing building permits.

Stratford.—Sixty-three permits for new buildings, valued at $159,993 and ninety-six permits for repairs amounting to $27,101, or a total of $187,094, were issued in 1910, as against an aggregate total of $158,964 in 1909.

London.—In 1910, there were 882 permits covering an expenditure of $805,074, compared with an aggregate value of $850,134 in 1909.

St. Thomas.—One hundred and eight permits for new buildings to the value of $195,000 and sixteen permits for repairs valued at $7,000, making a total expenditure on building operations of $202,000, compared with a total of $261,600 in the year 1909.

Chatham.—Forty permits for new buildings, valued at $56,787 and nine permits for repairs amounting to $5,062, forming a total of $61,849, were issued in 1910, as against a total expenditure of $110,610 in the previous year. Among the classes of buildings erected were Malleable Manufacturing Company, $4,700; garage, $1,500; church, $4,000; Fruit Growers' Building, $5,000; one block of stores and hall, $12,000.

Windsor.—In 1910 there were issued in Windsor 237 permits for new buildings, and repairs aggregating $392,040 in value compared with a total in 1909 of $431,060.

The total sums expended in Windsor and district in building operations during 1910, were as follows:—

Windsor	$392,040
Michigan Central Station outside of city limits	70,000
Walkerville	250,000
Sandwich	150,000
Total for district	$862,040

Sault Ste. Marie.—Building operations valued at $386,000 were carried on in 1910, compared with an aggregate total of $48,000 in 1909.

Port Arthur.—The total building operations at Port Arthur for 1910 amounted to $1,062,616, as against an expenditure of $500,000 in 1909. The total expenditure in Port Arthur in 1910 for streets, paving, sewers and water works aggregated over $1,000,000.

Fort William.—There was a total expenditure of $2,381,125 on building during 1910, compared with a total of $2,970,365 in 1909.

Manitoba.

Winnipeg.—Building operations in Winnipeg during 1910 were on a very extensive scale as may be judged by the fact that 3,049 permits for new buildings valued at $14,569,500 and 890 permits for repairs amounting to $546,950, making a total expenditure of $15,116,450 were issued, as against a total expenditure in 1909 of $9,226,325, or an increase of nearly sixty-four per cent.

Brandon.—One hundred and forty-three permits for new buildings valued at $1,195,221, and ten permits for repairs approximating $29,164, or a total amount of $1,224,385, were issued in 1910, as against a total expenditure in building of $350,120 in 1909, an increase of 249.7 per cent.

Saskatchewan.

Regina.—Five hundred and seventy-three permits for new buildings, valued at $2,351,288 and 122 permits for repairs amounting to $65,000, or a total of

$2,416,288, were issued in 1910, compared with a total expenditure on building operations of $744,479 in 1909, an increase of 215.83 per cent. The class of buildings are as follows:—

47 business blocks and offices	$ 533,725
29 warehouses and factories	441,080
Public buildings (such as hospitals, market buildings, &c)	302,150
368 dwellings	1,270,455
122 removal of shacks, stables, &c	65,000

The prospects for the present year are very bright; it is anticipated by authoritative circles that the permits for 1911 will exceed $5,000,000.

Moose Jaw. — Building operations amounting to $1,116,690 were carried on in 1910, as against the sum of $1,007,500 in 1909. Municipal improvements during 1910, totalled $940,000 and Canadian Pacific Railway improvements, $300,000 making a grand total for the year of $2,326,690.

Saskatoon.—Four hundred and thirty-three permits for new buildings and repairs and alterations, valued at $2,817,771 were issued at Saskatoon. The aggregate amount for 1909 was $947,905, and for 1908, $115,625.

Prince Albert.—During 1910, building operations at Prince Albert totalled $662,475, compared with $141,810 in 1909, or an increase of 367.15 per cent.

Alberta.

Edmonton.—The sum of $2,161,356 was spent on building operations in 1910, compared with the sum of $2,128,161 in 1909.

Calgary.—Permits to the number of 1,499 for new buildings, &c., representing a total value of $5,589,594 were issued in 1910. The total value for the year previous was $2,420,450, showing an increase of 130.93 per cent. in the past year.

Medicine Hat.—The record for 1910 was 151 permits for buildings, valued at $427,140. The aggregate value in 1909 was $228,168.

The following table shows the extent of building operations of several localities in the Edmonton district:—

Locality.	1910		1909	
	No.	Value.	No.	Value.
Innisfail	....	$5,500	....	$20,000
Red Deer	35	77,770	....	50,000
Fort Saskatchewan	....	40,335	....	36,300
Strathcona	112	372,470	....	573,000
Daysland	....	8,500	....	75,300

Lethbridge.—Building operations in Lethbridge amounted to $1,211,310 in 1910 compared with a total of $1,268,215 in 1909,. In Lethbridge district the Town of Fort Macleod expended in building during 1910 the sum of $227,460 and Taber the sum of $100,000. These last two municipalities did not appear in the operations of 1909.

The City of Lethbridge purposes to make a outlay of some $600,000 during the year 1911. There is an agricultural Fair ground to lay out, contract for exhibition building let for $35,100; with some $70,000 to be spent on improvements.

The following is some of the estimates:

Street grading	$40,000
Sewer main extension	53,000
Cement sidewalks	42,000
Plank sidewalks	6,500
Water main extension	55,000
Total	$196,50

A gravity system of water supply under consideration and the cost o survey is, no doubt, included in propose outlay.

The assessment of the City has increased by nearly $2,000,000 for 1911.

The School Board Trustees have a proposition for a new Manual Training School house, costing $35,000. In regard to private buildings: the Dominion Building is going to be completed with a three storey addition. A four-storey building for a harness factory is spoken of. A public library is likely to be built, to cost $40,000.

Never in the history have the prospects been brighter than for 1911. A large sash and door factory of which the foundations were put in last fall will be completed. At the Lethbridge Collieries twelve double workmen's houses were

built in 1910, and a large tipple is now being built. At Diamond City ten double miners' houses were built (brick). Improved power house, and tipple to discharge coal into cars.

British Columbia.

Fernie.—The sum of $325,000 was spent on building operations during 1910, compared with the sum of $1,374,700 in 1909. The large decrease for 1910 is accounted for owing to the year 1909 being exceptionally active following the great fire of 1908.

Nelson.—Sixty permits covering an expenditure of $168,930 for building operations was the record for 1910, in addition to which the sum of $275,000 was expended on building in the vicinity of Nelson. In 1909, the aggregate value of buildings in Nelson was $175,000.

Vancouver.—Two thousand, two hundred and fifty building permits valued at $13,150,365 were issued in 1910. In 1909, the grand aggregate was $7,258,565, thus showing an increase for 1910 of 81.17 per cent. and placing Vancouver fourth among the cities of the Dominion for building activity.

Victoria and district.—The monthly figures for the year compared with those for the two preceding years are given below:

Month.	1910	1909	1908
January	$ 128,985	$ 78,080	$ 54,725
February	151,760	122,680	72,325
March	244,760	121,640	110,800
April	192,440	188,060	129,625
May	257,290	188,620	79,295
June	302,600	90,120	74,010
July	222,290	372,120	106,070
August	212,814	141,040	132,770
September	199,686	140,935	53,630
October	124,375	104,840	99,755
November	104,295	53,585	104,710
December	131,750	71,700	113,025
Total	2,373,045	1,673,420	1,130,740

General repairs estimated at $100,000 will bring the year's total to $2,373,045. With 125,000 for Oak Bay and $150,000 for the adjacent portions of Saanich and Esquimalt the grand total for Greater Victoria reached the handsome figure of $2,646,095.

The record for the past ten years, the number of permits issued and the value of the buildings erected, was as follows:

Year.	Permits.	Value.
1910	744	$2,373,045
1909	573	1,773,420
1908	568	1,314,740
1907	349	1,490,250
1906	140	699,300
1905	135	554,250
1904	146	607,154
1903	86	337,940
1902	91	370,300
1901	90	375,500
1900	69	363,580

Nanaimo.—Forty permits for new buildings, valued at $90,234 and for repairs amounting to $15,000, or a total of $105,234, were granted in 1910. No estimate was furnished for 1909.

Prince Rupert.—Building operations totalling $610,590 were carried on during 1910.

LABOUR ORGANIZATION IN CANADA, 1911.—NUMBER OF ORGANIZATIONS BY TRADES AND PROVINCES.

THE Department presents as an appendix to the present issue of the *Labour Gazette* the opening instalment of a directory of labour organizations in Canada, publication of which, it is expected, will be concluded in the present volume of the Gazette, ending with the June issue.

This directory contains a complete list of the labour organizations existing throughout Canada, as based on information in the possession of the Department of Labour, on March 31, 1910, The locality and name of each organization is given, together with the name of the secretary in each case.

The chief sources from which the information set forth in the directory was

derived were: the correspondents of the Department resident in the several cities of the Dominion, the public press of Canada, and the official trade journals issued by several of the international organizations, verification of details after the existence of the several organizations had become known to the Department having been obtained by correspondence direct with the officers of the organizations or with others in a position to supply authentic information.

Analysis of Returns.

In connection with the publication of the directory, it was thought by the Department that an analysis of the information which it contains would be of value as throwing additional light upon tendencies of labour organization in Canada at the present time. Such features as the relative extent of organization in the several trades, the distributions of organizations among different provinces and the more important cities of the Dominion, and the extent to which trade unions are affiliated with national and international central bodies, are of great interest and significance, but are not shown in aggregate statistical form in the directory as published. In the following article a statistical review is presented with the object of furnishing information in readily accessible form on these and other points of interest, including statements as to the number of congresses and national associations in Canada, with their respective affiliations; the number of trades and labour councils and federations of trade unions, according to provinces; the total number of trade unions chartered by national and international organizations; and a complete list of the various central international organizations having branches in Canada, the number of the latter being shown according to provinces and groups of trades affected.

Aggregate Returns.

The directory contains a total number of 1,859 labour organizations of all kinds, of which ten are congresses or national associations issuing charters, fifty are trades and labour councils, forty-eight are federations of trade unions, and 1,752 are trade unions or other local associations of employés.

Congresses and National Associations.

Broadly speaking, the labour organizations of Canada may be divided into: first, those which are affiliated with organizations of international scope; and, second those which are Canadian in their affiliations. A third group are entirely local.

Corresponding to the two main divisions above are two congresses of directly affiliated trade unions in Canada, namely, the Trades and Labour Congress of Canada and the Canadian Federation of Labour, the former of which has some 450 branches, all being either trades and labour councils, federations of allied trades, branches of international unions, or federal labour unions.

Next in order may be considered certain national associations of trade unions within Canada. These are, the Provincial Workmen's Association with twenty-one branches; the Federation of Textile Workers of Canada with twelve branches; la Fraternité Canadienne de Cordonniers with five branches, and the Canadian Granite Cutters with four branches. All of these are affiliated with but are not under charter from the Canadian Federation of Labour. The National Association of Marine Engineers, which has nine branches, and the Federated Association of Letter Carriers which has thirteen branches, though entirely Canadian in scope, are affiliated with the Trades and Labour Congress of Canada, which, though in general composed of international organizations admits these on the ground that international affiliation in these crafts is not feasible.

A national association unaffiliated with either congress is the Canadian Association of Masters and Mates, with four branches.

The Fishermen's Union of Nova Scotia has an affiliation of twenty-four local organizations or stations, and is unattached to any other organization.

Trades and Labour Councils.

The extent to which trades and labour councils, consisting in each case of representatives from organizations of different classes in the same locality, are in existence in the several provinces of the Dominion is shown in the following table:

TABLE SHOWING NUMBER OF TRADES AND LABOUR COUNCILS IN CANADA BY PROVINCES, 1910.

Province.	Number.
Nova Scotia	2
Prince Edward Island	1
New Brunswick	2
Quebec	6
Ontario	22
Manitoba	3
Alberta	4
Saskatchewan	3
British Columbia	7
Total	50

It will be seen that of a total of fifty trades and labour councils, twenty-two are in the Province of Ontario, seven in British Columbia, six in Quebec, four in Alberta, and three each in Manitoba and Saskatchewan.

Thirty-nine of the trades and labour councils are affiliated with the Trades and Labour Congress of Canada, and two with the Canadian Federation of Labour. The others are without charter.

Included in the thirty-nine holding charters from the Trades and Labour Congress are ten which also hold charters from the American Federation of Labour.

Federations of Trade Unions.

There were in March 1911 some forty-eight federations of trades unions of similar classes, of which twenty-three were made up of employés in the building trades, eight were federations of the metal trades, five of the printing and allied trades, three of clothing trades, two each of employés in the mining industry, among commercial telegraphers and in the railway service, and one each of employés in the fishing industry, in the wood-working trades, in the general transport trades, among barbers and among public employés. Twenty of these federations are in Ontario, seven in British Columbia, six in Quebec, three each in Manitoba and Alberta, two in Nova Scotia, and one each in New Brunswick and in Saskatchewan. Five are Dominion in character.

Trade Unions.

According to the information contained in the directory there are at present 1,752 trade unions or local organizations of employés in Canada. Of these 1,520 are affiliated with international organizations, and 232 are outside of such affiliation, being either connected with one or other of the Canadian central bodies above mentioned or being entirey local in character. The distribution of these by Provinces is as follows:—

Name of Province.	International Organizations.	Canadian or Local organizations.	Total
Nova Scotia	92	54	146
Prince Edw. Island	4	5	9
New Brunswick	64	15	79
Quebec	190	86	276
Ontario	654	50	704
Manitoba	103	1	104
Saskatchewan	74	..	74
Alberta	127	6	133
British Columbia	210	15	225
Yukon Territory	2	..	2
Total	1,520	232	1,752

Of 147 organizations in existence in Nova Scotia, twenty-eight are in Halifax and twelve in Sydney. In Prince Edward Island, seven out of a total of nine unions are in Charlottetown. St. John, N.B. has twenty-four, and Monction eighteen, of a total of seventy-nine organizations in New Brunswick. In Quebec Province, out of a total of 276 organizations, 117 are in Montreal and fifty in the City of Quebec. Ontario has a total of 704, of which 113 are in Toronto, fifty in Ottawa, forty-eight in Hamilton, and thirty-nine in London. Winnipeg contains sixty-nine of the 104 unions of Manitoba. In Saskatchewan, of a total of seventy-four unions, nineteen are in Saskatoon, sixteen in Moose Jaw, and fourteen in Regina. Of the 133 unions in Alberta, thirty-nine are in

Calgary, twenty-nine in Lethbridge, and twenty-one in Edmonton. In British Columbia there are 225 labour organizations, of which seventy-two are in Vancouver and thirty-six at Victoria. There are two organizations in the Yukon Territory, both in Dawson City.

Of the 1,752 local trade unions included in the directory, 1,520 above as stated are affiliated with central organizations of an international character.

In the following table a list is given of the various international organizations having branches in Canada, arranged according to industries and groups of trades, and showing the number of unions charered by each central organization in the several provinces of the Dominion:—

It will be seen that the largest number of international labour organizations existing in any one group of trades in Canada is in the railway service, in which there are 447. In the building trades the number is 328; in the metal, engineering and shipbuilding trades, 235; in the trades classified under the heading "miscellaneous," 109; in the printing and allied trades, 86; in the clothing trades, 77; in the mining industry, 70; in the food and tobacco preparation trades; 50; in general transport trades, 44; in general labour, 35, and in the woodworking trades 28.

The international organizations having over twenty-five chartered branches in Canada are as follows:—

Name of Union.	Number.
Brotherhood of Maintenance-of-Way Employés	119
United Brotherhood of Carpenters and Joiners	75
Brotherhood of Locomotive Firemen and Enginemen	73
Brotherhood of Railway Trainmen	72
Brotherhood of Locomotive Engineers	71
Bricklayers and Masons' Inter. Union	61
International Brotherhood of Machinists	48
International Typographical Union	47
Order of Railway Conductors	45
Brotherhood of Railway Carmen	45
United Mineworkers of America	43
Journeymen Tailors of America	38
Amalgamated Society of Carpenters and Joiners	36
Iron Moulders' Union of North America	32
Journeymen Barbers' Union	31
United Association of Plumbers and Steamfitters	30
Journeymen Stonecutters' Association	30
Brotherhood of Boilermakers and Iron Ship-builders	29
Brotherhood of Painters, Decorators and Paperhangers of America	27
International Brotherhood of Electrical Workers of America	26

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF MARCH, 1911.

DURING the month of March one application for the establishment of a Board of Conciliation and Investigation was received, as follows:—

On behalf of the commercial telegraphers employed by the Great North Western Telegraph Company of Canada, the dispute affecting, it was stated, 200 employés directly and 1,000 indirectly.

Report Received.

During the month of March reports were received in the case of three disputes, as follows:—

1. In the dispute between the Canadian Pacific Railway Company and its maintenance-of-way employés. In this case a minority report was also received, bearing the signature of Mr. F. H. McGuigan.

2. In the dispute between the Canadian Northern Railway Company and its maintenance-of-way employés. In this case a minority report was also received, bearing the signature of Mr. F. H. McGuigan.

3. In the dispute between the North Atlantic Collieries Company, Limited, of Port Morien, N.S., and its employés.

Other Proceedings Under the Act.

In the application of the commercial telegraphers employed by the Great North Western Telegraph Company of Canada for the establishment of a Board of Conciliation and Investigation it was stated that the dispute related to the alleged dismissal of a number of employés, members of the Commercial Telegraphers' Union of America, also to rates of pay and conditions of employment. The number of employés concerned in this dispute was given as 200 directly and 1,100 indirectly.

A Board of Conciliation and Investigation was established by the Minister of Labour on March 20, 1911, and was constituted as follows: Mr. Frederick H. Markey, K.C., of Montreal, Que., member appointed on the recommendation of the Company; Mr. D. Campbell, of Toronto, Ont., member appointed on the recommendation of the employés

concerned; and the Honourable Mr. Justice Teetzel, of Toronto, Ont., Chairman, appointed by the Minister on the recommendation of the foregoing members of the Board. The Department was informed that the Board would meet on April 5.

Dispute at Wettlauffer Lorrain Silver Mines.

The following letter has been received in the Department from Mr. John Seward, Manager of the Wettlaufer Lorrain Silver Mines, Limited, with respect to the report of the Board of Conciliation and Investigation which inquired into certain matters in dispute between the above mentioned Company and its employés. The report of the Board in this matter was published in the March number of the *Labour Gazette*.[1]

Kerr Lake Mining Company, Limited.

Cobalt, Ont., March 31, 1911.

F. A. Acland, Esq.,
Deputy-Minister of Labour,
Ottawa, Ont.

Dear Sir,—

Replying to your letter of the twenty-seventh instant, in reference to Wettlaufer labour dispute. The Wettlaufer Lorrain Silver Mines, Limited, are satisfied with the recommendations of the Board of Conciliation, that the wage scale at the property continue the same as it was before the proposed cut. The Wettlaufer Company are not satisfied, however, with the way a certain part of the report of the Board of Conciliation is worded, namely the bottom of page 1 and the top of page 2, reading: "and submitted evidence which showed that the net result to the employés would be to their advantage, and a net loss to the Company, although the Company alleged that the change from the present scale of wages to the one proposed by them was done to operate the mine on more economic lines. Upon analysing the losses and gains both ways, it was learned that the Company would be the losers by the proposed change."

The Wettlaufer Company feel that this part of the report is most unfair to them and object to its publication. If the Board of Conciliation had followed up their questioning along these lines it would have developed that the condition they found of present loss to the Company would be only temporary, owing to the fact that most of the underground work is done by contract at present, and that as soon as mining were done by day's pay the Company would gain materially by the proposed reduction in wage scale. To make this clear the Company proposed a reduction of 15 cents per day per man, and a corresponding reduction in the boarding house rate of 5 cents per day per man. The result would be a net gain to the Company of 10 cents per day per man on most of the men employed. However, owing to the fact that at the moment most of the underground work is done by contract, few men were affected by the cut in wages, while most of them benefitted by the reduction in the boarding house rate.

The Board of Conciliation made their deductions on the present temporary condition *re* boarding house and contract work, and thereby place the Wettlaufer in an entirely wrong light in the matter. If the Board will amend their report according to these corrections the Wettlaufer Company would be glad to accept it in its entirety, and as satisfactory in every way.

Respectfully yours,

(*Signed*) John Seward,
Manager,
Wettlaufer Lorrain Silver Mines, Limited.

I. REPORT OF BOARD IN DISPUTE BETWEEN THE CANADIAN PACIFIC RAILWAY COMPANY AND ITS MAINTENANCE-OF-WAY EMPLOYES.

THE Minister of Labour received, on March 1, the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Canadian Pacific Railway Company and its maintenance-of-way employés. A minority report was also received in this matter, on March 4, from the representative of the Company.

In the application for the establishment of this Board it was stated that the dispute in question related to a demand on the part of the employés concerned for an increase in the wage rates and a revision of the existing schedule of rules. The number of employés affected by the dispute was given as 4,000.

The Board which was appointed to investigate this dispute was composed as follows:—Messrs. F. H. McGuigan, of Toronto, Ont., and W. T. J. Lee, of Toronto, Ont., members appointed on the recommendation of the Company and of the employés respectively, and His Honour Judge D. McGibbon, of Brampton, Ont., Chairman, appointed by the Minister of Labour in the absence of any joint recommendation from the foregoing members of the Board. Sittings were held at Toronto, Winnipeg, and Montreal, continuing from September 24, 1910, until February 9, 1911.

The majority report was signed by the Chairman and Mr. W. T. J. Lee, representing the employés concerned. A schedule of rules and rates of pay was submitted which they believed would be fair as between the contending parties. This schedule was to take effect from December 1, 1910, and was not to be changed unless upon sixty days' notice by either party, to be given between May 1 and November 1 in any year.

The minority report bore the signature of Mr. F. H. McGuigan, the representative of the Company. A schedule of rules and rates of pay recommended by Mr. McGuigan was also attached. In his report Mr. McGuigan gave his reasons for not agreeing with the other members of the Board, and also endeavoured to show that the claims of the employés were unfounded. A comparative table was furnished, showing the average rates of pay on the railways of Canada and those of the United States while Mr. McGuigan maintained that the maintenance-of-way employés were better paid in Canada than in the United States.

On March 4, the Department was informed of the acceptance by the employés of the majority report, and in a communication from the Canadian Pacific Railway Company, under date of March 30, it was stated that "the majority report will be accepted by this Company in so far as it affects employés upon its lines in Canada."

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:

HON. W. L. MACKENZIE KING, C.M.G.,

Minister of Labour,
OTTAWA.

In the matter of a dispute between the Canadian Pacific Railway Company and its permanent Maintenance-of-Way employés.

The undersigned members, a majority of the Board of Conciliation appointed under the Act in this matter, have the honour to report as follows:—

The Board met at Toronto, on the 24th and 27th days of September, 1910, and adjourned its sittings to Winnipeg where it met on the 5th and 6th days of October, 1910, and at Toronto on the 22nd and 26th days of October, 1910, and on the 16th day of November, and at Montreal on the 4th, 5th, 6th, 7th and 8th days of December, 1910, and at Toronto on the 10th, 11th, 12th, 16th, 24th and 26th days of January and on the 1st, 8th and

9th days of February, 1911. The men were represented on the Board by Mr. A. B. Lowe of St. Louis; Mr. Henry Irwin, of Portage la Prairie, Mr. Wm. Dorey of Woodstock, N.B., Mr. A. E. Barker of Portage la Prairie and Mr. F. J. Fljozdal, Warroad, Minn., and the Company by Mr. James Leonard, Montreal; Mr. Gutelius, North Bay, and Messrs. Bury and Arundel of Winnipeg.

A great amount of the time of the Board was taken up in the hearing of the evidence tendered by the employés upon the conditions under which they were working, the costs of living, &c., and by the Company's representatives upon the rates of pay submitted by them in force upon other roads, especially upon roads in Western Canada contiguous to the Company's lines of Railway. After giving due consideration to all the evidence submitted by the parties to the dispute, the undersigned members of the Board would recommend to the Company and the employés the schedule of conditions and rates of pay hereunto annexed as written, believing that these conditions and rates of pay, if placed in operation by the Company and submitted to by the men would be fair as between the contending parties as a settlement of the dispute.

When additional positions of a like class are created by the Company, compensation is to be fixed in conformity with that of similar positions as shown in this schedule.

The undersigned members of the Board are of the opinion that notwithstanding that the application for a Board to you was made in or about the month of August last, that this schedule and conditions hereto annexed should commence and have effect as of the 1st day of December, 1910, and if accepted by the parties, should not be changed unless upon sixty days' notice by either party to be given between the 1st day of May and the 1st day of November in any year. These rules and conditions are not intended to take away any privileges that are now in effect with the employés.

We beg to thank the officers of the Company and the Representatives of the men for their courtesy and consideration during the sittings of the Board, all of which is respectfully submitted.

Dated at Toronto this 15th day of February, 1911.

(Sgd.) D. McGibbon,
Chairman.

(Sgd.) W. T. J. Lee,
For Employés.

SCHEDULE OF RULES AND RATES GOVERNING THE SERVICE OF MAINTENANCE-OF-WAY EMPLOYES ON THE CANADIAN PACIFIC RAILWAY.

Effective December 1, 1910.
